KITCHEN PLANNING EXPERTS SAY THIS BUILT-IN IS A MUST IN EVERY HOME...

Your WIFE can prove it!

Editors of all the leading national women's magazines have praised the NuTone Food Center... as the most exciting appliance in 30 years!

Now... a remarkable Meat Grinder has been added... creating a sensation wherever it has been on display.

We want your wife to see how useful

it is in her daily food preparation. We want you to discover its terrific "woman appeal"... as a sales clincher for every new kitchen you're planning. That's why we are making this 60-day offer to all Builders and Architects.

If you would like to have one of these units at below cost for your own home, please write for complete information.

U. S. & Foreign Patents Pending.

OAK FLOORING

**Lockwood
OAK FLOORING**

Lockwood Oak Flooring has the Nail Groove, a great time-saver because it positions the nail and provides seat for nail head.

Lockwood's exclusive Splinter Clipper eliminates annoying chip or spur... makes laying faster, easier and more economical!

Thanks to Snap Side Match design, Cloud's Lockwood Oak Flooring lays up readily, with final match firm and squeak-free.

Cloud's compartment, fan-type Kiln Drying helps produce oak flooring of permanent uniformity and Cloud's Precision Milling holds sanding to a minimum.

It's a careless set of specifications that casually call for "oak flooring" in a new home to be!

Those "specs" should specify!

Cloud's Lockwood Oak Flooring is designed to save you builders plenty in labor costs.

This engineered oak flooring goes down faster, and neither shrinks nor warps nor buckles under normal conditions.

You get easier, more economical installation... and just as important, never a kickback!

Moreover, the beauty of Cloud's Lockwood Oak Flooring is a real sales-clincher. No other oak flooring equals Lockwood for gracious charm and warm, inviting hospitality.

Check the important Lockwood features at left.

And remember, there's a grade for every need, each produced in accordance with N.O.F.M.A. standards.

CLOUD OAK FLOORING CO.

SPRINGFIELD, MISSOURI

QUICKER, EASIER
and all ways better
FOR ALL SLIDING DOORS

600 SERIES

FIRST and only packaged sets with all these better features

- Aluminum track with built-in fascia . . . etched and anodized. Fits standard head jamb. 1 1/4" headroom. Doors can be hung after hangers are attached.
- Twin nylon wheels with oiled-for-life bronze bearings.
- Steel hangers with angle-slotted screw holes for easier plumbing of doors.
- Door stop limits sliding action of doors to prevent pinching fingers.
- Nylon and steel door guide installed easily with just two screws.

700 SERIES

Similar to 600 Series except track does not have built-in fascia or anodized finish

- Aluminum track . . . fits standard head jamb. 1 1/2" headroom. Doors can be hung after hangers are attached.
- Twin or single 1" nylon wheels with oiled-for-life bronze bearings.
- Steel hangers with angle-slotted screw holes for easier plumbing of doors.
- Door stop limits sliding action of doors to prevent pinching fingers.
- Nylon and steel door guide installed easily with just two screws.

NEW! "THRIFTEE PAK" SET

FIRST and only set for BOTH 3/4" or 1-3/8" doors with all these features

- Aluminum track, 1 1/4" headroom. Doors can be hung with hangers attached.
- Big 1" nylon wheels. One piece, husky steel hangers with slotted screw hole for easier plumbing of doors.
- Nylon and steel door guide uses two screws.

The Opportunity Page

(Keynote page of the AMERICAN BUILDER, which is opportunity cover to cover, advertising and editorial)

Those extras count

It's becoming more and more evident that today's buyers—especially in large subdivisions—want "extras." At Glasgow Village in the St. Louis area, builder C. T. Wilson installed playground equipment and sponsored a number of ball teams. Other builders left wooded areas for picnic grounds and at least one helped residents install their own swimming pool. Under the sponsorship of builders, community improvement associations were set up to pick up where builders left off.

Tell 'em to sell 'em

Merchandising is the key to the 1957 home-building market. That's the word from two men associated with the industry in diverse fields. Says A. C. Findlay, executive of the Ohio Savings & Loan League: "If home builders practice good merchandising, sell closer to their costs and build homes acceptable to the present needs of buyers, we will be in shape to finance them." Agreeing is E. F. Walsh, promotion director for Structural Clay Products Institute, who urges the use of lawn signs, advertising reprints and book matches to help builders sell brick homes. Advertising is increasingly important in today's tight market. To learn what other builders are doing, see AB's survey feature on page 17.

A much-needed service

Taking a page from the medical profession, HBA of Metropolitan Pittsburgh has established a "land bank" as a service to builders, developers and realtors. All property owners who want to sell their holdings—whether large or small—can notify the association which passes on the information to interested builders. There is no charge for the service which, according to HBA presi-

dent C. D. Crawford, may serve to "pull together" pieces of property which are unknown to builders and would make good home sites.

Local market conditions

It's always a good idea to be familiar with local statistics before planning your operations. A good way to learn what's happening in your area would be to get a copy of the "75 Housing Areas 1956 Annual Summary," published by Housing Securities Inc., 250 Park Ave., New York, N.Y. The book, which features selected data on housing, population, economic indicators and mortgage activity, will help you evaluate the housing markets in which you're interested. Cost: \$7.50.

After-dark opportunity

With the "fair weather" seasons approaching, builders might consider night openings for their model homes. Many families "take to the road" for an after-dinner ride, especially if crowded roads keep them home on weekends. This idea met with good success on Long Island, N.Y., last year where the builders of Harbor Hill reported that "open hours" until 11:00 P.M. one night each week drew record crowds.

Who are your buyers?

When determining what kind of homes to build, you'd be wise to consider what families are in a buying mood. A recent survey by the University of Michigan's research center showed that families in the above-\$5,000-a-year bracket were far more inclined to buy than those in the under \$3,000 range. This is good news since more than 40% of all families are included in the \$5,000 and over group. The survey also revealed that intentions to buy homes have increased recently.

a new basic tool for
profitable homebuilding

A misplaced decimal in an estimate can often mean the difference between profit and loss...consequently a figuring machine that will render fast, reliable calculations has become as vital to the home-builder as any other tool he employs. The REMINGTON RAND® Model 99 Calculator That Prints is that sort of Calculator. Printed proof on easy to understand SIMPLA-TAPE means that you can rely on figures as being accurate and rest assured that your estimates aren't getting you in trouble.

On the job from start to finish, the Calculator That Prints is equally valuable to the builder for computing payrolls, extension of bills, tax accounting and all the other figure work that goes with homebuilding.

For illustrated case history that shows further how the Calculator That Prints is aiding the contractor, write for case history CH974. Room 1459, Remington Rand, 315 Fourth Avenue, New York 10.

In April McCall's . . .

NEW PRE-FAB HOME

Typical of the new ideas for better living in McCall's is the full-color article in the April issue on the three-bedroom pre-fabricated "Sweetbriar" model developed by National Homes as a result of last year's women's conference on housing in Washington.

IN ADDITION, the article lists 70 builder-dealers who are featuring the Sweetbriar. Each of these dealers is being supplied with special merchandising material to assist them in local tie-ins with the McCall's feature.

Women... and the trend to better living

HOW McCALL'S, THE MAGAZINE OF TOGETHERNESS, CREATES NEW MARKETING OPPORTUNITIES FOR MANUFACTURERS OF ALL PRODUCTS FOR THE HOME

Today, business is more than ever aware of the new role the American woman plays in influencing home building and the sale of furnishings and home equipment.

Naturally, the woman has always had a vital interest in the home. But today she takes on *greater responsibility than ever in inspiring the actual buying decisions* that involve her family's comfort and enjoyment. The much-publicized housing forum held by the U.S. Housing Administration last year pointed up the importance of women in home-selection and home building as no other single event in recent years.

The woman and her family are living better today than at any time in American history. They have more money to spend—and they are spending it on their homes. They have more leisure time today, too, in which to enjoy their homes. McCall's, by reflecting this changed attitude toward home life through its well-known *Together*ness concept of editing, is creating new marketing opportunities for all manufacturers of products for the home.

Each issue of McCall's is a colorful shopping center of ideas and information on everything pertaining to *better living* for women and their families. Through outstanding editorial features, illustrated in full color, McCall's helps to introduce new products, and create new uses and new customers for established products in the home furnishings, home building, home equipment and home improvement fields.

For your copy of McCall's Home Improvement Pocket Letter, write Dept. AH, McCall's, 230 Park Ave., New York 17, N. Y.

New York 7, N. Y.

"A Real Service" "A Great Help"

Sirs: Your February issue on "prefabrication" is a spellbinder and I am sure that it will remain on the top of builders' desks all over the country. I like the comprehensiveness of your story and feel that you have done a real service to the building industry in exposing your readers to the latest developments in this fast growing field.

We have numerous requests throughout the year for information on prefabrication and would like to include a copy of your February issue with the material which we send out in reply to such queries. . . . Please extend the congratulations of PHMI to the members of your staff who worked on this issue.

—Conrad "Pat" Harness, Executive Vice-President, Prefabricated Home Manufacturers Institute, Washington, D. C.

Sirs: Your current issue, as well as articles in several previous issues, have certainly been a great help to us in fabrication in presenting to the builders the advantages offered by this industry.

—James T. Cochrane, Franklin Homes, Inc., Franklin, Mass.

Sirs: I really enjoyed reading your February issue and its fine editorial on "Prefab is finding its place" and wish to express our thanks for the fine cooperation given us during the past year.

Much to our dismay, however, we are not listed in the section entitled "Prefab catalogs." As you know, American Houses is one of the oldest prefabricators in the industry. . . . We offer a wide range of models with a turnkey

price of approximately \$7-to over \$50,000 depending on location.

—John C. Pollock, Advertising Manager, American Houses, Allentown, Pa.

From Another Section of Our Industry

Sirs: I have intended writing you from day to day to tell you how much I appreciate the wonderful job you did in the February issue with the component story as well as the Lu-Re-Co split-level that is the Weldwood House in Chicago. Once again, you did a beautiful job, and if there is anything I can do at any time to help you with some of your problems, let me know.

—Raymon H. Harrell, Research Director, Lumber Dealers Research Council, Washington.

Just help us keep posted on how lumber dealers are taking advantage of the Lu-Re-Co idea.

Best's Mid-American to Mid-Asia

Sirs: I have just seen the December issue of the American Builder. Your feature about the 28 selected houses was extremely informative and interesting. The house made by W. G. Best & Co., which has received the Special Merit Award in the Mid American Jubilees, has fascinated me very much. I am about to get a house built for myself and would like to have it built exactly like the house mentioned above. Therefore if you can, please send me its plan and all the other necessary information which I would need. Please also if possible, send colour photographs of interior decoration and colour schemes. I shall feel highly obliged.

—Azhar ullah Kirmani, Karachi, Pakistan.

Letter forwarded to Mr. Best (with postage stamp removed).

"Aren't you jumping the gun a bit, Schultz?"
 (By Virgil Partch—Courtesy Pomona Tile Mfg. Co.)

Insulation can be a White Elephant

It can clutter up a building site.

And if it rains before the building's up...!

A 10' x 15' shack holds about a MILLION Sq. Ft. multiple aluminum insulation. Some bulkier insulations need 131 times the storage space.

Storage space at congested building sites is so scanty, that bulky materials must sometimes be left exposed to the weather, even to rain.

Pilferage and congestion cause expensive delays and become annoying problems. With compact, scientific multiple aluminum insulation, a few small 2 cu. ft. cartons, each holding 1000 sq. ft., tucked in a corner of a shed or tool bin, occupy negligible space. They can be taken to the job in the trunk compartment of a passenger car, or carried on a bus. One man can unload a passenger auto holding 10,000 sq. ft., in minutes. But it would take a crew HOURS to unload a freight car holding that much bulky insulation (about 250 bundles).

Light, clean and easy to handle, the average experienced applicator can install about 2,000 sq. ft. of multiple aluminum per day.

RESISTS HEAT AND VAPOR FLOW

Most important is PERFORMANCE: resistance to heat flow winter and summer; resistance to vapor flow and condensation formation which cause peeling paint, stained and crumbling plaster, rotting timber; and the loss of 1060 Btu's of latent heat with each pound of escaping vapor.

Metallic vapor barriers bar excessive passage of vapor from the warm side of walls and ceilings to colder spaces and surfaces, where it often condenses. (Cold air can hold less vapor in suspension than can warm air.) Water, from leaks and from soaking by driven rain, also gets in and evaporates; often recondenses.

Water vapor is a gas with about 1-millionth the density of water at 0°F. The invisible pores and apertures in many seemingly "solid" building materials are wide open spaces for the flow of vapor. Some materials may be waterproof and not vapor-proof. Being *metallic*, aluminum has almost zero permeability to vapor. Com-

pared to outer walls and roofs, it has much less permeability than the ratio (1 to 5) required for efficient outward flow of vapor.

Aluminum has 97% reflectivity for Radiation, only 3% emissivity and absorptivity; and retards outer and inner Convection. Air spaces have low density, slight conduction.

Obtain **MAXIMUM** protection against heat loss and condensation with tough, *uniform-depth*, joist to joist multiple aluminum. It is continuous, up to 750 ft. long, without "breaks" every few feet.

What are the causes of condensation? How can you control it? The National Bureau of Standards brochure: "Moisture Condensation in Building Walls," helps you with these problems. (Use the coupon for free copy.)

THERMAL VALUES

Infra Type 4 Parallel Insulation

Up-Heat C .105°=3 1/8" non-metallic insulation†

Wall-Heat C .068°=4 3/4" non-metallic insulation†

Down-Heat C .042°=7 7/8" non-metallic insulation†

*Determined by method of National Bureau of Standards in H.H.F.A. Research Paper 32.

†Calculated on basis of limiting thermal values cited in Fed. Specs. LLL-1-321b; HH-1-585; HH-1-521c; HH-1-551a.

Cost installed between wood joists, material and labor, about 8¢ sq. ft.

The Building Outlook

SMALL TALK

COST CUTTING POSSIBLE

New techniques in home building may be the answer to spiraling costs. One stumbling block, says John K. White, American Houses, Allentown, Pa., is the lack of coordination between architects who design the homes and engineers who design the heating, plumbing and wiring systems that go into them.

WINTER WONDERLAND

You'll soon be able to tell your buyers they can toss away that old snow shovel. A snow melting system consisting of pipe coils can now be built into walks and driveways. Whenever snow falls, a switch is thrown and hot water circulating through the coils will warm the pavement, thereby melting the snow. Tests by the University of Illinois show that it costs only about 6 cents an hour to run the system—cheaper than hiring a boy to do it.

THE RIGHT APPEAL

Whom are you building for? These four categories of home buyers, supplied by Pittsburgh builder Stanley Edge, are a top-notch guide: Rose-covered cottage variety—people with children who want a quiet atmosphere; minimum shelter buyers—people who spend more for food, clothing, etc., than homes need small down-payment terms; fun and frolic group—these include the majority of modern suburbia and need large subdivisions with swimming pools, parks, clubs, etc.; and snob appeal home-seekers—location is of prime importance.

WILL HOUSING LAW CHANGES proposed by the Administration (and under consideration by Congress as AB went to press) do enough for the industry? One significant change would reduce down-payment requirements on FHA mortgages in July 1958—or possibly much sooner if conditions warrant. The new scheme asks for these legal minimums: On the first \$10,000 of appraised value, a 4% down-payment; on values between \$10,000 and \$16,000, a 15% down-payment; anything above \$16,000 would call for a 30% down-payment. No change was asked in the legal limit of 30 years repayment terms for government-backed loans. If the proposals are adopted, here's how they will work on the sale of a new \$16,000 house: The buyer would need \$1,300 for a down-payment, quite a drop from the \$2,500 required under present terms. But, under the new setup,

WHAT WILL HAPPEN TO VA LOANS? No mention was made of the current 2% VA minimum down-payment requirement. However, if the Administration's proposals are adopted it would mean veterans would have to pay at least 4% down when the World War II program expires in July 1958. In effect, the proposals would allow FHA to absorb the GI program, but veterans would have to make higher down-payments. On the same \$16,000 house described above, current VA regulations call for \$320 down. However,

SHOULD DOWN-PAYMENTS BE EVEN LOWER?

George S. Goodyear, NAHB's president, says they should and also urged that FNMA's special assistance fund be increased by \$2 billion "to provide emergency relief in geographical areas and in price ranges where mortgage credit is not now available." But,

HOW LONG WILL BUILDERS HAVE TO WAIT before Congress acts? There's a great deal of debate ahead. Robert Tharpe, legislative director, Mortgage Bankers Assn. of America, says the recommendation (by Goodyear) would "enormously increase the demand for Federal funds for home mortgages." Spokesmen for the American Bankers Assn. and the U. S. Savings & Loan League also testified that expanded federal housing programs would only inflate construction costs.

entirely new and wonderful way to enclose bathtubs and shower stalls

New Folding Tub-Master Slides Smoothly, Quietly for luxurious showering. Translucent doors let in plenty of light, keep out drafts. The bar that fastens enclosure forms a handy towel rack.

sliding folding tub-shower doors!

Tub-Master is Made With High-Impact Plastic. Can't shatter or splinter... has no sharp corners to cut or scratch. Panels fit snugly into polished aluminum frame; won't warp or deteriorate.

Tub-Master Folds Back and Stays Out Of The Way for bathing children or washing bathtub. By-passes for easy entrance to tub; closes completely for shower. Dries immediately. Cleans like a breeze.

The New Door for Shower Stalls safe, easily cleaned and permanently beautiful.

Cleaner than a shower curtain • Safer than glass • Lovelier than either!

Now—a really exciting innovation to increase the saleability of your houses—the most convenient shower enclosures ever made! MODERNFOLD's new "Tub-Master" has every desirable feature that homebuyers want in custom-made shower enclosures; eliminates everything they don't want. (These photos just start the list!) And there's absolutely nothing else like it for glamorizing your bathrooms!

"Tub-Master" comes in beautiful decorator colors that go clear through—won't fade, mildew, chip, flake or peel. It increases the value of the homes you

build...helps merchandise them. Call a MODERNFOLD Distributor; he's listed under "Doors" in the classified directory.

Pulse of Building

Interpretations: 1

Conflicting trends are evident in the industry. On one hand, Feb. showed the most serious weakness in housing activity since the general downtrend began late in 1955. (Seasonally adjusted rate fell below 1,000,000 for the first time since Dec., 1951.) On the other hand, total construction of all types set a new national high of \$2.9 billion, 3% ahead of last year. Housing demand remained substantial, as measured by vacancy rates.

FAILING TO RISE SEASONALLY, February starts stayed at the Jan. level of 65,000 (13,000 below Feb., 1956). This indicated a seasonally adjusted annual rate of 940,000, lowest since Spring, 1949.

15 LEADING HOME BUILDING AREAS

Dwelling units built in Metropolitan areas during the first eleven months of 1956. (BLS)

	Units Built	% Change Jan.-Nov. 1955-56
Los Angeles	84,018	-14
New York	72,587	-21
Chicago	48,384	-16
Detroit	30,101	-22
San Francisco	20,861	-32
Miami	15,965	+ 3
Washington	15,943	-26
San Diego	12,152	+14
Cleveland	11,731	-23
Baltimore	10,767	-25
Buffalo	9,450	-10
Boston	9,411	-13
Atlanta	9,042	-18
Denver	8,587	-31
Milwaukee	7,935	+ 2

2

A NINTH CONSECUTIVE MONTHLY RISE in hourly earnings brought them 6% above the January, 1956, figures. Unchanged in February, material prices were only 1% higher than a year earlier.

3

RECORD FEBRUARY OUTLAYS for total new construction showed a gain of 3% over 1956. There was a 9% increase over last year in public construction. Private spending, excepting housing, was up.

Tomorrow's House

ALUMINUM: an auditorium today . . . your house tomorrow

You'd have a tough time convincing a client that he should live in an aluminum igloo; yet the structure shown above may be a preview of just exactly that. It is an auditorium seating 1,800 people, built in the Hawaiian Village, Hawaii. The Kaiser Aluminum and Chemical Corp. designed the auditorium, and also made the panels which serve as both the skeleton and the skin.

The basic aluminum panels are diamond shaped and bowed, with a strut across the center. This gives them great rigidity; the finished

dome spans 145 feet, is 50 feet high, and will handle loads of better than 100 lbs. per square foot.

The completed dome rests on 25 concrete piers spaced around the perimeter. Provision is made at the intersection of piers and panels to accommodate a 3-inch expansion.

Stressed-skin construction, with its minimum use of structural members, has so far been confined in the housing industry, to plywood. Now it seems that aluminum, with its high strength-weight ratio, is serving notice that it's ready to come into its own.

DOMES IS BUILT around a 96-foot steel tower, shown at the right. A row of panels is bolted on, the entire structure is raised a few feet, and another row goes on. When job is finished, the tower is removed.

With walls and ceilings heat-proofed with Alfol Aluminum Foil Insulation, these spacious Dallas homes derive "5-ton" performance from 3-ton cooling units. Builder-designer is David Tips, Dallas.

Cost of Air Conditioning these homes cut \$400 each with Alfol Insulation!

By boosting air conditioning efficiency with Alfol Aluminum Foil Insulation, Dallas builder David Tips gives his customers year-round comfort in a home they can afford.

Cooling load cut

"Our homes," writes builder Tips, "are big even for Texas. But with Alfol Insulation in walls and ceiling, our air conditioning needs are met *with capacity to spare* by a 3-ton cooling unit. Having originally priced the 5-ton size, we figure Alfol saves us roughly \$400 per house!"

A designer as well as builder, Mr. Tips knows that Alfol is better for him, better for the customer. Its superior year-round efficiency, along with its protection against condensation, makes for better construction all around.

Ideal for air conditioning, Alfol minimizes tonnage requirements . . . insures low cost operation. Even by itself, Alfol makes a difference your prospects can feel.

Free data book: Why not investigate Alfol for your next job. For comprehensive information as to efficiency, application, availability and cost, send today for your free copy of the new 24-page Alfol data book.

Ease of Alfol installation means extra savings for you

Installation of the Alfol Blanket is fast, positive, virtually fool-proof. All you do is staple the flanges—the aluminum foil layers expand automatically. The result: Alfol Insulation installs at speeds up to 3,500 sq. ft. per man per day! Whether you install your own insulation or buy it contractor-applied, the extra Alfol speed means extra savings for you.

GOING TO PRESS

HOW TO SPEND PROMOTION \$\$\$

Which ad media pay off in sales?

NEWSPAPERS
give widest coverage of our market.—Phoenix.

TELEVISION AND RADIO
ads are advisable in this area.—Albuquerque.

PAINTED SIGNS
on job site work best for us here.—St. Petersburg.

HANDBILLS
are going to be our number one merchandiser.—Wichita.

What kind of advertising pays off best for builders? In today's tight market, the printed word still reigns as king in attracting buyers to new homes. That's the consensus of builders surveyed by AB at press time.

Although almost all of them stated that other media also have their place in any good merchandising program, the majority of those replying agreed: What is read in newspapers registers more than what is heard on a radio, or fleetingly seen on a TV screen or read on a billboard while driving along a crowded highway.

Supporting this belief are figures such as those cited by Ralph E. Bruno of Harmony Builders, Inc., Albany, N. Y., who favors display and classified newspaper advertising, but also tried out radio and television. The company conducted a test check of visitors at its model home to find out what medium had brought them out. It was "ten to one in favor of newspapers." At the time the test check was made, ten TV spot announcements and 50 radio commercials had been run during a one-week period.

"Newspapers reach more people with a longer-lasting effect." It sounds like the same answer, but it isn't. That's the reply from J. Robert Norman, Aurora Development Co., New Orleans, who also feels that television, radio and handbills are important. But, he adds, "best of all, of course, is free word of mouth."

And, from Denver a builder wired: "We find newspaper display ads most effective per dollar spent and are reducing our TV and radio advertising from 40 per cent to 15 per cent of our merchandising budget."

Lee P. Campau, Jr., president, Terra Development Corp., Clayton, Mo., goes along with this: "Newspaper rates in this area are considered high. But even so, I feel that newspaper advertising, generally speaking, in our line is still the best. It reaches more people."

Other builders who agree that newspaper ads are their top method of merchandising:

Forrest Cox Home Builders Inc., Phoenix, Ariz.: "Prefer local newspaper classified section because of wide coverage of our market."

George W. Walters, Horizon Homes, Inc., Albuquerque, N. Mex.: "We have used all media and find newspaper and radio to be most effective in this area."

Richard S. Millhollen, Eugene, Ore.: "Favor advertising by newspaper display and classified." Millhollen finds telephone

Survey continued on next page ▶

SURVEY, continued

classified yellow pages give good coverage for least expenditure and believes some TV and radio advertising is advisable.

Wood McArthur, Little Rock, Ark.: "I favor newspaper classified because of its expediency in reaching active home buyers."

Vincent C. Buck, Western Builders, Inc., Spokane, Wash.: "We favor classified newspaper advertising because we get more sales per dollar invested."

Jack R. Worthman, John R. Worthman, Inc., Fort Wayne, Ind.: "Favor first newspapers and brochures, second, site signs and furnished open houses."

But, there are areas in the country where other media seem to do a better selling job than the newspapers.

Lester Matlock, Wichita, Kan., formerly used newspapers as his top advertising medium.

"Our merchandising consisted of open houses, signs, etc.," he says. "This proved unsatisfactory. We now plan a direct approach—use of hand bills, employment of a highly-trained woman as a public relations officer whose sole job will be her work with women's clubs to create interest in our models. We also plan to erect model homes and pre-sell, rather than to build speculatively."

Signs on the job get the nod from two builders—Joseph Fleming, Wilmington, Del., and Eveland Brothers, St. Petersburg, Fla. In addition, the Eveland company says newspaper publicity does a good selling job.

Overall outlook

Along with information about which advertising medium does the best job, AB asked builders how much they are spending on merchandising as a whole and whether or not they expect to spend more on advertising this year.

This fact seems clear: Along with everything else, the cost of merchandising new homes has taken an upward turn for most builders.

Western Builders, which allocated 5.3% of its gross sales income to advertising and promotion, anticipates a 75% increase in marketing costs; Aurora Development Co., which budgeted 1¾% to 2½% to merchandising, foresees a possible

30% increase due to the tight sales market; Lester Matlock plans an entirely different approach to advertising and expects it to cost 25% more than formerly.

However, the Worthman company, which has been devoting 1½% of its gross sales price to promotion and advertising, does not intend to increase its budget. Says Jack Worthman: "Expect to stretch it by better planning. We

need better, not increased advertising."

According to Forrest Cox Home Builders, present sales conditions indicate that no increase in advertising is needed.

Another viewpoint comes from Horizon Homes: "Under present VA and FHA valuations, plus mortgage discounts, we cannot feasibly justify more than 1% of our gross income from sales to

DICKERMAN'S COLUMN . . .

Today's market has to be

by John M. Dickerman, Executive Director, National Assn.

In this era of intense competition there is more often than not a tendency to sell by "gimmick" rather than by fundamentals. And while few will quarrel with a well thought out and soundly planned "gimmick" as a sales aid, many of us are old-fashioned enough to believe that the best salesman is one who knows and practices his fundamentals.

Dickerman

The Spring selling season for home builders is upon us in many parts of the country. And despite the mortgage drought there will be a lot of new houses to sell. I think, therefore, it might be worthwhile to review briefly some of the fundamentals of selling that are stressed in the Merchandising Short Courses at the National Housing Center.

They sound pretty elementary in print. But, if adhered to, they'll help you sell your houses.

First, you have got to have something to sell. "Sure," you say, "I have a house to sell. What do you think I'm in the home building industry for—my health?" So you have a house, probably several of them. But your competitors have them too. Is your house well designed? Is it soundly constructed? Is it attractive? Is it in a location which, for one reason or another such as convenience to schools and shopping centers, or by reason of address (some call it "snob" appeal), is likely to appeal to a good

segment of the public in your area? Is it priced competitively? Do you think it offers a sound value to a buyer?

These are pretty simple and basic questions. And my guess is that every builder reading them answered each one with a mental "yes." Assuming the answers are correct, my next question is: "Are you making plans to assure that these selling points are presented in an attractive way to a potential buyer? It doesn't help your financial health to tell yourself you have a fine house for sale, but not tell it convincingly to a potential buyer. You and your salesmen—whether in your own organization or of an outside firm—should know and be able to use effectively every selling point of your house.

Secondly, you have to have someone to sell your house to. Elementary? Of course, but vitally important we'll all agree! But there is more to this than may appear on the surface. The days when lenders were falling over themselves to supply mortgage money on generally accepted terms are long gone. As many of you have found out to your sorrow, it's not easy to qualify a borrower, particularly one with a moderate income, in these times of tight money.

The perceptive salesman diplomatically ascertains in advance two things: the features of a house that the buyer (or more often than not, his wife) values most highly, and what he is qualified to pay. The problem is to match a buyer's desires—what he thinks he should

merchandising." That's the same amount they have been using.

There's no doubt that merchandising and advertising is more important to the industry than ever before. As one Denver builder put it: "Our advertising is considered to be an integral part of our operating plan."

To learn what two other merchandising-minded builders think, see pages 20 and 21.

"sold"

of Home Builders

have in a house—with his ability to pay. These two factors, more often than not, are pretty far apart.

For one thing, the average buyer wants much more in a house than he is either prepared to pay for, or is capable of paying for. These desires can be trimmed to size by a discerning salesman, but only if the buyer is convinced he is getting his money's worth in the house offered.

The third point—and this comes only after the other two are satisfactorily taken care of—you have to sell the house. It's elementary again, but all too many sales are lost by over-selling, by not giving the customer a chance to buy the house when he is ready to take pen in hand. The mark of a good salesman is his ability to do the necessary amount of talking and shut up!

There is, of course, far more to competent merchandising and salesmanship than I have outlined here. Books on the subject would fill a good-size library with plenty of volumes left over. Parenthetically, one excellent way to catch up on fundamentals, obtain new ideas and swap merchandising talk with other builders is to attend the NAHB short courses.

But the principle point I want to make here is that builders are going to have to do a first-class job of merchandising if they are going to sell their product in today's highly competitive economy. There's a mad rush on for the consumer dollar by every businessman in the land. The builder who doesn't merchandise effectively is not going to be building much longer.

Meet the builder

► **QUESTION: What would exclusion of appliances from mortgages do to your house sales?**

L. R. Latch, Tulsa, Okla.:

It would be like removing automatic transmission from automobiles. Large majority of home buyers purchase homes to have new and modern conveniences. It would tend to turn housing backward instead of forward.

Emerson M. Mead, Fort Morgan, Colo.:

We build in low-price field, \$10-\$14,000 and do not offer appliances. Furthermore we do not believe appliances generally should be built into houses less than 1,000-1,100 sq. ft. Low-priced home buyers need space more than appliances.

C. W. Gosnell, Jr., Alexandria, Va.:

It would cut sales. Last year we sold 79 homes, average price, \$33,000. Despite substantial down-payments, no buyers desired to exclude appliances. Effects would be drastic in lower price ranges using guaranteed mortgages. Many buyers just do not have additional cash.

L. E. Coulter, Portland, Ore.:

Most of my houses are 3-bedroom ones, selling for around \$12,000. To include appliances raises the sales price, making down-payments and monthly payments higher. This makes houses harder to sell in these days of tight money. Most of my customers have their own appliances.

YOUR SOUNDING BOARD: Let AB know what problems you'd like discussed. Write: Meet the builder.

► Must we boost our ad budget to

'YES' says Irving Rose*

Irving Rose

"The percentage of gross that builders allow for advertising and merchandising just doesn't provide enough funds to do an adequate job in today's market, where we are offering a product that people don't have to buy. . . ."

The home-building industry must do a better, more effective job of merchandising to recapture the volume of business it has enjoyed for the past decade.

Item: Only 12 per cent of the consumer's dollar today is being spent on housing, according to the September 1956 "Survey of Current Business." This is much less than the 25 per cent most economists consider reasonable. Auto, gas, and oil take practically as much.

Item: More than 25 per cent of the average family income is spent on miscellaneous items of a non-necessity nature such as ice cream cones, women, poker games, and home permanents.

Item: More than 77 per cent of all U.S. homes are as outdated as a Model-T Ford. Forty per cent of them were built before 1919. That's just about twice as many homes as we have built since 1945. Think of the condition of the heating plants, plumbing, wiring, and kitchens of these homes.

Obviously, we home builders,

and housing generally, are getting only 50 per cent of what we should get. The potential is there; we are just not going after it aggressively enough.

I say the way to do a better job of merchandising is to spend more money. A *lot* more money.

The auto industry and others which sell directly to the consumer generally spend somewhere between 2 and 3 per cent of gross income for promotional activities.

Builders don't spend anywhere near this much. And I wouldn't mind having the difference between this budget and what the

building industry spends on advertising and merchandising. I should estimate that the average builder's outlay for promotion falls between one-half and three-fourths of 1 per cent of his gross. This percentage just doesn't provide enough funds to do an adequate job in today's market, where we are offering a product that people don't have to buy.

Although our industry dates back to the time when caves were just going out of fashion, we are just babes in the woods when it comes to battling these 20th century Johnny-come-latelies for our rightful share of the consumer dollar.

Let's take a builder who constructs 100 homes a year in the \$15,000 range. His annual gross is \$1,500,000. Allocating three-fourths of 1 per cent for promotion, (and I'm not being conservative) he has \$112.50 per house or \$11,250 to spend over a year to peddle \$1,500,000 worth of merchandise.

From this sum, let us say he

	\$30,000

*Irving Rose is president of Edward Rose & Sons, Detroit. A director of NAHB and member of the GI committee of the Mortgage Bankers of America, he has spoken on builder merchandising and trade-in plans before home builder groups across the nation, authored booklets on the subjects, and won an Acapulco Derby award.

sell more houses?

'NO' says Joe Rattner*

"Merely boosting the budget for merchandising only increases our costs by intensifying the selling effort. Let's leave that advertising allocation alone and put our attention—and our dollars—into improving our merchandise. . . ."

Joseph W. Rattner

Good advertising is not enough.

No one can quarrel with the thesis that we must overhaul our merchandising techniques.

But we need a new approach to the selling problem, beginning with subdivision planning and continuing right through to post-sale public relations and institutional practices. Merely boosting the budget for merchandising only increases our costs by intensifying the selling effort.

To succeed in a slow-selling competitive market, today's builder, in my book, must tailor his operations to provide more of the amenities which will sell homes in greater quantity without the need of boosting that three-quarters of 1 per cent promotional allocation Mr. Rose mentions.

Why? Because many of today's educated home buyers are buying a community more than a home. It is pretty well accepted that our market lies in the second- and third-time buyer and new-family formations which come of home-

owning antecedents.

So let's leave that advertising allocation alone and put our attention, and our dollars, into merchandise. A good architect is basic; he's worth his fee. Most builders already recognize this tenet or will be forced to in the near future.

True, we must accept increasing costs to get the share of the consumer dollar to which all of us believe we are entitled. Fancier advertising, more hoopla and hard-sell promotion undoubtedly would give the builder who adopted the program first an edge

in sales over his competitors—until they picked up the ball and met his competition in the real estate pages. It would no doubt boost sales for all builders by converting some apartment dwellers to home owners and some old-home owners to new-home owners.

But, regardless of this, where we home builders have lagged behind the auto industry and others which admittedly outsell us is not so much in selling itself but in the value given per dollar.

We must offer the market something much better than it has now. The story of sales by obsolescence has been told before; that is not the program I propose.

We must create planned communities. Even the better programs for land development in 1957 do not provide facilities community planners have long promoted.

*Joseph W. Rattner, home builder of Birmingham, Mich., recently completed two 12-family apartment houses, a \$100,000 home, three in the \$35,000 class, and 12 for \$22,000. With versatility, he has constructed public buildings for state and county, built a large church, and is a development builder.

FIRST PRIZE in Visking Company's contest is the Women's Congress Home design No. 2 sponsored by National Retail Lumber Dealers Assn. Nation-wide promo-

tion, which kicks off next month, will be a boon to lumber dealers. Home is to be built under supervision of Lu-Re-Co on winner's lot, foundation and floor platform.

Pictures in the news . . .

PRINCIPAL SPEAKER at OHI National Housing Congress in Tucson was Housing Administrator Albert M. Cole who pointed out campaign's dual benefit to people as individuals and to the entire economy. A banner year was predicted for home improvement. (Story on next page.)

TV's Wendy Barrie and Ralph Brass, national director, Build-In-Age, Inc., display January 1957 issue of American Builder which featured 461 new products. Magazine was placed in a time capsule and buried near the new Architect's Display Building at Mountainside, N. J.

Why builders cheer, "On Wisconsin"

When and if the mortgage money problem is solved, partial credit may go to some good old-fashioned Wisconsin enterprise. Two plans, designed to channel much-needed money into new home loans, are being tried out in the Badger state.

"A new pattern for financing veterans' housing and VA-guaranteed mortgages." That's how Delbert J. Kenny, president, B. C. Ziegler & Co., describes his firm's approach to the problem. The initial phase of the plan involved the offering of a collateral trust bond issue to finance construction and sales of 36 houses for veterans in a Milwaukee development.

How the plan works

Mortgages on the 36 houses were deposited as collateral for a \$385,000 loan with the First National Bank of West Bend as trustee. Then arrangements were made to issue bonds against the \$385,000. These bonds took the form of coupon bonds in denominations of \$10,000, \$5,000, \$1,000 and \$500, maturing at intervals from April 15, 1957 to Jan. 15, 1972. Interest varied from 4½% on the short-term bonds, 4¾% on medium-term issues and 5% on those maturing at the latest dates. The 4¾% and 5% bond interest is possible on 4½% GI loans. Kenny said, because the mortgages themselves total \$452,000.

Twenty-four hours after the bond issue went on sale, School View

Realty Co., Inc. (the builder) and the Ziegler Co. elatedly announced that the issue was sold out. And, the investors had come from every stratum — individuals, insurance companies and pension and trust funds.

Explained Kenny: "There are many persons with money to invest who normally would not be interested in home mortgages. Collecting monthly payments and keeping complicated records would involve too much bookkeeping. What we have done is to provide a safe investment to get some money into the new home market which otherwise might have gone elsewhere."

Although Kenny admits the initial offering was somewhat of a trial balloon, the experience indicates that fears were groundless. Another, more ambitious issue is planned and it will be registered with the Security and Exchange Commission.

New insurance program

Competition with the Federal government in the field of mortgage insurance is the basis of the second Wisconsin plan.

The Mortgage Guaranty Insurance Co. of Milwaukee has been licensed to offer lenders a mortgage insurance plan to protect them against losses with rates that compare favorably with those used by FHA, according to Sterling H. Albert, president. Albert was formerly

assistant state FHA director.

The plan, he stated, should help loosen lending requirements by savings and loan associations, banks and insurance companies in the state.

"Lenders are paying 4% to get money," he said. "They need at least 1½% for overhead, so the 5% top of FHA isn't enough. That's one of the reasons for the failure to use its services more here."

The company permits lenders to charge any competitive interest rate on their mortgages which can run to 80% of appraised value. Other rules: amortized loans may not exceed 25 years or \$25,000; the loans must be for one-to-four-family non-farm, residential, owner-occupied property; and a satisfactory credit report is required.

Rates are ½ of 1% of the loan for the first year and ¼ of 1% of the principal balance for each succeeding year. Special premium rates are available in lieu of annual premiums.

Max H. Karl, the firm's chairman of the board, reports that a number of local builders feel that by offering the mortgage guaranty policy to a mortgage lender, the lender will show a greater willingness to make a loan where the down-payment is at a minimum.

The company reports its plans to operate nationally and has started license proceedings in more than 40 states.

Enthusiasm: key word in OHI outlook

Challenging opportunities which exist in the home improvement field point to a rapidly expanding business. This good news for the industry came from the recent meeting of THINC—the Tucson Home Improvement National Congress.

Enthusiastic speakers at the sessions agreed that there will be much more home improvement work in 1957 and there is no "tight money" situation on home improvement loans. (All bankers who attended the meeting said they expect to make more of these loans this year

than they did in 1956.)

Outlining its plans for the year to further stress remodeling, OHI designated May as National "Better Your Living Month."

Closing session of the congress passed the following recommendations:

- Since OHI is such a tremendous success at the community level, everything possible should be done to encourage more cities to launch local programs.

- The industry should capitalize on the fact that there is no money

shortage for improvement loans.

- Remodeling is a distinct category of construction and should attract a bigger force of builders and contractors because of the steady profits to be made.

- Great need exists for "harder sell" in competing with other industries for the consumer dollar.

In an effort to convert OHI's high level promotional activity to a strong administrative and informational force, OHI upped Don Moore to managing director, succeeding John R. Doscher.

► Discounts . . . unfair to the builder

by Caswell Oden, Shreveport, La.

GUEST EDITORIAL . . .

Contrary to popular belief today, the so-called tight money situation is not the builder's biggest problem. His chief problem stems from a tight money situation, but that in itself is not the evil forcing him to the wall.

Tight money, plus low FHA-VA interest rates, brought on the discount. And the discount, of course, is merely a device for adjusting the interest rate upward. It is, therefore, actually part of the interest paid in advance.

Since it is interest on the loan, it should be paid by the borrower. (I have found no one who disputes this fact, including customers to whom I have sold new homes.) Nevertheless, FHA and VA require this item of interest be paid by the builder. It is this unconscionable requirement, totally unfair, totally unnecessary and totally unwise, that slowly but surely is bankrupting many builders.

The builder does not want inflation any more than anyone else. If the economic picture in this country dictates that few homes be built, he is quite willing to build fewer homes. If there is not enough mort-

gage money, he is willing to operate a reduced program. But what he would like to do is earn fair profit on the fewer homes he does build. FHA and VA have made it impossible to do this. They have slowed down building, not by putting pressure on consumers, where it belongs, but by making it impossible for builders to gross an equitable profit.

There is no other industry where the producer or seller is forced to pay a cost legitimately belonging to the buyer. When you buy a car, you don't find that VA or a Federal Automobile Administration has told the dealer he must pay part of the interest on your loan.

It is very true that FHA (not VA) permits the builder to sell a house for more than its valuation and in this way collect the discount for the lender. But everyone knows the general public considers valuation the price it should pay. If the builder does manage to get more than that, he is a profiteer with horns and tail. Moreover, if FHA doesn't care who pays the discount, why prohibit the borrower from paying it—as a discount? Why not lay the cards on the table? Why not call a spade a spade? Why not let

the law of supply and demand work?

The FRB can pursue its hard-money policy to kingdom come and the builder will adjust himself to this condition. FHA and VA can raise down payments and reduce terms and the builder will not complain, because he knows the buying public would do enough complaining for everyone.

But if FHA and VA don't stop insisting that the builder pay part of the interest on the borrower's loan, they will soon wreck the economy of builders in this country, which will in turn have adverse effect upon the economy of the entire nation.

No one will deny the great benefit of FHA and VA, least of all the builders. If they will merely permit the borrower to pay all interest on his loan, the builder's economy will be saved. This done, a new home prospect may buy, or not, as he sees fit. Supply and demand will have meaning in the building industry, too. And the builder will take new hope, and work out his own destiny on his new foundation of justice—whether he is confronted with tight money, loose money or medium money.

LUMBER DEALERS . . .

How to get the most from your displays

by H. R. Northup, Exec. Vice Pres., National Retail Lumber Dealers Assn.

One of the country's leading authorities on retail merchandising, New York adman, E. B. Weiss, has raised the interesting question of whether retail store display may not be a much more effective force in determining consumer preference than many realize.

He points out that whenever a test is made in which a well-known nationally advertised brand is dropped down to a lower shelf or given less shelf frontage, and another brand not quite so well

Northup

known is given better visibility, the results have uniformly proven that display will outdo advertising in making sales.

Mr. Weiss probably is thinking principally of chain food and drug stores featuring self-service.

Lumber dealers don't carry as many competitive brands of an item as food and drug chains do. And, self-service isn't nearly as prevalent. But Mr. Weiss' observations raise the interesting question of whether more lumber dealers who go after consumer business shouldn't be trying to make really effective use of their display space.

Many dealers are doing a bang-up job, of course. Others seem to

use space more for the purpose of storing merchandise than for inviting customer inspection and making extra high-profit, impulse sales.

In many stores, all that is needed is to arrange the merchandise more attractively, keep displays dusted and filled up, add price tags and talking signs. Then displays could be rotated frequently so as to take advantage of seasonal appeals.

Dealers seeking good advice on store layout and display, in either written or visible form, should write to their state or regional association. They can get the information in the form of dealer-operating guide chapters, color-slide programs, or trade-paper reprints.

How Milwaukee plans ahead: HBA demands land use plan

It's happening practically all over: builders are "crying" for some type of over-all community land planning.

They want to know where they stand before they begin developments. They want to know that what's okay to build in one section of their community won't be "out-lawed" five miles away.

Local ordinances, poor zoning and bewildering code variations have stymied builders to the point where many will not build. If fewer homes are built, those going up will cost more.

In Milwaukee the problem became so acute the Home Builders Assn. decided to do something about it. Led by their president Joseph J. Mollica, they got the ball rolling on a land-use plan program and are seeking state legislation to carry it out.

The builders are calling for:

- A master land-use plan for Milwaukee county. (Small individual communities would be required to follow it.) The plan would pinpoint heavy and light industrial areas, commercial areas, parks, main thoroughfares and residential districts. Zoning would set aside areas for low, medium and high priced homes.
- A uniform land platting law.
- A uniform building code for the entire county.

Mollica believes the association should have done this years ago. "The fact that there has been no over-all planning for this county has been costing it millions and millions of dollars."

Builders in Milwaukee are determined to put this plan into action, then make it stick. Right now the state, like many others, has laws which permit regional planning commissions for seven Wisconsin counties—but only on an advisory basis. If counties request the commissions, the governor can create them. But so far not one county has requested aid. Even if they had, the commissions are weak and without authority. Their advice is not law and no local officials would be forced to follow it.

It is these commissions that Mol-

lica thinks possibly could handle the proposed plan. Or he believes it might be necessary to have some agency controlled by the state. This would avoid controversy among the various communities affected.

A number of events, some recent, some building up for years, have led to this action taken by the association.

Local zoning ordinances around Milwaukee are getting more and more restrictive and discriminating. For instance, the city of Franklin sets the minimum lot frontage at 120 feet. Large subdividers for medium and low-cost homes can't build there because the homes would be too costly for most buyers.

Also from 1955 to 1956 there was about a 33 per cent decline in the number of platted plots in the county. Builders are blaming zoning ordinances on this too. The HBA is trying to make sure there will be lots available for all the people in Milwaukee who want them—especially in view of the increasing population.

These new families will need places to live, but builders won't be able to provide them if local ordinances continue to be so strict. A state subdivision law passed in the 1955 legislature isn't operating properly because individual communities can overrule it. In Frank-

lin an ordinance was recently passed that said, among other things, that a subdivider has to provide proof that adequate grade-school facilities are or will be available, or pay \$500 per home to a school fund. In the end the home owner pays it.

Builders believe that this school contribution feature is unconstitutional. However, if it should be upheld by the courts, it would practically end subdividing in Franklin.

Mollica said builders feel it's unreasonable to demand that persons entering a school district make a monetary deposit for new school facilities when those already in the district never have.

With a master land plan, schools would be included in the proper areas before subdividing began. Mollica said that around Franklin "there isn't a subdivider that would operate there."

The builders also feel that with a master plan the community would be considered as a whole. Developers would be able to buy up land when it is reasonably priced.

The plan will solve other problems around Milwaukee. For instance, there is a transportation problem which is now in the process of being solved. While this problem may not have been foreseen, a land plan would prevent a similar one in the future.

Since home ownership in Milwaukee has increased from about 42 per cent to 64 per cent since World War II, a master plan is badly needed to correlate building.

Mollica said, "The builders' association wants a planning agency which will get something done."

LIFE INSURANCE: under Chicago HBA's new program, first payment to a beneficiary went to widow of

Get set

(Following is the second section of the article by William C. Bober. Upon it, American Builder's editors Joseph B. Mason and Walter R. Browder based the leading discussions at the annual AB breakfasts at the Sherman House-on-the-Roof during the NAHB convention. Mr. Bober here stresses the five non-family-formation components of demand.)

Why is it that we have had these bounteous years of more - than - a - million annual homestarts from 1946 to 1956 in the face of this decline in family formation—this steady numerical drop of young folks reaching home-wanting age? Of course war and depression backlogs played their part. But, far more important, family formation is merely ONE component of new-home demand. Every one of the following components will continue to be operative when the curve of family formation begins to climb again in 1958:

1. The migration to the suburbs.

It is of colossal proportions and one of the most spectacular features of our times. From 1950 to 1955, according to latest Department of the Census estimates, the suburbs swelled with population six times as fast as the old central cities themselves. People are pouring not only into the suburbs but into trans-suburbia and right out into open country. From now into the 1960's, growth will be easily ten times as fast as in central cities. That alone calls for a vast volume of homebuilding plus the myriad forms of secondary non-residential construction generated thereby.

Vacancies in the old congested areas will sooner or later rise to what some analysts will call "alarming proportions," but *don't* be alarmed. The figures will be

for 2 million starts in '70's

irrelevant. What counts is not the empty dwelling units *where people no longer want to live*, but where they *do* want to live—and that is in the suburbs, and beyond. Today the vacancies there are almost zero. Given available mortgage money and prosperity, the housing boom in the suburbs will keep going for decades to come.

2. Regional migration.

The West, sunshine, climate, scenery and greater opportunities in the younger parts of the country continue to function as magnets that pull great numbers of American families out of the older regions into the newer. Here too, as in the suburban migration, vacancies where people move from are irrelevant. A vacant dwelling in Portland, Me., is no help when you are hunting a home in Portland, Ore.

3. The postwar distribution of income.

It is radically different from pre-war. It has practically abolished the distinction between middle class and working class. The latter now demands new homes, like the former. The day is done when the working man was resigned to rent, or at best own a second- or third-hand dwelling. Today half of all our non-farm families have incomes of \$5,000 or over—which is enough to finance a new home priced \$12,500 at bankers' standards. And every year another million or so of families has been entering this bracket.

In the late 1960's three quarters of all our urban families will be able to finance new homes. That, as compared with pre-war, is a revolution indeed.

4. Easy credit.

The small down payments are the basis. But what has really done the trick is that it is cheaper

to own than rent. You pay \$75 or \$80 a month on an owned new house in the desirable suburbs instead of actually more to rent a railroad flat or antiquated apartment in the old congested city. Hence home ownership has moved up from 40 per cent before the war to 60 per cent of all homes in 1956. Hence also in 1956 over 90 per cent of all new dwelling units were built for owner-occupancy, instead of 40 per cent as in the last year before Pearl Harbor.

In effect, American families are using their "rent money" to become owners. This is an immense offset to the mortgage debt that the alarmists observing its size do not realize. Mortgage debt is recorded as debt. Rent liability is not. Yet people must live somewhere and if they avoided mortgage-payment liability, rent-payment liability would be vastly greater in the aggregate. As all lending institutions have discovered, people pay their debts, particularly for dwelling space—whether you call it mortgage debt or rent liability.

5. The obsolescence of the existing stock of dwellings.

It isn't merely deterioration due to the passage of time. A vast number of dwellings no longer fit into what the modern American

housewife considers satisfactory. She doesn't like the stairs, the lack of window space, the gloomy kitchen, the inadequate electrical outlets for today's innumerable electrical gadgets, the single bathroom, the obsolete hallway, the ancient dated design and layout. Every time she visits a friend who has moved into a new house in the suburbs, these old dwellings are shown up as Victorian and inadequate.

The homebuilding industry has made three quarters or so of the entire old pre-war stock of dwelling units essentially obsolete! It hasn't itself as yet grasped the full significance of that revolutionary performance. But this is certain: in the 1960's the great bulk of American families will be satisfied to live only in (1) *new* homes or (2) in old ones that have been radically modernized from their very foundations.

Above I have listed what can be called the five main *non-family-formation* driving factors that caused the great postwar housing boom. Remember: this boom has taken place in the face of steadily declining annual contingents of young people reaching home-wanting age.

Yet every one of these driving factors will continue and become even more powerful in the years ahead. And on top of this, the number of young adults will rise, slowly at first, then in an irresistible torrent as we enter the 1960's. Do you wonder that I am predicting 2 million new homes a year when we end the 1960's?

Aged live longer

In former years, the death of the aged threw some housing on the market to partially but heavily offset housing demand resulting from new family formation. But now, with the ever-advancing medical revolution, the older folks live longer. So young

(Continued on page F27)

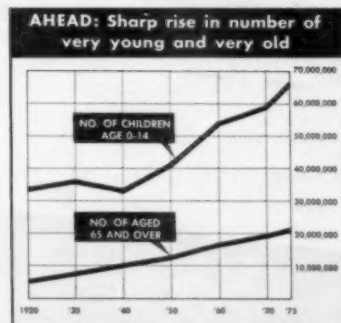

CHART III: Two more signs of the coming housing boom: more children, longer-lived old folks.

ACKNOWLEDGEMENT

This issue of American Builder contains material secured from hundreds of different sources. We want to acknowledge here our deep appreciation to the associations, manufacturers and individuals whose cooperation has made it possible to bring together this vast collection of building knowledge.

The Editors.

KEEP THIS BOOK HANDY

As you turn the pages of this DIRECTORY you will be aware that here is a book that meets a year around need because of the scores of editorial data pages, the catalog and specification type of advertising and the big reference directories. Get acquainted with this DIRECTORY and you will be sure to agree that it is a handy book to have around!

USE IT EFFICIENTLY

This book has been divided into seven major sections, each opening with a frontispiece,

which enumerates the subjects covered as well as indexes to both the editorial and the advertising pages. Consult these indexes when you have an estimating, construction or buying problem. Each of these sections have been foiled separately with the page numbers prefixed by the alphabetical letter designating the section so that you can use it efficiently.

BUILD UP YOUR REFERENCE FILE

Within the advertising pages of each section are reviews of catalogs and technical literature which you can obtain free from manufacturers. All you have to do is circle the reply card facing

WHAT TO USE - HOW TO

TIME - SAVER ISSUE

WORKING

Section G and drop it in the mail.

WORK THE ADVERTISING

To supplement the technical material offered in the editorial pages of this DIRECTORY you will find that advertising too has been designed to give you installation data, specifications and buying information. This is the type of reference you will want to use throughout the year.

To get the most value from the advertisements, study them carefully from time to time, for in these pages you will find the latest developments in building industry products, construction methods, tools and equipment.

The manufacturers who advertise in this DIRECTORY do so because they want to serve you. Write them regarding your problems at any time. They will be happy to send you technical data and literature, prices or the name of your nearest supply source.

Work the advertising hard—it will help you to be a better and more successful builder.

USE THE YELLOW PAGE SECTION

The yellow pages in the front of this book contain two important directories each performing a specific purpose for you. You'll want to become acquainted with these for here is what you will find.

The Directory of Building Products and Equipment Manufacturers is your buying guide to "Who Makes It." Classified alphabetically by product categories here are the manufacturers who serve the needs of your industry. Many of these have gone to extra effort to help you locate them by using display advertising and are particularly anxious to help you. Contact them at any time for information.

The Directory of Brand Names is provided to help you to locate the name of the manufacturer when you need repair or replacement parts for a product which you have associated only by its brand name.

USE IT - WHO MAKES IT''

CONTRACTORS! Getting new construction business takes plenty of smart digging. And Dodge Reports tell you where to dig. In short . . .

We can help you "dig up" business!

Put down the pick—and pick up your pen if you want to know about new construction jobs coming up in your area . . . and how to get invited to bid on just the kind of work you want. Read, fill out and mail this coupon today!

TO: **DODGE REPORTS**, 119 WEST 40th STREET, DEPT. 172, NEW YORK 18, N. Y.

Yes! I'd like to pin-point my prospects by knowing in advance who's going to build, what, when, where.

I want to know whom to contact and when to submit bids.

I'd like to see some Dodge Reports, and I'd like a copy of your booklet that tells how to use this accurate, daily, up-to-the-minute construction news service to get profitable business.

I understand that I can pick just the area and type of construction activity that interests me. Also, that I won't have to wade through mounds of data to find the information I need.

I'm interested in General Building House Construction Engineering (Heavy Construction)

in the Following Area: _____

Classified Directory

Brand Names of Building Products and Equipment

Brand Names used to identify principal building products and equipment of major manufacturers are listed in this directory in alphabetical order with the names and addresses of the companies to which the brand names apply.

This listing may be used to ascertain the manufacturer of any product when only the brand name is known. It can

also be valuable in determining the source of repair and replacement parts on products and equipment.

Wherever possible brand names which are synonymous with the manufacturer's name have been omitted as these may be readily located in the classified Directory of Products and Equipment Manufacturers.

AMERICAN BUILDER

Classified Directory

Building Products and Equipment Manufacturers

This classified directory has been compiled to provide the industry with the names and addresses of the major producers of building products, equipment and services. It also supplements the preceding directory of Brand Names as those brand names which are synonymous with the manufacturer's name do not appear in that section but may be found here by consulting the specific product classification.

A minimum number of cross references appear in this directory. This has been done to conserve space thus allow-

ing for more individual categories. Choice of either the noun or descriptive adjective, as the classification word, has been used on the basis of the word most acceptable in the parlance of the building industry.

Every attempt has been made to make this listing as complete as possible and to encompass all phases of the building industry. In the event the information desired cannot be found in this directory write to AMERICAN BUILDER, Directory Editor, 79 W. Monroe St., Chicago 3, Ill.

The names of Manufacturers who advertise in American Builder appear in **Boldface Type**

... the new, simple way to bridge all
 wooden joists. Cold rolled steel, rust-
 treated. Simplest, cheapest, and by all
 odds the best—quality bridging at a
 price. FHA accepted. Write for prices,
 literature.

Inquire Direct!

KIMBALL MFG CO 816 UNIVERSITY PL EVANSTON ILL

NEW BEVIL DEVIL #77 MAKES HARDBOARD BEVELING EASY → → →

The famous Bevil Devil #77 has now been re-designed to specifications of a leading hardboard manufacturer. It puts a clean-cut bevel on any hardboard, tempered or standard—with one stroke.
 It maintains a uniform bevel angle. Can be quickly adjusted to various angles.
 This new tool, made of hard maple, has a hunky carbon steel cutting blade. Easily kept sharp.

ONLY \$2.50 POSTPAID

NEW WACO Light-Duty Scaffolding

*For All
Building
Trades*

*Light-Weight—
Easy to Handle!
Two people can
easily move sev-
eral sections.*

WACO Light-Duty Scaffolding gives you
these important "extras":

1. WACO "Speedlock" attaches braces to frames instantly and securely.
2. High-strength, high-carbon steel end frames—carries up to 50 pounds per square foot.

For the name of your nearest WACO
distributor, write:

WACO MANUFACTURING COMPANY
3565 Wooddale Ave., Mpls. 16, Minn.

DUO-FAST STAPLE TACKERS

for the Building Industry

STAPLE GUNS

Ideal for general tack-
ing. Fast, easy, accu-
rate. Just squeeze the
handle.

HAMMER TACKERS

Fastest manual method.
Tacks as fast as you
swing it. Rugged, pow-
erful.

AIR TACKERS

To speed those BIG
jobs. Just flick the trig-
ger... air does your
tacking.

- DUO-FAST Tackers are fully Guaranteed.
- Send for free Builders' Brochure FT-26.

SUPERIOR
METAL TRIM

THE COMPLETE THRESHOLD LINE

Superior Threshold Plate is available in
bulk, fabricated to customer's require-
ments. However, complete Unit Packages
containing all necessary hardware are
recommended for most organizations as
the package lends itself to better mer-
chandising and easy handling, as well
as "Do-it-Yourself" sales.
Complete line of decorative trim and spe-
cial extrusions to customer's specifica-
tions. Send for latest circular.

HOW TO USE THIS TABLE

This table gives the cubic yard factors to use in estimating quantities of concrete required for walls, slabs, walks or drives when the square footage is known.

Example: Find the number of cubic yards of concrete required for the walls of a foundation 24' x 30' x 8' - 10" thick.

$2 \times (24 + 30) \times 8 = 864 \text{ sq. ft.}$

Use factors from table for 10" wall thickness:

864 sq. ft. =	34.64 cu. yds.
60 sq. ft. =	1.848 cu. yds.
4 sq. ft. =	.123 cu. yds.
26.611 cu. yds. of concrete required.	

Where concrete thickness is an odd number of inches use factors for double the thickness and divide result by 2. Example: For 9" walls use 18" factors and divide final quantity in half.

CONCRETE FOOTING QUANTITY FACTORS										
(Cu. Yd. per 10 Lin. Ft.)										
DEPTH IN INCHES	WIDTH OF FOOTING IN INCHES									
	6	8	10	12	14	16	18	20	22	24
6	.093	.124	.154	.185	.217	.248	.278	.308	.340	.370
8	.124	.165	.205	.247	.289	.330	.370	.410	.451	.494
10	.155	.206	.256	.308	.360	.412	.462	.512	.564	.616
12	.185	.247	.308	.370	.432	.494	.555	.616	.678	.740
14	.216	.288	.360	.432	.504	.576	.648	.720	.792	.864
16	.247	.329	.410	.494	.576	.658	.739	.820	.904	.988
18	.278	.370	.462	.555	.648	.740	.832	.924	1.017	1.110
20	.309	.411	.513	.617	.720	.820	.924	1.024	1.130	1.234
22	.339	.452	.564	.679	.791	.900	1.016	1.128	1.243	1.358
24	.37	.494	.616	.740	.864	.988	1.110	1.232	1.360	1.480

HOW TO USE THIS TABLE

This table gives the cubic yard factors to use in estimating quantities of concrete required for footings when the total lineal feet is known.

Example: Find the number of cubic yards of concrete required for a footing 18" wide, 10" thick for a foundation wall 24' x 30'

$2 \times (24 + 30) = 108 \text{ lin. ft.}$

From the table it is found that 10 lin. ft. of 18" x 10" footing contains .462 cu. yds. (or .0462 for 1 lin. ft.)

Multiply .0462 x 108 = 4.989 cu. yds.

or .462 x 10.8 = 4.989 cu. yds. concrete required

NOTE: This table is also useful in estimating the quantity of earth to be removed from footing excavations. Follow the same procedure as outlined above.

Section A Structural Materials

ESTIMATING CONCRETE MASONRY

NOMINAL LENGTH OF CONCRETE MASONRY WALLS BY STRETCHERS

(Based on units 15½" long and half units 7½" long with ¾" thick head joints)

LENGTH OF WALL	NO. OF UNITS	LENGTH OF WALL	NO. OF UNITS	LENGTH OF WALL	NO. OF UNITS	LENGTH OF WALL	NO. OF UNITS	LENGTH OF WALL	NO. OF UNITS	LENGTH OF WALL	NO. OF UNITS
0'-8"	½	20'-8"	15½	40'-8"	30½	60'-8"	45½	80'-8"	60½	100'-8"	75½

HOW TO USE THESE TABLES

The tables on this page are an aid to estimating and designing with standard concrete masonry units. The following are examples of how they can be used to advantage.

Example:

Estimate the number of units required for a wall 76' long and 12' high.

From table: 76' = 57 units

12' = 18 courses

57 x 18 = 1026 = No. masonry units required.

Example:

Estimate the number of units required for a foundation 24' x 30' — 11 courses high.

2 x 24-30 = 108' = distance around foundation.

From table: 108' = 81 units

81 x 11 = 891 = No. masonry units required.

This table can also be useful in the layout of a building on a modular basis to eliminate cutting of units. Example: If design calls for a wall 41' long it can be found from the table that making this wall 41'-4" will eliminate cutting units and consequent waste. Example: If the distance between two openings has been tentatively established at 2'-9", consulting the table will show that 2'-8" dimension would eliminate cutting of units.

TYPICAL SHAPES AND SIZES OF CONCRETE MASONRY UNITS

Dimensions shown are actual unit sizes. A $7\frac{1}{2}'' \times 7\frac{1}{2}'' \times 15\frac{1}{2}''$ unit is commonly known as an 8'' x 8'' x 16'' concrete block. Half length units are usually available for most of the units shown below. See concrete products manufacturer for shapes and sizes of units locally available.

CASING BEADS

Casing beads of different manufacturers may vary slightly, but the illustrations and dimensions shown here are typical and represent Simplified Practice Recommendation 3-52 promulgated by the U.S. Department of Commerce. They are fabricated from not less than 24 gage galvanized steel and are generally available in lengths of 7 and 10 feet.

Here, 1/2" casing bead is used over the face of gypsum lath. If gypsum lath laps the bead, a 3/4" depth (with short flange) is used. With metal lath the depth is 3/4".

If the door frame is erected after plastering, the casing bead is installed flush with the buck. A small molding closes the joint between buck and frame.

Jamb is Similar

This 3/4" casing bead provides for 1/2" of plaster over 3/4" gypsum lath as required by FHA. Casings are mitered or coped to form neat corners at head of opening.

In this detail, the casing bead laps the door frame. Nailing flanges of casing beads have a slight bend to give a spring-tight fit against the frame when nailed in place.

Jamb is Similar

Glass blocks are wider than wood studs, requiring a 1/2" casing bead to be placed over the gypsum lath. Expanded flange on bead reinforces the plaster.

Jamb is Similar

Casing beads around a window are modern in appearance, and not subject to warping or shrinkage. They assure full plaster thickness and sharp straight edges.

STEEL JOIST LOADING TABLES

The following table gives the total safe uniformly-distributed load-carrying capacities, in pounds per linear foot, of Open Web Steel Joists and Nailer Joists, adopted by the Steel Joist Institute. The weight of dead loads must in all cases be deducted

to determine the live load-carrying capacities of the joists. When Nailer Joists (those with suffix W) are used, they should not be spaced farther apart than the safe span of the wood deck or other material used over them.

Joist Designation	The prefix letters "SJ" should precede Joist Designations given below, i.e. SJ81, SJ81W, SJ82, SJ82W, etc.																
	SJ 81	82	102	103	104	123	124	125	126	145	146	147	166	167	166	167	207

Section A Structural Materials

Flashing Structural Clay Masonry

Damp checks should be placed about 6" above grade to prevent moisture, absorbed from the ground by exterior foundations, from traveling upward by capillary action into the wall above.

Base flashing or chimneys should extend well back under the roof covering. Counter flashing should be imbedded securely in the mortar joints of the chimney wall.

Flashing should be placed under and behind both masonry and wood sills. All heads of openings, except those protected by projecting eaves or hoods, should have through flashing.

Projections and recesses from the exposed face of the wall tend to hold water or snow and should be flashed, preferably over the top with the outer edge of the flashing bent down and folded as a drip.

Spandrel beams should be flashed continuously throughout their length. Where columns occur above the beam, the flashing should be turned up approximately 6".

Various methods of parapet wall flashing. Unless wall coping is of an impervious material with watertight joints, through flashing should be placed in the mortar bed under the coping.

4x4x12	3.00	0.039	0.052	13.00	17.30

* Actual size plus thickness of one joint
** 10% added for waste

MODULAR BRICK

In Table 1 are the quantities of units and mortar required to construct a 4-in. wall using 5 sizes of modular brick with two joint thicknesses. The mortar quantities shown are for the bed and head joints only. If this facing is to be applied to a backup wall, the quantity of mortar required for the interior vertical or collar joint must be added. These quantities are as follows:

- .0313 cu. ft. for 1 sq. ft. mortar joint 3/8-in. thick.
- .0365 cu. ft. for 1 sq. ft. mortar joint 7/16-in. thick.
- .0417 cu. ft. for 1 sq. ft. mortar joint 1/2-in. thick.

The brick quantities shown are for brick laid in running bond. For other bonds in which full headers are used, the correction factors in Table 4 must be added. The 2-2/3x4x8-in. size brick is commonly referred to as the "Standard Modular" size.

**TABLE 2

* The loads are given in kips, a kip being 1,000 lbs.

EXAMPLES

To find correct I beam size:

1. Determine uniformly distributed load.
2. Locate this load figure in column under span in feet.
3. Read size and weight of required beam in column at extreme left.

To find pipe column size:

1. Determine load in kips. If column is to support center of beam supported at ends divide load in half.
2. Locate nearest load figure in column under required length.
3. Read size of pipe required in column at extreme left.

To find I beam column size:

- Follow same procedure as outlined for pipe columns.

Section A Structural Materials

COMPONENT PANEL TECHNIQUES

The Component Panel Techniques detailed on these pages have been developed by the Small Homes Council, University of Illinois, Urbana, Illinois, as part of a research project sponsored by the Lumber Dealers Research Council. These are part of the Lu-Re-Co system which is licensed only to retail lumber dealers. More information may be obtained from the National Retail Lumber Dealers Association, Ring Building, Washington 6, D. C.

Floor panels are made 4' wide and in full span lengths. Various types of joist spacing may be used as shown in the two illustrations here. Plywood is used for sub-flooring and is applied with the grain running at right angles to gain full advantage of its strength.

SECTION OF HEADER

A continuous header, constructed according to this detail, runs all around the building and serves to tie the outside wall panels together. This header is placed after the outside wall panels are in place.

A jig table is the basis for the building of all component panels. Made of plywood, reinforced with 2 x 4's, and set table high, it allows for assembling the panels with the minimum amount of labor. Steel angles form the guides for the placing of the framing materials. An extension is added to the table for the assembling of panels longer than the basic 8 feet.

PLATE DETAIL

As all component panels are built on the 4' module the sills at the foundation must be built so as to have all dimensions end on the even foot inside the building. A nailer strip is used around the perimeter of the house and the header or mud sill is set flush with the foundation wall. A plywood sub-floor strip ties the header into the floor.

Section A Structural Materials

COMPONENT PANEL TECHNIQUES

WINDOW PANEL

WALL PANEL

HORIZONTAL WALL

HALF PANEL

Window panels have a basic width of 4' using any type of window that is coordinated in dimension to drop directly inside the basic 2 x 4 frame. It is set directly under the top header to eliminate the need for short cripples.

Basic wall panel measures 4' x 8' with 2 x 4 studs cut 88" long so that standard sheathing projects at top and bottom to cover junction with header and sill. Half panel is made in the same manner but is only 2' wide and is used to fill out walls not in multiples of 4 feet. The horizontal solid-wall panel has the same dimensions as the basic wall panel but has horizontal blocking on 2' centers to provide nailing for vertical siding application.

Door panels may use either a 2'-8" or a 3'-0" door but in any case an additional stud is required. The door opening may be located in the center or to the left or right of the panel.

Basic partition panels have dry-wall materials applied to one side only to allow for installation of wiring on the job.

Partitions containing interior doors are framed in sections. This illustration shows the use of three panels combined and tied together with the side jamb of the door opening.

DOOR PANEL

As all basic partition panels are made 4' wide, to facilitate moving into the building through a door, long partitions may be built up by combining panels in vertical and horizontal positions. Dry-wall materials will work either way.

Facts about the Van-Packer Chimney

Saves you money — Factory-built Van-Packer Chimney saves you 20 to 40% per unit over brick construction.

Saves you time—Van-Packer Chimney goes up in 3 man hours. No delays, immediate delivery to job site when needed.

Saves you space—Ceiling on floor suspended Van-Packer Chimney eliminates pier, lets you locate furnace anywhere.

Attractive brick-design panel housing provides massive masonry appearance—available in red, buff or white to harmonize with any home. Asbestos-cement housing won't dent, rust or streak roof.

Safe, permanent masonry sections have insulating value of 2 ft. of solid brick. Acid-proof fire clay tile liner withstands over 2100° F.—fire protection is built-in.

Van-Packer All-Fuel Chimney

Listed by Underwriters' Laboratories for all fuels, all home heating plants and incinerators; approved by major building codes. 7" I.D. flue sections in 1 and 2 ft. lengths combine for any height. 14" O.D. sections fit between joists 16" O.C. without joist cutting. Section joints sealed with acid-proof cement and reinforced with aluminum drawbands. Enclosed above roof by asbestos-cement brick-design panel housing in red, buff or white. Completely packaged including flashing.

To order a Van-Packer All-Fuel Chimney or Gas Vent, or for prices, give your Van-Packer Jobber "H and L" measurements as indicated above. See "Chimneys—Prefabricated" in Yellow Pages for your nearest jobber, or write Van-Packer.

Van-Packer Gas Vent

Provides safety, permanence and beauty of brick. Flue sections are 5/8" fire clay tile with asbestos-cement jacket. Section joints sealed with acid-proof, leak-proof cement and aluminum drawbands. Enclosed above roof by attractive brick-design panel housing; no bare vent pipe to mar appearance of home. All parts provided including flashing. For use with all gas-fired appliances (except incinerators) requiring 3" to 7" I.D. flues. Listed by Underwriters' Laboratories for Class B service.

KEYCORNER

- Pre-formed to fit snug in corners
- Gives multi-directional reinforcement
- Quick and easy to lath
- Lays tight against flat surfaces
- Trowels over smoothly and easily
- Provides a minimum of waste material
- Galvanized to prevent rust streaks
- Comes in easy to handle, easy to store 150 ft. rolls.

Easy to handle... Easy to store 150-foot rolls, 4", 5", 6", 12" and other widths. Ask your dealer for details.

KEYCORNER

GALVANIZED PLASTER-REINFORCING

...ask for it by name

THE LOW-COST, MORE EFFICIENT PLASTER REINFORCING LATH FOR
INSIDE PLASTER CORNERS, JOINTS AND CEILING-WALL JUNCTURES

PRE-FORMED FOR CORNERS Keycorner is pre-formed; manufactured to fit snugly into corners. It forms the corner shape by merely flexing the cut piece. Inside plastered wall corners and ceiling-wall junctures remain crack-resistant when reinforced with Keycorner.

LIES FLAT FOR STRIPPING Keycorner comes out of the roll flat and stays flat when applied on flat surfaces. It won't form the corner shape until you flex it. Keycorner used as stripping around windows, doors and other large openings provides lasting plaster beauty.

INCINERATORS

FOR THE "HOTTEST" MARKET
DEALERS HAVE TODAY

- for apartments • schools
- stores • hospitals • institutions
- factories • industrial plants

Dealers everywhere are profiting from the increased sale of incinerators!

The Donley line includes standard models of flue and floor-fed (charge through fire door) design as well as units for use in small and medium size plants, gardens or estates. Prefabricated steel-shell units also are available. All Donley Incinerators feature greater waste disposing capacity through the utilization of an automatic burning principle.

With Donley plans and parts, local contractors can build complete incinerators . . . profit from this growing market!

why builders look for this
brand name on

West Coast Hemlock

West Coast Hemlock is enjoying an increasing popularity among builders. They find that it is light and strong, easy to work, straight-grained, and relatively free from pitch pockets . . . an ideal species for light frame construction.

As finish lumber, West Coast Hemlock is a beautiful, light-colored wood. This feature, plus its remarkably straight grain, makes Hemlock an excellent species for both paneling and molding.

Builders know, too, that the well known Weyerhaeuser 4-Square trademark means that this lumber has been carefully and scientifically seasoned. Kiln-drying assures greater stability, long life, and excellent finishing characteristics. Whether it is framing, siding, sheathing, flooring, or paneling, the 4-Square brand name means that this lumber has been manufactured with precision, accurately graded, and carefully handled and shipped.

The structural advantages, beauty, and versatility of Weyerhaeuser 4-Square West Coast Hemlock Lumber explain its growing popularity among builders and architects. See this beautiful "Ability Wood" at the yard of your Weyerhaeuser 4-Square Lumber Dealer.

LACLEDE STEEL COMPANY

SAINT LOUIS, MISSOURI

Producers of Steel for Industry and Construction

Here are **EXTRAS** all owners want...

...and they help you cut costs...save time...sell faster!

ZONOLITE® INSULATING FILL

Three-Step-Method Cuts Insulating Costs

- (1) Anyone can easily unload light-weight bags of Zonolite Insulation.
- (2) Store them right on attic joists prior to plastering!
- (3) And any laborer on the job can

handle the pouring. Pour and level! An entire attic in 2 to 3 hours! You save work, time and labor costs!... And fireproof Zonolite is guaranteed in writing for the life of the building!

ZONOLITE PLASTER AGGREGATE

Machine Application Breaks Home Building Bottleneck

Here's the easy, low cost way to get homes finished "for sale" faster. A man with a machine can really make that plaster fly. And Zonolite is always available! You KNOW it's easier to sell a home that's plastered

throughout...for added beauty, greater fire safety and higher resale value! Zonolite Plaster Aggregate weighs 1/10 as much as sand; gives added insulating value. Just as valuable in non-residential building too!

ZONOLITE CONCRETE AGGREGATE

For Warm Dry Floors

This low cost "extra" is a surefire selling point in a "basementless" home. Zonolite insulating concrete has 12 to 16 times the insulating

value of ordinary concrete. And you'll appreciate the fact that it's lightweight, easy to mix. Greatly increases the efficiency of any heating system.

For Lightweight Roof Construction

In small or large buildings, Zonolite's "Big 4" advantages are (a) lightweight, at lower cost; (b) 100% fire-proof, cannot burn; (c) insulates per-

manently; (d) can be used in any roof design. Cut costs on your next job. Mail coupon for booklet showing all types of roof construction.

ZONOLITE ACOUSTICAL PLASTIC

New Application Techniques Speed Construction, Cut Costs

Zonolite Acoustical Plastic in addition to absorbing sound, is completely fire-safe. Choice of architects and owners for texture, appearance. Zonolite adheres directly to clean, firm

surface; even underside of concrete ceilings. Costs little more than conventional 3-coat plastering. Machine application permits widespread use of acoustical treatment at low cost.

Mail Coupon today for New **FREE** Book

Without obligation, you'll receive booklet fully illustrating the widespread use of modern Zonolite products...including full technical data, drawings, and specifications. Cut costs, deliver quality with ZONOLITE. Write today.

how to keep 2000 homes dry for life!

This is Kendall Park at Franklin Park, New Jersey. Here 2000 slab-type homes are under construction—300 completed. All have VISQUEEN film under the slab to assure life-long freedom from moisture-generated ills. Herbert Kendall, and his chief superintendent heading the project, Ed Ludlow, cement contractor agree that there is no moisture barrier as effective as VISQUEEN, and at such low cost. "Delighted" is the consensus and they keep right on with VISQUEEN.

SAYS GEORGE W. GILL, JR.:

**"We find CONCRETE MASONRY homes
have excellent customer acceptance"**

Lauderdale Isles is a beautiful modern home project built by the Gill Construction Company near Ft. Lauderdale, Fla. All the homes are of concrete masonry construction with an exterior finish of portland cement stucco. They are built on 60-foot lots, most of which are on waterways that connect with a deep channel to the ocean. All waterfront lots are completely landscaped and have a concrete seawall. Along with each home goes a membership in the Lauderdale Isles Yacht Club, which features a large concrete swimming pool.

George W. Gill, Jr., manager of the Gill Construction Company, says: "Lauderdale Isles, the latest waterfront project of our company, is an excellent example of our highly successful use of concrete block and stucco home construction.

"During the nine years we have been in business in south Florida, we have built more than 2500 homes, all with exterior walls of concrete block and stucco. This type of construction has excellent customer acceptance, is very economical, and provides minimum upkeep expense."

Many of America's successful builders use concrete masonry construction. They enjoy a marked sales advantage because concrete masonry homes are comfortable, economical, and have unequalled resistance to moisture, decay, termites and fire. Send for free "Concrete Masonry Handbook." Distributed only in U.S. and Canada.

PORTLAND CEMENT ASSOCIATION

Interior designs by John and Earline Brice.

Give any interior this fresh new beauty
BEGIN WITH A BEAUTIFUL BACKGROUND
 of plastic wall tile

"Begin with a beautiful background of plastic wall tile." This is the theme for the big '57 Dow advertising and promotion program for dealer-guaranteed plastic wall tile made of Styron®. Dramatic interiors like this delightful "checker" laundry area will be featured in full-color national magazine advertising and in exciting promotion material.

Play up Styron plastic wall tile in your homes in any price range. Make the most of its extensive color range and versatile shapes . . . its unlimited decorating possibilities. Above all, stress its *guaranteed quality*. Your certified dealer can help you create new buyer preference with dealer-guaranteed plastic wall tile made of Styron. THE DOW CHEMICAL COMPANY, Midland, Michigan, Plastics Sales Department PL1553Q.

IDEA! Make a focal point of stripes in Styron plastic tile to underscore modern kitchens.

YOU CAN DEPEND ON

1. National Homes, Lafayette, Indiana, specifies Styrofoam 1" thick placed horizontally around the perimeter 12" from the foundation wall of the house.

2. Styrofoam insulation 1" thick is then placed at an angle 12" high against the poured foundation wall.

National Homes uses Styrofoam

A new concept for construction of all masonry structures:

Styrofoam is used to eliminate dampness and cut building costs. Portland cement mortar bonds Styrofoam to the masonry—permanently, without studs. Plaster keys directly to Styrofoam surface—smoothly, without lathing. No special training or tools are needed. And the warm, dry walls keep their smooth, crack-free appearance year after year. The man who looks ahead will investigate this!

3. Next the slab is poured—and that's it! From experience National Homes finds it has protection from cold and damp for the lifetime of the house.

for lifetime perimeter insulation

There are good reasons why this is so. The same reasons that can help you enhance your reputation.

Styrofoam* (a Dow plastic foam) is a homogeneous insulation with a remarkable combination of properties. This rigid insulation contains millions of noninterconnecting air cells. As a result, it can't absorb water. It provides true protection against dampness and water. Its low thermal conductivity stays low. In addition, it resists rot, mold, deterioration. And

having no food value, vermin and rodents won't bother it. But what makes Styrofoam even more outstanding is its unparalleled performance in such fields as low-temperature and plaster-base construction . . . industrial equipment . . . roofs, cavity walls and wall panels. This clean, odorless, lightweight insulation has many applications that are well worth your investigation. You'll find Styrofoam pays off in lifelong efficiency and economy.

*Styrofoam is a registered trademark of the DOW CHEMICAL COMPANY

YOU CAN DEPEND ON

How to use RUBEROID QUALITY to build sales as well as homes

Premium materials, nationally advertised, mean extra assurance for buyers, easier selling for you.

Few home buyers know how to evaluate house quality. They can see the design, of course, and ask about local taxes, schools—but they're lost when it comes to construction features. One way to reassure them that your homes offer real quality is to use — and promote — Ruberoid building materials. Fireproof siding that can't rot . . . windsafe asphalt roof shingles . . . asbestos roof shingles that can't wear out . . . Fiberglas* insulation that prospects recognize as the best name in the business—these are easy-to-describe construction features that impress buyers and build prestige for all homes you sell. Here are some of the best points your salesmen can pass along to prospects. They are easy to remember, and convincing assurances of quality that help close orders.

Now! Offer buyers this new Ruberoid exclusive — a written *Wind Warranty!* Hidden-tab design locks shingle butts down through worst storms. New Warranty covers Lok-Tabs against blow-offs — even in hurricanes! The first really new shingle feature in 20 years!

A36

ROOFING

EXTRA HEAVY SUBURBANS

Extra heavy for extra protection. A de luxe asphalt strip shingle with modern styling! Striated texturing gives

"shake" look. Dark color band creates handsome shadow line. Wide choice of beautiful colors.

TOUGH, LONG-LASTING SQUARE-TABS

The world's most popular shingle with a wide color range offers new modern beauty for any home. Made

of durable, fire-resistant asphalt for long, trouble-free life. The quality standard strip shingle.

"NEVER WEARS OUT" AMERICAN THATCH®

(Pat. No. 2,687,701)

ASBESTOS ROOF SHINGLES

Made of fireproof asbestos and cement . . . secure against storm damage by copper anchors. Duroc® finish protects colors from the sun, weather, dirt. "Thatch" design gives three-dimensional look. Wide range of beautiful, two-tone colors.

AMERICAN BUILDER

SIDING

FIREPROOF

CLAPBOARD

AUTOCLAVED
SIDING

Can't burn, rot or be eaten by termites. Ruberoid Autoclaved Clapboard combines rich, new lasting colors—protected from dirt and weather by Ruberoid's exclusive Duroc® finish. There's virtually no maintenance expense.

HIGH STYLE

VITRAMIC® SIDING

Self-cleaning asbestos siding with a vitreous ceramic surface. "The finest siding made." Repels dirt, needs no paint, assures life-of-the-house beauty.

Fireproof, rotproof, weatherproof. *Now available in white and seven new decorator styled colors with dramatic shadow effect.*

"LASTS A LIFETIME"

STONEWALL BOARD

FOR BOARD AND BATTEN

Decorative residential side-walls of asbestos cement. Permanent, fireproof, rotproof! Just score and snap it to size. Comes in standard 4' x 4' and 4' x 8' sheets. No upkeep! Hard, smooth surface is easy to clean. Takes paint beautifully! Use it for soffits gable ends and 1001 new home construction uses.

INSULATION

FIBERGLAS* INSULATION

*Reg. T.M. OCF Corp.

Lightweight, high efficiency home insulation in roll blankets, batt blankets, utility batts and perimeter insulation.

Choice of aluminum foil or kraft paper enclosure to keep heat *in* in winter, *out* in summer. Outside perforated for "breathing," inside vapor-proofed to prevent moisture condensation. Roll blanket lengths 3 to 80 feet, batt blankets in 24", 48" and 96".

PLUS...

Crawl-space cover, reflective insulation, reinforced kraft papers and other important fast-selling profit makers are among the over 100 Ruberoid quality building material products. For information on these and other quality Ruberoid products, see your Ruberoid dealer.

Bondable*

NEW MOTOROLA PLANT
WITH CRYSTALITE ROOF

AND PRICED FOR EVERYONE

CRYSTALITE HIGHLY REFLECTIVE MARBLE White Roofing Aggregate

Sparkling white Crystalite makes a beautiful built-up roof... and it's approved for bonding by leading roofing material manufacturers. Crystalite is a hard, non-porous limestone marble. It will not crumble, deteriorate or change color. Because of its heat reflective properties, air conditioning expense is greatly reduced. Crystalite looks expensive yet costs very little more than the cheapest aggregates, and is easy to handle. It is clean, dry and ready to use.

NEW BEAUTY
NEW LIVING COMFORT
NEW CONVENIENCE
NEW ECONOMY

Insulation	Size Furnace	Size Air Conditioner	Annual Cost of Operation
Maximum—using Aluminum-Surface Insulation	75,000 btu	2-ton	\$144
Standard FHA-Specified	90,000 btu	3-ton	\$204
None	105,000 btu	4-ton	\$288

This table is based on scientific findings described in Alcoa's new book, *Comfort Everybody Can Afford*.

WITH ALUMINUM-CLAD INSULATION central air conditioning fits any new-home budget

Significant cost advantages of adequate aluminum-clad insulation are shown in this comparison of equipment for a 1,200-sq ft house under typical climatic conditions. Show buyers that savings like these are possible with aluminum-surface insulation. These figures can help you sell more units in 1957.

**Furnace and air conditioner are
smaller . . .
monthly operating costs are
lower**

Adequate aluminum-clad insulation using ALCOA® Aluminum puts year-round comfort—with central air conditioning—within the reach of the popular-price-home buyer. Because a smaller furnace and a smaller air-conditioning unit are possible, both equipment costs and operating costs are markedly lower. Here's a powerful sales stimulant that can give you the competitive edge. The whole story is in ALCOA's new book on insulation, *Comfort Everybody Can Afford*, which contains the important findings of recent ALCOA-sponsored research. Every builder should have a copy. For yours, simply fill in the coupon.

HERE'S PROOF—This properly engineered, 1,273-sq ft home in Toledo is heated and air conditioned for less than \$12 a month. Maximum effectiveness of its aluminum-clad insulation has been assured by solar orientation, shade trees and correct roof overhang.

ALCOA does not make insulation of any kind. It makes ALCOA Aluminum Foil, which many manufacturers use to produce several types of insulation.

HEATILATOR®

the first choice of home builders
and buyers

HEATILATOR UNIVERSAL DAMPER

Designed and engineered for
open-sided fireplaces

The Universal Damper incorporates both smoke dome and damper in one compact unit. Its scientific proportions are essential to smoke-free operation. Sloping sides of dome permit a back-up course of masonry above damper for safety. Reinforced flange serves as lintel. Damper blade, with chain-pull control, holds firmly in any position.

The Universal Damper simplifies construction with a saving in time and labor. Available in 5 sizes for fireplaces with 2, 3, and 4 open sides.

HEATILATOR SERVICE-WAY

The service entry for
modern basements

Home buyers want the convenience of Service-way—one of the most practical ways for the home owner to get full use of his basement. It solves the problem of storing garden tools, outdoor furniture and recreational equipment. The wide single door is counterbalanced to swing up and out of the way at the touch of a finger.

The Service-way is built of heavy gauge steel—electrically welded and reinforced. Comes fully assembled, ready to install.

and buyers

Heatilator units are available in a wide range of sizes for fireplaces with openings from 28" to 60" in width and fuel capacities up to 48".

the genuine HEATILATOR FIREPLACE UNIT

A heat-circulating fireplace unit that assures smokeless, trouble-free operation—that's what builders and owners look for when they are planning a home. That's why there are more genuine Heatilator Fireplaces in use today than all other makes combined!

...Heatilator design has kept in step with progress over the years. It is the only unit specially engineered for today's modern homes.

...it's the only fireplace unit with a positive Pressure-Seal Damper. Prevents loss of heat in winter and costly summer air conditioning when fireplace is not in use.

...sturdily constructed with fully welded seams throughout. The one-piece boiler plate firebox is designed for a lifetime of trouble-free service.

...easy to install. No chance for construction errors. Takes any size or shape flue.

Write for full information and specifications to Heatilator Inc., 824 E. Brighton Ave., Syracuse, N. Y.

FRY

RY proudly points to its performance record of "20 years without a single roofing failure." Think what a clincher this can be in selling top quality (which means top profit, too) asphalt shingle or built-up roofing!

ROOFING that's *full-value* bonded for 20 years—this is the real explosive for demolishing sales obstacles. FRY is the one and only nationally advertised roofing backed by such an "eye-opening" sales weapon—another reason why it's easier to sell FRY!

YOU sell higher quality, more *profitable* roofing when you sell FRY. And your sales are speeded by FRY's aggressive, "full-value 20 year bond" advertising in leading consumer magazines—PLUS a treasure chest of *free* promotional helps for your local use. Write **TODAY** for complete details!

Thousands of Contractors Rely on the New Bostwick Expanded Corner Bead

As straight as a string . . . no crooked ends . . . no bows . . . that's it every time with Bostwick Expanded Corner Bead. All this is due to a brand new Bostwick expanded corner bead machine. It has electronic controls to bring you product uniformity. That's how Bostwick can give you these six time-saving features, and no call-backs for premature repairs at six cents per minute:

1. Straight end to end
2. Ends sheared square
3. Plaster key to the edge of the bead
4. Uniform width wings having same angle to the nose
5. Special non-peel galvanized coating
6. Special expanded small mesh wings

Your dealer can get Bostwick quickly if he doesn't have it in stock. You won't like a substitute as well. Want a sample?

WESTERN RED CEDAR
Home Selling Ideas
 Designed By Green, Sibold and Associates, AIA

INSIDE-OUTSIDE

Glaze a panel of glass right into 8" or 10" siding—Western Red Cedar doesn't shrink. The sweeping shadow lines form a pleasing pattern for the eye to follow into the entrance hall...it's an economical "plus value," using versatile Western Red Cedar to build in another sales point.

EFFECTIVE DESIGNS

Either Siding or Paneling designs easily into patterns of beauty...for hall ends, over mantles, entrances, garage doors, planters or ceilings. Cedar's natural beauty and warm color tones produce focal points for interesting individuality. Build this simple 4' square of 1/2" x 6" Beveled Siding. Your cost will be surprisingly low. There's no extra material to buy—use the same Western Red Cedar Beveled Siding that goes up on your home exteriors.

You "Build-in" Sales Points
WITH RED CEDAR

The genuine natural wood color of versatile Western Red Cedar gives that saleable quality-tone to your homes. Red Cedar is easy to decorate...easy-to-work...and goes up fast *without* mechanical application gimmicks.

Ask your lumber dealer for the kiln dried, clear grades of Western Red Cedar.

Write for our "Cedarhome 1965" sketch, technical and merchandising information.

The permanent
protective overlay for plywood

CreZon overlaid plywood siding gives

EXTRA CONSUMER APPEAL

● Homes with CreZon overlaid plywood siding find a ready market . . . they look better, last longer and slash maintenance costs through the years—important sales features for today's discriminating buyers.

This tough, weather-resistant CreZon surface won't check or blister, holds paint years longer . . . and it saves time and money in construction too!

With lap siding you run fewer courses because CreZon plywood comes in wider widths of 12", 16" and 24". It butts accurately, nails easily without drilling, works cleanly without splintering. CreZon plywood siding speeds work, takes fewer man hours to apply. And you save 19% on trim loss (CreZon siding has a trim loss factor of only 1% compared with the accepted waste figure of 20%).

You save too on paint and painting time because the velvet-smooth CreZon surface has a natural

affinity for paint, takes paint easier, holds it better. And you don't have to waste time preparing the painting surface—no sanding or patching, and some sidings are pre-primed too.

CreZon plywood is opaque; it has no grain pattern. Nor is there any chance of grain rise marring your painted surface.

Find out how CreZon plywood will help you sell more homes with a saving in labor and materials. You can obtain CreZon plywood in sheets for flat siding or pre-cut as lap or bevel siding.

CreZon plywood is available through the leading manufacturers and their distributors listed below. Consult your Yellow Pages for the company nearest you or write Dept. CR, Crown Zellerbach, 343 Sansome Street, San Francisco, California.

SEALTIGHT *Premoulded Membrane*

TRADE MARK

the industry's only **TRUE** VAPOR SEAL

Eliminates

- EXCESSIVE WINDOW CONDENSATION
- EXCESSIVE BASEMENT DAMPNESS—RUSTING OF TOOLS
- BLISTERING OF EXTERIOR PAINT
- DETERIORATION OF INSULATION VALUES
- DETERIORATION BY MILDEW OF RUGS, FURNISHINGS, SHOES AND CLOTHING

The only sure way to "eliminate" the ravages of destructive moisture is with the installation of "Premoulded Membrane" during the original construction . . . all other methods are merely temporary "stop-gaps." When specifying or installing a vapor seal, be sure it meets these Sealtight standards of quality: permeance rating of only 0066 grains per square foot . . . resistant to rot, mold and termites . . . expandable . . . quickly, easily and permanently installed . . . ONLY "Premoulded Membrane" meets them all.

IDEAL FOR ALL TYPES OF CONSTRUCTION

This illustration shows how the installation of Premoulded Membrane and Corktite completely isolates the slab and superstructure from soil moisture.

The proper installation of Premoulded Membrane and Corktite removes all danger of condensation and oxidation of metal installations in the crawlspace area . . . eliminates the need for ventilation.

The proper installation of Premoulded Membrane to the exterior of the basement walls as well as beneath the floor slab insures a permanently warm and dry basement.

ARCHITECTS, BUILDERS, DEALERS . . .
WRITE TODAY for complete information that tells you where, why and how to use Sealtight Premoulded Membrane, the only true vapor seal and Corktite, the resilient, impermeable perimeter insulation.

Quality They Can See...

A
Follansbee Terne
Roof!

The **NEW**
Bermuda Roof
of
Follansbee Terne

A Bermuda roof of Follansbee Terne will give your houses a distinctive beauty that prospective buyers can see—a visible quality that sells its value!

If you would like more particulars about the Bermuda roof of Follansbee Terne, we will be happy to send you additional information about installation and cost. Other data also appears in the Architectural and Light Construction Files of Sweet's Catalog.

... and a Terne Roof Will Sell Your Homes!

Normally, your prospective home buyers may not ask about the roof. But a Terne roof has a distinctive quality those buyers can see—and a feature you can sell.

They will be impressed to know that a Terne roof will last as long as the house stands... a Terne roof is fireproof, weather-tight, windproof and can be painted any color, anytime, to harmonize with the house exterior. And if the house is air conditioned, a light-colored Terne roof will reflect more of the sun's heat than any other type of roof.

The beauty and serviceability of a Follansbee Terne roof is that added attraction that will help you sell your homes quickly.

Roofing and sheet metal contractors everywhere will install Follansbee Terne Roofs.

They're getting "new house" ideas

Big four-color spreads in Better Homes & Gardens tell your prospects to look for Barrett materials in the homes they buy.

The millions of men and women who read "home" magazines go house-hunting with well-informed notions. For one thing, they know how to push aside the fancy frills and look for evidence of lasting quality.

So be sure to let them know you use Barrett building materials in the homes you build. For the Barrett name has a long-standing reputation for quality.

Backing up this reputation, two-page, four-color spreads appear in Better Homes & Gardens to tell your prospects, "It's Better Built with Barrett!" And today the name Barrett means more than roofing. It means a full line of building materials

DUR-O-WAL prevents cracking and adds lateral strength to masonry walls at low, low cost . . .

DUR-O-WAL[®]

RIGID MASONRY WALL REINFORCEMENT

- Mechanical bond every 8 inches of wall
- Electric butt welds place all rods on a single plane
- Deformed side rods lay straight and flat
- Trussed design causes side rods to work together
- Two mortar locks at each weld
- Deformed side rods for maximum bond strength
- Conforms to ASTM Standard A-82-34 for high tensile steel
- 10 foot lengths for easy handling
- 6 inch lap at splices develops continuity and maintains reinforcing strength
- All steel in single plane makes possible uniform mortar joints

What an X-ray would show where Dur-O-wal

is used in every second course 16" c. to c.

DESCRIPTION:

Extra Heavy Dur-O-wal is manufactured with 3/16 inch (.1875) Side Rod and No. 9 (.1483) Cross Rod. Standard Dur-O-wal is manufactured with No. 9 (.1483) Side Rods and No. 9 (.1483) Cross Rod.

SELECTION TABLE

Wall Thickness	4 in.	6 in.	8 in.	10 in.	12 in.	13 in.
Extra Heavy Dur-O-wal	4-EH	6-EH	8-EH	10-EH	12-EH	13-EH
Wt. per 1000 lin. ft.	247 lb.	250 lb.	257 lb.	266 lb.	276 lb.	282
Standard Dur-O-wal	4-S	6-S	8-S	10-S	12-S	13
Wt. per 1000 lin. ft.	178 lb.	180 lb.	187 lb.	196 lb.	207 lb.	212

Furnished in either bright basic or galvanized steel. Specify Drip Sect Dur-O-wal for Cavity Walls.

NOTE — In determining whether to specify Standard weight or Extra Heavy weight Dur-O-wal, comparisons in following table should be properly evaluated:

	Weight lbs. tensile steel per lin. ft.	Surface bond area—sq. in. per lin. ft.	Number mortar locks per lin. ft.
Standard weight Dur-O-wal	0.19	11.18	3
Extra Heavy Dur-O-wal	0.26	14.14	3

CAVITY WALLS

Cavity walls shall be reinforced with drip section deformed Dur-O-wal in the first and second bed joints (8" c to c) immediately below window sill and first and second bed joints (8" c to c) above window lintels and every second bed joint (16" c to c) throughout remainder of masonry area. Dur-O-wal in first bed joint immediately above and below openings shall be continuous. In second bed joint it shall extend two feet beyond each side of opening. Joint reinforcement shall be wide enough to extend to within one inch of both exterior and interior faces of wall. Diagonal cross rods that serve as ties shall be formed with a drip and shall be of non-corrosive (galvanized) metal. Drip can be placed at center or off-center in cross rod as required. Codes generally call for a minimum of one 3/16 in. tie for each 3 sq. ft. of wall. Dur-O-wal exceeds this requirement and provides maximum anchorage with positive and uniform spacing of ties.

COMPARISON TABLE VARIOUS TYPE TIES

Type	Spacing	Cross Sectional Area of Ties per sq. ft. wall
Z-Bars	1 for each 3 sq. ft.	.009 sq. inches
Rectangular	1 for each 3 sq. ft.	.0184 sq. inches
U-Bars	1 for each 3 sq. ft.	.0184 sq. inches
Dur-O-wal	Spaced 16 in. o.c. vertically	.0207 sq. inches

Dur-O-wal for Cavity Walls is furnished with steel side rods and galvanized cross rod or with all galvanized steel rods.

EXTERIOR WALL BEARING CONSTRUCTION

Joint reinforcement — Dur-O-wal — shall be placed in first and second bed joints (8" centers) immediately below window sills and first and second bed joints (8" centers) above window lintels and every second bed joint (16" c to c) throughout remainder of masonry area. Joint reinforcement shall be wide enough to bridge air space and shall be 2 inches less in width than normal thickness of the wall. Minimum mortar coverage on exterior exposed face of wall shall be not less than 3/4". Reinforcement shall be lapped sufficiently at splices to insure continuity and corners shall be cut and bent as shown in details.

WALLS OF STACKED COURSING

Masonry walls of stacked coursing of through wall units or stacked coursing of brick not bonded to backup shall be reinforced with deformed Dur-O-wal placed in every course (8" c to c) and shall be wide enough to extend to within one inch of both exterior and interior faces of wall.

INTERIOR PARTITIONS

Interior partitions shall be reinforced with deformed Dur-O-wal in first and second bed joints over door openings (8" c to c) and every second course (16" c to c) throughout remainder of masonry area.

BRIXMENT MAKES

BRIXMENT is a waterproofed masonry cement for every kind of brick, tile, concrete block or stone masonry, and also for stucco and plaster. Brixment complies with the requirements of the American

Society for Testing Materials Specification C91 and the Federal Specification SSC-181 for Masonry Cement (both Type I and II). Specify one part Brixment, three parts damp sand.

BRIXMENT MAKES SOUND MORTAR

The autoclave test requires the use of a high pressure steam chest. Neat cement bars are exposed to 295 lbs. steam pressure, 420° F., for 3 hours. The two bars above the ruler are both Brixment, one before and one after autoclaving. The Brixment is sound—it has not expanded. The two bars below the ruler are portland cement and lime, one before and one after autoclaving. They are made of one part portland and one part of a lime which does not meet the autoclave test. Note the expansion—proof of unsoundness.

Unsoundness in mortar material is readily detected by the autoclave test. This severe test rapidly accelerates the chemical reaction of mortar materials, and the slightest unsoundness is immediately revealed by excessive expansion.

Brixment easily meets the requirements of the autoclave tests included in Federal and ASTM Specifications for Masonry Cement. Therefore, when Brixment is used, sound mortar and strong, durable brickwork are assured.

BRIXMENT IS WATERPROOFED

Prepare two slabs of mortar, one with Brixment and one with ordinary cement-and-lime mortar. After mortars have hardened, seal a lamp chimney to each of the mortar slabs, and fill with water.

After 24 hours, note how much water has gone into and through the ordinary cement-and-lime mortar and how little water has gone into or through the Brixment mortar.

Brixment is waterproofed, during manufacture, with the most effective air-entraining water-repelling agent known. Even under pressure, water cannot readily penetrate Brixment mortar. Brixment meets the special requirements of Federal Specification SSC-181 for water-repelling masonry cements.

BRIXMENT MORTAR HELPS PREVENT LEAKY WALLS

When a wall leaks, water almost never passes through the brick or through the mortar. It works its way through cracks or openings between the brick and mortar.

The best precaution, therefore, is to parge or back-plaster the face brick with waterproofed mortar before the backup units are laid. Therefore, if the face brick are back-plastered with Brixment mortar, a water-repelling barrier is set up against the further penetration of any water which may have worked its way through cracks or voids in the outside four inches of the wall.

This kind of brickwork will not leak. All head-joints are full and the face brick are back-plastered before the back-up brick are laid.

BETTER MORTAR!

BRIXMENT MORTAR IS MORE DURABLE

To compare the durability of Brixment with that of ordinary cement-and-lime mortar, make a cylinder of each, let both cure for a month, then freeze and thaw them 40 or 50 times with a little water in the pan.

After a number of freezings and thawings, you will note that the cylinder of Brixment mortar retains its original condition, while the cylinder of non-waterproofed materials has badly crumbled and scaled.

Brixment mortar *is durable*. This durability is due partly to the strength and soundness of Brixment mortar, and partly to the fact that an air-entraining water-repelling agent is incorporated into Brixment during manufacture. This helps prevent the mortar from becoming saturated—therefore helps protect it from the destructive action of freezing and thawing.

BRIXMENT MORTAR HELPS PREVENT EFFLORESCENCE

Brixment helps prevent efflorescence. The air-entraining water-repelling agent in Brixment helps to prevent water from saturating the mortar and dissolving the small amount of salts that it may contain. Moreover, Brixment mortar prevents water from percolating down through the wall, dissolving salts which may be in the brick, and carrying them to the surface.

To test Brixment and ordinary cement-and-lime mortar for resistance to efflorescence, "cap" two brick heavily with the mortars—let harden, and keep both brick for a few weeks in a shallow pan of water as shown. See the difference with Brixment mortar!

BRIXMENT MORTAR ASSURES STRONG WALLS

The strength of Brixment mortar is more than adequate for any type of brickwork. It is recommended for foundations, loadbearing and cavity walls, for free-standing stacks—for every kind of masonry where strength is required.

Brixment mortar is equivalent in strength to 1-1-6 cement-and-lime mortar. It meets the requirements of ASTM specification C270 for mortar, type N.

BRIXMENT MORTAR HAS BETTER WATER-RETENTION AND GREATER PLASTICITY

Place a dab of Brixment mortar and a dab of ordinary cement-and-lime mortar on a brick. Wait a minute, then feel each mortar. The one that stays plastic longer will be the one having the highest water-retention. Feel the difference with Brixment mortar!

Brixment mortar has high water-retaining capacity. Brixment strongly resists the sucking action of the brick and stays smooth and plastic longer when spread out on the wall. *This permits a more thorough bedding of the brick and a more complete contact between the brick and the mortar.* Brixment's exceptional plasticity has made it the most widely-used masonry cement in the field. Brixment makes it easy for the bricklayer to secure neat, economical brickwork.

Flintkote Insulation Roof Deck
 gives you functional, practical and decorative advantages
 for popular open beam construction...

OUTSIDE... ■ ■ ■

No one needs to tell you how increasingly popular open beam design is becoming. Not only for custom-built luxury homes... but for even lower priced houses.

However, have you discovered the new material that makes open beam construction easy, rich-looking and money-saving? Flintkote Insulation Roof Deck.

In addition to a fine appearance, Flintkote Roof Deck provides high structural strength, unusually fine insulation qualities.

It eliminates the use of old-fashioned materials... simplifies and speeds application. Reduces material handling, sawing and nailing. Cuts labor costs as much as 50%.

and

INSIDE...

Flintkote Insulation Roof Deck is decking, insulation, and pre-finished ceiling all in one. The beautiful open beam ceiling it produces makes a home seem more spacious, more gracious. At low cost.

There are also worthwhile savings because Flintkote Insulation Roof Deck eliminates the need for further insulation. And because these products are prefinished... so that they do not require painting.

Flintkote Roof Deck provides a strong roof... that resists cracking or warping. A roof that makes heating and air conditioning both highly efficient and economical.

THE FLINTKOTE COMPANY, Building Materials Division,
 30 Rockefeller Plaza • New York 20, N. Y.

Flintkote Insulation Roof Deck is manufactured in two types. One, with a built-in vapor barrier and a factory-applied joint sealer in the groove on the long edge (as indicated in illustration), was designed for use in areas where the average January temperatures are lower than 40° F. The other, without vapor barrier or joint sealer, is for use in areas where the average January temperatures exceed 40° F.

...the extra years of service cost no more!

FLINTKOTE

MASONITE®

RIDGEGROOVE SIDING

Up Fast!

You cover large wall areas quickly. Full-dimension panels are 4' wide and up to 16' long. Quickly, securely fastened. Shiplapped edges. Little dimensional loss...low cutting loss...no knots or splits.

Finished Fast!

Takes paint or stain quickly, evenly. No knots or grain to rise; walls keep their "just painted" look.

Sold Fast!

The "luxury look" at low cost. Distinctive appearance with ridge-textured surface and grooves 4" or 8" apart or at random widths.

1. 2·4·1

subfloor-underlay

2·4·1 is the new 1½" plywood that makes possible the revolutionary "panel and girder" floor construction system that saves from fifty to five hundred dollars per house.* It also gives you markedly superior construction. You save on both framing costs and application time. And because 2·4·1 has structural strength *plus* smooth surface, it serves as *both* subfloor and underlayment. More savings!

*Actual savings reported by builders vary with local wages, size of house and type of floor construction previously used.

3 ways to get **DOUBLE VALUE**

2. Texture One-Eleven[®] siding-sheathing

Here's another way to sharply cut costs by doing two jobs with one material. With Texture One-Eleven siding, you can eliminate sheathing. This new vertical shadow-line Exteriorplywood adds crisp good looks to any style home. Panel is 5/8" thick, with 1/4" deep grooves, leaving a full 3/8" thickness under grooves, meets FHA MPRs for combined siding-sheathing.

For complete information about 2·4·1, Texture One-Eleven and Overlaid plywood write for free "Plywood Light Construction Portfolio." (Offer Good USA Only). Douglas Fir Plywood Association, Tacoma 2, Wash.

New 2•4•1 serves as both subfloor and underlay, spans 4' girder spacing. Inset 2x4 blocking supports panel edges. Finish floor may be hardwood, tile, carpet.

Girders set flush with footings lower house about 12". Result: important savings in labor and materials plus a visual bonus achieved by giving house attractive "low-lying" feeling.

with fir plywood

3. Overlaid Plywood siding-sheathing

Overlaid fir plywood also has the "plus" structural strength to serve as *both* siding and sheathing. The smooth, durable resin-fiber overlay is permanently fused to Exterior fir plywood to provide the perfect base for smooth, long-lasting paint finishes. Overlay eliminates checking, grain raise. Available in standard sizes, thicknesses. May be used as flat panel, board and batten or lapped siding.

Accent!

the simple beauty of this sparkling White Top Roof

White Top's crystalline marble chips enhance the home and its landscaping, present a clean and beautiful appearance that catches a prospect's eye. Behind this beauty is the famous enduring quality of marble. Maintenance is practically unknown. Even more than that, White Top will save heat and air-conditioning bills. This dense, crystalline marble has the *lowest* absorption and *highest* reflectivity of any known roofing materials. That helps bounce the heat back in summer, bar the cold in winter.

White Top is the ultimate in roofing—the symbol of the kind of quality prospects want to buy.

Certain-teed® 12" THICK BUTT SHINGLE Sealdon®

the modern self-sealing shingle!

It goes down in a BREEZE... stays down in a GALE!

Sealdon application is fast and easy. A special adhesive-repellent silicone paper separator keeps Sealdons from sticking together in the bundle. They slide apart at a touch. They're packaged so every other shingle can quickly be flipped over into nailing position. Clumsy end-over-end "flopping" is eliminated. The silicone paper separators remain on the underside of each shingle—eliminating tedious removal by hand, as well as time-consuming cleanup on the job.

Every Sealdon shingle has a strip of special sealing compound factory-applied to the underside of the shingle tab. As the sun beats down, each Sealdon seals itself securely against every kind of wind or weather. The sealing compound is applied in "dashes" to channel off rain and snow—preventing the damage that water accumulations might otherwise cause. A Sealdon roof will give many years of trouble-free service under the most severe weather conditions.

This latest addition to the Certain-teed line of quality roofing materials has built-in benefits for homeowners, builders, roofers and dealers alike.

Sealdon is self-sealing. It stays put in any weather. It means longer roof life, fewer repair bills, greater all-round economy for the homeowner.

Sealdon is designed and packaged with the builder and roofer in mind. Application is faster because waste motion is reduced. Labor costs are lower. The unique way Sealdons

are bundled considerably simplifies handling on the job.

Sealdon is a sure seller for dealers. Besides its self-sealing features, it has the same long-wearing characteristics and wide range of beautiful colors that have long been associated with Certain-teed Thick Butt Shingles.

Get complete details about new Certain-teed Sealdon Asphalt Shingles. Contact your nearest supplier—or write direct to us.

ASPHALT ROOFING • SHINGLES • SIDING • ASBESTOS CEMENT SHINGLES AND SIDING
FIBERGLAS BUILDING INSULATION • ROOF INSULATION • SIDING CUSHION
PAINT PRODUCTS—ALKYD • LATEX • CASEIN • TEXTURE • PRIMER-SEALER

This laminated roof is constructed of random thickness lumber, interlaced at the roof peak for additional sturdiness. Cantilevered over the supporting beam at the right, the structure is given both stiffness and pattern by the angled bracing at left. Siding of rough sawn one-inch stock adds interest to the wall texture.

For high salability and ease of construction, build with wood—always economical, ever modern. And for dependability, use the West Coast species, Douglas fir, West Coast hemlock, Western red cedar, Sitka spruce.

THERE ARE ALWAYS NEW USES FOR WEST COAST LUMBER

One of many fine, modern homes designed by Van Evera Bailey, architect, A.I.A. His designs are noted for effectively combining livability and a sense of spaciousness.

A MASON TELLS WHY...

"THE ONLY CHOICE FOR UNUSUAL FIREPLACES IS THE *Beneform* UNIVERSAL DAMPER"

"These modern fireplaces ... open on 2 or 3 sides, or sometimes all around ... were a headache before I started using the Beneform Universal Damper. Beneform saves my time in many ways ... and gives a perfect, smoke-free job every time. Start by setting the hearth; put post in position ... and you're ready to go."

"Just set the Beneform on the brick, on two sides, and on corner post. Since Beneform has three straight sides, it's an easy matter to lay up brick. No lintel bars are necessary. Beneform's flange is 3½" wide, strong enough to carry any load. Masonry is laid right on the flange. No fancy, time-consuming brick-work here."

"With Beneform, the down draft shelf can be built at any of the four sides, depending on best location for the stack. Flue is offset, with down draft shelf directly below it, front edge of flue in line with back end of damper. Smoke chamber is sloped at 60°, with clearance provided for free opening of damper valve."

"That's about it ... here is a truly beautiful fireplace that will give years of pleasure, with no smoke or draft worries for the homeowner—or me. Incidentally, I usually install the exclusive Rotary Control, because it operates easily and has little to get out of order. If you haven't tried Beneform, you are behind the times!"

BENEFORM LETS YOU BUILD FASTER, BETTER, AT LOWER COST— Beneform is the easy answer to the need for lower construction costs in *unusual* fireplace openings. It assures *low cost* and gives the strong, smoke-free draft so vital in unconventional fireplace design.

BUILDS ALL 6 BASIC OPENING TYPES— No matter which fireplace type you're building ... projecting corner, 2-sided or 3-sided openings, open all around, opening in 2 rooms, etc. ... Beneform will build it *better*, and at *lower cost*.

SIX STOCK SIZES AVAILABLE— from 26" x 26" up to 50" x 24". Complete specifications, prices and construction details furnished upon request.

SEE YOUR LOCAL BENNETT SUPPLIER ... for the complete Bennett line, including Beneform Fireplace Forms, Ash Dumps, Dampers, Grilles, Grates, Lintels, etc. Write to Bennett Ireland Inc., Dept. C, Norwich, N. Y. for complete catalog.

AUTHORITIES ON FIREPLACES

Briar Hill

GOLDEN TONE SANDSTONE

Beautiful tones of buff, gray, tan, brown, pink. Arrives in near ready-to-set condition. Provides greater coverage because of minimum waste. Available in 2¼", 5" and 7¾" heights of ashlar veneer, approximately 3½" in width. Can be ordered accurately on coverage basis (see chart below). Furnished in random length strips, unjointed, with split face. Top and bottom beds sawed to provide easier, faster setting. Only ordinary masonry tools required. Set with any portland or natural cement. Resists water and weathering. Costs little more than ordinary wall facings. Helpful advisory service available to builders without charge or obligation.

COURSING PATTERN	Sq. Ft. Wall Per Ton
 <p>16% — 2¼" 47% — 5" 37% — 7¾" MOST POPULAR PATTERN</p>	45 Sq. Ft. ½" Mortar Joints
 <p>2 Heights — 2¼" 1 Height — 5"</p>	50 Sq. Ft. ½" Mortar Joints

HOW

HEATFORM

The Superior Heat
Circulating Fireplace Unit

**HELPS SELL
HOMES**

Ninety percent of the people building or buying homes want a fireplace.

They expect the designer and builder to give them a fireplace that will deliver to the home the largest possible volume of smoke-free heat. There is only one way to meet these specifications and that is to build the fireplace around the HEATFORM unit.

Countless thousands of home owners now enjoying the comfort provided by the HEATFORM fireplace, with economy of fuel consumption, are telling their friends and neighbors, "Don't buy or build a home without a HEATFORM heat circulating fireplace."

A HEATFORM fireplace costs but little, if any, more. It is a complete double-walled form, built to proper angles and dimensions. It consists of firebox, throat, smoke-dome, and properly hinged and operated damper. It is a perfect guide for the masonry walls (hearth to flue), replacing some materials and time necessary to construct the ordinary fireplace... a matter of vital importance to the multiple home builder.

HEATFORM is the only heat circulating fireplace unit made in four models and various sizes to accommodate both conventional and multiple opening fireplaces. The smart builder is capitalizing on the 35-year reputation of HEATFORM and has found a HEATFORM fireplace is one of the major selling features of the home. HEATFORM is your insurance against heat waste and smoke trouble.

MODEL "A" with front warm-air outlet for greater heating efficiency and economical installation. Warm air could be taken from side outlets and through the mantel shelf or carried to the ceiling height, if desired.

MODEL "S" corner fireplace, with view of fire from front and either side. Model "M" (not shown) provides view of fire from front and both sides.

MODEL "D" for fireplaces serving two rooms, with a cool-air inlet and warm-air outlet in each.

Exclusive HEATFORM Advantages:

- ribbed reinforced boiler plate firebox for greater strength and appearance
- all metal parts beneath chimney sealed with masonry against corrosion caused by moisture contact
- greater air inlet and outlet capacity and contact of air to all heating surfaces removes heat rapidly to prevent metal from reaching deteriorating temperatures
- more heating surface. Air chambers surround the firebox and also the upper throat, with connecting air passages through and at each end of the throat, to eliminate dead air pockets and increase velocity of air circulation
- friction control holds damper in any desired position

Vitroliner Leads Again

prefabricated **VITROLINER CHIMNEYS**

with **Protecto-Top**

FOR ALL FUELS!

VITROLINER offers Architects, Project Builders and Building Contractors MORE FLEXIBILITY, CHOICE, SELECTION, QUALITY and MORE SPECIAL FEATURES than any "prefab" on today's market.

VITROLINER offers MORE TYPES of Chimneys—Type "E" and "L" for ceiling or basement installation. It offers MORE FLUE SIZES for the one CORRECT size, the heating plant requires. There is also MORE permanent basic engineering—and MORE QUALITY MATERIAL, time-tested, tried and proven successful, for over fifteen years.

The Chimney is MORE COMPLETE—Tailor-made to fit the individual job—no cutting or fitting—packaged and shipped direct from the factory. The "KD" Knocked-Down complete Housing Package is MORE quickly shipped from nearby Vitroliner Distributors and Dealers.

VITROLINER IS PREFERRED BECAUSE OF THESE SPECIAL FEATURES

- LOWEST INSTALLATION TIME.
- SAVES FLOOR SPACE IN UTILITY ROOM.
- LIGHTWEIGHT—10-15 LBS. PER FT.
- TAILOR-MADE FLUE HOUSING AND ROOF FLASHING.
- CHOICE OF FLUE DIAMETERS—6", 7", 8", 10" and 12".
- PROVIDES ATTIC VENTILATION.

LISTED BY UNDERWRITERS LABORATORIES FOR ALL FUELS. APPROVED BY BUILDING AUTHORITIES. EXCEEDS F.H.A. AND V.A. MINIMUM CONSTRUCTION REQUIREMENTS.

THE NEW BEAUTY OF CONCRETE MASONRY

(Right) Exposed masonry wall in living room of palatial residence. 8" stacked units alternately protruding to obtain pleasing shadow effects.

Concrete brick with extruded mortar joints and long low split units combined in this ranch type home.

The many new applications of concrete masonry in new construction appear to be one of the more interesting developments of the current building boom. In fact, the upsurging popularity of concrete masonry as evidenced by the tremendous demand for standard and split block, seems to be the consequence of not only construction economy but of constructive thinking as well.

Certainly the many novel and interesting concrete block effects now noticeable in new home designs are far from the ordinary.

Horizontally stacked 8" x 8" x 16" units enhance the natural beauty of this "all block" office building.

These effects range all the way from major structural innovations such as the use of chimney block on edge, to create a 3D effect, to striking entrance designs. Block stacked horizontally or vertically may also be seen in many new applications.

Of course, it is in the wide variety of design that Vibrapac block has long offered outstanding opportunities. And it is in this respect that its use has increased enormously. New patterns, textures, colors and sizes of

Unusual effects in concrete block construction bring new opportunities to designers and builders . . .

Vibrapac block now available, bring designer and builder virtually an artist's palette for creation of new structural beauty. Endless variations of rooms, corridors, stairways, basements, fireplaces, etc., are possible by simply varying the selection and laying of Vibrapac block.

Similar variety may be achieved outdoors. Patios, terraces, steps, planters, retaining walls, etc., all can receive original treatments. Even inexpensive housing can be given the added artistry . . . and sale-ability . . . of unique Vibrapac block effects. Here again, the economy and dependability of Vibrapac block enable the builder to achieve selling appeal of distinctive design without losing the advantage of competitive pricing. Vibrapac block has much to offer as one of the most versatile and useful of modern building materials. Complete literature on request. Write, BESSER COMPANY, Box 183, Alpena, Michigan, USA.

This fence of 8" x 6" x 8" block, laid in a square pattern, provides semi-privacy.

Apartment building entrance employing stacked steel sash block to achieve this interesting effect.

Stacked split units of any height make an eye-appealing fireplace. Shown are 4"x16" split block in stacked bond.

QUALITY BUILDING PRODUCTS

... IMPROVE CONSTRUCTION!

METAL CROSS BRIDGING

Instant application saves 50% of the labor cost of wood bridging... stronger than wood... made for 2x8 or 2x10 joists on 16" centers.

VERSATILE JOIST SUPPORTS

For new construction or repair, YECK supports make the strongest joint where joist does not rest on foundation or beam... holes are properly punched and spaced for quick application.

CORRUGATED WALL TIES

A low-cost but vital item in masonry work... galvanized 7" x 1/8" steel straps... deeply corrugated for positive clenching action.

METAL SIDING CORNERS

Aluminum or galvanized steel corners for all sizes of siding and shingles.

ALUMINUM CANOPY POSTS

Non-rusting BLACK-ANODIZED ALUMINUM... a YECK FIRST! Also available in natural finish... 7', 8', 9' lengths in corner and flat posts... standard (shown) or deluxe scrolls... exclusive, sturdy cast aluminum mounting brackets make installation trouble-free!

ALUMINUM DOOR GRILLES

Precision-made... rigid construction... wide variety of designs... full line of sizes in plain or initialed models... universal size door grille (shown) fits 30"-36" doors.

For rough carpentry or finish trim, YECK Metal Building Specialties are low cost aids to speedy construction, better accuracy and appearance... assure PROFIT! Available for immediate delivery... in any quantity... in any location.

a COMPLETE line... including FLASHING SHINGLES, UNDER-EAVE VENTS, PIN ANCHORS, DUCK DOOR ANCHORS, ROOFING AND SIDING MOLDINGS, PERFORATED HANGER IRON, and JOIST HANGERS

WESTERN PINE PANELING PATTERNS

The paneling patterns shown here are standards established by the Western Pine Association and may be ordered $\frac{3}{4}$ " thick if desired. On many patterns, WP-4 can be run on the reverse side if so ordered from the mill. This may be desirable if paneling is to be exposed on both sides. Shiplap patterns have $\frac{1}{2}$ " tongue while tongue and groove patterns have $\frac{3}{4}$ "

CABINET CONSTRUCTION

PLYWOOD EDGE TREATMENT

Thin veneer of facing material is applied to edge. Lower illustration is the most practical method as top ply protects veneer from wear and damage.

Two types of stock moldings used to finish raw edges of plywood. Many other molding contours are available which are adaptable for this use.

The mitered butt edging shown above is stronger than thin flat veneer. For extremely fine work the mitered inset shown below is excellent.

Two methods of applying an inset facing between the plywood faces. Both are practical as they strengthen the edge of the plywood.

Where a heavy molding is used for edge facing the tongue and groove methods provide a practical solution. Square stock may be applied in this manner.

CABINET JOINTS

Tongue and groove miter Feather miter joint Dowel miter joint
Three types of miter joints to be used where end grain would be objectionable.

Dado and rabbet joint Dado, tongue and rabbet Lock butt joint
Right angle joints used for drawer construction or other cabinet work where end grain is not objectionable. All joints may be cut on ordinary table saw.

DRAWER SLIDES

Various types of drawer slides used in cabinet construction.

HARDWOOD FLOORING DATA

"Nominal" is the size designation used by the trade, but it is not always the actual size. Sometimes the actual thickness of hardwood flooring is 1/32-inch less than the so-called nominal size.

"Actual" is the mill size for thickness and face width, excluding tongue width. "Counted" size determines the board feet in a shipment. Pieces less than 1 inch in thickness are considered to be 1 inch.

OAK			
Nominal	Actual	Counted	Weights M Ft.

25/32 x 3 1/4 in.	25/32 x 3 1/4 in.	1 x 4 in.	2400 lbs.
17/16 x 2 1/2 in.	33/32 x 2 1/2 in.	5/4 x 3 1/4 in.	2500 lbs.
17/16 x 3 1/2 in.	33/32 x 3 1/2 in.	5/4 x 4 1/4 in.	2600 lbs.

NOTE: Oak, Beech, Birch, Hard Maple and Pecan Flooring are bundled by averaging the lengths. A bundle may include pieces from 8 in. under to 6 in. over the nominal length of the bundle. No piece shorter than 9 in. admitted.
The percentages under 4 ft. referred to in the grading rules on this page apply on total footage in any one shipment of the item.

3/8-in. allowance shall be added to the face length when measuring the length of each piece.
Flooring shall not be considered of standard grade unless the lumber from which the flooring is manufactured has been properly kiln-dried.

ESTIMATING FLOORING

Figures below are board feet of various sizes of flooring required to cover square feet of floor space shown at left.

Square Foot Floor Space	25/32 x 3/4	25/32 x 2 1/4	25/32 x 2 1/4	25/32 x 1 1/2	3/8 x 2 1/2	3/8 x 2	3/8 x 1 1/2	3/8 x 1

COMPUTING FLOORING NEEDS

To ascertain the amount of hardwood flooring required for a room, first determine the area of the room by multiplying the width by the length. Then add one of the following percentages to that figure, depending upon the size of flooring you intend to use.

25/32 x 1 1/2 in.	50%
25/32 x 2 in.	37 1/2%
25/32 x 2 1/4 in.	33 1/2%
3/8 x 1 1/2 in.	33 1/2%
1/2 x 1 1/2 in.	33 1/2%
3/8 x 2 in.	25%
1/2 x 2 in.	25%
25/32 x 3 1/4 in.	24%

The above figures are based on laying flooring straight across the room. Where there are bay windows or other projections, allowance should be made for additional flooring. It is well to order 5% additional flooring to take care of floor layer's cutting and possible damage if carelessly handled.

NAIL SCHEDULE — OAK FLOORING

Tongued-and-grooved flooring. To be blind-nailed.

Flooring Dimen., in.	Type, Size, Spacing of Nails
3/8 x 2 3/8 x 1-1/2	Bright casing nail — 4d wire or cut nail, or screw nail. 8 in. apart. Wood subfloor required.
25/32 x 3-1/4 25/32 x 2-1/4 25/32 x 1-1/2	7d or 8d screw type or cut steel nail.* 10-12 in. apart.
1/2 x 2 1/2 x 1-1/2	5d screw type or cut steel or wire nail. 10 in. apart. Wood subfloor required.
Square-edge flooring. Face-nailed.	
5/16 x 2 5/16 x 1-1/2	1-in. 15 gauge fully barbed flooring brad, preferably cement coated. 2 nails every 5 in. Wood subfloor required.

*If steel wire flooring nails is used, it should be 8d, preferably cement coated.

ESTIMATING RESILIENT TILE

TABLE I ACTUAL DIMENSION REQUIREMENTS

(Based on 9" x 9" units)

LENGTH	TILE	LENGTH	TILE	LENGTH	TILE	LENGTH	TILE
9"	1	8'-3"	11	15'-9"	21	23'-3"	31
1'-4"	2	9'-0"	12	16'-6"	22	24'-0"	32
2'-3"	3	9'-9"	13	17'-3"	23	24'-9"	33
3'-0"	4	10'-6"	14	18'-0"	24	25'-6"	34
3'-9"	5	11'-3"	15	18'-9"	25	26'-3"	35
4'-6"	6	12'-0"	16	19'-6"	26	27'-0"	36
5'-3"	7	12'-9"	17	20'-3"	27	27'-9"	37
6'-0"	8	13'-6"	18	21'-0"	28	28'-6"	38
6'-9"	9	14'-3"	19	21'-9"	29	29'-3"	39
7'-6"	10	15'-0"	20	22'-6"	30	30'-0"	40

TABLE II SQUARE FOOTAGE REQUIREMENTS

(Based on 9" x 9" units)

SQUARE FEET	TILE REQUIRED	SQUARE FEET	TILE REQUIRED
1	2	60	107
2	4	70	125
3	6	80	143
4	8	90	160
5	9	100	178
6	11	200	356
7	13	300	534
8	15	400	712
9	16	500	890
10	18	600	1068
20	36	700	1246
30	54	800	1424
40	72	900	1602
50	89	1000	1780

HOW TO USE THESE TABLES

Either of these tables may be used to ascertain the number of 9" x 9" resilient tile required for given areas. A typical example would be to find the number of tile required for a room 15' x 21':

Using Table I

15'-0" = 20 tile
21'-0" = 28 tile
28 x 20 = 560 Total
number of tile required

Using Table II

15 x 21 = 315 sq. ft.
300 sq. ft. requires 534 tile
10 sq. ft. requires 18 tile
5 sq. ft. requires 9 tile

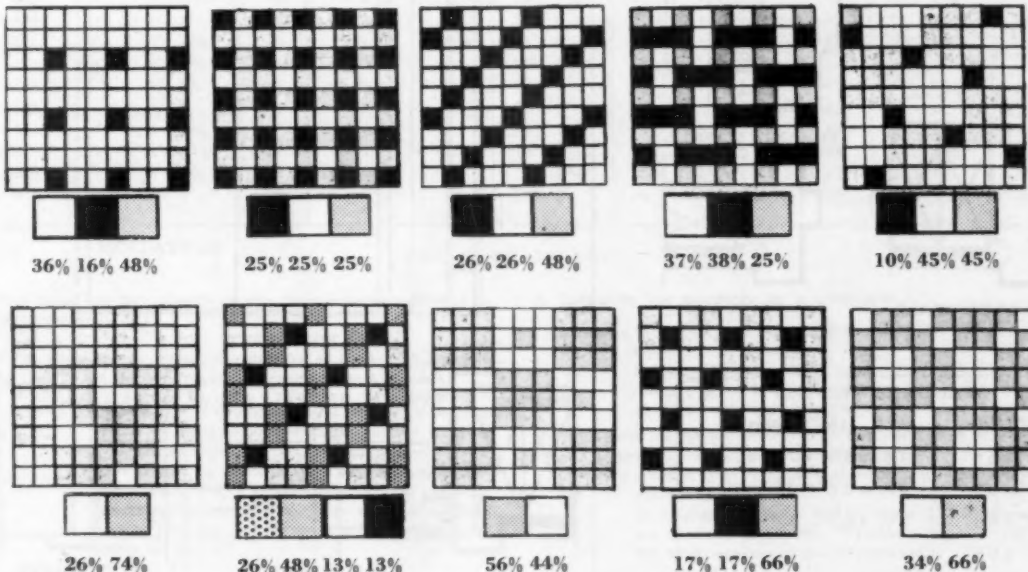

Total tile required 561

Note: Table II is based on mathematical factors which accounts for the slight difference. In all cases 2 percentage factor should be added to the total to allow for waste.

PERCENTAGE FACTORS FOR WASTE

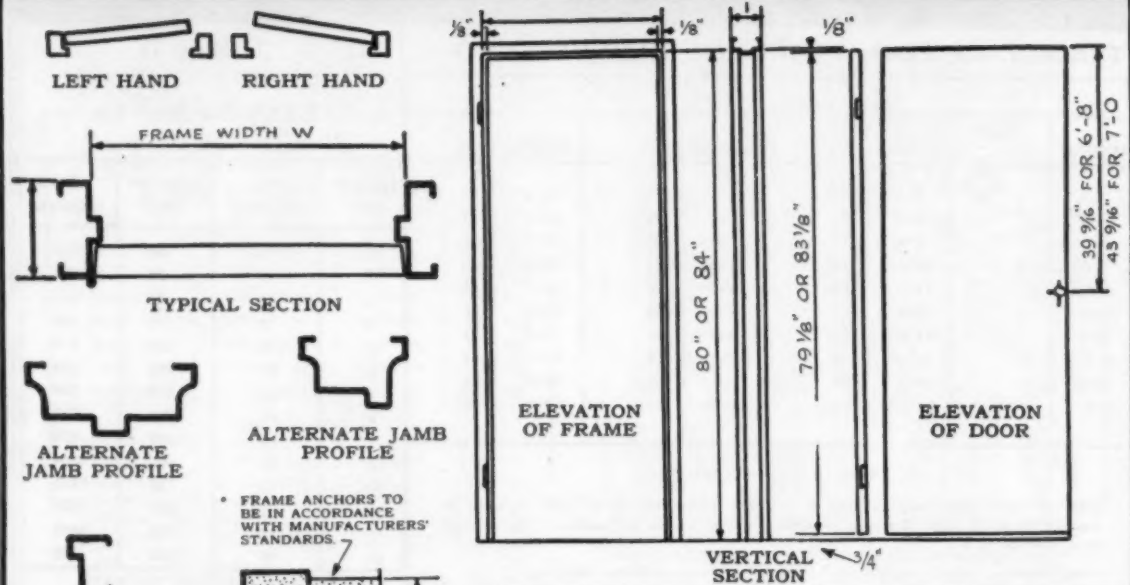

NUMBER SQUARE FEET	ADD
1 to 50	14%
50 to 100	10%
100 to 200	8%
200 to 300	7%
300 to 500	6%
500 to 1000	5%
Over 1000	3%

HOW TO USE THIS TABLE

This table can be valuable to the designer and estimator in several ways.

1. In designing or layout, the number of courses of tile can be ascertained, for any required height or length of wall.

Example: Assume that a wainscot height of 4'-6" is desired and it is required to know the number of tiles necessary to approach this dimension. Checking the table it will be found that 13 tiles give a course height of 4'-7 1/4". If desirable to hold close to the 54" dimension 12 full tiles may be finished with a half tile or cap of 2 1/8" giving a total height of 4'-5 1/4".

2. Estimating tile quantities for a given area.

Example: Length of wall in lineal feet—17'-0"
Height of wall—5'-8"
Number of tile in 17'-0"=48
Number of tile in 5'-8"=16
48 x 16=768 tiles required.

3. Estimating the number of pieces of 4 1/4" cap, base or feature strip required for lineal feet of wall.

Example: Assume total lineal feet of wall to be tiled to be 48 feet.
Consulting the table it will be found that 34 pieces are needed for 12 feet. Therefore: 34 x 3=102 the total number of pieces required.

Section B Doors - Windows - Millwork Floor & Wall Finishes

LOCATION OF WINDOWS FOR VENTILATION

Natural ventilation and summer comfort can be "built into" the house by taking advantage of the prevailing breezes. To understand these advantages, it is necessary to understand the principals of air movement.

Air moves by differences in temperature or differences in pressure. Because warm air rises, air entering the room at a low point will continue to move if provision is made to exhaust it at a higher point.

Prevailing breezes striking a building create a high pressure area on the windward side, with a low pressure as it moves around the building. The wall on the high pressure side acts as a dam and forces the air through the open windows and through the house. On the low pressure side a vacuum is created and the flow through the house is increased. To speed this movement, the openings through which the air leaves should be large,

A high pressure area is created when moving air strikes a building. Low pressure areas are created as the air moves over and around the structure.

Better ventilation can be achieved in rooms with cross ventilation by placing the windows as far apart as possible. Corner windows limit the flow of air as shown by the dotted arrow on this plan.

The movement of air through a building is caused by differences in pressure. Partitions divert and slow down the movement of air.

To get the maximum cooling advantages from air movement through a room it should be caused to flow across at the level of occupancy. If the type and location of the windows are such that they cause the air to flow along the ceiling the room can be uncomfortable. The location of the window in a wall depends upon its type. Some windows can deflect air downward and will achieve the same effect as those placed lower in the wall.

Obstacles in the path of moving air slow it down and have a tendency to divert its flow. Heavy shrubbery, fences and other obstructions should be eliminated if full advantage is to be obtained from prevailing breezes.

Section B Doors - Windows - Millwork Floor & Wall Finishes

WINDOW PLANNING PRINCIPLES

One large opening is more desirable than several small windows. Not only does the former provide a better distribution of light but dark areas between smaller openings are eliminated as well as undesirable contrasts in brightness.

Windows in more than one wall give more effective light distribution throughout the room. Strip or clerestory windows furnish light and ventilation with maximum privacy.

DINING ROOM

LIVING ROOM

KITCHEN

BEDROOM

Consideration should be given in the placing of windows so that sills and horizontal muntins or rails do not interfere with vision either seated or standing. The sketches show the eye-level range for persons sitting and standing. Avoid horizontal window divisions within these levels. Dimensions are based on persons from 5'-0" to 6'-4" tall as well as the usual window head and sill heights as determined by furniture.

Window shapes may be selected to give any desired distribution of light within the room. This diagram shows graphically how the sun's rays entering a room at a 45° angle give various patterns of light depending upon the shape of the opening. The closer the head of the window is to the ceiling, the greater the depth of penetration, as shown in openings 1 and 2. Opening 3, placed lower in the wall creates a much shorter light pattern. Strip windows, opening 2, are desirable where it is preferable to have the area beneath in shadow such as a bedroom. This diagram also illustrates why it is desirable to use windows in more than one wall for better distribution of daylight.

METAL CASING FOR DRYWALL CONSTRUCTION

Metal casings are made in sizes for $\frac{3}{8}$ ", $\frac{1}{2}$ " and $\frac{5}{8}$ " boards

Two types of square edge metal casings which are used to finish edge of wallboard at door jamb or window. Corners are butted and casing is nailed through board into stud. Knurled side affords good spackle adhesion.

Corner guard for protection to exterior corners applied directly over wallboard and nailed through flange. Nose is undercut to provide grip for spackle finish.

Round or square edge casings are nailed in place before board is applied. Corners are mitered. Inclined plane creates tension that draws board snugly into position.

WITH THE NEW
BY-PASSING UNIT
THE HOUSE PATTERN
IS COMPLETE

HINGED & BY-PASSING DOOR UNITS

Install complete in 20 minutes
Split Jamb fits walls from 4 1/4" to 5 1/2"

Assures better material and
workmanship—machine uniformity

HINGED Door Units

- 1 3/4" doors in any standard size, style or specie
- Trim patterns popular in your area
- Special fasteners keep mitres tight
- Shipped fully assembled

BY-PASSING Door Units

- TWO POINT BOLT SUSPENSION† of the track assures TROUBLE FREE operation:
—Eliminates troubles from bent tracks
—loosening of screws holding track
- No blocking to rough header—saves time
- All construction features of hinged unit

†Patent Pending

PACKAGED* FOR DELIVERY WITH JOINTS SQUARE AND TIGHT

Tension in the steel band exerts equalized pressure (indicated by the arrows) at the corners to draw the frame in tight contact with the rigid door. Frame joints and mitres are therefore rigidly held square and tight by the door itself.

Spacer blocks between the door and frame serve a dual purpose: (1) They block the frame around the door during shipment, and, (2) Are used to maintain proper door clearances while the door is being installed. Faces are protected by cardboard when shipped by common carrier.

*Patent No. 2489020

IT TAKES A HEAP OF WINDOWS TO MAKE A HOUSE A HOME

FOR VARIETY AND VERSATILITY . . . SEE CECO

Monotony in building design, you'll agree, makes homes more difficult to sell. Individual dwellings or housing developments need variety — especially in window selection — to lure prospects. And you'll find that Ceco, with the world's widest line of steel and aluminum windows, gives you irresistible customer-bait . . . no matter where you operate. — What window styles are in greatest demand in Texas? — In California? What windows are most popular with home-buyers in New England — the Deep South — the Middle West — the northern tier of states? Ceco gives you the types and sizes you want. Ceco knows how to engineer windows to save you installation time. So, for better home building profits, better use Ceco Windows.

SMART, BEAUTIFUL NEW S

WITH INSULITE PRIME

...and you save the cost of one coat of p

Wide-width Insulite Lap Siding, with $10\frac{3}{4}''$ exposure, goes beautifully with any style or design. Half inch thickness provides deep, beautiful shadow lines that accentuate the "long, low look" so popular in contemporary homes. Long lengths—8', 12' and 16'—mean less handling and waste. Vertical grooved panels on gable ends add a beautiful architectural touch. Grooved panels have shiplapped edges for concealed joints.

Builders, dealers, architects and home owners *all* get extra value and extra satisfaction with new Insulite Primed Siding.

Builders cut painting costs; handle uniform, straight pieces; speed up application; reduce waste; eliminate callbacks, repairs.

Dealers handle a clean, compact, packaged product . . . uniform, precision milled. No short lengths.

Architects have, in Insulite Primed Siding, a uniform, de-

Board-and-batten design. Siding in plain 4' x 8' panels make strikingly distinctive on center, and are fully practical applications of Insulite Primed Siding for garage exteriors, porch co-

pendable, highly flexible residential and commercial de-

Home Owners appreciate design value, durability, less maintenance, no need to paint blistering.

The sooner you can start with Insulite Primed Siding, the greater your benefit. For more information you want, mail th

of paint!

Often design treatments made possible by Insulite Primed Siding. 4' x 8' panels are trim and handsome. Grooved panels, too, are distinctive sidewalls. Grooves are 7/16" wide, spaced 8" apart. All are fully prime coated for fast finish painting. Many other uses for Insulite Primed Siding include light commercial buildings, porch ceilings, and soffits.

flexible material for a wide variety of residential designs.

appreciate Insulite Primed Siding for its durability, low maintenance cost, and resistance to weathering.

can start planning with new Insulite Primed Siding. Your benefits will be. For the special information, mail the coupon at right . . . *today!*

No
*more paint
blistering?*

In laboratory tests, in field tests . . .
Insulite Primed Siding has not blistered!

Flotation test apparatus used in our research laboratory measures the paint-blister-resistance of woods, hardboards, and Insulite Primed Siding. The sample in foreground is wood, painted two coats. The sample at back is Insulite Primed Siding, painted one coat. Both have been subjected to same moisture-forcing treatment. Notice how paint on one specimen has bubbled, blistered and completely failed while paint on Insulite Primed Siding shows no blistering or damage whatever.

Test homes at International Falls, Minnesota, built with Insulite Primed Siding, have now been weathered for three full years. Photo above shows exterior view taken this winter of typical home. Here, where winter temperatures reach 35° below, summer heat soars above 100°, there is today *no trace of paint blistering on Insulite Primed Siding!*

NEW INSULITE PRIMED SIDING

*New 12'
Wide Lap Siding*

New 4' x 8' Panels

*(plain and vertical
grooved)*

INSULITE
PRIME
SHEATHING

*Goes on
easier and
faster!*

Here's what makes this siding revolutionary!

What it is: Insulite Primed Siding is a new wood fiber material, made on a new \$1,500,000 machine. It is $\frac{1}{2}$ " thick, looks like wood, works like wood, yet has no structural nor surface grain. Comes in 8', 12' and 16' lengths for lap siding, and 4' x 8' panels, plain or vertical grooved.

Five years of research, and laboratory and field testing, have insured the performance characteristics of Insulite Primed Siding.

Cuts painting costs. Insulite Primed Siding is prime coated on face, edges and ends; and back primed. Every piece is ready for quick finish painting on the job. Grooves in vertical panels are fully primed. Insulite Siding can be painted soon after wet weather.

No knots—no splintering. Considerable waste and expense are eliminated because Insulite Primed Siding has no knots, will not split or splinter.

Easy to saw—easy to work. With handsaw or power saw, Insulite Primed Siding cuts quick, clean. It nails like wood. Nails set easily.

New wide widths. Twelve-inch wide siding—now difficult to obtain in lumber—creates stylish exteriors. All Insulite widths and lengths are full measure.

Reversible weather drip edges. Both long edges of Insulite Lap Siding are precisely cut at an angle to make water drip straight down instead of flowing inward to the wall.

**You Sell
More!**

for flush panel doors
VISADOR
door lights
and louvers

*add much to the appearance —
little to the cost of flush doors.*

The installation of prefabricated door-light and louver inserts opens up entirely new possibilities for door sales. Custom designs can be easily furnished along with more standard designs. Economical installation costs add to your profits. Quality lights and louvers add to your reputation. Nationally-advertised VISADOR products add to your repeat-sales. They all add up to the fact that **YOU SELL MORE . . . with VISADOR!**

Just a few of hundreds of designs possible. Write for beautiful **V-7B Catalog** for other designs, and for the complete Visador story.

VISADOR ROUTER makes installation a quick, easy job. Designed for convenience and versatility. Cuts holes in hollow or solid-core doors in minutes. Write for further information and prices.

The **VISADOR Co.**

**3 Houses or 300 . . .
put this profit
protection into every
one you build**

Size of your operation doesn't vary the importance of making full profit on each unit.

Call-backs and replacements due to leaks, rattles, and scrapes in windows and sliding glass doors steal your profits, can't possibly earn income.

Protect yourself by specifying fenestration equipped with Schlegel Certified Woven Pile. Schlegel wool pile weatherseal assemblies are engineered to work perfectly on the units for which they are designed.

Sliding doors and windows with Schlegel Woven Pile are leaders on the market. They're available in almost any type to meet your plans. Make sure of positive weather protection. Request Schlegel wool pile assemblies, preferred and used by quality manufacturers throughout the window and door industry.

Dense, flexible tufts of tough wool prevent air from filtering in or out, keep dust out, cushion against rattles, scraping.

Industrial Textiles Since 1885

STRYPANEL

Puts more **SELL**
into your new homes

Is ideal for Home, Institution and Store remodelling.

Strypanel is the *only* plastic wall panel available in radiant *duo-tones*. Easy-to-apply it offers unusual decorative effects achievable in no other way. Leading architects and decorators are most enthusiastic over Strypanel. Many have already specified its use in new office buildings, hotel modernization programs and homes. In every instance, colorful glowing Strypanel draws enthusiastic approval of all who see it.

You save by applying Strypanel right over Concrete Block!

No other permanent wall covering offers this material and labor saving advantage. No furring strips are needed. Merely apply right on block—above or below grade. Perfectly smooth finish every time.

Pioneers in the Plastic Tile Industry

CERMAK TILE COMPANY, INC.

4901 Brookpark Rd. • Cleveland 29, Ohio

- Tough, high-impact styrene will not chip, crack or craze.
- 12 popular color combinations as modern as tomorrow.
- Fast, clean and easy application.
- Complete line of matching trims; Small Cap, Large Cap, Inside Corner, Outside Corner, Divider Bar.
- Standard panel lengths are 4½' and 8'. Special lengths available for quantity orders.
- Exclusive PANEL-LOK for greater strength. Similar to wood paneling construction.

You know you're RIGHT when you specify Oak Floors

Almost everybody
wants

oak floors

You never risk buyer objections
with the floor that makes decorating easier

Oak Floors—and only Oak Floors—harmonize perfectly with all furnishings, all colors. That's very important in new home sales.

Room arrangement, color scheme and floors . . . these are the main elements a prospective buyer considers in judging the interior of a home. If the floors are Oak, she'll never question whether her furniture will be appropriate. Oak Floors, always in style, make decorating easier.

A builder can guess wrong on a lot of things that affect sales. But you always can be sure of buyer-approval for beautiful, durable, *preferred* Oak Floors. No other building material has such overwhelming acceptance . . . at a price every home buyer can afford.

National Oak Flooring Manufacturers' Association

814 Sterick Building, Memphis 3, Tenn.

LUPTON

ALUMINUM SLIDING DOORS • METAL WINDOWS

A New Budget-Priced Aluminum Sliding Door featuring . . .

WEATHER-TIGHT CONSTRUCTION—Woven pile, double row weatherstrip provides resilient, long-lasting seal on all sides of movable sash.

SMOOTH, QUIET OPERATION—Doors operate on quiet rollers with bronze self-lubricating bearings.

ADJUSTABLE ROLLERS—Special door design allows for leveling adjustment at installation.

LOW-SLOPED THRESHOLD eliminates danger of tripping. Keeps water out. Made of heavy extruded aluminum.

HARDWARE—Tight-locking bronze latch is simple to operate. Standard pull-handle is extruded aluminum, 8" long. Decorative Lucite handle (*available at extra cost*).

STRENGTH—Specially designed Flynn extruded aluminum members make Lupton Sliding Door units strong and rigid.

SCREENS—(*Furnished at extra cost when specified*). Heavy duty aluminum sliding screens make doors practical for use anywhere. Equipped with flexible closure strips, locking latch, and interior and exterior pulls.

HEIGHT FOR ALL DOORS: 6'-9½" OVER-ALL • RECOMMENDED STUD OPENING HEIGHT: 6'-9¼"

Lower Cost . . . Faster Delivery.

LUPTON

METAL WINDOWS from STOCK

The Lupton windows in the stock types and sizes shown on this page offer builders lower cost, faster delivery. Lupton windows are a finished product, engineered and made to give satisfactory service during the entire life of the building.

Double-Hung Windows

Frame and sash members are accurate extrusions of high strength aluminum alloy. Weather stripping is stainless steel. Balances are completely concealed, yet accessible. Sash floats between guides of stainless steel, continuous from head to sill, eliminating window rattle.

Residence Casements (muntin variations)

Both fixed and ventilated units are available at no extra cost with any or all muntins omitted. Any remaining muntins must be in standard locations.

Lupton Casements provide maximum glass area, superior ventilation. They are weather-tight, easy to operate, easily and safely cleaned.

NEW Aluminum Framed Glass Jalousie Window

(Not shown) Year 'round comfort. The NEW Lupton Jalousie is an all-season window. Storm panel or screen can be snapped to the frame when required.

Ranch Windows

Corners of frames and ventilators are mitered and electrically welded. Ventilators are hinged at top and open outward. Drip bars are included for all ventilators. Steel Ranch Windows are bonderized and painted. Aluminum Windows are etched and lacquered.

**HOMEBUYERS LOOK
FOR THAT EXTRA
"Quality Touch"**

Why does one home sell faster than another? Many reasons, yes . . . but basically it's the home with an extra touch of quality that sells first. Alsynite translucent fiberglas panels can give your homes that extra quality sparkle in beauty and practical advantages . . . for patios, fences or windbreaks outside . . . partitions, light fixtures inside. And genuine Alsynite offers the matchless benefits of heat-blocking Filtron 25 and armor-plate Chemiglazed surface.

All flush doors may look alike . . . but these 9 reasons prove why America's *Finest* doors are Paine

REZO

FLUSH DOORS

These nine production photographs show the time . . . craftsmanship, precision, care . . . and highly specialized equipment required for the manufacture of Paine Rezo Doors. Backed by over a century of woodworking experience and more than nine million installations, it's no wonder architects, dealers, builders — and home owners—call Rezo Doors America's finest doors!

For information, write:

P A I N E
LUMBER COMPANY, LTD.
 ESTABLISHED 1853 • OSHKOSH, WIS.

Rezo Doors equal or exceed the requirements of C.S. 200-55

1 All lumber kiln-dried to specific, and uniform moisture content.

2 Stiles and rails securely fitted. Stiles are 1 3/4" instead of 1 1/2".

3 Hand-matched face veneers; the panels 1/8" thick—instead of 1/16".

4 A complete coating of resin glue is applied by machine.

5 Accurate assembly is assured by controlled heat and pressure.

6 Doors pass through a complete conditioning cycle in special kilns.

7 Doors are carefully belt-sanded to a cabinetmaker's finish.

8 Special doors are custom-made by experienced craftsmen.

9 Each door must be painstakingly inspected in oblique light.

AMERICAN BUILDER

FARLEY & LOETSCHER

WOOD CASEMENTS

WITH EXCLUSIVE
Narrow Mullions

Qualitybilt Casements emphasize modern, narrow lines, fine hardware and accessories. Check these outstanding features:

NARROW LINE MULLIONS

A heavy, cross-shaped aluminum extrusion is expertly combined with the wood mullion to give great strength and rigidity, yet allow a slender appearance. Bulkiness is eliminated.

EXTENSION HINGES

Permit easy, quick cleaning from inside of building.

DOUBLE GLAZE PANEL

Attaches to inside with clips, forms an integral part of sash for year 'round insulation. Easily removed and replaced for cleaning.

INSULATING GLASS

Hermetically sealed air space eliminates the need of double glazing panels. Meets all insulating and air-conditioning requirements. Cuts window cleaning time in half.

OPERATOR

Powerful worm and gear operator holds sash in any desired position, operates without interfering with screen.

SASH LOCK

Pick-up closing action. Forcibly ejects sash slightly when opening. Operates without interfering with screen.

SELECT YOUR CHOICE OF GLAZING

Casements are supplied with three types of glazing.

1. Horizontal lights as shown, glazed standard window glass. (Double glazing panels optional.)
2. One light sash, glazed standard window glass. (Double glazing panels optional.)
3. One light sash, glazed with insulating glass. (Double glazing panels not required.)

PICTURE WINDOWS

Can be furnished in many sizes with plate or insulating glass to combine with casements. Standard frame parts are used for picture windows with or without casement flankers.

COMPLETE CATALOG

See complete catalog in Sweet's 1957 Architectural and Light Construction Files or write us for catalog and name of nearest distributor.

Order today! Your order shipped promptly! All M-D products are fast sellers, nationally advertised.

American GLASS PRODUCTS

American Lustraglass and Lustracrystal

(Lustraglass—single and double strength)(Lustracrystal— $\frac{3}{16}$ ", $\frac{7}{32}$ ", $\frac{1}{4}$ ")

- 1. Superiority**—Clearest, whitest, most transparent sheet glass made. Less distortion. More luster. No additional cost.
- 2. Tolerances**—See table of exacting tolerances at right.

STRENGTH TYPES	MAX. SIZE		THICKNESS—INCHES			LBS. PER SQ. FT.
	Width	Length	Min.	Av.	Max.	
Single	40"	50"	.087	.091	.095	1.183
Double	60"	80"	.121	.125	.129	1.625
$\frac{3}{16}$ "	72"	120"	.187	.193	.199	2.509
$\frac{7}{32}$ "	72"	120"	.212	.218	.224	2.834
$\frac{1}{4}$ "	72"	120"	.245	.253	.261	3.289

- 3. Economy**—Architects and builders are specifying and using AMERICAN LUSTRACRYSTAL where suited, instead of more costly plate glass, to save many "glass dollars." Note comparison table at right, showing LUSTRACRYSTAL advantages.

COMPARISON $\frac{1}{4}$ " American Lustracrystal TO $\frac{1}{4}$ " PLATE GLASS

	LUSTRACRYSTAL	PLATE
Clarity (visible light transmission)	GREATER	LESS
Clarity (ultraviolet transmission)	"	"
Strength (impact)	"	"
Strength (constant pressure)	"	"
Strength (surface abrasion)	"	"
Luster	"	"
Distortion	"	"
Economy	"	"

American Lustragray Glare Reducing Glass

This neutral gray tint sheet glass is economical, and has good merchandising features to make your homes more saleable. AMERICAN LUSTRAGRAY reduces glare about 50%. Table at right gives characteristics.

	D.S.	$\frac{3}{16}$ "	$\frac{7}{32}$ "	$\frac{1}{4}$ "
Visible Transmission	71.1%	61.8%	58.8%	55.0%
Infrared Transmission	79.2%	73.4%	71.7%	68.5%
Solar Radiation Transmission	75.5%	68.3%	66.3%	62.6%

For maximum size, thickness, pounds per square foot, etc., see corresponding sizes in Table at top.

AMERICAN glass products are now available through more than 500 glass jobbers. Check your classified telephone directory for listing.

WSW 6047

NOW! Superior Cabinets and Built-ins at no extra cost with Old Craftsman Pine Plywood!

Paints better! Look at that coverage from one coat of paint! Takes stains or finishes just as well!

Works easier! Saws as slick as a whistle with no edge-splintering! Takes an edge beautifully!

Sands smooth! Because it's smoother to start. No temperamental grain trouble!

Whether you build your own cabinets or have them built for you, you should know about Weldwood's new Old Craftsman Pine Plywood — the easiest working, easiest painting plywood ever!

This newest member of the quality Weldwood Family combines all the time- and money-saving advantages of pine lumber . . . with the greater strength and time- and money-saving advantages of plywood construction. And, more important, it turns out a superior finished product every time!

If you build your own cabinets and built-ins, Old Craftsman is for you. It takes paint better, needs less paint to cover. And there's no grain show-through or color show-through. Old Craftsman works like a charm. Takes a straight, non-splinter edge . . . saws cleanly and easily . . . and comes already factory-sanded. And, since it is good-looking pine, you can stain it or finish it natural if you wish. Furthermore, interior grade Old Craftsman is made with L-1R, an exclusive mold-resistant bonding agent for your protection.

If you buy your cabinets and built-ins, start specifying Old Craftsman Pine Plywood for them. It means an extra-quality product in your homes at no extra cost to you! It's the kind of "extra" that may help you close a sale fast! Work done with Old Craftsman Pine Plywood feels better, looks better, is better. Remember too, Old Craftsman Pine Plywood is so exactly made it exceeds even the Pine Plywood Commercial Standards.

For more information about Weldwood Old Craftsman Pine Plywood, send the coupon below. Or, see it at your lumber dealer's or any of our 87 offices in principal cities. In Canada: Weldwood Plywood, Ltd.

RAY-O-LITE

FIBERGLAS AWNINGS AND PATIOS

Add beauty that helps you 'close' faster...

Homebuyers today are more selective, more demanding. They look for "plus" features before they make a decision. And every day more and more builders are discovering that Ray-O-Lite translucent fibreglas awnings and patios are powerful "plus" features that help close more deals—and close them in a hurry! Ray-O-Lite offers tremendous merchandising opportunities: distinctive design, created by Raymond Loewy Associates... spar-

king jewel-like beauty, with locked-in colors...year-round protection from all kinds of weather...*Filtron 25*, the effective new heat-blocking formula that keeps hot sun out but lets in soft diffused light...*Chemiglazed* surface that insures lasting beauty...rust-proof aluminum framework, with no exposed edges. And to top it all, Ray-O-Lite carries the emblem consumers depend on in buying finest quality: the respected *Good Housekeeping Guarantee Seal*.

find out today how Ray-O-Lite can help you boost sales

Grant Folding Doors

pat. pend

make home values grow!

and no wonder! No folding door on the market can duplicate the many fine selling features of the Grant Folding Door!

- a real door that folds
- solid, $\frac{3}{16}$ " thick hardboard core
- finely textured vinyl fabric, laminated to core
- sound resistant and light-proof
- nylon carriers, aluminum track
- minimum stacking space
- "built-in" friction catch
- a variety of colors in a wide range of sizes
- designed by nationally famous Paul McCobb

Grant has available the greatest array of technical and promotional aids ever! Write for specification, application and installation data included in the Grant Folding Door Reference Manual.

G-P builder's guide

forest products by Georgia-Pacific

G-P Prefinished V-Grooved Hardwood Paneling

Factory-waxed for natural, lasting finish... V-grooving simulates random planks, edges eased for continuous effect. Back and face sealed, ready to install. 4'x8' and 4'x7' panels, 1/4" thick, packaged for surface protection. Choice of 7 classic hardwoods: Blond Cativo, Birch, Blond Oak, Honeytone Oak, Red Gum, Cherry, Walnut.

G-P Savannah Paneling Packaged for Easy Sale

"One-trip" package is complete do-it-yourself kit including prefinished random width panels, sufficient retaining clips* and grooved furring strips* for 12'x8' wall. Easiest of all plywood panels to install... 4 simple steps, no face-nailing. Birch, Blond and Honeytone Oak.

GPX Yellow Plastic Surfaced Plywood

Low-cost siding for interior-exterior uses allowing minor edge filling; surface engineered for fast, smooth finishes; no sanding or seal coat needed; weather-proof when painted, reduced grain raise. May be sawed, machined, drilled, riveted, glued or edge-sanded. 4'x8' panels, 5/16" to 3/4" thick; longer, thicker panels manufactured to order at extra charge.

G-P Textured Paneling

RIPPLEWOOD®

STRIATED*

Ripplewood®. Low-cost genuine wood paneling; "brushed" effect accents knots, burls and other growth characteristics, provides a surface that can "take it." Factory-sealed; variety of finishes possible by waxing, staining or painting. 4' x 8' or 4' x 7' plywood panels and 12" or 16" squares.

Striated*. For distinctive shadow-line wall styling vertically or horizontally or alternate squares for dramatic pattern interest. Southern Gum Hardwood Striated for natural finish, Western Fir Striated for staining or painting. Sizes same as Ripplewood.

G-P Coos Bay Hardboard

Guaranteed not to split, splinter, check, crack or delaminate due to natural conditions of weathering or exposure. Quality dry-process hardboard generally superior to most standard grades, yet competitively priced. Hardboard 3/32", 1/8", 3/16", 1/4", 3/8"; panelboard 1/8", 3/16", 1/4"; underlayment, .215".

G-P Lumber and Wood Products from 11 Mills

Southern and Appalachian Hardwoods; Shortleaf, Longleaf Yellow Pine and Cypress; Douglas Fir, West Coast Hemlock and Sitka Spruce; Sugar Pine, Ponderosa Pine and White Fir; Kiln Dried Pattern Lumber, Flask Stock.

G-P Redwood Lumber

Superior product of controlled quality backed by one of the world's finest reserves of California Redwood. Siding, finish, pattern.

- ★ **DEPENDABLE DELIVERIES**
from big warehouse stocks in every area
- ★ **CONTINUOUS ADVERTISING**
— link yourself to ALWINTITE popularity!

DOUBLE-HUNG WINDOWS

Features and quality that impress even the unsophisticated home prospect! Easy to handle, install, with lowest "installed costs." Built-in weather stripping. Screens and storms available. In 35 standard stock sizes with Fin Trim for time-saving installation. Premeassembled. 90, 135 and 180 mullions available.

SINGLE-HUNG WINDOWS

Low-low cost with General Bronze Alwintite engineering and design. Same famous quality as Alwintite double-hung windows plus simplicity, extra-tight seal and structural rigidity. Actually a selling plus for air conditioned residences and buildings!

SLIDING WINDOWS

Originated by General Bronze! The most popular window in America today. Simplest installation. Consumer advantages include beauty, ample light and air, and conservation of wall space. In 18 stock sizes with or without Fin Trim. Alwintite screens and storms available. New model features integral sliding storm sash.

AWNING WINDOWS

The window most demanded by women who see them! New torque-bar and flexible-cable operation delivers "Balanced Power" via worm gear. Finger-touch control, delayed action opening, tightest closure without tension! Completely weatherstripped. Quality and durability suitable for schools and hospitals, yet priced low enough for economy residences. In 15 standard and 24 modular sizes.

aluminum

WINDOWS and DOORS

BRONZE CORPORATION

VIEWALL WINDOWS

Exotic floor-to-ceiling VIEWall Windows portray glamor and "inside outdoor-living." Popular with designers and architects. Available with sliding window vents and fixed lights in optional arrangements. Simple to install. In 1, 2, or 3 unit (6 or 9 foot) widths.

PICTURE and PICTURE-SLIDING WINDOWS

Today's buyers love large glass areas. Build in these modern selling assets. Picture-slide windows have fixed panel in center and sliding sash on each side. Fin Trim simplifies installation. 12 standard sizes in easy-to-handle units.

PICTURE-SLIDING DOORS

Use these lovely units to form "a wall that opens" ... and watch the spectacular effect on prospective home-buyers! Ball bearing rollers—completely weatherstripped—accommodate insulating glass—independent channels for screen units.

REGENCY Series sliding doors

A top quality product with deluxe features and especially weathertight construction. Sturdy lock. Ideal for rooms opening onto porch, patio, or terraca. In widths from 6' to 24'. Heights 7' and 8'. Special model for 1" Thermopane.

CORONET Series sliding doors

Alwintite quality in a "sliding door wall" at a thrifty price! 1, 2, 3, or 4 tracks. 6' to 20' widths. Standard 6'10" height.

MAKE FINANCING AND SELLING EASIER!

Include Alwintite screens and storm sash under the single mortgage, one monthly payment plan. Home buyers benefit, and you earn a reputation for quality and thoroughness. Mortgage bankers and FHA offices strongly endorse the idea.

For complete details on ALWINTITE Products see your local distributor . . . or write for our latest catalogs to Dept. AB-571.

For beautiful walls, job after job — easy to install Marlite Plank and Block

You'll cut days off completion time, add customer appeal with new Marlite Plank and Block. This easily-installed paneling is applied over plaster, plasterboard, plywood or existing wall surfaces with adhesive. Simple clips speed installation; make fitting easy. And Marlite's soilproof melamine plastic finish stays clean and bright with an occasional damp cloth wiping; drastically reduces maintenance time and expense.

Planks (16" x 8') and Blocks (16" square) are available in modern, new Loewy-styled colors plus distinctive wood and marble patterns. Before your

next building or remodeling project, get complete Marlite details from your building materials dealer, Sweet's File, or Marlite Division of Masonite Corporation, Dept. 403, Dover, Ohio.

Marlite's exclusive tongue and groove joint eliminates the need for joint coverings, conceals all fastening, adds the perfect finishing touch to every interior. This $\frac{3}{8}$ " material combines beauty and ease of installation with low maintenance.

that's the beauty of **Marlite**[®]
plastic-finished paneling

MARLITE IS ANOTHER QUALITY PRODUCT OF MASONITE[®] RESEARCH

THE AMAZING NEW WINDOW WITH SASHES THAT TILT

safe, easy cleaning
more air! no drafts!
keeps out rain, snow

Both sashes tilt easily to any desired angle for true healthful no-draft ventilation that uses 100% of the wall opening! Wash *all* outside glass in comfort—without disturbing screens or storm sash. Looks like an ordinary window and can also be used like one—concealed adjustable spiral balances for quiet, easy operation.

It goes up...It goes down...It's weatherstripped...And it TILTS!

FAMOUS BEE GEE...THE DECORATOR'S WINDOW

Companion line of 170 high-style casement, picture and corner picture windows... "idea" windows designed as focal points for lovely modern interiors. "Wife-Approved" for their clean, slim modern beauty, their practical convenience. Completely assembled units, ready to set in the wall. New fingertip Crank Operator now optional, factory-installed—also in kits for older Bee Gee windows.

—for continuous, crackproof coverage of any area—

WILSON AIR-FLOAT CEILINGS

PATENT APPLIED FOR

permit major savings in construction

Ceiling can be hung from rafters or collar beams — ceiling joists can be omitted. The bottoms of supporting members need not be leveled up by furring. No bearing partitions are required. Three men cover a minimum of 200 square feet an hour!

Wilson Air-float is a "continuous dry-wall" method of ceiling construction. It is revolutionary — yet it employs only standard materials and no special equipment. The completed ceiling — of any size — floats as one unit — free to expand or contract in either dimension. The edges are held back 1/2" from each wall and merely rest upon the corner mold, or the ceiling may be hung free from all walls.

The surface area is made up of *weatherproof* Homasote Insulating-Building Boards in the largest practicable sizes — up to 8' x 14'. This surface takes any paint, stain or wallpaper.

The hangers are 1 x 4's — from 12" to 36" in length — each suspended by four 3/4"

plumber's straps. To support an 8' x 14' Homasote panel, only four hangers are needed within the panel area and only four along a joint. The joints are sanded and spackled — as needed. Homasote Nails #1256 have "waffle" heads to match the linen surface of the panel; they require no counter-sinking or spackling.

Wilson Air-float Ceilings are easily applied — in new construction — in modernization, regardless of existing conditions. It is often the only possible solution to the "impossible" ceiling situation.

Let us send you complete blueprint material and full application details. Write for the facts today! Kindly address your inquiry to Department D-8.

Standard, inexpensive materials require no special equipment

Simple, economical — 3 men cover a minimum of 200 sq. ft. per hour

HOMASOTE COMPANY
TRENTON 3, NEW JERSEY

YOUR FORMULA FOR MORE SALES AND GREATER PROFIT IN 1957...

that modern luxury-touch of *Glidorama* ALUMINUM HORIZONTAL GLIDING **WINDOWS** ...

You have found out that today's home buyers want modern luxury . . . and they are willing to spend just a little more for the better things, especially when they look so much more costly. Glidorama Windows quality hand-

somely on this! . . . They are obvious *quality* when you see them or use them! *And they give you five exclusive features to sell with . . . over and above the features of any other quality window—*

1. Complete perimeter seal of entire vent . . . assurance to your customer that wind, dust or rain will never get in.
2. "Invisible" hardware . . . such as handle designed flush with meeting rail molding and featuring an automatic tamper-proof bolt-lock—universally popular with home-buyers.
3. Stainless-steel needle-bearing rollers on stainless-steel axles . . . to give your customers that instant finger-tip gliding action, always instantly recognized as quality.
4. Twin-V-shape metal interlock at both meeting rail and jamb . . . to eliminate vibration completely and provide a sound-proofing all home-buyers appreciate.
5. 20%-heavier-gauge frame sections, and double-I-Beam sill construction . . . to give the strength needed to support broad areas of glass, plus the rigidity for flawless lifetime operation, an impressive point to every customer.

Plus these savings on installation—no painting (of interior or exterior trim) . . . less time to install (delivered ready to install, and with wide flanges) . . . built-in storms and screens (no added costs for your customers)!

See how Glidorama Windows fit your formula for more sales and greater profit in 1957! . . . Send coupon or letter for our Builders' Catalog, Price List or a Glidorama demonstration right in your office!

give your '57 home buyers that modern luxury-touch...

whether for the more modest homes like this...

or on up to the more costly modern mansions like this . . .

Only by a demonstration can you appreciate how Glidorama Windows will make sales easier, profits greater!

Here's window beauty
for indoor-outdoor living!

Andersen Windowalls

TRADEMARK OF ANDERSEN CORPORATION

John Barkhorn is the owner and designer of this South Orange, New Jersey home.

The window beauty of Andersen WINDOWALLS serves here to blend a charming outdoor scene with a well-appointed interior. These beautiful—and practical—Andersen Gliding Wood Window Units slide easily in their plastic tracks to let in cooling breezes; yet they *close tight* to form a weatherproof barrier that seals out rain, dust, drafts. The *natural wood* is pleasing to the eye, to the touch and provides *natural insulation*—makes it easy for the builder to create beauty and distinction.

For information on how to create quality in homes you build with WINDOWALLS, see your lumber and millwork dealer, Sweet's Files or write Andersen. WINDOWALLS are sold throughout the country, including the Pacific Coast.

The term **BAKELITE** and the Trefoil Symbol are registered trade-marks of UCC.

HOPE'S

Since 1818

STEEL WINDOWS HAVE THE STRENGTH AND RIGIDITY THAT NO OTHER WINDOW CAN MATCH

Hope's Combination Inside-Outside Metal Trim is installed as in the illustration below.

RESIDENCE (Holford) CASEMENTS

ACTUAL SASH SIZES	1'-7 $\frac{1}{8}$ "	3'-1"	3'-1"	4'-5 $\frac{1}{8}$ "	5'-9 $\frac{1}{8}$ "	7'-7 $\frac{1}{8}$ "
2'-2"	1212	2212	2222	3222	4222	5222
3'-2"	1313	2313	2323	3323	4323	5323
4'-2"	1414	2414	2424	3424	4424	5424
4'-2"	1413	2413	2423	3423	4423	5423
5'-3"	1514	2514	2524	3524	4524	5524

HOPE'S COMBINATION INSIDE-OUTSIDE METAL TRIM is easily and quickly installed with all standard sizes of Hope's Steel Casements. Trim fits into rough openings; no finished carpentry is required, either inside or out. Only a few minutes are needed for assembling at the warehouse or on the job.

HOPE'S STEEL CASEMENTS (standard sizes shown in above diagram) provide a variety of sizes and ventilator combinations that complement any type of architecture; readily fit any kind of construction. No other window can equal the strength and durability of steel.

HOPE'S ROTO TYPE RANCH WINDOWS

	3'-1 $\frac{7}{8}$ "	6'-2 $\frac{3}{8}$ "	9'-3 $\frac{5}{8}$ "
2'-1 $\frac{7}{8}$ "	R1110	R21210	R31210
4'-2 $\frac{3}{8}$ "	R12111	R22211	R32211
6'-3 $\frac{5}{8}$ "	R13112	R23212	R33212

Hope's New Roto Ranch Windows have wide (1 $\frac{3}{8}$ " muntins in proper proportion to panes. They provide great rigidity and harmonize with residential construction. Awning type ventilators open and close easily, quickly. Die-cast underscreen roto operator has extension arm of stainless steel fitted with a bronze shoe.

New flat-type fixed screens need never be touched. No fussing with wickets. Glazing may be standard units of "Thermopane", "Twindow" (to eliminate storm sash) or single panes, sheet or plate glass. No other Ranch Window in the same price range possesses all these features... and Hope's prices are low.

For Full Information on Hope's Residence Casements and New Roto Ranch Windows, Write

Protect your wallboard construction with STEEL...

Use Gold Bond Corner and Casing Beads

Guard exterior wallboard corners with Gold Bond Arch Corner Bead

Protect your wallboard corners *while you're building*—and give protection that *lasts long after prospects buy*. Put the permanent strength of steel into exterior corners with Gold Bond Wallboard Arch Corner Bead.

You get maximum bonding of joint cement with Gold Bond's exclusive triangular design—and this bead's deep knurled flanges prevent joint cement slippage during application and give better adhesion afterwards.

Protect door and window edges with Gold Bond Wallboard Casing Bead

These self-finishing *steel casings cost less* than wood trim and make it easier to terminate wallboard construction around doors and windows.

Guard against construction accidents—and give homeowners the extra strength that steel provides. Each casing unit fits snugly and has a ridge design that *locks in* the wallboard. You save painting time because there's no fuss about trim edges. Precision-mitered ends available at no extra charge.

Homeowner prospects appreciate strong exterior corners and sturdy door and window edges. For more information on how Gold Bond® Wallboard Arch Corner and Casing Beads can help you build—and sell—better, write National Gypsum Company, Dept. AB-47, Buffalo 2, New York.

Use Gold Bond Wallboard Arch Corner Bead for straight corners or simply snip flanges to form a versatile arch bead.

Use Gold Bond Wallboard Casing Bead No. 400*, with its self-locking ridge design and mitered edges for a snug fit. *Patented under U. S. Patent No. 2,663,390.

BUILDING PRODUCTS

“These windows can *take it*”

says Sid Naham, Maryland builder

“I’ve been using steel windows continuously for twenty years,” reports Mr. Naham, president of Naham Construction Co., Inc., of Silver Spring, Md. “You know, windows get a lot of abuse during construction and in the home. My experience proves steel windows can take it.

“What’s more, with steel sash I get the most window area for the least money. I’m using steel casement windows with inside-outside trim in my Newcastle, Adelphi Heights and Glen Haven projects.”

Take it from Mr. Naham and from successful builders everywhere, your best buy is steel windows. They’re easy to work with, they resist damage, and they go in fast.

Once installed, they give trouble-free service. And their clean, modern lines add greatly to the appearance of your homes, especially when the sash is painted to harmonize with your inside and outside color schemes. Available in many popular types and designs. You’d be wise to use steel windows in the next homes you build!

Bethlehem Steel Company does not manufacture steel windows, but for many years the window industry has looked to us for the specially rolled bar shapes that give steel sash its unequalled strength. See the advertisements of steel window manufacturers in this magazine, or consult Sweet’s, AIA File 17b.

BETHLEHEM STEEL COMPANY

BUILD FASTER...SELL FASTER WITH

STEEL WINDOWS

Architect: Onnie Mankki, Cleveland, Ohio

An answer to today's biggest problem in RESIDENTIAL BUILDING

With material costs and labor costs what they are, how can you give home buyers a better house at a price they are willing to pay?

We think we have an answer for you: *(continued on next page)*

LIBBEY • OWENS • FORD GLASS CO., TOLEDO 3, OHIO

Architect: Harold Spitznagel, Sioux Falls, S. D.

Design, build and sell your house as an ALL-insulated home by putting Thermopane[®] insulating glass in every window. *Sales points you can use on prospective owners:*

1. Any house with single glass—*without Thermopane*—in every window is only *halfway* insulated.
2. *Thermopane* keeps the house *warmer* in winter (and cuts fuel bills). *Cooler* in summer (cheaper to air condition). And it insulates against outside noise year 'round.
3. No storm sash to buy, put up, take down, paint, wash or worry about . . . ever!
4. The cost of *Thermopane* can be part of the *original* mortgage for only a dollar or two a month, and the *resale* value of the house is higher.

YOU CAN CASH IN ON THIS! Home buyers in your community who read *Life*, *Better Homes and Gardens*, *American Home* or *House Beautiful* will see *Thermopane* advertised as "a sign of a better buy". By using it in your houses you can cash in on this and 13 years of national advertising. *Thermopane* is the best known and most wanted kind of insulating glass.

LIBBEY • OWENS • FORD GLASS CO., TOLEDO 3 • OHIO

Thermopane Facts

1/2-inch DSA Thermopane

Two lights of 1/8" glass with 1/4" air space—54 standard sizes. *Thermopane* made with DSA Glass is economical double glazing. However, while made with fine-quality window glass, it does not provide the clarity of vision and superior exterior appearance attained with polished plate glass.

1/2-inch polished plate glass Thermopane

Two lights of 1/8" plate glass with 1/4" air space—49 standard sizes. *Thermopane* made with 1/8" plate glass provides better vision and gives the home a finer quality appearance.

1-inch Thermopane

Two lights of 1/4" *Parallel-O-Plate*® Glass with 1/2" air space—56 standard sizes. This *Thermopane* provides excellent thermal insulation combined with the clarity of vision that you get with plate glass. Ideal for picture windows, window walls and sliding glass doors.

Special Glasses

Thermopane can be made with four types of glass for reduction of glare and solar energy transmission: 1/4" or 1/8" Heat Absorbing Plate Glass—blue-green, transparent. Also 1/4" or 1/8" *AKLO** Hammered Glass—blue-green, translucent.

For diffusion of light and for decoration, it can be fabricated with any one of several Blue Ridge Glass patterns.

For extra resistance to thermal shock or impact, it can be fabricated with *Tuf-flex*® tempered plate glass.

SLIDING GLASS DOORS—The demand for *Thermopane* for these large glass areas is growing at a tremendous pace. L·O·F and the sliding glass door industry have standardized on three sizes of 1"-thick *Thermopane*: 33" x 76 3/4", 45" x 76 3/4", 57" x 76 3/4". Architect: Wilbur Firth, Cincinnati, Ohio.

PICTURE WINDOWS AND WINDOW WALLS—Most leading manufacturers of wood or metal sash for picture windows or window walls can supply sash designed to take standard sizes of 1"-thick *Thermopane*.

Porch planned by owners, Mr. and Mrs. P. F. H. Reichert, Toledo, Ohio.

Design by Don Scholz, Toledo, Ohio

Since *Thermopane* is a factory-sealed insulating glass unit and is subject to movement due to changes of temperature and barometric pressure, adequate provision should be made for expansion and contraction.

An approved cushioning material *must* be used so there is no contact between the sash and glass at any point. L-O-F has available Neoprene setting blocks for units $\frac{1}{2}$ " , $\frac{3}{8}$ " , $\frac{7}{8}$ " , and 1" thick. Also, for units $\frac{1}{2}$ " thick, the company has available a metal glazing clip for use in steel, aluminum and wood sash. Under no circumstances

should units be *forced* into any type of sash. Face clearances between glass and stops must be at least $\frac{1}{8}$ ". Edge clearances between glass and frame must not be less than $\frac{1}{8}$ " on each edge for $\frac{1}{2}$ " *Thermopane*, and $\frac{1}{4}$ " on each edge for units over $\frac{1}{2}$ ". For detailed glazing information, ask for *Thermopane* Manual.

The contractor, architect and building owner should assume responsibility in seeing that glazing instructions are followed and *not accept the job if they haven't been*.

Thermopane can be used in these standard types of sash:

- Picture Windows and Window Walls
56 sizes

- Double Hung Windows (2-light)
14 sizes

- Double Hung Windows (4-light)
14 sizes

- Wood Casements
7 sizes

- Wood Awning Windows
6 sizes

- Residential Steel Casements
6 sizes

- Wood Panel Windows
2 sizes for fixed lights
2 sizes for ventilators

- Panel Window with Louvers
1 size

- Modified Wood Panel Window
1 size

- Metal Panel Windows
1 size for fixed lights
1 size for ventilators

HELPFUL INFORMATION AVAILABLE

To assist you and your staff in using *Thermopane*, L-O-F offers the following:

- List of standard sizes
- List of manufacturers who make sash for *Thermopane*
- Simple framing methods (complete details)
- Folder on economical Panel Window System

Thermopane Merchandising Guide — to assist you in using *Thermopane* as a sales feature.

Thermopane Sales Aids — signs, folders, displays, banners, mats, TV commercials, radio spots, etc.

For further information contact your local L-O-F Glass Distributor or Dealer (listed under "Glass" in phone book yellow pages) or write to Libbey-Owens-Ford Glass Company, Dept. 517, 608 Madison Ave., Toledo 3, Ohio.

a Great Name in Glass

You'll appreciate the
Exclusive Features in

VENTO WINDOWS

(STEEL AND ALUMINUM)

Take, for example, the Vento Champion Steel Basement Window. *It's the best window made* and for these reasons: Made of 14 gauge formed steel sections, our own design; 3 position ventilation; weather stripping action of ventilator in frame; positive action cam lock gives greater tolerance; high sill section prevents leakage; integral fins for easy installation in any type of construction; design of formed sections allows unit to stand by itself, saving installation time. *It's really a Champion!*

A few
VENTO installations
... the right
window for every
type of building.

Heavy duty pouring bucks are available for poured wall construction — can be used over and over.

VENTO Steel Casement Windows

All casements drilled and tapped to receive storm sash and screens, operator arm guide channels attached with screws for easy removal and replacement, if necessary; ventilator frames constructed from the same heavy sections as the outside frame to provide greater rigidity and stronger ventilators.

VENTO Aluminum Awning Windows

Direct gear operated, worm and pinion type; heavy duty construction with angle handle that conforms to all stool depths, minimum turns to open window fully. Weather tight . . . Vento alone keeps metal to metal contact plus metal to weatherstrip. Effortless operation . . . nylon roller blocks at all friction points permit finger tip operation.

VENTO Industrial and Commercial Steel Windows

Vento Pivoted, Projected and Architectural Windows are suitable for every type of commercial and industrial building, especially where abundant daylight and fresh air are desired. Offered in a broad new range of types and sizes.

Bayley

Steel Heavy Intermediate PROJECTED WINDOW

A Better Value in Commodity
Sizes, available for quick shipment

Featuring new one-piece solid hot-rolled sections assembled by machine welding, this new Bayley Steel Heavy Intermediate Projected Window now offers you a window that exceeds all present industry standards. It retains the time-proven advantages of Bayley section design *plus* new shape and weight characteristics, hardware and fabrication details that result in greater strength, better weathering and maximum freedom from upkeep — an extraordinary dollar value in window service and operating qualities. The features listed below readily reflect the Bayley window engineering experience and modern manufacturing methods embraced in this new window.

- 3.5 lbs. per foot weight of ventilator frame and jamb
- Sections (one-piece) 1½", 1⅝" and 1¾" deep — with wide parallel double-contact weathering rolled integrally
- Joinery — machine welded and finished
- Outside glazed — accommodates ½" insulated glass
- Wide triple-contact brass friction shoes assure smooth operation of ventilators

Meeting rail between PO and PI Ventilators FULL SIZE

personality:

INFORMAL

The right doors and windows can be of major help in making a house look "different." And Curtis provides you with the widest, most varied line of windows, doors and other woodwork. Here a finely detailed Curtis Dutch door—highly popular—and Curtis Convertible wood windows, used as awning sash, strike the contemporary note.

personality:

TRADITIONAL

The traditional style is coming back, say many leading builders. You can capitalize on this trend with an interior like this. Curtis divided-light Silentite double-hung windows are used in a bay. Like all Curtis windows, these open and close at a touch, are truly weather-tight. The door is a Curtis panel door—one of many styles awaiting your choice.

personality:

MODERN

Curtis Silentite casements will never swing or rattle in the wind and staunchly bar out dust and weather. They are made in several sash styles. The door is a famous Curtis New Londoner with a beautiful grain pattern that creates a "picture in wood." The broad line of Curtis Woodwork offers styles for every taste, every purse and every personality.

Give the lady what she asks for *(it's the way to sell houses)*

When housing authorities in Washington, D.C., asked representative women what they want in dwelling-house styles, they got an emphatic answer. Women want houses that have personality. They dislike "look-alikes"—intensely.

Today, Curtis offers you the easy, practical way to vary the appearance of the houses you plan or build, and to upgrade quality at the same time.

Curtis wood windows and doors come in so many different styles and types that you can offer the home owner almost an unlimited choice of door and window combinations. No other manufacturer has so broad and varied a line—entrances; trim, mantels, cabinetwork, stairwork, kitchen cabinets—everything in residential woodwork to fit every taste and every building budget.

This guarantee makes selling easier

Here is absolute assurance to the home owner that Curtis Silentite wood windows embody fine materials and workmanship. These toxic and water-repellent treated windows have special patented features not available in other windows. Curtis high-quality New Londoner flush doors and panel doors, too, like Curtis Silentite windows, are trademarked to provide positive identification. This trade-mark identifies Curtis quality—famous since 1866—and it helps sell houses—at a profit.

CURTIS

WOODWORK

heart of the home

Now your Curtis dealer provides a simplified way to choose your Curtis windows and doors. Two Selector Charts show 72 window styles and arrangements, 86 panel and flush doors. Sizes and prices are quickly found in an accompanying size and price book. Lumber and building materials dealers who sell Curtis Woodwork are located in most parts of the country.

QUIET-ZONED

**HOMES SELL FASTER WHEN
QUIET-ZONED WITH CELOTEX
PERFORATED CEILING TILE**

New CELOTEX quiet-zoning makes homes sell easier. Smart, exclusive *linear-random* tile board helps "zone off" noise—breaks the barrier to bigger, quicker sales. Add the deal-clinching power of "peace and quiet" to *your* plans. Quiet-Zone the homes *you* build, with this newest aid to better building from the originator of noise-quieting fiber tile. Feature this sales-making mark of a truly modern home: *Quiet-Zoned* with perforated ceiling tile by CELOTEX.

Cuts Costs Three Ways! (1) Needs no decorating! (2) Material cost is low! (3) TWINTEX® (12x24 cross-scored) goes up faster, covers twice the area with one tile (also available 12x12 size, bevel butt or "E-Z" joint).

Sells on Sight and Sound! Patented *linear-random* perforated design. More restful, more pleasing to the eye. New, exclusive, *really* white finish! And prospects appreciate the way it puts a hush on noise!

AMERICAN BUILDER

You can stake your reputation on guaranteed

BILT-WELL woodwork

In 1957, homes built will be sold on the basis of exclusive features of the component parts. You can guarantee that the woodwork in your homes will qualify and at the same time enhance your reputation by choosing from the full line of BILT-WELL windows, cabinets and doors.

new BILT-WELL Super 7 REMOVABLE WINDOW

The new BILT-WELL Super 7 has all the outstanding features of the popular BILT-WELL Superior Window unit, PLUS the removable sash feature and the addition of flat overhead balances.

7 Good Reasons Why Your Homes Should Feature BILT-WELL Super 7 Windows:

Easily Removable—Sash quickly removed from either side, without sacrificing weathertightness.

Unitized—Sill design facilitates groupings.

Counterbalanced—Flat overhead balances guaranteed for life of the unit. No cocking or sticking. Completely safe, smoother operation.

Weatherstripped—Completely weatherstripped. Patented stainless steel jamb-liner. Head sill and check rail anodized aluminum alloy weatherstrip.

Durable—All wood parts, water-repellent preservative pressure treated in strict accordance with NWMA requirements. Jams are 1 1/16" thick and sill 1 3/8" thick.

Standardized—Fits all standard walls—brick veneer, solid masonry and wood stud walls with 3/4" lath and plaster, 1/2" or 3/8" dry wall and with either 1/2" or 25/32" sheathing.

Guaranteed—Meets U.S. Dept of Commerce, Bureau of Standards requirements for weatherstripped double-hung wood windows. Also bears AWWI Seal of Approval.

Standard Sizes

We have carried out an extensive survey on the use of different sizes of double-hung windows over a period of several years. This survey has shown that the following 22 standard window sizes are specified in 90% of building applications. These 22 sizes CAN meet ALL of the requirements. However, BILT-WELL Super 7's are available in all of the popular sizes of the NWMA Standard List.

ROUGH OPENING—Add 7 inches to glass in width and 10 inches to glass in height. Add 6 1/8" to glass in width for each additional unit to arrive at multiple rough opening size.

MASONRY OPENING—Add 8 inches to glass in width and 10 1/2" to glass in height. Add 6 1/8" to glass in width for each additional unit to arrive at multiple masonry opening size.

Sash furnished two light or four light horizontally divided.

GLAZED SSB GLASS

BILT-WELL woodwork

New Exclusive Doors by BILT-WELL

Here is the first real innovation in door design since the flush door... the exciting BILT-WELL New Orleans and Belvedere Doors with beautiful decorative glass panels.

The decorative designs which will add a distinctive touch to every home you build is fired ceramic and is fused into the glass panel... no chance of chipping or peeling. Scrubbing or scraping will not mar their beauty.

Both the New Orleans and the Belvedere doors have veneered stiles, using waterproof glue. Rails are solid, all clear, kiln-dried Ponderosa Pine.

Ask your Lumber Dealer today about the full line of high quality BILT-WELL Woodwork for the home. Or mail the coupon below for specific information on any one of the BILT-WELL Products.

The Belvedere Door is available with either of 2 different decorative glass panel designs, with plain glass panels or without glass. This door is available in 3'-0" x 6'-8" x 1 3/4" only. Glass panels are 16" square.

The New Orleans Door is available with any of 3 different decorative glass panel designs. These doors are available in 3'-0" x 6'-8" x 1 3/4" only. Glass panel is 12" wide by 48" long.

A handy reference guide to Weldwood Products— the most complete line in the building industry

ADHESIVES

Contact Cement—nonstaining, instant bonding; for laminates, installing plywood without nailing—no clamps or presses needed.

Plastic Resin Glue—water-resistant; permanent bond for wood, other porous material; mixes with cold water.

Presto-Set Glue—ready-to-use; in tubes or jars; for plastic, paper, cloth or wood.

Resorcinal Glue—completely waterproof; completely weatherproof; withstands cold, heat, acids, alkalis, fungus, and mold.

ARMORPLY—plywood faced with any metal; strong, light and rigid; has metal's toughness, wood's easy workability; made to specification.

CHALKBOARD—porcelain-surfaced steel[™] bonded to plywood—metal backing; surface defies abrasion, chipping or cracking; in 4 shades of eye-pleasing gray and green and new "Projection White." Booklet-1403.

Aluminum Chalkboard Trim—for all Weldwood Chalkboard installations.

Tackboard—colorful bulletin board designed for use with Weldwood Chalkboard installations.

CONCRETE FORMS—see "Fir Plywoods—Ply-form."

CORE STOCK—see "Paneling—Novoply."

COUNTERFRONTS— $\frac{3}{4}$ ", 5-ply; hardwood or fir veneer; lumber or Novoply cores; expansion or contraction almost never occurs; in a variety of handsome surfaces.

COUNTERTOPS—see "Micarta."

DOORS, BI-FOLD—Space-saving doors made of nonwarping Novoply for closet and wardrobe fronts. Complete kit includes track, hardware, etc. Available with birch faces.

DOORS, FIRE—combine positive protection and rich wood beauty; have exclusive Weldrok[®] incombustible mineral core; UL labeled for Class "B" and "C" openings. Guarantee covers replacement cost including hanging and refinishing. Booklet-1591.

DOORS FLUSH—(all with fine hardwood faces)

Hollow Core Door— $1\frac{3}{8}$ " or $1\frac{3}{4}$ " thick; all sizes; proven stability in exhaustive tests; may be painted or finished natural; for exterior, use $1\frac{3}{4}$ " only.

Solid Core Door—exterior or interior; hardwood or pine core; thicknesses from $1\frac{3}{8}$ " to $2\frac{1}{4}$ "; all sizes; crossbanded and laminated with waterproof glue; best of its type.

Stay-Strate[®] Door—incombustible Weldrok core; lifetime guarantee against manufacturing defects, warping or twisting; covers replacement cost including hanging and refinishing; full variety of sizes; $1\frac{3}{4}$ " thick. Booklet-1592.

DOORS, LOUVER—In fir and pine; wide range of sizes.

DOORS, SLIDING—Made of nonwarping Novoply. Doors alone or complete kit including track, hardware, etc. All standard sizes.

DOOR STOCK, CUPBOARD—wide variety of sizes, thicknesses, including door or core of nonwarping Novoply; good one or two sides; birch-faced; requires no finishing; won't warp, sag or bind. Booklet-1323.

DOORS, METAL-FACED—Doors with Armorply facing; on special order. Send your requirements for all details.

DOORS, MICARTA-FACED—The "Custom Royal." Lumber, hollow or Weldrok core flush door with faces of Micarta. Booklet-1601.

EDGING—see "Flexible Wood Trim."

FINISHING MATERIALS

Firzite—for fir plywoods or soft woods; seals pores, minimizes wild grain, reduces checking and grain raise; in white or clear; may be tinted. White Firzite easy way to popular blond finish.

Satinlac—brings out natural beauty of any wood; quick to apply and dry; satin finish.

FIR PLYWOOD

Duraply—Weldwood exterior plywood with tough, smooth overlay permanently bonded to face. Takes paint better, holds it longer. Weatherproof, easy to work. Also available lap-cut with furring strip. Booklet-1413.

Weldtex—striated; butt seams don't show; won't check; made in both interior and exterior grades; easy to finish.

Exterior Douglas Fir—superior plywood for any purpose, including:

Plyform—exterior—for concrete forms; produces smooth surface; multiple re-use.

Plyshield—"A" face, "C" back; all sizes.

Sheathing—"C" face and back, all sizes.

Underlayment—lies flat; resists warping and twisting; all sizes.

2-4-1 Panel— $1\frac{1}{8}$ " thick panel that's combination underlayment and subflooring.

Texture One-Eleven—deep-grooved every 2" to 4"; splitproof and punctureproof; ship-lapped edges: $\frac{3}{8}$ " thick; 16", 32", 48" width; 96", 120" length. Booklet 54-10.

Interior Douglas Fir—all grades and sizes including:

L-1R—Plyform made with new L-1R adhesive; gives many of the advantages of exterior-type plywood yet sells at interior grade price.

Lebanex—5-ply, hardboard faced; tough and smooth to resist wear and denting; for concrete forms, table tops, sliding doors, etc.

Plybase—base for linoleum, carpeting; backing for wall panels.

Plyform (interior)—"B" face and back, all sizes.

Plypanel[®]—3 grades; for paneling, built-ins, counters, backing; sanded both sides.

Plyscord[®]—C.-D. grade; unsanded; low cost; for sheathing and underlayment; all sizes.

FIRZITE—see "Finishing Materials."

FLEXIBLE MATERIALS—see "Flexwood;" "Kalistron."

FLEXIBLE WOOD TRIM—Real wood veneer in handy rolls to cover plywood edges. Many species; 1" wide—larger sizes for industrial use.

FLEXWOOD[®]—genuine wood 1/85" thick on cotton backing; 12" to 24" widths, 8' to 12' lengths; for any smooth, dry surface; 40 wood surfaces, wide choice of grain, figure; applied like wallpaper. Booklet-28.

HARDBOARD—Weldwood offers a complete line of standard, tempered, textured and perforated hardboards. Special fast delivery service on any type, variety, size. Booklet-1304.

KALISTRON[®]—clear, wear-resistant sheeting; color permanently fused to underside (pattern and color never show wear); 33 colors; ideal wall covering or upholstery fabric; less expensive utility grade, too. Booklet-147.

LUMBER—Weldwood is currently producing all common western species of lumber and invites inquiries on carload lots.

MARINE—Duraply, Douglas Fir, Philippine Mahogany, Samara and other hardwoods with 100% waterproof adhesive; will never rot or delaminate. Booklet-1446 for more details.

METAL-FACED PLYWOODS—see "Armorpoly."

MICARTA[®]—made by Westinghouse, distributed by Weldwood; highly durable and beautiful plastic laminate; resists chipping, denting, burning, grease or fruit staining; easy to clean; needs no refinishing; for table tops, countertops, etc.

Unitop—complete Micarta sink top with coved backsplash and no-drip front edge all in one piece. Booklet-1415.

MOLDINGS

Metal—aluminum, faced with hardwood veneers; matches popular Weldwood veneers; 8' strips for corners, caps, dividers.

Wood—all-plywood Cove Moldings for cabinets, trim, etc. Solid hardwood moldings available, too. Booklet-1397.

NOVOPLY[®]—see "Paneling," "Doors."

PANELING

Algoma Grade Hardwoods—carefully selected, matched veneers; uniform color and appearance; many fine hardwoods. Booklet-1457.

Architectural Grade Hardwoods—finest obtainable; superlative veneers, perfectly matched; in all fine woods. Booklet-1034.

Korina[®]—from the Belgian Congo; blond; complements modern or traditional.

Limba—from Africa; blond, mahogany-style; fine grained figure.

Nakora[®]—blond; low-cost Japanese hardwood; highly figured grain pattern.

Samara[®]—low-cost African hardwood; interesting grain pattern; light reddish color.

Prefinished—completely and expertly factory-finished; just install. Panels include:

Plankweld[®]—7 woods; put on old walls or new studs—no furring; edge-grooved for neat joints; special clips eliminate nail holes.

V-Plank[®]—4' x 8' panels "v-grooved" for a random-plank effect; 13 beautiful hardwoods.

Colonial V-Plank—like V-Plank but specially "pegged" for plank appearance; 10 woods.

Specialty Paneling

Novoply—unique wood-plastic product; wood chips and flakes give mosaiclike effect; amazingly flat, easily fabricated; ideal for cores, sliding doors, wall paneling, partitions.

Planktex[®]—6" bands of striations alternating with the smooth Philippine Mahogany grain pattern; comes finished or unfinished.

Sea Swirl[®]—low-cost panel with weathered, textured look; grain stands out from etched-out background; free of knots.

Surfwood[®]—similar to Sea Swirl but with occasional knots; very low cost.

Surfwood-Duplex—7/8" thick fir panel with one Surfwood face; combination ceiling and roof-decking for open-beam construction.

Surfplank[®]—shiplapped, solid lumber paneling with Surfwood appearance.

Weldtex—the original striated paneling; interior or exterior grades; easy to install and finish; blends with modern or traditional.

Weldtex Squares—Weldtex in 3 sizes of squares, from 11 7/8" to 24"; 5 1/2" thick.

PARTITIONS, MOVABLE—real wood beauty; panels have incombustible Weldrok core; units interchangeable; accessible concealed wiring. Booklet-1405.

PEW SEATS—5 fine hardwoods; for churches, terminals, etc. In lengths up to 10'.

PINE PLYWOOD—"Old Craftsman" brand, for cabinets, built-ins. All-pine construction; interior grade made with mold-resistant glue. Exterior also available. Paints faster, smoother; exceeds Pine Plywood Commercial Standards. Booklet 1695.

PLANKTEX—see "Paneling."

PLASTIC MATERIALS—see "Kalistron," "Micarta."

PORC-LIN-PLY[®]—weatherproof porcelain panel for building fronts, or interior paneling; hardwood core—durable porcelain face—steel back. 9 standard colors. Booklet-1469.

SAMARA—see "Paneling."

SATINLAC—see "Finishing Materials."

SHEATHING—see "Fir Plywood."

SIDING—see "Fir Plywood"—Exterior Weldtex, Duraply, Texture 1-11, Hardboard.

STORE-FRONT MATERIALS—see "Armorpoly," "Porc-lin-ply."

VINYL PLASTIC—see "Kalistron."

WELDBORD—smoothly sanded all-hardwood panel that sells at a softwood price. No grain raise—perfect for painting.

WELDTEx—see "Paneling."

"TWINDOW"...the world's brings many advantages

EVEN IN LARGE AREAS, the amazing insulating properties of Twindow—Pittsburgh's windowpane with insulation built in—keep a room like this one more comfortable winter and summer. Twindow reduces window fogging and icing. It cuts heating and air-conditioning costs. And it provides the most convenient form of storm window insulation. Prospective home buyers and people interested in remodeling know that they are saved the labor of putting up storm windows in the fall and taking them down in the spring. Architect: Giorgio Cavaglieri, New York City.

THIS PATIO VIEW shows the clear vision possible with "the world's finest insulating glass"—Twindow. More and more people are demanding the advantages possible with Twindow. And they are impressed with the fact that Twindow costs no more than single-pane windows plus storm sash.

finest insulating glass... to this beautiful home

TWINDOW, as demonstrated here, adds to the beauty of the home's design. It opens the rooms to the fullest enjoyment of the outside view—whether it's an exceptionally delightful one, as here, or a modest garden scene. Moreover, Twindow minimizes cold air downdrafts. It muffles outside noises.

TWO TYPES OF TWINDOW®

METAL EDGE. Ideal for large windows and where maximum insulation is needed most. Constructed of two panes of $\frac{1}{4}$ " clear-vision Plate Glass, with a $\frac{1}{2}$ " sealed air-space between. Exclusive stainless steel frame means no bare edges to chip or mar. It means easier, quicker, and safer handling for the builder, too.

GLASS EDGE. Constructed of two panes of $\frac{1}{8}$ " Pennvernon®—the quality window glass—with a $\frac{3}{16}$ " air-space between them. High insulating value makes these units ideal for modern window wall construction. Available in popular sizes for a variety of window styles.

See Sweet's Builders Catalog for detailed information on Pittsburgh Plate Glass products.

RELATION OF GROSS VENTILATOR AREA TO NET AREA

FHA REQUIREMENTS

Provide cross ventilation for all spaces between roof and top floor ceiling with corrosion-resistant 8-mesh screened louvers as follows: **ROOFS WITH SLOPES 2 IN 12 OR GREATER**, 1/300th of the horizontal projection of the roof area over each space. One-half the required ventilation shall be in the upper part of the ventilated space as near the high point of the roof as practicable. **ROOFS WITH SLOPES LESS THAN 2 IN 12**, 1/150th of the horizontal projection area over each space unless a complete, continuous vapor barrier is provided, in which case use 1/300th.

HOW TO USE FREE AREA VENTILATION GUIDE

Using length and width dimensions of each rectangular or square attic space, find one dimension on vertical column, the other dimension on horizontal column. These will intersect at the number of square inches of ventilation required by FHA to provide 1/300th. Multiply this re-

quired ventilation by two for roof slopes of less than 2 in 12 without vapor barrier.

Remember — 1. Include overhang of roof area in measurement of attic areas. 2. At least 50% of the required ventilation must be in the highest part of the roof practicable. 3. Provide cross ventilation for each separate space.

1/4" MESH SCREEN

Gross area = Net area

1/8" MESH SCREEN

Gross area = 1.25 × Net area

1/16" MESH SCREEN

Gross area = 2 × Net area

LOUVERS WITH 1/4" MESH SCREEN

Gross area = 2 × Net area

LOUVERS WITH 1/8" MESH SCREEN

Gross area = 2.25 × Net area

LOUVERS WITH 1/16" MESH SCREEN

Gross area = 3 × Net area

Section C Hardware & Building Specialties

ORNAMENTAL IRON

When ornamental iron railings in stock sizes will not fit a particular job they can be "made to order" by the manufacturer. In order for the manufacturer to submit an accurate estimate or to proceed with the fabrication of the iron work preliminary job sketches with accurate dimensions and other pertinent data must be furnished. The following details show the procedure to follow to insure an accurate custom-built job. While the details and information shown are for entrance porches and steps the same methods also apply to all other locations where ornamental iron is to be used. For the names of manufacturers of ornamental iron work consult the yellow-pages of this Directory.

Either a sketch, as shown in the upper right-hand corner of this page, or a plan view layout with accurate measurements as indicated by the letters "W" and "L" should be submitted. If holes for newel posts are already in place—specify all rail dimensions.

For step railings which are to have a slanting hand rail, include a side view to show accurate masonry dimensions. In addition to the dimensions "W", "H", and "L" the width of the treads and height of the risers should be given.

Accurate measurements must be furnished if rail is to be curved. Indicate on the plan the dimensions "T", "C", "C'" and "L" if the rail is to follow an irregular curve. For a circular curve give the radius of the circle with dimensions locating exact center point in regard to other masonry details.

Additional information should specify the type of rail with the number, design and location of all rail ornaments. Also specify the type and finish of newel posts and indicate if the newel is to have an extended leg or a floor plate.

Plan above shows additional dimensions needed where bottom step has a bull nose end.

NOSE TO NOSE
DISREGARD OVERHANG

Elevation drawing at left presents an example of important offset dimensions. For instance, between columns or at baseboard, show offset dimension affecting setback of bottom rail in relation to top rail. Also show setback, or projection of nosing, at top edge of platform to the wall or column.

GENERAL

Consult manufacturers catalogs for stock sizes and designs of ornamental iron work. Many times slight alterations on the job during construction will eliminate the necessity of having the ornamental iron made to order.

Section C Hardware & Building Specialties

BUTT HINGE DATA

NUMBER OF HINGES PER DOOR
VARIES WITH HEIGHT OF DOOR

HOW TO SPECIFY HINGES

Number (in Pairs)—Either Ball or Oilite Bearings (if Required)—Type of Tips—Type of Screws—Type of Hinges—Metal—Height—Width (Required Only for Full Mortise Hinges)—Weight (Regular or Heavy)—Finish

TEMPLATE HINGES are Made to Standard, Templates or Patterns (Usually in Accordance with Government Standards) to Insure Exact Matching of Hinge and its Screw Holes with Metal Doors and Metal Jambs Fabricated by Other Manufacturers

LOCATION OF HINGES

WOOD	1 1/4" & 1 3/8" Transom	1 1/2" & 1 3/4" Transom	1 1/2" Thick Door	—	1 3/8" Thick Door	1 9/16" to 1 7/8" Thick Door	2" to 2 1/2" Thick Door
	STEEL	1 1/4" & 1 3/8" Transom	1 1/2" & 1 3/4" Transom	—	1 1/4" Thick Door	—	2" to 2 1/2" Thick Door
50"							
43"	4'-0" 4'-2"					6"-x	6"-x
37"	3'-0" 3'-1"					5"-x	
32"	2'-8"	3"	3 1/2"		4"	6"	5"-x
20"	1'-8"		3 1/2"	4 1/2"	3 1/2"	4 1/2"	
1'-0"		2 1/2"	3"				

HEIGHT (LENGTH) OF EACH HINGE Varies with Width, Thickness and Material—(Note:—X Means Extra Heavy)
FOR HIGH FREQUENCY DOORS, USE EXTRA-HEAVY HINGES
Note: Doors of Wrought Bronze, Since They Weigh About 50% More Than Steel, Always Require Extra-Heavy Hinges

WIDTH OF FULL MORTISE BUTT HINGE

$$\text{Width} = 2t'' - 2s'' + \text{Clearance} + 1/8''$$

$$= \text{Usually} = 2t'' + \text{Clearance} - 3/8''$$

Conversely: Clearance = Hinge Width - $2t'' + 3/8''$

CLEARANCES WITH OTHER TYPES OF HINGES

Length of Hinge	Half Surface	Full Surface	Full Surface	Half Mortise
3"	1"	(Kalamain & Angle Iron Doors)	(Tubular Steel Doors)	
3 1/2"	1 1/4"			
4"	1 1/4"			
4 1/2"	1 3/8"	1 3/4"		1 3/4"
4 1/2" Extra Heavy	1 7/8"	1 7/8"	7/8"	1 7/8"
5"	1 7/8"	1 7/8"		1 7/8"
5" Extra Heavy	1 7/8"	1 7/8"	7/8"	1 7/8"
6" Extra Heavy	2 1/8"	2 1/8"	7/8"	2 1/8"

Courtesy American Society of Architectural Hardware Consultants

TO DETERMINE SIZES OF BUTT HINGES

Door sizes given are jamb opening dimensions.

Thickness of Doors in inches	Width of doors or height of transoms in inches	Height of butt hinges (length of joint), inches
3/4 and 7/8 cupboard doors	To 24	2 1/2
7/8 and 1 1/8 screen doors	To 36	3
1 1/8 doors	To 36	3 1/2
1 1/4 and 1 1/2 doors	To 32	3 1/2
"	Over 32 to 37	4
1-9/16, 1 3/4 and 1 7/8 doors	To 32	4 1/2
"	Over 32 to 37	5

Ridge

overhead doors

INDUSTRIAL • COMMERCIAL

HEAVY DUTY DESIGN

Commercial and industrial fields are served for all applications in a great variety of heavy duty styles and sizes. Maximum strength and durability combined with functional design for manual, electrical or radio controls. Accepted service station, warehouses, factory installations including high lift and vertical doors. Any door manufactured to architects' specifications.

RESIDENTIAL

GREATEST VARIETY

Ridge offers the greatest variety of residential styles and sizes in the industry. There are models with raised, flush and recessed panels to suit every style of architecture.

HIGHEST QUALITY

Quality lumber and expert craftsmanship combined to bring lasting beauty and efficiency. Exclusive "golden hardware" and "certified tension springs" are used on all doors.

FINEST SERVICE

Ridge management is continuously improving methods of production and distribution to meet the modern demands of the building industry. A new manufacturing plant is under construction which will have a capacity of 1000 doors per day.

RAISED PANELS

are available for all sizes and models. Production facilities include an electronic glueing machine which assures a perfect product at an economical cost to give the utmost in style and lasting appearance.

GUARANTEED HARDBOARD

panels of these three types: Dorlux by Masonite Corporation, Dekadoor by U. S. Plywood Corporation, Coos Bay by Georgia Pacific Corporation. These panels are guaranteed not to split, crack or delaminate due to natural conditions of weathering exposure.

CERTIFIED SPRINGS

by Ridge are individually tested for pounds pull and recorded on a tag by the testing machine. Each spring is matched with a door by careful weight calculation to give the greatest efficiency of operation.

NEW . . . FIRST IN THE FIELD!

Copper comes out of the kitchen! Dexter's new Contemporary Copper lock line brings new warmth to the entire home, traditional or modern. Exterior parts are all solid copper — not plated. They're finished in Dexter's new tarnish-resistant Brite Copper or Satin Copper. The 2 3/4" roses are available in matching Copper or contrasting satin black finish. Accessory door and window hardware available in matching Copper finish.

The Lifetime Guaranteed tie bolt lock has pin tumbler cylinder, deadlocking or spring latch and "bull-nose" bolt. Available in key-in-knob models, passage sets and privacy sets. Easy to install, reversible for any hand door without disassembly. Requires only 1 3/8" cross-hole.

In Mexico: Dexter Locks, Plata Elegante, S.A. de C.V., Mexico City
Dexter Locks are also manufactured in Sydney, Australia; Milan, Italy and Porto, Portugal.

CALDWELL SASH BALANCES

TAPE AND SPIRAL TYPES FOR ALL WINDOWS

TAPE BALANCES

FOR RESIDENTIAL WINDOWS

(4 to 26 lb. sash; type 242)

Popular residential size adopted by most large manufacturers of unit windows. Same high quality clock steel springs, high tensile tapes and heavy gauge housing used in our largest types. Volume production permits use in low-cost housing. Can be used singly with one equalizer spring per sash at very low cost.

FOR COMMERCIAL AND INSTITUTIONAL WINDOWS

(4 to 35 lb. sash; type 150; 23 to 50 lb. sash; type 154)

Ideal for schools, hospitals, institutional and commercial buildings. Exclusive, patented screwdriver adjustment feature. Every coiled power clock spring tested for accuracy before shipment. Compact design reduces head room under lintels and mullions to a minimum.

FOR HEAVY WINDOWS

(50 to 75 lb. sash; type CX; 99 to 100 lb. sash; type D)

Carefully engineered to meet exacting requirements of heavy windows, sliding panels and doors, dumb waiters and other counter-balancing applications. Types CX, CXT, CXAT, D and DO are adjustable.

FOR SPECIAL CONDITIONS

Special face plates, loops, long tapes and even special balances can be furnished for unusual window conditions where standard balances will not suffice.

(Refer to size table when ordering tape balances.)

SPIRAL BALANCES

SPIREX... for residential windows

The only spiral balance on the market offering all of these advantages...

- **ADJUSTABLE FOR PRECISE TENSION**—Can be adjusted after installation to save time in precision balancing.
- **SMOOTH, QUIET OPERATION**—Special coating insulates Spirex springs against noise and rust. Patented new design eliminates friction and rasp.
- **POSITIVE LIFTING POWER**—High carbon, finely tempered flat wire springs and patented new design provides positive lifting power.
- **CAN BE INSTALLED WITH SASH IN FRAME**—Saves time and labor. Reduces errors in installation.
- **EASY TO TENSION**—Only one turn of tensioning wire for each 6 to 7 inches of height, or 3 or 4 turns for average sash.
- **FITS STANDARD GROOVING**—Fits any standard groove, round or square, $\frac{5}{8}$ " x $\frac{3}{8}$ " or $\frac{3}{4}$ ".
- **PROTECTIVE CARTON**—Heavy jute board carton protects Spirex from damage in transit or on the job.

HELIX... for institutional and commercial windows

This heavy duty spiral balance specifically designed and built for heavy sash.

- **PRETENSIONED AT FACTORY**—Will handle variations up to 5 lbs. without adjusting. Adjustment is provided, however, so that unusual variations can be easily compensated on the job.
- **LOCKING PIECE FOR EASY INSTALLATION**—Allows lower portion of spring to extend out of tube so that attaching arm can be connected quickly and easily.
- **SEAMLESS, RUSTPROOF ALUMINUM TUBE**—Positively eliminates dust, dirt and other foreign matter from reaching balance interior.
- **DURABLE TORSION-SUSPENSION SPRING**—Oil tempered, high carbon spring is both tension and torsion spring. Efficient and durable.
- **SEPARATE ATTACHING ARM**—Drastically cuts costly installation time by permitting attachment after balance has been fastened in place.
- **GRADUATED TORQUE ROD**—Cadmium plated spiral torque rod has graduated twist to assure smooth, even, effortless operation throughout travel of sash.

COMBINATION BALANCE—WEATHERSTRIP

SPIRAFLEX... the NEW 1-piece weatherstrip with spiral balances

The new SPIRAFLEX is the only combination weatherstrip-sash balance that offers all these features...

- **SPIREX SPIRAL BALANCES**—Prevent creeping; assure smooth, easy operation.
- **ENCLOSED BALANCES**—Provides protection from moisture, and gives neat appearance.
- **1-PIECE ALUMINUM STRIP**—Assures long lasting, efficient pressure seal.
- **OUTSIDE PRESSURE FLANGE**—Prevents sash from becoming paint sealed.

- **DOUBLE-RIBBED LOWER SECTION**—Provides additional weather tightness and rigidity.
- **FAST, EASY INSTALLATION**—Makes possible a better window at reasonable cost.
- **NOISELESS OPERATION**—Assured by silent Spirex balances.
- **FULLY ADJUSTABLE**—Easily adjusted, if necessary, even after installation.

Spiraflex units are made in sizes to fit any window up to 6'6" in height ($1\frac{3}{8}$ " sash, $\frac{1}{2}$ " or $\frac{3}{8}$ " parting bead).

THE CALDWELL GUARANTEE: All Caldwell balances are guaranteed to provide positive lifting power for the lifetime of the building. Caldwell is the nation's oldest sash balance manufacturer, and this guarantee is backed by a 68-year reputation for making quality products and standing behind them.

Our engineering department will welcome any opportunity to assist you with difficult window balancing problems. Additional information will be gladly furnished by the factory or your Caldwell representative.

68-A COMMERCIAL STREET
ROCHESTER 14, N. Y.

Mark of a Modern Builder

More and more successful builders are discovering the sales appeal of Schlage 5-inch backset locks for flush doors . . . originally developed by Schlage to combine new locking convenience with new opportunities for individual lock styling.

Schlage 5-inch backset locks give builders new freedom and flexibility in lock placement . . . permit the many striking combinations of Schlage locks and escutcheons that establish a home's first touch of quality at the entranceway.

Modern builders give strong sales impact to the quality of their homes . . . when the immediate note of fashionable lock beauty is made possible by Schlage 5-inch backset locks.

Cramped Hand Position of Standard Installation

Complete Hand Freedom with Schlage's 5-inch Backset

Full Hand Freedom with Schlage's 5-inch Backset

Compare the difference between a standard backset and Schlage's 5-inch backset . . . and feel the extra hand space now possible for all doors throughout the home. The old-fashioned squeeze between door-jamb and lock too often caused bruised knuckles and scraped hands . . . until Schlage developed five full inches of hand freedom.

Send for New "Lock Fashions" Brochure #651 Y-4

For colorful applications of the Schlage 5-inch backset with Schlage residential lock and escutcheon designs, write today for this 4-color, 12-page brochure.

M-D
MACKLANBURG-DUNCAN CO.

for the finest in

When desired, attach Guide Strip No. 15 to rear of door. Requires no grooving.

M-D SLIDING DOOR HARDWARE Overhead Type

- Extra-heavy extruded aluminum track
- Positive, no-jump track feature
- Noiseless, lifetime nylon wheels
- Silent, brass wheel bearing
- Heavy-gauge cadmium-plated steel hangers with adjustable slot
- Smoothest, quietest operating

Installations at left and above shows 3 ways plastic door guide set may be used.

Extra-sturdy extruded aluminum track for all doors from 5/8" thick, single or by-passing. Built-in, no-jump design.

M-D EXTRUDED ALUMINUM THRESHOLDS in 2 FINISHES

ANODIZED ALBRAS (BRASS COLOR) ALACROME (SATIN)

AP-3 3/4" Extruded Aluminum threshold with replaceable vinyl insert. Comes in two finishes — Alacrome, satin finish and Anodized Albras (Brass color). Never rusts or tarnishes. Never needs polishing.

AP-118 Same as AP-3 3/4" except 1 1/8" high. Available in Alacrome (satin finish) and Anodized Albras (Brass color).

AP-158 An extruded aluminum threshold 1 11/16" wide with replaceable vinyl insert. Also comes in either Alacrome (satin finish) or Anodized Albras (Brass color).

M-D SQUAR-EVEL

Two tools in one. Blade can be adjusted for 45 degree angle, can be used as level only, or as square & level combined.

M-D EXTRUDED ALUMINUM LEVEL

A light, sturdy extruded aluminum level. Comes in 18", 24", 28", 30", 36", 48", 72", 78" and 96" — a size for every purpose.

Kennatrack®

...the complete line of sliding door hardware

Brand new from Kennatrack—Kenna-pak a prefabricated, adjustable sliding door wardrobe header assembly complete with steel header, Scottie Series 2050 hardware and wood nailing strips for wardrobes using $\frac{3}{4}$ " and $1\frac{1}{4}$ " doors. Pre-assembled, Kenna-pak cuts labor and installation costs while adding to the beauty of sliding door wardrobe installations.

Patent Pending

Kenna-pak steel header takes minimum headroom. Eliminates fascia and cutting of doors—standardizes all door opening heights.

CUTS COSTS—SAVES LABOR—ADDS BEAUTY

Parts vs. Pieces—You work with one prefabricated piece rather than many parts.

Uniform Openings—One height from finished floor for all standard openings.

Eliminates Fascia and Door Cutting—Trim is nailed directly to wood nailers, leaves normal $\frac{3}{16}$ " reveal. Conceals hardware. Minimum headroom allows full use of standard 6'8" doors.

With Scottie Series 2050 hardware set to doors a neat installation is completed.

Series 1900 Kenna-pak® Trade Mark

Adjustable, one piece header and hardware for wardrobes using $\frac{3}{4}$ " and $1\frac{1}{4}$ " sliding doors

Adjustable Kenna-pak is nailed flush with side jambs

One man raises Kenna-pak and jambs into place

SERIES 250-A For $\frac{3}{4}$ " kitchen and other cabinet doors. Exclusive step-up design hides hardware. Permits flush mounting. Eliminates fascia board millwork.

SERIES 600 For $1\frac{1}{2}$ " and $1\frac{3}{4}$ " wardrobe by-passing doors. Center mounted, adjustable hangers. 8 self-aligning nylon wheels. Min. headroom $1-15/16$ ". Max. door wt. 100 lbs.

SERIES 300-A For $\frac{3}{4}$ "- $1\frac{1}{4}$ " single doors. Center mounted, non-adjustable hangers. 8 self-aligning nylon wheels. Min. headroom 1 ". Max. door wt. 100 lbs.

SERIES 650 For $1\frac{1}{2}$ " and $1\frac{3}{4}$ " wardrobe by-passing doors. Center mounted, non-adjustable hangers. 8 self-aligning nylon wheels. Min. headroom 1 ". Max. door wt. 100 lbs.

SERIES 350 For $1\frac{1}{2}$ " closed pocket door installations. Center mounted, adjustable hanger. 8 self-aligning nylon wheels. Minimum headroom $1-15/16$ ". Max. door wt. 100 lbs.

SCOTTIE FASCIA TRACK SERIES For $\frac{3}{4}$ " (Series 5000) and $1\frac{1}{2}$ " (Series 5000) by-passing doors. Track can be installed after trim. Anodized fascia can be left plain or painted. Max. door wt. 75 lbs.

SERIES 400-A For $1\frac{1}{2}$ " closed pocket or heavy by-passing doors. Center mounted, precision ball bearing axles. 8 self-aligning nylon wheels. Min. headroom $2\frac{1}{2}$ ". Max. door wt. 150 lbs.

SCOTTIE SERIES 2050 One package, track, hangers and guide for both $\frac{3}{4}$ " and $1\frac{1}{2}$ " by-passing doors. (Series 2025 for 1 " and $1\frac{1}{2}$ " doors). (Series 2075 for $1\frac{1}{2}$ " doors). Max. door wt. 75 lbs.

Kennaframe®

Pat. 2,732,919

SLIDING DOOR POCKET FOR $1\frac{3}{8}$ " DOORS

Series 900 for doors up to 150 lbs.
Series 900 for doors up to 100 lbs.

EASY TO INSTALL

Pivotal connection of header and jambs allows independent leveling and plumbing of these members. Track can be removed without disturbing finished wall.

All Steel • Warp proof • Removable Track • 8 Wheels Per Door • Prefabricated • Completely packaged • Fits all 2 x 4 walls • Adjustable 3 ways • Takes any type wall construction

NOW! A Spiral Nail for less than the cost of a common nail

Jones & Laughlin introduces the new threaded-to-the-head "ARDOX" spiral nail to American markets. This superior nail, with all the advantages of extra holding power, ease of driving, and less splitting *actually costs less than the familiar, smooth, straight-shank nail.*

These established advantages are made possible by a major development in spiral nail-making technique, utilizing J&L quality, higher carbon steel.

Write for complete information on how "ARDOX" spiral nails can improve your operations *and* cut your costs. Write to the Jones & Laughlin Steel Corporation, Dept. 493, Pittsburgh 30, Pa.

Jones & Laughlin
STEEL CORPORATION · PITTSBURGH

INCREASED HOLDING POWER

The "ARDOX" full spiral shank nail develops up to twice the holding power of equivalent common nails . . . gives you stronger, longer-lasting construction.

The "ARDOX"® Spiral Nail

This comparison of properties shows advantages of "ARDOX" spiral nails over one size of common nails only, 2½" x 10½ (8d). Other comparisons will show similar advantages over all sizes of equivalent common nails.

Comparison of Properties

NAIL SIZE AND TYPE	Approximate				
	Holding Power in Soft Woods		Relative force required to drive	Number of nails per lb.	% more "ARDOX" spiral nails per lb.
	Immediate	After 30 days			
8d Common Nail	100%	100%	100%	94	—
8d Standard "ARDOX" Spiral Nail	143%	224%	70%	135	43%

Note 1. These figures based on wood at 12%-18% moisture, which is the approved building material range.
Note 2. Withdrawal speed, 2" per minute.

EASIER DRIVING

Despite its greater holding power, the "ARDOX" spiral nail actually requires less driving force. It speeds construction, reduces operator fatigue. Laboratory and field tests prove that "ARDOX" spiral nails are as much as 30% easier to drive.

LESS SPLITTING

The "ARDOX" spiral nail turns like a screw when driven . . . threads its way into the wood with minimum fiber damage. The stiffer shank of the "ARDOX" spiral nail, with less bulk of metal, greatly reduces the tendency to split the wood.

COST SAVINGS

"ARDOX" full spiral nails, because the greater count per pound results in lower cost per nail, cost less per job than equivalent common nails. Additional cost savings result from lower transportation costs, reduced handling and storage charges.

Now! 15 Dependable Products from One Dependable Source... **GABRIEL**

BASEMENT SASH

Aluminum or steel. Exclusive Side-Arm detail provides 4 positions for controlled ventilation . . . top or bottom opening . . . locks automatically when closed! 3 sizes, 2-light: 15" x 12" glass size; 15" x 16" glass size; 15" x 20" glass size.

10 Reasons Why the BIG Demand is for

**Kinnear
RōL-TOP
Doors**

Wood or All-Steel

1. Kinnear all-steel Rol-TOP Doors feature rugged 16-gauge sections that interlock *from end to end*, for smooth hinging action.
2. Steel door sections are hot-galvanized (1.75 ounces of pure zinc per square foot, A.S.T.M. Standards.)
3. Kinnear's special Paint Bond gives field-applied paint an *immediate, firm, lasting* grip on the galvanized surfaces.
4. Rol-TOP Doors open easily on ball-bearing rollers, "boosted"
5. Whether Rol-TOP sections are of high-quality steel or finest kiln-dried lumber, any number of panels in each section can be prepared for glass.
6. Kinnear's own "Keystone Seal" design and adjustable sealing strips assure snug, weather-tight closure for both wood and all-steel Rol-TOP Doors.
7. Kinnear Motor Operators, with push-button controls wherever desired, are easily added for maximum savings in time, steps, and effort.
8. Kinnear doors are *registered*—detailed drawings are kept in fire-proof vaults, assuring quick, accurate availability of parts even after many years of service.
9. Kinnear manufactures doors *exclusively!* Through more than half a century, Kinnear has proved the many advantages of using doors designed and built by door specialists.
10. Complete range of sizes offers correct answer to any door need.

STANLEY Hardware

ACCENT

SOLID BRASS

Modern cabinet hardware ... practical, beautiful

Here are two examples of Stanley cabinet hardware styled for the modern home buyer.

Accent hardware is new, features bright chrome or brass on contrasting black back-plates. Solid brass hardware is a proven salesmaker — an eye-taking "plus" feature for your homes. Both lines reflect Stanley's wonderful reputation for fine, lasting quality and discriminating taste.

"Floating" magnetic catch is easy to apply, adjusts for warping or shrinkage.

Streamlined capped covers on semi-concealed hinges. All standard finishes.

There's a Stanley style for every home, modern or traditional. Insist on Stanley. Home buyers will appreciate your extra consideration.

Ask your dealer about Stanley's complete line of cabinet hardware. Or write for catalog to Stanley Hardware, Division of The Stanley Works, 104 Lake St., New Britain, Connecticut.

AMERICA BUILDS BETTER AND LIVES BETTER WITH STANLEY

STANLEY

This famous trademark distinguishes over 20,000 quality products of The Stanley Works—hand and electric tools • drapery, industrial and builders hardware • door controls • aluminum windows • metal parts • coatings • steel and steel strapping—made in 24 Stanley plants in the United States, Canada, England and Germany

MILCOR® Steel Building Products

Metal Lath and Accessories . . .
for fire-safety, permanence, lasting beauty

Smalmesh

MILCOR METAL LATH

Metal Lath and plaster affords the finest fire-safe construction. There is a complete selection of Milcor Metal Lath types: diamond expanded, self-furring, flat rib lath, $\frac{3}{8}$ " rib lath and $\frac{1}{4}$ " rib lath. All are made from Copper Bearing Steel, painted after fabrication. Diamond expanded and self-furring lath are also made from Galvanized Steel. Each bundle of Milcor Metal Lath (except $\frac{3}{8}$ " rib lath) is marked on one end with a paint stripe for quick identification of the weight of metal from which it is fabricated.

No. 66
Expansion

MILCOR CASING BEADS

Provide protection around door and window openings. Applied before plastering. Ridged nailing flange insures tight fit to jamb. Provide screed to which plasterer can work. Only nose of casing bead is exposed after plastering is completed. Available in three designs with either expansion wings or short, solid flange. Made from 24 gauge Tight Coat Galvanized Steel in 7-ft. and 10-ft. lengths. Made for $\frac{1}{2}$ " or $\frac{3}{4}$ " grounds. (Short flange types only are also made for $\frac{3}{8}$ " grounds.) Packing, per carton: 7-ft.—80 pieces; 10-ft.—60 pieces.

Super-Ex

MILCOR CORNER BEADS

Corner beads protect plastered outer corners against impact damage. The Milcor selection offers a corner bead type to meet virtually every installation requirement. Included are small nose and bull nose beads with either solid wings or expanded metal wings. The expansion wing affords plaster band and reinforcement. Super-Ex combines the advantages of both expansion and solid wing corner beads in one superior product. Milcor corner beads are made of 26 gauge Tight Coat Galvanized Steel in 7, 8, 9, 10 and 12-ft. lengths. Packed in strong corrugated cartons.

Corner-Ex

MILCOR CORNER-EX

Finished edge Corner-Ex is the best reinforcement for plastered inner corners. Center stiffening rib guides Corner-Ex accurately into the corner and helps maintain the correct angle and shape. Design and contour eliminate any projections that could interfere with plastering. Made of Copper Bearing Steel, painted after fabrication. Sizes—2" x 2" x 96" and 3" x 3" x 96". Wired together in bundles of 25 pcs. each. Packed three bundles (75 pcs.—600 ft.) per carton. Weights per 1,000 lin. ft.: 2"—100 lb.; 3"—140 lb.

Clean-Out Door

MILCOR CLEAN-OUT DOOR

Convenient for removing accumulations of chimney debris. Door catch provides positive lock, prevents door from being blown open by down drafts. Hinge design permits lasting freedom of operation. Wide flanges on frame simplify installation. Stamped from high grade, 16 gauge, copper bearing steel sheets. Furnished painted. Size 8" x 8". Packed six doors per carton—shipping weight 19 lbs.

Style K Access Door

MILCOR STEEL ACCESS DOORS

For easy access to utility systems without damaging walls. Door opens to 175°. Door panel removable. Flush, screwdriver operated, cam type locks included. Key operated cylinder lock furnished, if required, at slight extra charge. Door panel made of 14 gauge steel; housing of 16 gauge steel. Grey prime coat painted. Sizes: 8" x 8" to 24" x 36". Packed one per carton.

STYLES: For plastered surfaces; Style "K" with expansion wing, Style "L" with solid flange. For non-plastered surfaces; Style "M". (Write for information on Style "A" door for acoustical tile installations.)

Rain Carrying and Roof Drainage Equipment . . .
better protection for building exteriors

Style K Gutter

Outside
'K' Mitre

'K' Slip
End Cap

MILCOR GUTTER AND ACCESSORIES

Milcor Gutter and accessories are accurately formed to assure easy assembly and a permanent tight fit. Made in 4", 5" and 6" sizes in two designs: Style K (see contour box gutter) or Half-Round. Style K made in both regular and Highback. Regular furnished in 10 and 20-ft. lengths; Highback in 10-ft. lengths. Half-Round made in Slip Joint and Lap Joint types in 10-ft. lengths. Made from 28 ga. or 26 ga. Galvanized Steel or 16 oz. Copper. Accessories, available for each size and design packed in sturdy cartons.

Corg. Square
Conductor Pipe

Sq. Cutoff

Sq. Elbow

MILCOR CONDUCTOR PIPE AND ACCESSORIES

Milcor Conductor Pipe is made in three popular designs to meet individual preferences: Corrugated Square, Corrugated Round and Plain Round. Each length is straight, uniform and securely locked with a watertight seam. Square pipe is made in 2", 3", 4" and 5" sizes; round pipe in 2", 3", 4", 5" and 6" sizes—10-ft. lengths. Elbows, Strainers and fastening Bands or Hooks are available for all sizes. Shoes, Funnel and Cutoffs are available for the popular 3" and 4" sizes. Made from 28 ga. or 26 ga. Galvanized Steel or 16 oz. Copper.

Style A

Style D

MILCOR ROOF EDGE

Designed to protect the eaves edge of roofs against weather and water damage. Finishes the roof with a neat, precisely straight edge suitable for painting if desired. Available in five styles. Made in 10-ft. lengths. Fabricated from sturdy Galvanized Steel. Packed in strong cartons.

Inland also produces Milcor Gravel Stops, in two styles, made of Galvanized Steel. Milcor Metal Building Corners for weatherboarding or dro siding installations are made of Galvanized Steel in sizes to fit popular siding sizes.

Galvanized
Seamless
Roll Valley

MILCOR SEAMLESS ROLL VALLEY

Furnishes protection for roof valleys. Popular utility material for many other purposes. Manufacture from prime Galvanized Steel in 50-ft. continuous rolls without seams. Furnished in even widths from 4" through 20", in 28 or 29 gauge.

Seamless Terne also available in 50-ft. rolls. Furnished unpainted, pointed one side or pointed two sides in 1C and 1X ws. Widths 14", 20", 24", 28".

Inland also manufactures Formed Valley, Ridge Roll, Flashing Shingles and Continuous Hip Shingles.

No. 300 Series

MILCOR STATIONARY LOUVER VENTILATOR

Generously fitted corners and overlaps. Reinforce louver blades. Made of heavy Galvanized Steel aluminum painted. Backed with removable No. mesh insect screen.

No. 300 Series (Flush Type Flange), for use in any type of construction, and No. 100 Series (Se Casing), for new construction, are available in wide range of sizes. No. 220 Foundation Ventilator fits an opening the size of one concrete block. Roof Louver Ventilators are installed on the roofs of buildings with no gables.

REVOLUTIONARY!

LoManCo Sectional Louvers

Sections of a large louver are assembled quickly using slip-joint fasteners to hold them together

Even a large model is easy for one man to handle and install without any assistance

Shown above basic 8 section set

Typical variations using sections as parts of triangular ventilators

Separate sections can also be used alone or as parts of odd-sized louvers

Introducing an entirely new concept of louver design and construction. Louvers made up of sections—which can be used in different combinations to make up ventilators with from 21 to 614 sq. inches of free area, from 2 to 12 feet in base length . . . which can be easily assembled and installed by one man in a few minutes . . . which can be installed in the rough opening either as one unit or piece-by-piece!

AN AMAZINGLY VERSATILE NEW DESIGN

By combining the 8 basic 2 ft. sections of the new LoManCo Sectional Louver in different ways, a builder can make up over 25 triangular and odd-sized ventilators. Automatically, when a builder has one set of these versatile louver sections he has a ventilator for use in any one of a hundred different ways—for standard gable end installations . . . for problem type, hard-to-fit installations. No other product on the market answers so many ventilating needs so well.

A QUALITY PRODUCT

New LoManCo Sectional Louvers are made of heavy gauge, rust-proof aluminum. Each section is completely assembled, and comes with 8x8 mesh bug screens installed. When sections are to be used together, specially designed aluminum slip-joint fasteners fit over the flashing edges, holding sections firmly together.

AVAILABLE IN COMPLETE SETS OR BY INDIVIDUAL SECTIONS

New LoManCo Sectional Louvers may be purchased in complete 8 piece sets, by individual sections, or in 2, 4, or 6 section sets to meet specific ventilating needs. They are available for both 4" and 5" rise per ft. roof pitches.

Get all the Facts about the building industry's most revolutionary new idea in ventilation. Ask your jobber or dealer for complete information, or write today for literature and details.

Complete assembly and installation of this 8 foot, 4 section model was completed in only 8 minutes

THRESHOLDS

• seal tighter • cut costs

Flexible vinyl plastic, arched in a rugged aluminum base, springs against bottom of door sealing snugly along entire length. No hooks or clips. Saves time, saves labor—installs in minutes with just a screwdriver. Proved by over 1,000,000 installations.

A model for every application:

	Regular DURAFlex (Model No. RX-100)	Height: 3/4" Width: 3 1/2" Rug Clearance: 3/8"
	High-Rug DURAFlex (Model No. RH-125)	Height: 1 1/8" Width: 3 1/2" Rug Clearance: 1"
	Commercial DURAFlex—4" (Model No. CS-200)	Height: 3/4" Width: 4" Rug Clearance: 3/8"
	Commercial DURAFlex—5" (Model No. CM-225)	Height: 3/4" Width: 5" Rug Clearance: 3/8"
	Commercial DURAFlex—6 1/2" (Model No. CW-250)	Height: 3/4" Width: 6 1/2" Rug Clearance: 3/8"
	Economy Bumper-Type DURAFlex For outswinging doors only (Model No. RB-150)	Height: 3/4" Width: 3 1/2"

HARDWARE

Attractive catalog, "Select-a-Pak Merchandising Program," contains essential information on firm's broad hardware line as well as illustrations of merchandising display fixtures.—National Lock Co.

Circle No. C20 on reply card Section G

HANGING & FASTENING DEVICES

A broad range of hangers and fasteners including toggle bolts, screws, clamps, drills, hooks and anchors is covered in pocket-size catalog.—Paine Co.

Circle No. C21 on reply card Section G

HARDWARE

Condensed catalog illustrates and describes line of locks, backsets, ornamental escutcheons, installation tools. Includes selector chart,

details on finishes.—Schlage Lock Co.

Circle No. C22 on reply card Section G

METAL DOORS

Standardized metal doors and frames for every type of opening are featured in this complete catalog.—United Steel Fabricators, Inc.

Circle No. C23 on reply card Section G

METAL LOUVERS

Here is a working chart for estimating the amount of ventilation required for attic areas.—Metal Ventilator Institute.

Circle No. C24 on reply card Section G

NAILS

Pocket-size handbook gives factual information and specifications for firm's new line of rust-resistant "Stormguard" nails. Reference data aids in determining type, size and quantity.—W. H. Maze Co.

Circle No. C25 on reply card Section G

ORNAMENTAL IRON

Handbook of stock designs and prices of complete line of ornamental iron. Also includes instructions for "manufactured to order" railings.—R. G. Coffman Co., Inc.

Circle No. C26 on reply card Section G

ORNAMENTAL IRON

Catalog No. 56 shows railings, columns, panels and posts for a variety of applications. Gives installation details, including estimates of complete costs.—Metal Crafters.

Circle No. C27 on reply card Section G

ORNAMENTAL RAILINGS

Brochure describes "Glamorails," a combination of metal railings and plastic cord. Gives length of rails—and posts, with colors of cord.—International Aluminum Corp.

Circle No. C28 on reply card Section G

PERFORATED METALS

General catalog No. 62 provides valuable information on the use of perforated metals. Also gives sizes and data on standard patterns.—Harrington & King Perforating Co.

Circle No. C29 on reply card Section G

Wrought Steel Butts
Cat. #8240

more and more builders
are saying:

"Let's use
GRIFFIN[®]
In Our Houses"

Builder's Special
Cat. #540

Cat. #88197
Template Butts, Button Tips
with permanently attached Bearings

Here's the "dependable line of hinges to use in all light construction work" . . . that's the trade's way of saying, "We like to buy and use Griffin products."

A full line of wrought steel butts and all shelf hardware. Send for new catalog sheet on our #540 Builder's Special.

TUFF-BOND
SUPER-STRENGTH ADHESIVES
Particularly Formulated
for Building Contractors

*TUFF-BOND GENERAL PURPOSE... An ALL PURPOSE water resistant adhesive that sticks almost anything to anything.

*TUFF-BOND NO. 4... A WALLBOARD AND A DRY WALL ADHESIVE. An economical adhesive with great strength and excellent aging qualities.

TUFF-BOND NO. 5... A FIBRE AND ACOUSTICAL TILE ADHESIVE with strong bonding strength.

TUFF-BOND NO. 8... A CONTACT BOND ADHESIVE for bonding laminates to wood and to metal.

TUFF-BOND QUIK-SET ADHESIVE... An excellent quick setting adhesive for bonding of wood to wood, wood to metal, metal to metal, and rubber to metal or to wood.

*Complies with all requirements of U. S. Department of Commerce Commercial Standard CS 181-52 for water-resistant organic adhesives.

Recommendations for special adhesives made without cost or obligation to you.

GOODLOE E. MOORE

NEW DENNIS SPRING-FLEX FULL JAMB WEATHER STRIP

COMPLETE S-1 ASSEMBLY INCLUDING JAMB COVERING STRIP, COVER TUBES AND COIL SPRING BALANCE UNIT

Each assembled set of Spring-Flex Weather Strip (S-1) includes 4-coil spring adjusters. All springs are adjusted to the minimum tension. If additional tension is required, the adjuster can be lifted up to the next notch or succeeding notches for more tension or lifting power on the spring. The adjustment notches are numbered for your convenience.

Note that the nail is driven through the perforated hole in upper top of cover tube, through the adjuster and jamb strip into the jamb of the window. This holds and keeps the complete unit from sliding up and down against the jamb when the window is raised or lowered.

All parts are made from the best quality aluminum alloy and the spring is HD-MB high carbon steel, electro galvanize plated.

Above are a few of the many horizontal kerf strips we manufacture from bronze aluminum or nickel silver. Write us for price delivery on the most complete line of kerf strips manufactured.

W. J. DENNIS & CO.

4444 Irving Park Road
Chicago 41, Illinois

THE LESLIE "SERIES 50" SLANT ROOF TYPE VENT

Combines all these features:

- ★ **EASIER INSTALLATION**—4" wide flange . . . no "legs" or "posts" to get in the way.
- ★ **WEATHERPROOF**—wide flange around top of stack, plus parallel baffle in rear.
- ★ **MORE FREE AREA**—as certified by Metal Ventilator Institute.
- ★ **BETTER APPEARANCE**—streamlined, one-piece top, and roof-hugging design.
- ★ **USE WITH FANS**—8" diameter stack fits round duct.
- ★ **STURDIER CONSTRUCTION**—full .025" aluminum, 26-gauge galvanized steel, screen securely attached.

Available in galvanized steel or aluminum, the "50 Series" Roof Vent is **YOUR** best answer to the demand for a vent that **installs without trouble, that looks and performs well, and provides top quality at the right price.**

FRANTZ *all 3*

gives you
in Overhead Doors
and Hardware

1 SECTIONAL DOORS

Beautiful designs in square and horizontal, plain or carved panel doors. Sizes to fit openings 8' x 6'6" to 16' x 7'. Fourteen cardinal features include the "Glide-O-Matic" self-opening operation and zinc plated hardware. Pre-bored for fast installation. Cat. No. 303.

2 RIGID DOORS (One Piece Type)

Frantz is *the* leader in rigid overheads. Single and double-width sizes. Special built-in features emphasize greater value. The new No. 10, left, with "Powermatic" action, has the looks of a sectional, the economy of a rigid. Catalogue No. 303.

3 HARDWARE Only (For Sectional and Rigid Doors)

For doors to fit openings from 7'6" x 6'7" to 18' x 12'. Ideal for architect designed or mill made doors.

Permits unlimited scope of design. The best engineered, easiest-to-use sets ever designed. Catalogue No. 107.

Over 50 models and sizes in residential overhead garage doors and hardware sets...*plus* Commercial and INDUSTRIAL DOORS for widest application at lowest cost... *plus* a diversified line of Builders Hardware respected for nearly half a century. That's what Frantz offers—and delivers. That's why, with more and more firms—it's FRANTZ all the way! (Frantz' New Electric Operators are Tops!)

YOUR DOOR TO GREATER VALUE IS A FRANTZ DOOR!

CONDENSED METHOD OF ESTIMATING HEATING REQUIREMENTS

"CONDENSED METHOD" HEAT LOSS FACTORS*

1. WINDOWS & DOORS		Multiply sq. ft. by:
a.	Without storm sash	113
b.	With storm sash	75
2. OUTSIDE WALLS (NET)		Multiply sq. ft. by:
a.	SOLID MASONRY—(Brick, stone, etc.) with plaster applied direct to inside surface of masonry wall.	45
b.	AVG. FRAME—Brick Veneer—Wood Siding—Shingles or Stucco—with sheathing, bldg. paper, studs, lath and plaster	30
c.	FURRED MASONRY—(Same as 2a with air space between plaster and masonry wall)	
d.	INSULATED FRAME—Same as 2b—with 1" or less insulation board or blanket	20
e.	HEAVILY INSULATED—Same as 2b with 2" or more insulation	10
3. CEILINGS & INSIDE WALLS		Multiply sq. ft. by:
a.	CEILING—Plaster on lath or wall-board. No floor above—Attic not vented	34
b.	Same as 3a—with 2" or more insulation	12
c.	CEILING of first floor room below unheated room on second floor	17
d.	INSIDE WALL adjacent unheated room	
4. FLOORS		Multiply sq. ft. by:
a.	Double wood floor—over cool basement or other enclosed space	15
b.	Same as 4a—but open space below floor exposed to outside	32
5. INFILTRATION (AIR LEAKAGE)		Multiply each sq. ft. of window and door area by:
a.	WINDOWS AND DOORS. Average fit—Not weatherstripped	50
b.	Average fit—weatherstripped (or equipped with storm sash)	30
c.	Poor fit—not weatherstripped	140
d.	Poor fit—Weatherstripped (or equipped with storm sash)	43
e.	EXTRA FOR EACH OUTSIDE DOOR	1000
f.	EXTRA for air lost up fireplace flue	3000

*Above factors are approximate heat loss through each sq. ft. of surface with 70° inside and —30° outside.

The map at the right is zoned according to winter design temperatures, and gives percentages by which results from Step C should be multiplied to find actual heating requirements.

HOW TO USE THE CONDENSED METHOD HEAT LOSS FACTORS

Quantities of heat are measured in units called British Thermal Units (abbreviated BTU).

Heat is lost from a warm building through all of its surfaces exposed to lower temperature. This is called "transmission losses." Heat is also lost due to wind blowing through cracks around windows and doors. This is called "infiltration losses." Total heat loss of a building is the sum of transmission losses plus infiltration losses.

A The first step is to find how much heat is lost by transmission. Calculate the areas in square feet of all exposed surfaces of the room or building including:

1. Window and outside door area (combined).
2. Net outside wall (gross wall area minus item 1).
3. Ceiling area (below unheated room or attic space). Inside walls adjacent unheated rooms.
4. Floor area (if space below floor is not heated).

Each of the above areas should then be multiplied by the proper factor from one of the Condensed Method tables.

B Next, estimate infiltration losses. This depends on the amount of cold air blown into the house, which is in turn dependent on the size of the window or door and the width of the crack around it. Simply multiply the area of windows and doors already calculated in Step A by the infiltration factor selected from Table 5. Also, since there is more air leakage through door cracks than through window cracks, allow an additional 1000 BTU for each outside door. Add 3000 BTU for each fireplace.

C Add the infiltration losses (Step B) and the transmission losses through the windows, walls, etc. (Step A) all together. The sum is the heat that would be lost from the room or building—if the temperature difference between inside and outside were 100°. In other words, this is the amount of heat it takes to maintain 70° inside when the outside temperature is 30° below zero, which would occur only in the very coldest sections of the United States.

D Heating requirements are naturally less where the weather does not get so cold. The average minimum temperature in Dallas, Texas, for example, is only 10° above zero. The "design temperature difference" between inside and outside would be 70° minus 10° equals 60°. Therefore, the heating requirement is only 60/100 or 60% of the amount based on 100° TD.

Section D Appliances - Electrical - Heating & Cooling - Plumbing & Water Supply

PLANNING FOR AIR CONDITIONING

ORIENTATION

Orient the house so that major glass areas are to the north or south. Shield the west wall with a garage or carport when possible.

Position of the sun at noon on March 21st and September 21st in a latitude of 40° N. (Indianapolis, Ind.) results in a 50° angle.

Position of the sun at noon on June 21st in the same latitude (40° N.) results in a 73.5° angle.

SHADING DEVICES

Fences or tall hedges are good protection for east and west walls when the sun is low.

Canvas awnings can reduce the heat load on glass areas as much as 75%.

Trellis work with vines provides a "plant awning" in summer and allows winter sunshine to enter house.

Trees which shed their leaves provide shade in summer yet permit the winter sun to help warm the house.

Overhangs with adjustable louvers provide accurate control throughout the year as they may be closed for summer shading and opened in the winter to take full advantage of the warm rays of the sun.

ESTIMATING ROOF OVERHANGS

To find the amount of roof overhang to cast a shadow desired on the wall or window use the following formula:
 $\text{Shadow height} \times \text{Latitude factor} = \text{Amount of overhang needed.}$

1. Determine the height of shadow, in inches, desired (see sketch).
2. Select the factor, from the table, which applies to your latitude.
3. Multiply the desired shadow height by the factor. The result will be the length of the overhang in inches.

Example:

Shadow height desired 60 inches
 Factor for 40° latitude .71

Length of overhang 42.6 inches

FACTORS

LATITUDE	TYPICAL CITY FACTOR*
25°	Miami .37
30°	New Orleans .48
35°	Memphis .59
40°	Philadelphia .71
45°	Minneapolis .85
50°	Winnipeg, Can. 1.02

*April 1 - September 11

Section D Appliances, Electrical - Heating & Cooling - Plumbing & Water Supply

BUILT-IN LIGHTING DETAILS

VALANCE

Shown here with side-mounted channel. Tube should be far enough from wall to prevent drapery from shielding downward light. Provides both ceiling- and wall-lighting.

CORNICE

Provides wall light only. Face-board joins ceiling. Channel is ceiling-mounted. Recommended for low-ceiling rooms, or where window head is close to ceiling.

COVE

Emits light horizontally and upward unless shield is translucent (luminous cove). Should be either luminous or low enough to flood upper wall—otherwise too inefficient for home lighting applications.

BRACKET

Like valance, but centerline of faceboard is on same level with tube, should be closer to wall. Light emission is both upward and down.

RECESSED DOWNLIGHT

Technically a fixture, but its inclusion in home should be planned prior to rough wiring. Using reflector-type bulb, adds highlights and drama to interior design.

EDGELIGHTING

Arrangement of plastic or glass panel to transmit light edgewise — invisibly except where decorative cuts, ripples, or flutes in surface re-direct light, appear as its source.

SOFFIT

Underside of beam or furred-down section containing recessed luminous panel. Chiefly for local lighting, but several soffit panels could provide adequate general illumination.

CANOPY-OVERHANG

Like luminous cove; but downward, diffused light is primary purpose of structure. Uniform brightness of diffusion panel would normally require at least two rows of tubes.

TROFFER

A fixture that provides a "pre-assembled" recessed panel including reflector. Generally narrow, made to permit end-to-end, continuous runs.

SUSPENDED CEILING

Either diffusion or opaque material suspended to form light plenum. Plastic or glass left open (right) would afford better ventilation, but could be harder to shield properly.

COFFER

A recessed cavity open at bottom with high cut-off angle. Interior surface becomes an indirect, diffused light source, primarily local.

Section D Appliances - Electrical - Heating & Cooling - Plumbing & Water Supply

LIGHTING PRINCIPLES

KITCHEN WORK COUNTERS

The plane to be illuminated is 24 inches wide and 20 inches deep. It is located with its front edge along the work counter, and it is 36 inches above the floor. The lower shielding edge of wall mounted lighting units should not be higher than 58 inches above the floor.

RANGE AND SINK TOPS

The plane to be illuminated is 40 inches wide and 24 inches deep. It represents the entire area of the range or sink top. It is 36 inches above the floor. The lower shielding edge of wall mounted lighting units should not be higher than 58 inches above the floor. Ceiling mounted units are centered over the work surface as illustrated. The dashed circle indicates the positioning of incandescent lamps, while the parallel straight dashed lines position fluorescent tubes.

LAUNDRY TRAYS

The selected plane to be illuminated is 48 inches wide and 20 inches deep and it is 32 inches above the floor. The lower shielding edge of wall mounted lighting units should not be higher than 58 inches above the floor. Ceiling mounted units are centered over the plane. The dashed circle shows the position of incandescent lamps, while the parallel straight dashed lines position fluorescent tubes.

HAND IRONING

The selected plane to be illuminated is 48 inches wide and 12 inches deep. It is 32 inches above the floor. The lower shielding edge of wall mounted lighting units should not be higher than 58 inches above the floor. Ceiling mounted units are centered over the work surface as illustrated. The dashed circle indicates the positioning of the incandescent lamps, while the parallel straight dashed lines position fluorescent tubes.

MACHINE IRONING

The selected plane to be illuminated is 30 inches wide and 14 inches deep. Its center is 31 inches above the floor and it is tilted up 45 degrees, towards the eyes of the individual. Wall mounted lighting units shall have their shielding edge not higher than 48 inches above the floor. Ceiling mounted units are centered 5 inches back from the front edge of the illuminated plane. The dashed circle indicates the positioning of the incandescent lamps, while the parallel straight dashed lines position fluorescent tubes.

TYPES OF RANGE TOPS

Stack-on and counter top range units are usually produced in dimensions to fit the cabinet standards of both the metal and wood cabinet manufacturers. Also the back-splash dimensions and shape is made to line up with manufactured counter tops, with the junction covered with a metal moulding.

KITCHEN & BATHROOM VENTILATING FAN INSTALLATION

CEILING

GENERAL INSTALLATION RULES

Kitchen ventilating fans should be installed as close to the range as possible. Ceiling fans directly over the appliance; wall fans should be located 12 to 18 in. above the top of the range.

Where discharge ductwork is necessary ducts should be as large as the fan outlet opening throughout. For best results limit ducts length to 10 ft.

Elbows tend to restrict air flow. Keep runs as direct if practical.

For best results install fan that will change air in the room every two or three minutes. The following formula aids in estimating fan size needed.

$$\frac{\text{Cu. Ft. of Room}}{\text{Minutes Air Change}} = \text{CFM Fan Capacity}$$

INSIDE WALL

OUTSIDE WALL

SHALLOW WELL PUMP INSTALLATION

For a Single room
or An Entire home...

TEMCO

**HAS THE ANSWER TO
YOUR HEATING PROBLEMS!**

Whatever the size or style of the houses you build, whatever the heating problems, Temco has the answer.

Temco, Inc., Gas Heating Specialists for the Nation, makes a unit for every need — small gas room heaters for supplementary heat... gas floor furnaces for compact homes... gas wall heaters that are ideal for slab construction... and central heating systems with combination air conditioning for year 'round comfort.

All Temco units are approved by the American Gas Association for Natural, Manufactured, or L.P. Gas. The heat exchangers carry written 20-year warranties to the consumer. Temco heat exchangers are finished in Ceramic-Clad* — a high-temperature porcelain enamel that will never rust, never burn out. Just one of the many reasons why more builders are turning to Temco for heating equipment.

* Trademark Registration Pending

Perfect for add-on rooms — a Temco Automatic Gas Space Heater. Ideal supplementary heat — no need to extend existing duct work. Sizes to fit all needs, prices to fit all budgets.

Perfect for compact homes — the Temco Automatic Gas Floor Furnace. Fits right into the floor; requires no basement, no excavation, no remodeling.

Perfect for slab foundation homes — the Temco Automatic Gas Wall Heater. Perfect, too, for upstairs rooms. Fits right into wall between standard 16" studding.

Perfect for homes of all sizes and types — a Temco Automatic Gas Warm Air Furnace, the most modern central heating unit on the market. Available in combination with Temco air-cooled Air Conditioning units for year 'round comfort.

Temco means quality

SAVE UP TO 50% ON TODAY'S MOST DYNAMIC HOME-SELLING FEATURE —*Central Air Conditioning!*

New air-cooled packaged system
now available with **LOW COST**
AMERICAN-Standard pre-fabricated
aluminum-clad fibre glass ductwork

Never before has such a small investment packed so much extra *sell* into a house! Central air conditioning—now cut as much as 50% in cost by American-Standard's new air-cooled package unit and pre-fab ductwork—doesn't just sit there looking pretty. It's dynamic . . . it breathes cool comfort . . . it whets your buyer's desire for quick possession of the house!

This is a *twin-compressor* unit—delivers 24-hour-a-day comfort. A single compressor maintains proper humidity and temperature on normal sum-

mer days; on extremely hot days both compressors operate to insure complete comfort.

Just order it as a completely installed system. No problems! No grief! Your local American-Standard Air Conditioning specialists do the whole job, furnishing the new Model ACP (covered by 5-Year Protection Plan) in either a 2 hp or 3½ hp size . . . whichever is more economical, all house construction factors considered.

Call them today and talk it over!

SPECIAL AMERICAN-STANDARD PROMOTION PLAN HELPS YOU SELL AIR CONDITIONED HOMES

Ask your local American-Standard Air Conditioning specialist for details on liberal promotion plan covering newspaper ads, direct-mail material, model home billboards and display cards, and newspaper publicity.

Saleability

The big reason for Yorktowne Kitchens' popularity with builders...

You can place all the complimentary adjectives you can think of in front of Yorktowne Kitchens (they all fit) . . . but only one properly describes their basic appeal to builders—they SELL houses.

This is because Yorktowne Kitchens, in genuine hand-rubbed birch, come in 175 different stock models . . . provide any number of appealing and distinctive com-

binations. Naturally, this also offers a price flexibility to fit almost any budget.

And most important, because Yorktowne Kitchens are completely stocked in more than 50 strategically located distributor warehouses, they are delivered to your job *exactly* when you need them.

The attached coupon brings you full particulars.

Backed by the strongest of all Sales Features

All Yorktowne cabinets are fully guaranteed against any defect in material or workmanship for a period of 5 years after installation.

STIGLITZ CORPORATION
2007 PORTLAND AVE.
Louisville 3, Ky.

There is no doubt that this year's building market will be more competitive . . . but the kitchen will remain the most important single room for clinching the sale. Stiglitz Ranges and Cooking Tops for 1957 let you offer prospects more quality than ever before *at less cost* for both new building and remodeling. Write today for the full story, including specifications.

Some territories still available. Qualified building supply dealers please request distributor price list.

CRANE

Mr. Vadnais (left) and Mr. Keddy, K-V Homes, Inc., Springfield, Mass., look at the guarantee on a Crane Sunnyday 2WG gas fired boiler in one of their homes. When oil is the selected fuel, the Crane Sunnyday 15 boiler is used. One of the largest builders in New England, they have put up over 2,000 houses in 4 states, are planning 1,000 more this year.

Here are Mr. Keddy and Mr. Vadnais at the site of a newly finished K-V Home. All K-V Homes are equipped with Crane plumbing and heating.

20-year guarantee on Crane Sunnyday boilers helps sell 75 homes a month!

Read what Norman Keddy and George Vadnais of K-V Homes, Inc., say about Crane's 20-year guarantee on Sunnyday boilers.

"We have just completed a most successful year and could not let it go by without thanking our many friends.

"Your 20-year guarantee on the sections of Crane Sunnyday boilers is the biggest selling feature we ever had. We feel that it helped us sell up to 75 homes a month during 1956.

"Sunnyday boilers are the finest in the business. They're well designed, dependable, and economical. With them, we have been able to maintain the high standards of quality that are so much a part of K-V Homes."

**Is the biggest selling exclusive in hot water heating working for you?

Let General Electric Built-In

Here's why these colorful General Electric Built-Ins
are tops with America's builders...

Low-Cost Installation—General Electric Built-Ins are designed for fast, *economical* installation. Oven comes complete, requires no time-consuming assembly. Cooktop drops into place; simple plug-in connects with control panel.

"Customized" Kitchens—Customers get greater choice in kitchen plans at no extra cost. Versatile G-E Built-Ins give *extra flexibility* . . . new two-unit top simplifies custom arrangements . . . pushbutton controls can be mounted in base cabinet or convenient wall location . . . oven, cooktop can go almost anywhere!

Proven Quality—G-E equipment is favored by lending institutions and consumers alike—because world-famous G-E engineering assures long life, dependable service.

Consumer Preference—General Electric Appliances help sell homes *faster* . . . because General Electric is America's most-wanted brand of home appliances. In survey after survey, most women preferred General Electric appliances.

6 Glamorous Colors—Choose from the six *proven*, most-liked kitchen colors. Canary Yellow, Turquoise Green, Woodtone Brown, Petal Pink and White. Also available in Satin Chrome and Stainless Steel.

De Luxe Features—All the de luxe cooking features *your customers want*: fingertip pushbutton controls; extra-wide oven with automatic control and minute timer; enclosed all-Calrod® bake and broil units—no old-fashioned open coils; extra-high speed surface units, and lots more.

NEW 2-UNIT COOKTOP GIVES EXTRA FLEXIBILITY...

Use two 2-unit sections for a "divided cooktop" around a corner or along a counter. Section is reversible—install with large unit in front or in back.

Add a 2-unit surface section for more cooking capacity—you can install it beside a 4-unit section, or in any convenient location in your kitchen.

Install two 2-unit sections along the wall end to end—an arrangement that adds extra counter space in front where it's most convenient for meal preparation.

KEEP DOWN INSTALLATION COSTS...SAVE TIME, SAVE LABOR...

"Slide-in Oven" Installs in Minutes! One-piece G-E Oven, with seamless front panel requires no assembly . . . comes complete, ready to fit into cabinet or wall. Simply slide it into place in any standard 27-inch cabinet!

Install Cooktop Standing Up! Simple connector cable for remote pushbutton switches plugs into cooktop. Just drop cooktop into place, then fasten it to counter by reaching through Calrod openings and tightening a few convenient thumbscrews.

Ranges Sell your homes!

This G-E Built-In Range in dramatic Canary Yellow is speeding sales for Munsey Park Estates, Inc., a Long Island development of 72 custom-built homes. Across the country, General Electric Built-Ins are giving a "decorator kitchen" look to homes in every price bracket from \$7500 to \$75,000.

Put G-E Built-In Ranges to work for you . . . for dimensions and complete installation data, write to Range Department, General Electric Company, Louisville 1, Kentucky for Specification Sheet, Pub. No. 3-1085, or call your General Electric distributor.

Also, permanent steel panels (without trim) in turquoise, yellow, pink, white.

COMPLETE TAILORED

Oakland Kitchens

OAKLAND FOUNDRY CO. BELLEVILLE, ILLINOIS

It's **CAST IRON** throughout— at the *Rancho Cabrillo Subdivision* *San Diego, California*

A typical home in the Rancho Cabrillo Subdivision.

Only the finest of materials was used in these homes, including beautifully appointed kitchens and cast iron soil pipe from street to roof.

Tri-W Builders, developers of the beautifully designed **RANCHO CABRILLO** subdivision in San Diego, California, has featured quality construction in all of the 675 modest priced but charming "Great America Homes" in this 215-acre residential area.

Throughout this large development the complete plumbing system — street to roof — is **CAST IRON SOIL PIPE**. This includes Cast Iron house sewers, main vents, branch vents, and drains — insuring home buyers permanent freedom from plumbing drainage trouble and expense.

Attractive homes at Rancho Cabrillo have met a wonderful reception. More than 100 were sold recently before models could be completed and opened for inspection. They feature three and four bedrooms, with 1, 1½ and 2 baths, built on lots varying in size from 60x100 feet to half an acre, with the finest of materials used throughout. All homes are fully landscaped with trees, shrubs and plants.

With 32 years' broad building experience, Tri-W Builders has a fine reputation for quality workmanship in all subdivision products — a policy that has never failed to pay in a big way.

WOODWARD IRON COMPANY
WOODWARD, ALABAMA

Since 1882

Our Company does not manufacture Cast Iron Pipe, but supplies many of the nation's leading foundries with quality pig iron from which pipe is made.

NEW...WESTINGHOUSE...EXCLUSIVE...!

Complete Built-in HOME LAUNDRY IN 25 INCHES

Built-in Space-Mates install vertically

Westinghouse introduces an exciting new 25" wide Laundromat and matching 25" wide Clothes Dryer. The Dryer sits on top of the Laundromat in unique, vertical installation . . . provides a complete home laundry in minimum space.

Both models are completely automatic . . . will wash and dry a full family-size load of clothes. They are also available in free-standing models and in all of the new Westinghouse Confection Colors.

Undercounter Installation—Built-in Space Mates also install under custom counter surface for side-by-side use.

Deluxe Laundry Twins—America's favorite free-standing twins, the deluxe Laundromat and Clothes Dryer are shown adjacent to the kitchen. Both models have new Color Glance Controls plus many other deluxe features.

All models shown are available in new Confection Colors

Wash 'N Dry Laundromat—First it washes . . . then it dries, all in a single, space-saving unit, 32" wide. Has Weigh-To-Save Door and Water Saver for economy, flexible controls and automatic operation. Can be built into closet or alcove as shown.

See your Westinghouse Distributor for complete details on Westinghouse Laundry Equipment, or write direct to our Contract Sales Department.

PREWAY's great built-in Refrigerator-Freezer

*easiest-to-install
fastest-to-install
lowest cost-to-install*

**No Kits
No special framing
No extra
labor cost**

PREWAY provides the newest news — and the best news — in a built-in Refrigerator-Freezer — a 13 cubic foot all-in-one unit that has everything the housewife wants and the builder needs.

For the homemaker there's striking beauty in appearance, inside and out. There is more shelf room by far than comparable conventional refrigerators provide, plus all of the accessories in roll-out shelves, crisper drawers and the like. There is fully automatic operation — no defrosting is ever needed. The freezer holds 156 lbs. of frozen food — operates independently, for one compressor serves both units.

For the builder there is the most simple installation there can be. Made with a formed steel frame as a base, this PREWAY refrigerator-freezer just skids in place and plugs in.

You'll be glad to know, too, that this great all-in-one unit is available in coppertone, stainless steel and in a flat finish that takes any color beautifully. Complete information in a full color bulletin is yours for the asking.

PREWAY Inc.

8457 Second Street, N.
Wisconsin Rapids, Wis.

1. A simple wall cut-out is all that is needed.

2. The Refrigerator-Freezer is pushed into the opening.

3. Air-grille is fitted into opening.

4. Compressor is plugged into wall outlet.

5. Lower panel is set in place.

6. Finished installation.

Line" Appliances give you the look of built-in expenses!

No rounded corners! No bulging sides! Every appliance fits flush.

That kitchen in the picture looks every inch a built-in. You can see that.

But there's one big difference: actually this kitchen is a grouping of easily installed free-standing components. All appliance sides are flat. All appliance corners are square. All appliances fit flush. This is the new General Electric "Straight-Line" appliance concept.

Think of what this means to your prospects: the latest in kitchens . . . with the brand name women prefer—General Electric.

You can start putting these kitchens in your houses tomorrow. No waiting. They'll suit "U", "L" or "Island". . . or any layout you have in mind. They're available in a multitude of sparkling color and design variations. They'll fit any price house you are building . . . \$9,600 to \$96,000.

NEW TAPPAN BUILT-INS CUT YOUR COSTS!

One cut-out for either gas or electric ovens

SALES BUILDER: TAPPAN BUILT-IN GAS OVEN WITH SEPARATE ROLL-OUT BROILER gives wonderful freedom and economy because it's interchangeable with electric units in the same cut-out. Oven teams perfectly with any Tappan surface unit . . . and may be serviced without removal from cabinet or wall. Like all Tappan Built-ins, it is easy and inexpensive to install.

MONEY-MAKER: TAPPAN ELECTRIC DOUBLE OVEN, JUST 24 INCHES WIDE, interchanges with Tappan gas oven units without extensive installation work. Doubly great! Dinner roasts in one oven while cakes or pies bake in the other. It's convenience every woman dreams about.

LOOK! INTERCHANGEABLE SURFACE UNITS, TOO!

New 33" drop-in gas surface unit

33" drop-in electric surface unit

24" drop-in gas surface unit

24" drop-in electric surface unit

In the complete Tappan line, there are interchangeable gas and electric surface units to fit every buyer's building or remodeling plans. You can offer your customers a choice of three gas and seven electric surface units, rang-

ing in size from 24" to 42". Special convenience features such as Set 'n Forget thermostatic control, a large built-in griddle and a NuTone food center are also available on Tappan surface units!

... and all these best looking, best cooking features:

Chrome or porcelain-lined ovens for top baking results! Visualite windows optional! Handsome Lusterloy or Copperloy finishes, plus lovely pastels! Built-in Rotisseries! Lift-off oven doors! Eye-level automatic controls! Separate roll-out broiler drawer . . . all the most-wanted convenience features that help sell homes fast! *The Tappan Stove Company, Mansfield, Ohio*

New home of Theron Federspiel, Fort Wayne, Indiana; designed by John Randal McDonald, Architect, Racine, Wisconsin.

This Modern Multi-Level Home
heated with **THRUSH**

Radiant Hot Water Heat

HERE'S A beautiful home that introduces many new ideas in gracious living. Being a multi-level home, it is naturally heated with hot water. Both radiant coils in the floor and radiant baseboards are used. The broad expanse of windows makes the front of the house practically out-of-doors so baseboard radiation is added. There are four zones each controlled by a Thrush Radiant Heat Control, a Thrush Circulator and Thrush Flow Control Valve. Zoning is simple and inexpensive by this method, yet desired temperatures are maintained in each part of the home automatically.

With Thrush System, it's just like living in a mild climate all winter long no matter what the weather outside may be. Best of all, installation costs are lower, fuel consumption is reduced and maintenance is negligible.

See our catalog in Sweet's or write Dept. G-4 for booklet and any information you may require in planning home heating.

SWAY HER "HOME-BUYING DECISION" WITH THE NEW

Caloric

BUILT-IN GAS RANGE

Usually it's the woman who makes the final decision "to buy or not to buy." And what woman doesn't base her home-buying decision largely on the kitchen? She'll like this completely new Caloric oven-broiler unit . . . the separate top burner units that can be conveniently placed to save steps, save time. (She can choose from 7 porcelain enamel colors, plus bright and satin metal finishes.) Install this beautiful Caloric Built-In and watch it "swing the sale."

MEAT THERMOMETER provides precise, automatic control in roasting. Thermometer is set and inserted. Turns oven off automatically when meat is done.

MORE SPACIOUS OVEN is 1 1/4 inches deeper. Complete oven-broiler unit looks larger, but fits the same cut-out dimensions of previous Caloric Built-In gas ranges.

THERMO-SET TOP BURNER gives same temperature control to top burner cooking that's available in oven cooking. Makes every pot and pan "automatic."

NEW! ROTO-ROASTER rotisserie lets family have a barbecue any day of the year. Meats come out moister and more tender than conventional oven-roasted meats.

AMERICAN BUILDER

In this addition to a school building, the plumbing contractor took advantage of the light weight and long lengths of copper tube to complete much of his roughing-in well ahead of other construction.

Only Copper gives you money-saving short cuts like this

YOU have more control of time and installation costs when you use copper tube in plumbing.

Other construction doesn't tie you down. The long lengths and light weight of copper tube enable you to work ahead of other building construction — as in the job shown above — to complete much of the roughing-in when it's most convenient for you.

You can save man-hours — utilize time that otherwise might be wasted in waiting around — by prefabricating sections, at the shop or on the job site. Just the ease of using solder-joint fittings makes installation simpler

and faster. Contractors report that installation time has been reduced one-third to one-half.

Anaconda Copper Tubes are available in all standard wall thicknesses — Types K, L, M, and the new lighter weight Type DWV Copper Drainage Tube. And Anaconda wrought and cast solder-joint fittings are available in a wide range of sizes and types.

Write for descriptive literature on ALL-COPPER plumbing. Address: The American Brass Company, Waterbury 20, Conn. In Canada: Anaconda American Brass Ltd., New Toronto, Ontario.

 its most important quality!**

When you install the original P&S Despard Line, you cash in on the greatest consumer acceptance for any wiring device today!

Backed by 28 years of constant improvement, the P&S Despard Line is *first choice* with home buyer—with builder—with electrical contractor. It adds to *your* reputation for offering only the very best in your houses.

P&S Despard combinations of two or three switches (exclusive Roto-Glo[®], and regular toggle type), outlets, and special devices are *assembled on the job*—in a matter of seconds. Combinations fit in a one-gang standard size plate. Accurately engineered . . . produced with precision . . . the P&S Despard Line assures dependable, trouble-free performance for the life of the home.

Take advantage of P&S merchandising aids. For your FREE supply of consumer folders, magazine ad displays, mobiles, switch tags and newspaper ad mats, see your wholesaler or write direct to Dept. AB-9.

ORANGEBURG[®]

DOWNSPOUT RUN-OFFS

help sell the house!

**Roof water splashing down
leads to trouble and expense...**

wet floors in basement or garage... flooded yard, lawn, driveway. Orangeburg Root-Proof Pipe makes ideal drain lines to carry it away...

and at low cost. They become one of those extras that help close the sale.

see our catalog in

S Sweet's
or write for copy

ADVERTISED IN
LIFE

250,000,000 Feet of Orangeburg Pipe in service today!

...and downspout run-offs are one of its popular uses

Orangeburg's lightweight 8-foot lengths save installation costs. Taperweld Joints seal root-proof with a few hammer taps... no cement, no compounds. Orangeburg is strong and tough. Lines 50 years old, going strong today, prove its durability.

Orangeburg Root-Proof Pipe is made in 2", 3", 4", 5" and 6" diameters... for sewer lines from house to street main or septic tank; for downspout run-offs, storm drains and other non-pressure underground outside lines. Orangeburg also comes *Perforated* in 4" size for foundation drains, septic tank filter fields, draining wet spots everywhere. Get *genuine* Orangeburg. Look for the Orangeburg *brand name* on pipe and fittings. For more facts write Dept. AB-47.

ORANGEBURG MANUFACTURING CO., INC. • Orangeburg, N. Y., Newark, Calif.

ORANGEBURG FITTINGS

Exclusive Orangeburg Fittings featuring Taperweld Joints simplify the installation.

Built-in air

General Electric zone-by-zone cooling

lets you completely air condition a whole house. And the system's fully automatic! Each new General Electric Built-In *Thinline* has an automatic thermostat. As the sun moves around the house, the unneeded units turn off and those in the warm rooms go on. Your buyers don't have to pay for cooling they don't need.

conditioning— zone by zone

with the new General Electric Built-In Thinline

Here at last, is a permanent air conditioning system that's easy for you to install—economical for your buyers to operate. The General Electric Built-In *Thinline* Air Conditioner gives your homes zone-by-zone cooling—with no plumbing or costly ductwork, no wasted floor or window space.

The case is shipped to the site first—installed through the wall during construction. The mechanism slides easily into the case when the building is complete. With *Thinline* styling there's no unsightly overhang *inside or out* to mar the appearance of the house.

Buyers Will Like the Economy

*Thinline*s are economical to operate—there's no need to pay to cool rooms that are not in use. And there's one for every home-cooling need. Built-In *Thinline*s come in ½, ¾ and 1 hp. models. All fit the same size case.

Every *Thinline* is pre-sold through national advertising—backed by expert service and a written guarantee—designed to meet FHA requirements. See your General Electric distributor for full details. General Electric Company, Louisville 1, Kentucky.

SPECIFICATIONS: BUILT-IN THINLINE

Model Number	RB32P	RB52P	RB72P
Compressor Motor	½ HP	¾ HP	1 HP
Volts—60 Cycle	115	115-230	230
Amperes (nameplate)	7.5	11.0-5.5	6.8
Watts (ASRE)	800	1,150	1,480
BTU/Hr. Capacity*	5,500	7,700	10,100
Dehumidification (Pts./Hr.)	1.1	2.1	2.9
Two Speed Fan Switch	No	No	Yes
Width	25½	25½	25½
Height	21½	21½	21½
Depth	17 7/16	17 7/16	17 7/16
Ship. Wt. (Case)	37 lbs.	37 lbs.	37 lbs.
Ship. Wt. (Unit)	146 lbs.	152 lbs.	164 lbs.

*Cooling capacities are tested and rated in compliance with ARI (Air Conditioning and Refrigeration Institute) Standard 110-56 and are stated in BTU's (British Thermal Units).

It's simple to install the new General Electric Thinline Built-In model

Case is installed during construction—mounts in any kind of wall. Panel protects opening until building is completed.

Thinline mechanism slides into case later. Six screws hold it in place—give you a quick, weather-tight installation.

Add appearance front, air filter, grilles. Plug in and the *Thinline* is ready to run. Grille can be painted to match any décor.

On the outside the *Thinline*'s aluminum grille will keep its smart good looks for years. Easily painted to match the exterior.

Hydro-Flo SYSTEM

Year 'round comfort with *water*
for both heating and cooling

BELL & GOSSETT COMPANY

BELL & GOSSETT

C O M P A N Y

Dept. ET-11, Morton Grove, Illinois

Canadian Licensee: S. A. Armstrong, Ltd., 1400 O'Connor Drive, W. Toronto, Canada

*Reg. U.S. Pat. Off.

send for this booklet...the complete story of the

B & G *Hydro-Flo** SYSTEM

FOR HEATING AND COOLING WITH WATER

The B & G Booster

Engineered for compactness, silent operation and years of service, this electric pump circulates water for heating the house in winter, cooling it in summer and for snow melting panels. The B & G Booster has a solid reputation for dependability...that's why over 2,000,000 have been sold to date!

Here is the feature which lifts your homes out of the commonplace class.... adds value far beyond the actual cost. No other type of system can offer so many possibilities for more comfortable, more convenient living.

The B & G *Hydro-Flo* System employs *circulated water* to provide the advantages only water can give. It can be installed initially as a forced hot water heating system, with all the benefits of controlled *radiant* warmth, plus a year-round supply of low-cost hot faucet water. It can be inexpensively zoned to permit different temperatures in different parts of the house.

Other *Hydro-Flo* features can be included, either when building or at any time thereafter. Summer cooling, for example, using chilled water in a choice of several ways. Or snow melting pipe coils under driveway and sidewalk, using the regular boiler to supply heat.

All the facts are given in a new color-illustrated booklet. Send for your copy—see why more and more builders are turning to the B & G *Hydro-Flo* system.

In this home development, 300 homes were sold over one week-end. Not the least of the factors which influenced this rapid sale is the fact that these homes are equipped with baseboard forced hot water systems using B & G *Hydro-Flo* equipment.

This modest home is heated with a B & G *Hydro-Flo* System, with baseboard panels as the heat distributors. Note the sign—the builder is capitalizing on the sales-making appeal of controlled radiant heating, plus a year 'round supply of hot faucet water.

Typical space-saving B&G *Hydro-Flo* System heating plant. The boiler has a built-in water heater.

ONLY WATER OFFERS ALL FIVE!

Heating • Cooling • Hot Faucet Water
• Snow Melting • Zoning

THE *New* KOHLER MINOCQUA

K-725-E.
With outlet at right,
K-726-E.

Space-saving bench rim bath

First Quality Only

Searching tests and inspections are made throughout every step of manufacture.

The trim, low lines of the Minocqua bath have been given fresh selling appeal with the addition of a 4-inch bench rim.

Space-saving dimensions solve many problems caused by limited space available in today's homes, yet the Minocqua affords the convenience, comfort and safety of the full 5-foot length, slope end, flat bottom.

The sparkling, easy-to-clean enamel of the Minocqua—like that of all Kohler baths—is fused to a base of non-flexing iron, cast for strength and rigidity. The complete line of Kohler baths includes sizes and styles that permit various arrangements in bathrooms of any shape or size.

MYERS WATER SYSTEMS

the right price and size for your market

Photo, courtesy National Homes Corporation

For the all-around water requirements of modern living, the Myers "HN" Ejecto will provide complete water-supply satisfaction.

Whether you're building small-budget homes or suburban estates beyond the city water mains, you can afford to choose a Myers with all the capacity and pressure the home needs. Homes sell faster when equipped with nationally known, brand-name products, and Myers has a long-standing national reputation for high quality.

Every Myers water system is factory tested and fully guaranteed for one year after installation. This is one more point that helps you sell prospective homeowners who are buying beyond the city water mains for the first time.

Write today for a free catalog showing the full line of Myers quality Water Systems and the name of the nearest Myers distributor.

Proved in Thousands of Homes!

Declares Herman B. Mayer of Mayer-Raisher-Mayer, "The Vornado Residential Air Conditioning Unit has solved two major problems in our Paddock Hills Subdivision, St. Louis, Missouri.

"By proper engineering, we have been able to keep our installation cost low and include air conditioning in every home that we build.

"Secondly, the overall cost of the unit and installation, makes it a good buy for the home purchaser. It adds very little to the monthly payments, guarantees comfortable living during the hot summer months, and at an operating cost well below other type units.

"As builders, we realize that air conditioning directly affects sale of our new homes, it assures satisfied home owners during the summer months, and is a large factor in re-sale of our homes..."

Vornado® Residential Air Conditioner... *ideal for every home in every price bracket*

Goes in crawl space

Goes in attic

Goes in basement

Installs Anywhere

Can be connected with the heating system or installed separately with prefabricated Vornaduct.

VORNADO INSTALLS EASIER PERFORMS BETTER

- * **Complete Package.** Vornado puts air conditioning in self-contained, air-cooled package. No extra plumbing, water connections, outside accessories.

BATHROOM UNITS

Trade-Wind Motorfans, Inc. 7755 PARAMOUNT BLVD., DEPT. AB, RIVERA, CALIF.

STEP ONE
Rough-in wall opening
only 20¼" x 29".

STEP TWO
Make simple electrical
wiring connection.

STEP THREE
Push into wall opening. Four screws secure molding.

EXCLUSIVE "FRENCH DOOR" WALL OVENS give more flexibility to kitchen designers . . . center-opening doors swing out to allow more working space — take less aisle space. Come in 4 porcelain enamel colors or satin chrome. And they're so easy to install in walls, cabinets or islands. Oven rests on a level wood shelf, needs no internal braces or external vents. *Approved for zero clearance installation.* These three steps are all you do . . .

Step by step, Frigidaire built-ins

ALL-NEW FRIGIDAIRE "SHEER-LOOK" DESIGN

Styled to stay in style — built for the homes of tomorrow — engineered for your homes today. Frigidaire built-in and freestanding kitchen and laundry products are as clean-cut and plumb-line straight as the plans for your new homes. No space-wasting curves — no gaps to fill — here is a new

concept in appliance design and engineering that makes every corner count. More builders are learning they can now offer value far above actual cost — and, at the same time, cut "on the site" time and labor expense by specifying Frigidaire products that square-up with standard counters and cabinets.

ONE STOP FOR THE MOST COMPLETE LINE OF MAJOR HOME APPLIANCES

For every kitchen, laundry, heating or cooling equipment need, call your Frigidaire Dealer or District Headquarters. Choose from the complete line including: 20 models of America's "Handiest" Refrigerators and Food Freezers; 12 models of the "Thinkingest" Electric Ranges; 3 exclusive "French Door" Wall Ovens; 5 space-saving Fold-Back Sur-

face Units; 2 Built-in Cooking Tops; 5 Automatic Washers and 4 Electric Dryers — the "Savingest" laundry pairs ever; 4 "Cleaningest" Dishwashers; 2 Food Waste Disposers; 16 Electric Water Heaters; 7 of the "Coolingest" Room Conditioners — and, a complete line of cooling combinations *plus* new gas or oil heating units for every size home.

PERSONALIZED PROMOTION TO HELP SELL YOUR HOMES

Your Frigidaire Builder Sales Representative is prepared to assist you with your merchandising plans and promotion materials — all professionally de-

signed for your specific homes. Call your nearest Frigidaire Dealer or District Headquarters for complete information.

BUILT-IN COOKING TOPS fit 'most anywhere in the kitchen — on top of the counter next to a wall oven, next to the sink or in front of the kitchen window. Simplified "Slip-in" Installation uses no adapter rings or brackets. No front carpentry — controls are on top. Only 5-inch depth required. Come in 4 porcelain enamel colors or satin chrome. Zero clearance approved by Underwriters' Laboratories, Inc. See how easy they build in . . .

ALSO EXCLUSIVE FOLD-BACK SURFACE UNITS that install in two simple steps: wire-in, screw-in for extra convenience, extra counter space.

STEP ONE
Cut counter top opening 19" x 31".

STEP THREE
Secure bottom housing (four screws).

STEP TWO
Make single electric connection.

STEP FOUR. Fasten cooking top to bottom housing.

save you time and money...

UNDER-COUNTER DISHWASHERS fit flush — front, top and sides with standard kitchen cabinets, require only 3 1/4" under-counter clearance, 24" depth. Pressure discharge drain permits flexibility in meeting existing drain conditions (plumbing to nearby sink or disposer). Comes in 4 porcelain enamel colors, or all white. Also available in cabinet style or Dishwasher-Sink Combination or Portable model. One-two-three installation . . .

"BUILT-IN" REFRIGERATORS, TOO!

Frigidaire "Sheer Look" Refrigerators fit square in wall alcoves or standard cabinetry . . . just Plug-in, Push-in, for that BUILT-IN look!

STEP ONE
Rough in utilities.

STEP TWO
Push into place and connect.

STEP THREE. Attach bottom panel.

TOPS IN QUALITY

There is a Kaustine Furnace or Winter
Air Conditioner for every type of home

He wouldn't be guilty of leaving fingerprints!

The hands that go into these goatskin gloves belong to a skilled worker in General Electric's new Tyler, Texas plant where whole-house air conditioning equipment is built.

The reason for the goatskin gloves? Even the barely perceptible perspiration that forms on human fingers would have an adverse effect on the compressors which are the heart of General Electric central system air conditioning. In any necessary handling before the compressor is factory-sealed for protection, goatskin gloves are worn.

This is an extra step we take — one of the many ways we safeguard the quality of our

products. And this quality control, standard practice at Tyler, Texas, is far-reaching in its effects. Whether you equip a single home or an entire project with General Electric Home Heating and Cooling systems, you can be assured of the homeowner satisfaction on which your success as a builder depends. General Electric Home Heating and Cooling Dept., Tyler, Texas.

Announcing Carlton's New Stainless Steel Vegi-Prep Sink

Designs to meet every modern sink requirement

Shown above is Carlton's New Tri-Level No. DSR-2147LD. Three-compartment, all-purpose, stainless steel sink. This new Carlton Sink combines the Vegi-Prep Sink with still another bowl. The third bowl is extra-deep and is ideal for cleaning pots and pans; serving as a butler's pantry sink, hand laundering, and numerous other sink chores. The double faucet arrangement permits two people to use the sink's facilities at the same time, without interfering with each other.

Installation requires only a little more counter space than the customary two-bowl models, and the cost is far less than it would be if a single bowl were installed as an extra service sink elsewhere. The Tri-Level model is available with the deep compartment either on the left or right side.

There's a world of difference in stainless steel sinks, as you will quickly discover when you inspect Carlton's gleaming, new Vegi-Prep Design. The deep compartment takes care of the usual sink chores, while the shallow compartment, under which any housewife can tuck her knees so comfortably, is just right for preparing fresh fruits and vegetables for freezer or table.

See how Carlton's careful engineering makes sink chores almost fun. The narrower wall between

bowls that reduces splash . . . the sound-deadening undercoating that hushes dishwashing clatter; transforms garbage disposer noise from a growl to a purr! And, of course, there is no enamel to chip or crack; no chance of food stains or rust. A quick whisk of a dish cloth and a Carlton Stainless Steel Sink is restored to its everlasting beauty.

Write for Catalog No. 175 and the name of your nearest Carlton Distributor. Address SINK DIVISION, Carrollton Manufacturing Company, Carrollton, Ohio.

Always the bright spot in any kitchen - costs not a penny more!

Star of the Shows!

American Kitchens' sensational new

WOODHUES

NEW! THE "WOODHUES" HONEYWOOD KITCHEN—American Kitchens now offers two great house-selling combinations! A beautiful blend of new Bermuda Beige lifetime finish on durable steel frame, with wall and base cabinet doors in harmonizing Honeywood (shown above) on Cinnamonwood.

ALSO AVAILABLE IN
CINNAMONWOOD

And now "WOODHUES" are available to builders at a surprisingly modest price!

Most exciting home-selling salesmen since American Kitchens' famous "Pioneer"! Priced surprisingly low for a product so fine! That's what builders everywhere are saying about these fabulous new "Woodhues," and no wonder!

Created to help you sell more homes faster, "Woodhues" are an eye-pleasing combination of Bermuda Beige lifetime finish on steel, with harmonizing Honeywood or Cinnamonwood doors, a full $\frac{3}{4}$ " thick on both wall and base cabinets! Countertops in nine fashionable new Formica colors. And no mix-or-match color problems with "Woodhues"!

Especially easy to install, "Woodhues" add remarkably little to your costs. Plenty of sensational new features, too. Exclusive adjustable sliding drawer shelves in *all* base cabinets! Exclusive new convertible chrome faucets! Versatile drop-in sink cabinets in 30" and 36" widths!

Check the many advantages that new "Woodhues" can give you now! Get the edge in today's competitive market with "Woodhues" and its powerful built-in salesmanship. American Kitchens are also available in "Pioneer" of birch, copper and steel, and ever-popular White. Mail the coupon today!

Textolite Ideas

FOR YOUR
MERCHANDISING FILE

Birchwood Park kitchen features Textolite postformed counters and "Mix-or-Match" color styling. Fabricators: Formed Laminates, Inc.

Textolite® postformed counters strong sales feature in 2,600-home project!

General Electric postformed counters eliminate dirt-catching seams; add functional design and beauty.

Mr. Morris Sosnow, builder of mammoth Birchwood Park in Jericho, New York, knows that the sale of a home can be decided in the kitchen. That's why he specified Textolite postformed surfacing on kitchen counters in all his homes.

Priced at \$19,990 to \$30,000, over 800 homes have already been completed and sold. No wonder that, today, in Nassau and Suffolk Counties, so many jobs specify postformed counters.

General Electric Textolite postformed surfacing eliminates dirt-catching corners; its no-drip lip edge keeps liquids off the floor. The surfacing resists stains and scratches; cleans with a swish. And, with over 80 attractive patterns and colors, Textolite offers the extra advantage of "Mix-or-Match" color styling.

Check your Yellow Pages under "Plastics" for the Textolite fabricator nearest you. Specify Textolite surfacing . . . it sells!

Combination desk-and-work counter in Birchwood Park kitchen shows "Mix-or-Match" program at work. Textolite surface matches General Electric appliances perfectly. Only Textolite offers the colors and patterns that make a "Mix-or-Match" program possible.

AMERICAN BUILDER

now, adding Cooling

to Williamson Heating
is as easy as installing
a telephone!

Yes, you can get the most important "Year-round Air Conditioning" decision made for your home completed and your buyer decides whether he wants cooling added to his heating equipment immediately or not. Simply install a WILLIAMSON Warm Air Furnace with a cooling coil enclosure—the latter at practically no extra cost. When the buyer decides on cooling it can be added almost as simply as adding a telephone.

Remember, Williamson has a size and a type of central cooling unit and furnace to fit any size home you are building. No water required—no costly plumbing.

See our 12 page insert in SWEET'S Light Construction File.

The Gerber Bermuda bathroom features full size steel tub with bath and shower trim, pop-up drain. Lavatory is 20" x 18", has concealed front overflow, centerset faucet with aerator and pop-up. Closet is reverse trap.

The Catalina bathroom features full size steel tub with over-the-rim tub filler, connected waste and overflow. Lavatory is 19" x 17", has concealed front overflow, centerset mixing faucet. Closet is close-coupled washdown type.

For more bathroom appeal . . .

These two Gerber bathrooms cost little more than one of other makes

You can build more bathroom appeal into your homes with Gerber plumbing fixtures, at *no extra cost*. Gerber offers the most wanted bathroom features, so sensibly priced you can install colored fixtures instead of white, 2 lavatories instead of one, a full size tub instead of a "miniature." Deluxe features such as reverse trap closets cost no more than most washdown models, and modern Gerber pop-up drains cost no more than most chain and plug styles.

Gerber has five large, modern plants making a complete line of high quality plumbing fixtures, all moderately priced to give you *full value* for your plumbing dollar. They are easy to install and service and have smart, modern "harmonized styling."

Over a quarter of a century of experience supplying the building industry assures efficient handling of your order and "on time" delivery to your job site. All fixtures, including complete "packaged" bathrooms, are available from any of our 5 plants. Your Gerber representative is prepared to give you valuable job site service that cuts installation time.

Gerber offers a complete line of high quality brass, steel enamel ware, and vitreous china ware

Choice of 5 Gerber colors: Stainless White, Sunset Tan, Waterfall Blue, Lagoon Green, and Petal Pink. Gerber fixtures carry the Good Housekeeping Seal.

DELUXE FURNACES

For every home heating preference or need, there's an ideal Majestic furnace. In the Deluxe line of Majestic winter air conditioners, you find a choice of models for homes of every size and for every type of forced-air heating system.

Units are available in three sizes and in upflow, downflow, or horizontal flow design, and for either gas or oil fuel. These are quality furnaces, built with all the experience of Majestic's half-century of dedication to home comfort, but priced for economy in both the initial cost and in installation.

A full line of larger furnaces is also available, as well as matching summer air conditioners for year-'round comfort.

Majestic

HEATING and AIR CONDITIONING

Imperial Furnaces

Here are furnaces of exceptional beauty and quality construction, designed for those who want the best in winter air conditioning. A few of their outstanding features include: handsome vestibule front in modern design; "Quiet-Cote" undercoating of the casing (like the undercoating on your car) for rust-free service life and soundproofing; new quiet burners and controls of the latest design.

As in all Majestic furnaces, including the Deluxe line, the unique and efficient heat exchanger is guaranteed a full ten years.

System-matching air conditioners are available with these furnaces, in either completely self-contained water cooled units or remote air cooled models, with blower-equipped matching casings or with evaporator cabinets that utilize the furnace blower and filters.

FIAT PreCast SHOWER FLOOR

LOWERS COST OF SHOWER CONSTRUCTION

The new *FIAT Monterey* shower floor has a PreCast integral threshold and curb that completely eliminates the most expensive steps in shower construction: the built-on-the-job floor, threshold and pilasters. Glass filler panels at the jambs replace the pilasters, rest directly upon the curb of the *Monterey*. The *FIAT* PreCast Shower Floor simply slides into place—there's no need for sub-pan, mortar, tiling and hours of costly labor. Try this new shower technique that saves you money and produces added sales appeal.

The *Monterey* shower floor, PreCast of sparkling terrazzo, is permanently leakproof and furnished as a complete unit with solid brass drain and stainless steel strainer plate. There is nothing else to buy—nothing else to install! The photograph shows an excellent and economical shower combining the *Monterey* floor with a glass filler panel and door forming the front. Either hinged or sliding doors, by others, may be used as the solid threshold provides a convenient foundation for the track.

Monterey model available in six sizes—rectangular, square and corner designs.

It's so much easier to see the advantages of PreCast Floors than to read about them. That's why we would like just five minutes of your time to show you this cross section sample. Clip coupon to your letterhead and get full information. No obligation of course.

The Hotpoint Line is the Builder's Line of Appliances—offering you perfect combinations for homes in every price bracket!

Hotpoint Dishwashers offer Spot-Less Washing, Spot-Less Rinsing, Spot-Less Drying.

The widest variety of Built-in Models and Prices—5 Ovens, 7 Surface Cooking Units, 2 Refrigerators, 1 Freezer, 3 Modular Kitchens!

The Hotpoint Line of 9 Ranges offers the right model for every home—plus an Electronic Cooking Center.

what I want!"

Women are different—and each one knows exactly what she wants in the kitchen of her new home.

Differing preferences and pocketbooks are no problem to the builder who uses Hotpoint. As a matter of fact, they're an advantage because he can give people just what they want—at the price they can afford.

There's a logical reason—the Hotpoint Line is the broadest and most versatile line of kitchen appliances in the world today.

If cost is important to one couple, you can meet any price competition with Hotpoint budget models—the finest dollar-for-dollar values in the low-price range.

If the next couple wants the most advanced features and beauty in styling, you can offer them Hotpoint de luxe models, the finest in America.

To capitalize on the home-selling opportunities—and "selling up" profits—many builders now install two model kitchens. One features Hotpoint budget appliances, and one features Hotpoint de luxe appliances. Home buyers make their choice—and almost invariably they choose the added features of Hotpoint de luxe models. And that means added profit for you.

Contact your Hotpoint Distributor's Builder Specialist today—and he'll prove to you with facts and figures why Hotpoint offers you maximum profit opportunities!

Hotpoint (A Division of General Electric Company)
5600 West Taylor Street, Chicago 44, Illinois

Famous Hotpoint Disposal® Food Waste Disposer in two models.

Electric Water Heaters in 3 styles—Built-in, Round, and Table-Top Models.

The Hotpoint Home Laundry Line — 3 Washers, 7 Dryers, 1 Washer-Dryer combination, 5 style-matched pairs!

Hotpoint Owl-Free Design Highlights 2 Refrigerators, 2 Refrigerator-Freezers, 3 Chest Type, and 2 Upright Freezers.

Everybody's talking about
**THE ALL-NEW
NIAGARA**

BUILDER'S SPECIAL Gas-Fired Furnace

Builders know how important economy is in today's tighter market. This doesn't necessarily mean "cutting corners" to sacrifice quality, but requires getting the most value for every dollar.

To fulfill this requirement, Niagara has especially designed for builders a gas-fired furnace where "budget heating" is needed.

This compact heating unit has an efficient gas burner and heat exchanger that will provide plenty of heat with low gas bills.

Available either as a forced-air furnace, Model 100S-AC, or as a gravity furnace, Model 95S-G, this all-new Niagara Builders Special combines economy and efficiency.

The Niagara line also includes completely automatic gas or oil furnaces, with or without refrigerated air conditioning, to fit every home requirement.

For complete information, write direct or contact your Niagara heating contractor.

Are
your plans
really complete?

When you complete the planning for the homes you'll build this season have you included 'built-in' fans? . . . Chelsea attic and kitchen fans are inexpensive, easy to install — add that extra touch of luxury that will sway hard-to-please buyers in your favor . . . adequate home cooling and ventilation is a "sales must" today!

'Floating Action'
Attic Fans...

Can be installed in minutes while your homes are under construction. Sizes and models for every type of architecture in every price range . . . Give a tremendous sales advantage when competition is tough and sales depend upon the 'extras' you can offer!

Kitchen Range Hoods

With the emphasis on attractive kitchens Chelsea range hoods add the 'extra' that helps sell the entire home. Inexpensive and easy to install in a few minutes.

Kitchen Fans . . .

The symbol of luxury construction to most buyers yet priced so modestly that you can install them anywhere.

Chelsea

...Home Cooling has
become a "Sales Must"!

AMERICAN BUILDER

BE THE FIRST TO OFFER A HEAVY-DUTY POWER SOURCE

that operates **5** electric housewares at one time...

New Westinghouse Automatic APPLIANCE CENTER!

Another Westinghouse Built-in and what a feature to promote to your prospects! Now, 3, 4, or 5 appliances can *all* plug in without blowing fuses. Clock and Timer give automatic on-off control. Two outlets and three Hide-away cords with cord reels connect to appliances.

This Automatic Appliance Center installs with just one 3-wire circuit connection. It breaks into 5 appliance circuits at less cost than installing 5 separate circuits. It's compact and self-contained, perfect for a variety of locations. Mount it in a wall cabinet, under or alongside a wall cabinet.

Build-in an exclusive service feature—build up sales excitement. Specify the Automatic Appliance Center to your designer and electrical contractor. For complete specifications and installation, see your Westinghouse distributor or mail coupon at right.

Now! All Mueller Climatrol Units Automatically Rust-Proofed for Life

There is an important selling point for builders in the new Mueller Climatrol "Paintbond" finishing system. Used in production of all Mueller units, it assures a uniform, top-quality coat that protects against rust, assures long life and lends further sparkle to high-styled designs.

The new process is a three-stage automatic operation, including cleaning and phosphatizing prior to spray painting with distinctive Mountain Spring Green enamel. It's the finest system of its kind in the heating and cooling industry — the talk of the finishing field.

Constructed of tough heavy gage steel, Mueller Climatrol casings take years of abuse without revealing it. In addition, they're finished *inside as well as out* so that rust has no chance to get started.

Priced for Profits!

New Furnace Studded With Deluxe Features

Here's a gilt-edged invitation to bigger profits in your new homes or remodelling work. Mueller Climatrol Type 127-227 (gas or oil) winter air conditioner fits every requirement for a low-cost forced air

unit—in basements or utility rooms, for perimeter, conventional, small pipe or other installations.

Heavy-gage, insulated steel cabinet; welded steel heat exchanger; cast iron open-port burner — all are standard. Write for complete price and specification data.

Kit Puts Selling Punch in Model Home Installations

See your Mueller Climatrol dealer for full details, or write direct to . . .

Mueller Climatrol®

Manitowoc

Built-in 2-Zone®

... world's only family-size
built-in refrigerator-freezer

Compactness for small home planning, bountiful living for your luxury homes, and the only truly full-size capacity combination for modern families. A 10 cubic foot refrigerator featuring *Cold-Flo* to dissipate frost before it forms — and 13 cubic foot, 455 pound capacity freezer with superfast, supercold freezing anywhere in compartment. Highly adaptable, left or right doors, smart new squared-up styling, choice of beautiful finishes: antique copper, stainless steel, and white.

You really make it a dream kitchen — delight the housewife, who makes or directs those big home-buying decisions — with a 1957 Maniowoc built-in 2-Zone.

**No installation
more simple than this**

Manitowoc built-in 2-Zone is a *completely equipped package* — all ready to slide into basic built-in space.

Single compressor is part of the unit — mounted in place, ready for superbly efficient operation.

Bigger by 10-cubic-foot average than any other similar unit — but requires little more space, if any. Only 36" wide, normal cabinet depth.

Plan the kitchen that sells the house — with the biggest and best that modern families need — Maniowoc's built-in 2-Zone.

Mail the coupon today for complete details on features and specifications of the new Maniowoc built-in 2-Zone.

Builders, Contractors like to Sell, Install these New Radio-Intercom Systems

Fanfare MUSI-TALK

Sell . . . because MUSI-TALK adds to the value and sales-appeal of every house. It's the "big extra" certain to clinch a sale! Install . . . because MUSI-TALK installation kits and electronic kits may be purchased separately thus saving 3/4 on original investment. There is no warehousing problem.

- 6-Tube, trouble-free, printed circuit radio
- Direct remote-to-remote communication
- Remote stations can originate calls
- Smartly styled in brushed copper

Complete MUSI-TALK system consists of installation kit (plaster boxes, 200 ft. of wire and hardware) and electronic kit (1 master control, 4 indoor remotes and 1 door remote) **\$149⁹⁵**

Write for FREE catalog MT for complete details—and literature on other Fanfare intercoms for home and industry. Territories available for distributors.

10 DAYS FREE TRIAL!

**The Complete Book of
MODEL RAILROADING**

by Louis H. Hertz

Nationally-known Expert and Author

Send today for FREE 10-day trial of this big illustrated guide. Examine the wonderfully complete contents, the dozens and dozens of fine pictures. As it answers your puzzling questions and gives you helpful exciting ideas, you'll be getting MORE FUN from this fascinating hobby of model railroading.

Here are all aspects of model railroading. You get 1) the background and basic information valuable to beginners, 2) step-by-step directions for creating a model railroad system and 3) explanation of technical data hitherto understood by only the most experienced model railroaders. The partial contents given below only hint at the vast number of topics included. It's handsomely illustrated, clearly and interestingly written, technically accurate.

1500	13.04	35	55	85	140	215	350	550
2000	17.38	25	40	65	100	160	265	410
2500	21.73	20	35	50	80	130	210	350
3000	26.07	15	25	40	65	110	180	275
3500	30.42	...	22	35	60	90	150	235
4000	34.76	..	20	30	50	80	130	210
4500	39.11	..	15	28	45	70	115	170
5000	43.46	25	40	65	105	160
6000	52.14	20	35	55	85	135
7000	60.83	28	45	75	115
8000	69.52	25	40	65	100
9000	78.22	35	55	90
10000	86.91	30	50	80

*Above figures represent a one-way distance in feet for a 2 wire run. If a 4% voltage drop is permissible, double the distance listed.

If only 1% voltage drop is allowable, divide the distance listed by 2.

SINGLE PHASE 115 Volt A.C. — Use 115 Volt table above.

SINGLE PHASE 115/230 Volt A.C., 3 Wire — Use 115 Volt table above for each 115 Volt circuit.

SINGLE PHASE 230 Volt A.C. — In table above, use Watts column, multiply distances by 4, or use Amperes column, multiply distances by 2.

SINGLE PHASE 440 Volt circuit — In table above, use Watts column, multiply distances by 16, or use Amperes column, multiply distances by 4.

115 Volt D.C. — Use 115 Volt table above.

230 Volt D.C. — In table above, use Watts column, multiply distances by 4, or use Amperes column, multiply distances by 2.

THREE PHASE SYSTEMS

1. Three phase 230 volt circuit.—Multiply the distances in the 115 volt table No. 6A by 2 1/3 for the same load. Use the Amps column.

2. Three phase 440 volt circuit.—Multiply the distances in the 115 volt table No. 6A by 4 1/2 for the same load. Use the Amps column.

3. Single phase 120 volt circuit.—Use the distances in the 115 volt table No. 6A. Use the Amps column.

FORMULA FOR DETERMINING WIRE SIZE UNDER ANY CONDITION

Direct Current and Single Phase Systems

$$CM = \frac{D \times I \times 22}{Ed}$$

Three Phase Three Wire Systems

$$CM = \frac{D \times I \times 19}{Ed}$$

CM = Circular Mills — Wire Size (See Table 1)

I = Current in Amperes — (In the case of three phase, it is the current in each wire.)

D = Single distance on one way length of the circuit in feet.

Ed = Allowable voltage drop in volts. (2% of 115 V. is 2.3 V.) (2% of 230 V. is 4.6 V. etc.)

THIS SHOWS THE ACTUAL DIAMETERS OF DIFFERENT SIZES OF WIRE, WITHOUT THE INSULATION.

TYPICAL RUNNING CURRENT REQUIREMENTS OF MOTORS

HORSE POWER	115 V 1 Phase A.C.		230 V 1 Phase A.C.		230 V 3 Phase A.C.		115 V D.C.		230 V D.C.	
	C	W	C	W	C	W	C	W	C	W
1/8	2.6	14	1.3	14						
1/6	3.2	14	1.6	14						
1/4	4.6	14	2.3	14			3.0	14		
1/3	6.0	14	3.0	14			3.8	14		
1/2	7.4	14	3.7	14	2.0	14	4.6	14	2.3	14
3/4	10.2	14	5.1	14	2.8	14	6.6	14	3.3	14
1	13.0	12	6.5	14	3.5	14	8.6	14	4.3	14
1-1/2	18.4	10	9.2	14	5.0	14	12.6	12	6.3	14
2	24.0	10	12.0	14	6.5	14	16.4	10	8.2	14
3	34.0	6	17.0	10	9.0	14	24.0	10	12.0	14
5	56.0	4	28.0	8	15.0	12	40.0	6	20.0	10
7-1/2					22.0	10	58.0	3	29.0	8
10					27.0	8	76.0	2	38.0	6

C = Full Rated Load Current in amperes (Amperes while starting are MUCH higher)

W = Minimum Wire Size permitted by Code; larger sizes often required — Check Distance for Voltage Drop.

PULLEYS & "V" BELTS

SELECTING PULLEY SIZES AND SPEED RATIOS

$$\frac{\text{MACHINE RPM} \times \text{MACHINE PULLEY DIAM.}}{\text{MOTOR PULLEY DIAM.}} = \text{MOTOR RPM}$$

Example: To find the RPM of the Motor when the following facts are known:

Machine RPM.....	3,500
Machine Pulley Diameter.....	3 inches
Motor Pulley Diameter.....	6 inches
$\frac{3,500 \times 3}{6}$	= 1,750 RPM — Motor Speed

$$\frac{\text{MOTOR RPM} \times \text{MOTOR PULLEY DIAM.}}{\text{MACHINE PULLEY DIAM.}} = \text{MACHINE RPM}$$

Example: To find the RPM of the Machine when the following facts are known:

Motor RPM.....	1,750
Motor Pulley Diameter.....	6 inches
Machine Pulley Diameter.....	2 inches
$\frac{1,750 \times 6}{2}$	= 5,250 RPM — Machine Speed

$$\frac{\text{MACHINE RPM} \times \text{MACHINE PULLEY DIAM.}}{\text{MOTOR RPM}} = \text{MOTOR PULLEY DIAM.}$$

Example: To find Motor Pulley Diameter when the following facts are known:

Machine RPM.....	3,500
Machine Pulley Diameter.....	2 inches
Motor RPM.....	1,750
$\frac{3,500 \times 2}{1,750}$	= 4 inches — Diameter of Motor Pulley.

$$\frac{\text{MOTOR RPM} \times \text{MOTOR PULLEY DIAM.}}{\text{MACHINE RPM}} = \text{MACHINE PULLEY DIAM.}$$

Example: To find Machine Pulley Diameter when the following facts are known:

Motor RPM.....	1,750
Motor Pulley Diameter.....	2 inches
Machine RPM.....	600
Using the above formula:	
$\frac{1,750 \times 2}{600}$	= 5.8 inches — Diameter of Machine Pulley

"V" BELTS

GENERAL SUGGESTIONS

1. For most efficient drive design to operate with a belt speed of less than 5,000 feet per minute.
2. Allow 1/4" minimum take-up for stretch, and 1/8" additional for each 20" of belt length.
3. Allow a minus adjustment for easy belt installation.
4. Avoid having belts too tight. This will overload the bearings and stretch the belt. Proper tension can be gaged by pressing belt together at mid-point between pulleys. The movement of the belt should be about 1/2" to 1".
5. A reduction of only 10% in tension will increase belt life up to 60%.
6. Increasing the diameters of the pulleys increases the belt life.
7. Pulleys should be in line. Misaligned pulleys wear the sides of the belt and place undue strain on bearings and motor.

BELT DESIGNATION STANDARDS

Now belt numbers, now standard with most manufacturers are based on the top width dimension and the outside circumference of the belt.

Belt designations are given thus:

Width of top of belt in 8ths of an inch.

Belt length in inches.

Example: a belt 3/4 inch wide with a circumference of 44 inches would read:

Width of top (6/8) or 6L

Circumference 44" or 440

Belt designation: 6L 440

BELT SPEEDS

To find the speeds in feet per minute of belt travel the following formula is used:

$$\text{RPM} \times D \times 0.262 = \text{fpm}$$

or

$$\text{RPM} \times d \times 0.262 = \text{fpm}$$

Note: RPM = revolutions of pulley used in formula

D = Diameter of largest pulley

d = Diameter of smallest pulley

BELT LENGTH REQUIREMENTS

The following symbols are used in these formulas:

D = Outside diameter of larger pulley in inches

d = Outside diameter of smaller pulley in inches

C = Distance between centers of pulleys

To find the length of belt required when both pulleys are the same diameter:

$$\text{Formula: } \frac{2D \times 3.15}{2} + 2C = \text{Belt length required}$$

To find the length of belt required when pulleys are unequal diameter:

$$\text{Formula: } 2C + 1.57(d + D) + \frac{(D - d)^2}{4C} = \text{Belt Length}$$

QUARTER TURN DRIVES

This type of drive is used where it is necessary to have the motor and driven pulleys at right angles to each other. The design is basically the same as a standard drive with the following exceptions:

1. The center distance should be about six times the diameter of the largest pulley to insure maximum belt life.
2. When the speed ratio exceeds 2 1/2 to 1 it is usually more practical to incorporate a reduction drive to the 1/4 turn drive to reduce its ratio to about 1 to 1.

TRENCH EXCAVATION

MINIMUM RECOMMENDATIONS FOR TRENCH TIMBERING

Based on use of Douglas fir or equivalent
From the proposed American Standard Safety Code
for Building Construction, A10.2-1944

Trenches not more than 42" wide.

Depth of Trench in Feet	Uprights		Stringers		Cross Bracing	
	Size	Horizontal Spacing	Size	Vertical Spacing	Size	Horizontal Spacing
Hard and Solid Soils						
4'-10'	2"x6"	6' c-c		None	2-2"x6" to 7' 3-2"x6" up to 10'	6' c-c
10'-15'	2"x6"	4' c-c		None	3-2"x6" to 13' 4-2"x6" to 15'	4' c-c
Over 15'	2"x6"	Close Tight	4"x12"	4' c-c	4"x12"	6' c-c
Soil Likely to Crack and Crumble						
4'-10'	2"x6"	3' c-c	2"x6"	Top and Bottom	2-2"x6" up to 7' 3-2"x6" up to 10'	6' c-c
10'-15'	2"x6"	3' c-c	2"x6"	3 in. height	3-2"x6" to 13' 4-2"x6" to 15'	6' c-c
Over 15'	2"x6"	Close Tight	4"x12"	4' c-c	4"x12"	6' c-c
Soft Sandy Filled or Loose Soils						
4'-10'	2"x6"	Close Tight	4"x6"	2 up to 7' 3 up to 10'	4"x6"	6' c-c
10'-15'	2"x6"	Close Tight	4"x6"	3 up to 13' 4 up to 15'	4"x6"	6' c-c
Over 15'	2"x6"	Close Tight	4"x12"	4' c-c	4"x12"	6' c-c
Trenches of any width.						
Hard and Solid Soils except as noted						
4'-10'	2"x6"	6' c-c	4"x6"	4' c-c	4"x6"	6' c-c
10'-20'	2"x6"	Close	6"x6"	4' c-c	6"x6"	6' c-c
Over 20'	2"x6"	Close	6"x8"	4' c-c	6"x8"	6' c-c
Soils Likely to Crack or Crumble						
4'-10'	2"x6"	3' c-c	4"x6"	4' c-c	4"x6"	6' c-c
Soft Sandy Filled or Loose Soils						
4'-10'	2"x6"	Close	4"x6"	2 up to 7' 3 up to 10'	4"x6"	6' c-c
Trenches more than 42" in width.						
Soils Having Hydrostatic Pressure						
Not over						
8'	2"x6"	T&G	Close	6"x8"	6"x8"	6' c-c
Over 8'	3"x6"	T&G	Close	8"x10"	6"x8"	6' c-c

*Sheet steel piling may be used in place of tongue and groove piling.
The greater dimension of the stringers should be at right angle to the sheeting.

Storing excavated material. Note material is placed not nearer than two feet from edge of trench

Method of bracing when two lengths of sheet piling are used.

Jack screws used with complete sheet piling.

Shoring, full depth in soft sandy soil or filled ground.

Section E Tools & Construction Equipment

SAFE SCAFFOLDING PRACTICES

Various types of scaffolds are used in building construction, such as single pole scaffolds, independent (four pole) scaffolds, suspended scaffolds, outrigger scaffolds, and horse scaffolds. In the construction of these scaffolds the following suggestions should be carefully considered:

- (a) All lumber used in scaffolds should be of good quality, reasonably straight grained and free from weakening knots and other defects.
- (b) Scaffolds should be built and installed by men who thoroughly understand the principals of design and the safe loads which various members can carry.
- (c) Special lumber selected for scaffold use should be painted green on the end so it can be distinguished from other miscellaneous lumber.
- (d) Scaffold bracing should be installed in triangular fashion.
- (e) When it is necessary to splice an upright member of a scaffold, cleats not less than 4 feet long should be nailed on two adjacent sides of the upright at the joint.
- (f) Planks for flooring should be of uniform thickness. They should extend at least 6 inches and not more than 12 inches past the center of the putlog or other support.
- (g) Scaffolds (with the possible exception of iron workers' or riveters' scaffolds, carpenters' bracket scaffolds, and trestle or A-ladder scaffolds), if 6 feet or more above the ground, should have substantial handrails and toe boards installed on all open sides. Handrails should be approximately 42 inches high; and toe boards not less than 5½ inches high. If the lower edge of the railing is more than 34 inches above the scaffold floor, an intermediate rail should be installed.
- (h) It is advisable to install a wire screen of not more than ½ inch mesh between the top railing and the toeboard.
- (i) If work is carried on above the men on a scaffold, the scaffold should have overhead protection or a roof of light lumber, heavy canvas or heavy wire mesh.
- (j) Men should not work on an outside scaffold during a storm or in a high wind.
- (k) Scaffolds should be cleaned at least daily of all rubbish. Tools, buckets, etc., should not be left on any scaffold when workers leave the job. In winter, snow and ice should be removed from the scaffold before work is started. The platform may be sprinkled with sand or ashes to prevent slipping.
- (l) One or more safe means of access such as stairs or ladders should be provided to reach each scaffold platform. If a ladder is used, it should be fastened at the top and bottom so it cannot tip or slip.
- (m) Scaffold members should be fenced in or otherwise protected so trucks and other vehicles cannot strike or dump material against them.
- (n) Hoisting engineers should be warned not to let loads swing against scaffolds or catch on them.
- (o) Outrigger scaffolds are not favored if other types of scaffolds can be used.
- (p) Swinging scaffolds should be lowered to the ground or lashed to the building when men leave the job.
- (q) Wire rope is recommended in preference to manila rope for suspended scaffolds.
- (a) Any man who is required to go out upon a thrust-out (an overhead support to which cables are attached for suspended scaffolds) should wear a life belt. A life line should be secured to the belt and the other end made fast to some part of the building.
- (s) Men should not jump on a scaffold, nor should anything be allowed to fall onto or off a scaffold.
- (t) Horse scaffolds should not exceed three tiers nor a total height of 15 feet.
- (u) Men should not work nor pass under scaffolds. Otherwise, their work places and passageways should be roofed over so no one will be injured by objects falling from the scaffold.

SCAFFOLD PLANKS

Safe Center Loads

Douglas Fir (Rocky Mountain Region), Sitka Spruce, White Spruce, Red Pine and Port Orford White Cedar. Extreme fiber stress of 1300 pounds per sq. in.

Span in Feet	Nominal size of plank in inches					
	2x8	2x10	2x12	3x8	3x10	3x12
6	230	290	355	610	775	935
8	170	210	260	450	570	690
10	130	165	200	355	450	540
12	105	130	160	285	365	440
14	80	105	130	235	305	365
16	70	90	105	200	255	310

SPECIFICATIONS

and NOTES

For other species of woods as listed below, safe center loads may be determined by multiplying tabular load above by constant indicated for each group:

Species	Fiber stress in pounds per sq. in.	
	1,050	Constant
1. Balsam Fir, Eastern White Pine, Ponderosa Pine, Sugar Pine and Western White Fir.....	1,050	.80
2. Redwood and Tamarack.....	1,400	1.07
3. White Ash, Red Oak, White Oak and Baldcypress.....	1,500	1.15
4. Douglas Fir (Coast Region) and Southern Yellow Pine.....	1,750	1.34
5. Dense Douglas Fir and Dense Southern Yellow Pine.....	2,050	1.57

Above table applies to planks surfaced 4 sides, seasoned to moisture content between 15 and 18 per cent, free from shakes, decay or other defects. Slope of grain not steeper than 1 in 15. Knots in edge not larger than ¼ of plank thickness. Knots in center of wide face not larger than ¼ of plank width, with permissible size decreasing as they approach edge to 1/8 of plank width at edge. Sum of sizes of all knots in wide face in length equal to plank width not to exceed ½ of plank width. Average plank weight of 30 pounds per cu. ft. included.

Courtesy National Safety Council

Section E Tools & Construction Equipment

SIDEWALK SHEDS

Sidewalk sheds (or bridges) are used commonly for the protection of pedestrians on sidewalks adjacent to buildings under construction, being demolished or undergoing repairs or alterations.

Some states and cities specify conditions under which sidewalk sheds must be provided, and establish standards for their construction. Recommendations herein are based on the requirements of the Safety Code for Building Construction, A-10, approved by American Standards Association and referred hereafter as the Construction Code. Where local city or state codes, or applicable federal codes, are more stringent, they will take precedence.

SHED SPECIFICATIONS

The Construction Code permits the use of wood, steel or other suitable material but requires that the shed be capable of sustaining a load of at least 300 pounds per square foot, if material is to be stored on the shed. If there is to be no material storage, the requirement is 150 pounds per square foot. Because in most cases material is stored on the sheds, it is recommended that all of them be built to handle storage.

For sheds of wood construction Number 1 Douglas fir, Sitka spruce, or other woods of equivalent strength are commonly used. Lumber should be free from defects or damage which will materially reduce its strength. Structural members such as posts, sills and girders should be of sizes sufficient to provide strength as recommended in the first paragraph and to ensure stability of the structure. The latter factor usually takes precedence, and 6" x 6" posts and sills and 6" x 8" girders are commonly used.

The deck should be of not less than 2-inch planking, laid on deck-beams spaced not more than 24" center to center. Deck beams of at least 3" x 10" material should be used for sidewalk widths up to ten feet; for wider sidewalks heavier beams should be used.

Most codes recognize the use of steel or other materials but give no definite specifications other than a requirement that strength equivalent to that specified for wood be provided. Plank decking is the same as that on a shed of wood construction.

It is customary to make the shed of sufficient width to permit use of the full width of the existing sidewalk except for the necessary space occupied by the posts and sills. In any event the width should be sufficient to accommodate normal traffic without congestion.

Where the shed is adjacent to the face of the building, it should be so constructed that material cannot be dropped between the shed

Typical design for a sidewalk shed of wood construction. This drawing is one of a series of Detail Sheets published by the National Safety Council.

and the building otherwise. A solid back-fence should be provided at the line of the inner posts. The exposed surface of the back-fence should be smooth and free from protruding nails, wire, rods or other projections. Where material is dumped into trucks through chutes above the shed, the outer edge of the passageway should also have a solid enclosure.

The deck flooring should be made watertight. In some designs a watertight under-celling is provided.

Where material is to be removed from or taken into the building through the shed enclosure, the necessary openings should be kept closed when not in use. During use watchmen should be provided for protection of the public.

Where required to provide adequate visibility, lights should be installed in the structure. Where local ordinances do not govern the installation of wiring and fixtures, the recommendations of the National Electrical Code should be followed.

Where protection is built along the curb

line and is exposed to highway traffic, red warning lights should be placed on the street side of the structure, so that they are visible to approaching traffic from a distance of at least 200 feet.

To prevent material from falling off the shed, the outside edge and the ends of the deck should have a substantial enclosure at least 42 inches high. It may be either vertical or inclined outward at an angle of approximately 45 degrees. The enclosure may be of closely laid planking or toeboards and wire mesh screening of not less than No. 16 U. S. gauge wire with openings not larger than 1½ inches.

Regardless of the type of construction, all members of the shed structure should be braced and connected to resist displacement of the members or distortion of the framework.

The installation of a sidewalk shed does not make it safe to drop material down the outside of the structure. This practice should be prohibited, regardless of sidewalk protection.

USE OF THE TRANSIT

FIG. 1

FIG. 2

FIG. 3

FIG. 4

FIG. 5

HOW TO USE A TRANSIT

HOW TO LAY OUT A BUILDING (Fig. 1): Using the plumb bob, suspended from the hook under the spindle, locate the station mark or corner of the lot or building to be laid out. Center the instrument directly over this point by shifting the legs of the tripod so that the plumb bob hangs directly over the station point. To bring plumb bob to this position, loosen leveling screws and shift instrument until the plumb bob points to center. Level up the instrument by tightening the leveling screws.

Street line in the illustration is XX. The corner of the proposed building is L, distance from the street line PL. Then a distance RT should be measured from the street, equal to PL, at a point determining the length of the proposed building. Now the line LT is parallel with the street. And LT represents the two front corners of the building.

To get the line at right angles to LT, leave the sights on the stake at T and turn the eyepiece end of the telescope to the left until the vernier has turned a right angle, or 90°. A sight along this new position will give the line LM, on which the necessary distance is measured off to determine the corner M. Now move level to T, and go through same operation to determine corner N.

To prove the correctness of the survey, check the distance MN, to see that it is the same as the distance LT.

WHEN A BUILDING IS NOT A RECTANGLE (Fig. 2): In such a case, proceed as previously explained. However, additional points must be arranged for, and in that respect small errors are likely to creep in. In all cases, first lay out a large rectangle, along the outside extremities of the proposed building. This is represented by ABCD. These points established, the remaining portion of the layout will consist of small rectangles. Each of these can be laid out and proved separately. In the illustration (Fig. 2) these other rectangles are represented by EFGD, HJJC, KLMA and NOPQ.

ESTABLISHING LEVELS WITH A TRANSIT: Set up the instrument where points may be seen through the telescope. Level up the transit and take a reading where cross-hair cuts on the measuring rod. The rod is then moved to the second point to be established.

Then rod is raised or lowered until the original reading is located. The bottom of the rod is then on the same level with the original point.

MEASURING DIFFERENCE IN ELEVATION (Figs. 3 and 4): If the instrument has been properly leveled and is not out of adjustment, the line of sight set up by the telescope when locked in the level position is horizontal in any direction. To obtain the difference in elevation between two points, such as points A and B, Fig. 3, set up and level the instrument at an intermediate point, adjusting the tripod to any convenient height. Sight on a rod held over point A, note the reading where the horizontal cross-hair of the telescope cuts the graduation on the rod. Then, with the rod held over point B, rotate the telescope in a horizontal plane, again sight on the rod and note where the horizontal cross-hair cuts the graduation on the rod. The difference between the reading at A (6 ft.) and the reading at B (6 1/2 ft.) will give the difference in elevation between the two points. Point B is 1/2 ft. lower than point A. In making these readings, the telescope must be carefully focused on the rod or other object on which it is sighted.

When, for any reason such as irregularity of the ground or a large difference in elevation, the two points whose difference in elevation is to be determined cannot be sighted from a single point, "intermediate points" must be used, as shown in Fig. 4.

ESTABLISHING POINTS ON A LINE (Fig. 5): The transit may be used to establish points on a line as when a number of stakes in line—but at different heights—are to be located. Swing the two locking levers out of the way and loosen the vertical-motion clamp screw so that the telescope is free to rotate in the vertical plane. Level the instrument and center it accurately by means of the plumb bob and shifting center over the first point. Then release the two locking levers and the vertical circle clamp screw and sight the telescope on the most distant visible known point of the line. Lock the horizontal-motion clamp screw to prevent the telescope from moving out of the vertical plane in which the stakes are to be set, and place the vertical cross-hair exactly on the point with the tangent screw. Then, by rotating the telescope in the vertical plane, the exact location of any number of stakes on that line may be instantly determined, Fig. 5.

"My Berger Convertible paid for itself on this one job alone!"

says F. E. Fitzpatrick,
Building Contractor, Westwood, N. J.

"When I signed the contract to build this house, I had my fingers crossed. The specifications gave me no leeway—grades had to be on the button. So I decided to take out "job insurance" by getting a transit level I could trust—a Berger Convertible. So far, I've used it for leveling foundations, setting forms, locating buried survey stakes, setting the first course of siding and establishing some tricky grades. Before this job was finished, my Berger Convertible paid for itself."

That's because the Berger Convertible is built for builders. The new, ultra-sharp, 22-power, 10½" internal focusing telescope gives you a crisp, clear, right side up image over long sights as well as at distances as close as three feet. Rugged brass and bronze construction—dust protected leveling, clamp and tangent screws—it takes the bumps in the field and stays on the job without time lost for repair.

Why the new Berger Convertible with 3-ft. short focus is the best buy... *Compare*

TELESCOPE:	Short focus 3 feet; bronze; erect image; power 22 diameters; diameter of objective 35 mm.
OPTICS:	Coated—brilliant, clear image
FOOT PLATE:	Forged brass; trivet integral
YOKE FRAME:	Cast bronze
HORIZONTAL CIRCLE:	Forged brass, with double vernier reading to five minutes
VERTICAL ARC:	With double vernier reading to five minutes
LEVELING BASE:	Four screws; nickel silver leveling screws with cold and heat-resistant heads
SPINDLE:	Forged steel
SHIFTING PIECE:	For setting over a point
TANGENT PIECE:	Brass
TELESCOPE CLAMP:	Brass
POSITIVE LOCKING MECHANISM:	Converts instrument from transit to level with ease and speed and stays in adjustment at all positions
PLATE LEVEL:	In addition to telescope vial
CASE:	Mahogany transit case
STRAP:	Padded leather handle

Quick delivery—thanks to enlarged capacity.

Price \$219*, complete with mahogany transit case, tripod, plumb bob, sun shade and instruction manual.

Write for literature on the Berger Convertible, our 12" Dumpy Level, Service Transit-Level and Duplex Level. And ask about our Engineers' Transits and Levels.

You can tell a
DISSTON

by the
way it
cuts

When you use your Disston, note how easily it cuts through the wood. Its clean, sharp bite is due to the bevel filed teeth, the double taper ground blade perfectly tempered to hold its fine edge. Disston is "the saw carpenters use" because carpenters know there's so much extra satisfaction in owning and using fine tools. Disston makes fine tools. Your choice of four quality saws—D-23, D-8, D-7, D-95—in a variety of points and lengths.

*At better hardware and
building supply dealers . . . everywhere!*

STANLEY

Electric Tools

NEW!

H31 **\$84⁹⁵**
ONLY

Heavy duty belt sander does more . . . costs less

**It's new! It's heavy duty! It's Stanley!
And the H31 does more —**

- Because** it sands faster than other belt sanders.
- Because** the ball bearing motor runs cool and stays cool.
- Because** the drive belt delivers full power to the sanding belt.
- Because** it doesn't need constant lubrication.
- Because** it is heavy duty and has a long working life.
- Because** it has a low noise level in use.

the H31 costs less —
less than any comparable heavy duty belt sander sold today.

H331 Belt Sander Kit—\$96.95

Here's the complete kit in convenient metal carrying case . . . sander and three belts — one coarse, one medium and one fine.

See Stanley sanders, builders saws and other professional quality electric tools at the Stanley Electric Tool distributor near you. For illustrated 1957 catalog, write Stanley Electric Tools, Division of The Stanley Works, 104 Myrtle St., New Britain, Conn.

AMF DE WALT OUT-CUTS HAND SAWS ALL WAYS!

See your local Franchised Dealer for the proof!

CUTS FASTER—An AMF DeWalt® Power Saw *gang-cuts* studs, headers, and braces—as many as seven 2 x 4's at one pass. Gives straight-line materials handling... sets up for mass-production cutting on the job site. Powerful direct-drive motor handles *all* cuts with *ease*. One operator keeps a *dozen* or *more* carpenters busy nailing.

CUTS STRAIGHTER, MORE ACCURATELY—DeWalt automatically gives perfect accuracy every time—allows repeated cuts from the same marking. Easy-to-read scales and quick-set adjustments eliminate need for special guides and other devices—provide machine-tool accuracy on every cut.

CUTS SAFER—Never any danger of a dropped saw with a DeWalt. Blade and motor are always securely and safely positioned on DeWalt's mechanical arm. All work travels straight on level table. Exclusive DeWalt features like Safety Key Switch, Power Brake, and Spir'Ator Safety Return increase safety still further. Statistics prove the original DeWalt design the safest of all.

CUTS EASIER, PRODUCES MORE—There's no weight to hold

with a DeWalt, no need to guide or fight the saw. Operator simply pulls saw across work. All controls are top-side for fast, easy set-ups. Operators everywhere *prefer* an AMF DeWalt.

CUTS LONGER, WITHOUT MAINTENANCE—Powerful DeWalt direct-drive motors are sealed for life—require no lubrication or maintenance. No "time-out" as with other power tools. Heavy-duty precision construction *keeps* DeWalt cutting, making money for you.

MAKES ANY TYPE OF CUT—A DeWalt gives you a *complete planing mill on the job*. Does everything from framing to built-ins and other extras that help sell houses... mean extra profits for you. Use it outside or inside—carries easily through doorways, sets up anywhere you need it.

PUT THESE ADVANTAGES TO WORK FOR YOU! Model GW just \$395 on Easi-Payment Plan. See a demonstration at your local DeWalt Franchised Dealer. **FREE BOOKLET—JOB-TESTED METHODS FOR CUTTING CUTTING COST.** Valuable new operator's book—Easy Ways to Expert Woodworking—just \$3.95. *Send the coupon now.*

Finish Floors Fast and Profitably with HOLT machines

Compare Holt floor finishing machines with any other make for speed and ease of handling, long life, low maintenance, and price.

Holt Master Professional Sanders—8" and 12". If you've ever been caught with your sander down, you'll appreciate Holt's patented demountable drum cushion. When a nail rips the cushion, or other damage occurs, you just loosen one nut and slip off old cushion, slip on new—and you're back sanding, in a matter of minutes. Only Holt offers you this profit-protecting demountable cushion. You also get sure-grip paper

clamps; self-adjusting, double V belts; no chatter, no vibration, no ripples.

To remove cushion, loosen this nut. Slip off old, slip on new cushion.

Holt Rotary Edgers sand floor edges, stairs, corners, closets quickly, smoothly. Full visibility, plus two-hand front and back controls permit fast starts and stops, improve control on close work.

Holt Whirlwind Spinners sand, grind, plane, bevel glass, wire brush. Extremely handy for odd-job finishing.

Holt Hand Scraper. Wonderful for removing old paint and varnish. Molded to fit hand. Hammer head for driving unset nails.

Holtomatic All Purpose Floor Machines put customer-pleasing finish on floors. Built for fast, heavy work. 8 quick-change attachments enable you to polish, wax, scrub, steel wool, etc. Adjustable stowaway handles, stay-put wheels, safety switch hand-grip, static shock eliminator, non-marking rubber cable and bumper, motor grease sealed for life. 16, 20 and 24" brush spread. Other models 13" to 24". All with 2-year guarantee.

For full details, fill in coupon and mail now.

of twelve models
to fit your
requirements!

MODEL 360-57-90 — Half-yard; 360° continuous swing. New 90 GPM hydraulic system with triple tandem pump and split valve bank. For truck or carrier mounting.

There's no need to compromise—on cost, on capacity, on job versatility—when you look to HOPTO for your equipment needs. You pick truck-mounted models like the half-yard, full-swing Model 360 or the Model 200 DTM which handles up to 30" buckets . . . available in 24 or 36 GPM or the extra heavy-duty new 72 GPM hydraulic system with triple tandem pump and split valve bank! All weather, good visibility cab is available as optional equipment. To use power you already have, there are models CTM or RTM for crawler or wheel tractor mounting, either self-powered or PTO trailer types. Or, if a completely integrated self-propelled unit fits your picture best, select the Model 185 SPR rubber-tired HOPTO or the Model 190 SPC crawler unit. All twelve models give you HOPTO's feather-touch full-hydraulic operation with a wide selection of backhoe or shovel buckets, log grapples, magnets or crane equipment.

Discover how you can cut equipment costs—right now and over the long pull—with one of these work-hungry, heavy-duty HOPTOs. Get the facts on the money-saving HOPTO that's built for you!

You Can't Beat a **JOHN DEERE** for Holding Costs Down

"Good work" says John Deere dealer Frank S. Oyer (left) of the job Wm. Perry, East Stroudsburg, Pennsylvania, is doing with his John Deere Crawler Tractor and Bulldozer.

Doing the job efficiently . . . on time . . . has been a John Deere tradition for nearly 120 years.

But the big feature of modern John Deere mobile work units that always brings a smile of satisfaction to the owner, is the real, measurable dollars-and-cents saving he makes in initial cost, operating cost, and maintenance.

Mr. Wm. Perry, above, for instance, is well pleased with the way the John Deere handles his light construction work and topsoil business. But he uses the word "amazed" when he talks about its fuel economy. He owns a John Deere No. 963 Trailer with hydraulic brakes for transporting the unit, and is considering the purchase of a second John Deere tractor outfit.

The John Deere "420" Crawler with loader (left) is owned by Arthur Depue, also of East Stroudsburg. This combination is used to break shale loose from its natural formation to be used for roadbed fill. It's a severe test for any outfit, but both tractor and loader are giving excellent service on this rugged work. George Brands, the operator, says he never worked with any other tractor that has the fuel economy of the John Deere. He states that he uses only 9 gallons of gas in 10 hours of continuous maximum load operation!

Your John Deere dealer will be glad to give you more information on John Deere mobile power—crawler or wheel-type. You'll find his name in your classified directory.

New Back-Hoes and Loaders for 1957 ...make More Profits for You!

Here's good news for back-hoe and loader users. Davis opens a whole new era of profits. *The New 210 Davis Back-hoe* has three interchangeable mounting points so you can switch digging positions from center to side for flush digging alongside buildings, fences, etc. . . . and an engineering achievement desired by all — but accomplished only by Davis — an exclusive *hydraulic rotary boom swing cylinder* that gives smooth, continuous **200° cushioned operating arc** without ever changing a pin. Both the new 210 and the popular 185 have 7,000 pounds of breakaway power and an adjustable seat with extended foot rests.

Both models are now available as low-cost, *truck-mounted units* for any one-ton or larger flat-bed truck — self-powered, completely detachable, or attached in matter of minutes, and designed to fold into a compact package for easy transporting with everything being accomplished hydraulically. *The Davis Loader*, already the possessor of more "firsts" than any other make, has also been improved for even better workability. For better profits in 1957 . . . for better equipment in earth moving and material handling, see **DAVIS**, America's premium equipment that sells for competitive prices.

Available for Most Popular Tractors

Davis Products are sold and serviced anywhere in the United States.

STANLEY

Electric Tools

H36
ONLY **\$49⁹⁵**

Heavy duty orbital sander does more . . . costs less

**It's new! It's heavy duty! It's Stanley!
And the H36 does more —**

- Because** it sands faster than other orbital sanders.
- Because** the ball bearing motor runs cool and stays cool.
- Because** the pad is wide and absolutely flat.
- Because** full power is delivered to the pad.
- Because** it is perfect for flush sanding.

the H36 costs less —
less than any comparable heavy duty orbital sander sold today.

H336 Orbital Sander Kit—\$58.95

Here's the complete kit in convenient metal carrying case . . . sander and abrasive paper — 2 sheets each of coarse, medium and fine.

See Stanley sanders, builders saws and other professional quality electric tools at the Stanley Electric Tool distributor near you. For illustrated 1957 catalog, write Stanley Electric Tools, Division of The Stanley Works, 104 Myrtle St., New Britain, Conn.

AMERICA BUILDS BETTER AND LIVES BETTER WITH STANLEY

STANLEY

This famous trademark distinguishes over 20,000 quality products of The Stanley Works—hand and electric tools • drapery, industrial and builders hardware • door controls • aluminum windows • metal parts • coatings • steel and steel strapping—made in 24 Stanley plants in the United States, Canada, England and Germany

BUILDER'S BEST BUY...

"Power-Built to run smoother, last longer—
B&D Quality makes the difference!"

Fast-Action, Heavy-Duty **NO. 88 SANDER**

Eliminates hand sanding. Orbital action will not scratch or burn. Gives satin-smooth finishes on wood, plaster, even metal. Does an hour's hand sanding in five minutes. Ball bearings throughout. Movable knob handle. Quick-change paper clamp. Use with, across or against the grain. Complete with 4½" x 11" paper sheets. For lighter duty, see the B&D No. 44 Sander.

CUTS AT 45° ON
EITHER SIDE

Heavy- Duty

NO. 11 JIG SAW

Runs cool sawing 2 x 4's. Cuts intricate patterns in hardwoods, sheet steel, practically any building material. Full 1" stroke. Cuts to 2" at 90°... 1½" at 45°, either side. Armature and gear shaft mounted on ball bearings. Combines work of sabre saw, rip saw, crosscut saw, coping saw, hand saw, and key hole saw. For lighter work specify the B&D U-10 Jig Saw.

Always handy
B&D

3/8" UTILITY DRILL

Light and handy as a ¼" drill, but has extra power and capacity to do tougher-than-ordinary drilling jobs. Drives masonry bits to ½", twist drills to ¾", wood augers to ¾", hole saws to 1¼". Has ideal speed for B&D Screw Driving Attachment. Black & Decker has a complete range of types and sizes of drills (¼" to 1¼" capacity) for any building job.

BLACK & DECKER TOOLS!

New Heavy-Duty Saw Line! Outstanding Performers!

No. 63 Compact & Powerful

Rips through 2 x 4's, even at 45° angle. Cuts almost any building material with proper blade. Maximum cut at 90°, 2 $\frac{3}{8}$ " ; at 45°, 1 $\frac{1}{2}$ " (dressed 2"). Comes complete with B&D Kro-Bide Combination Blade.

No. 73 Rugged & Versatile

Ideal all-around builder's saw. Weighs only 13 $\frac{3}{4}$ lbs., yet with 25% more power, it can cut all day long. Has new double-guide line sight for accuracy. Cuts 2 $\frac{3}{16}$ " at 90°; 2" at 45°. Comes complete with Kro-Bide Combination Blade.

No. 83 Builder's Workhorse

Guts to do the job better, faster. Controlled airflow prevents overheating, blows sawdust away from eyes, line of cut. Cuts to 2 $\frac{13}{16}$ " at 90°; 2 $\frac{3}{8}$ " at 45°. Not shown: B&D No. 93. Cuts to 3 $\frac{1}{4}$ " at 90°; 2 $\frac{3}{4}$ " at 45°.

Four New Models . . .
*designed to outcut, outperform,
outlast other leading saws!*

NEW POWER! B&D-built motors specially designed for tough sawing jobs. Heat-treated helical gears assure smoother, quieter operation.

NEW VISIBILITY! New B&D picture-window design makes line-of-cut and cutting edge visible at all times. Powerful fan blows sawdust away from the job, away from your eyes.

NEW HANDLING EASE! Handle located closer to blade for better control in the wood. Quick adjustments for accurate depth and bevel adjustments.

SYMONS FORMS keep jobs moving on a time saving schedule

There are four principal reasons for the high acceptance of Symons Forms in the home and light construction market.

1. They can be quickly and easily set-up and stripped
2. Wood-Ply Forms have often lasted for more than 200 uses . . . frames of Mag-Ply Forms will last indefinitely
3. Forms can be used on any type of general construction . . . they are not confined to a single type of application
4. Symons engineers and field representatives can help you with any forming problem

← "CHAMP"—Inexpensive Wood-Ply Form

Here is an efficient and accurate form at a cost approximately 20% less than Symons Standard Panel Form. Designed primarily for light commercial and residential construction, it is equally satisfactory for high pours where strength and durability are "musts."

"MAG-PLY"—Hi-First Cost, Lo-Per-Use Cost →

Initial cost of this lightweight form is high. However, the many reuses possible makes the cost per use exceedingly low. Form averages only 3 pounds per square foot. Frame of extruded, rust-proof magnesium completely encases the plywood face. $2\frac{1}{2}$ " wide frame reduces loading and storage space.

Symons Forms can be rented with purchase option
Complete details on Symons Forms available upon request

ANNOUNCING

the first major improvement
in generator design in 25 years

REVOLUTIONARY VERTICAL DESIGN

*Spins
like
a top*

Entire weight of generator armature supported by the tubular frame. Engine and main bearing turn the armature—do not support it. Generator spins best on vertical axis—lasts longer.

OLD DESIGN

Generator weight exerts loads on engine shaft and bearings. Causes more wear than in Thor's vertical mounting.

New Thor generator powering a Thor 7 1/4" SpeedSaw hastens construction of the new Congress Street Expressway in Chicago.

ALL NEW THOR PORTABLE GENERATOR

Here's the brand new look in generator design—Thor's all-new 1500 watt portable engine-driven generator with vertical mounting.

This handy, compact power plant—available in AC and DC models—is the real answer to the builder or contractor who needs a rugged, portable power source. Check these features, then check your Thor distributor for a demonstration. • **Revolutionary design—vertical shaft**

engine • Light weight—95 lbs. Strong tubular framework protects unit, assures handling ease. • Heavy duty automatic rewind starter

—easily removable for repair. Off-on toggle-type switch. No shock danger • Drip-proof construction—keeps fuel and moisture from entering generator • No-creep—stays put while running, yet slides easily when moved. Thor Power Tool Co., Prudential Plaza, Chicago 1, Ill.

ANOTHER FIRST FROM THOR Universal Electric Motor-in-Head Concrete Vibrator

Model CV2-10 has 10-foot hose and switch • Model CV2-20 has 20-foot hose and switch. • Model CV2-210 has 10-foot hose on each end of switch. All models include 25-foot 3-conductor electric cable.

California contractor estimates:

**Time and labor costs cut 75%
with the Remington Stud Driver**

Out on the California coast, "Research House" has taken shape. It's an experimental house sponsored by Associated Architectural Publications and the latest tools have been used to build it—such as the Remington Stud Driver.

Contractor Bert Pickney says, "The Stud Driver cuts time and labor costs around 75% in anchoring beam supports, partition sills and furring to concrete. It took us only half a day to install the sills—a 2-day job with bolts. No pre-drilling

is necessary, and sills are set tight! I certainly recommend the Stud Driver to any contractor!"

YOU CAN SPEED ALL STUD FASTENINGS—light, medium and heavy-duty—with the Remington Stud Driver. It sets both $\frac{1}{4}$ " and $\frac{3}{8}$ " diameter studs in steel or concrete—up to 6 studs a minute either size. The tool is cartridge-powered, portable, ready to work *anywhere*. Forty styles and lengths of Remington Studs to choose from. Get full details by mailing coupon.

in a Chevy cab,
even the
air is better!

... more evidence that **Chevrolet Task-Force Trucks** are engineered better and built better for bigger savings!

These cab features give you extra comfort and safety behind the wheel, extra savings on truck maintenance. And they're proof that the most modern trucks for your money are Chevrolets!

The drawing "doodled" above shows how Chevy's High-Level ventilation provides a comfortable interior . . . and the numbers in the big picture point out other advantages equally as good to have around you when you haul! They include:

1 A roof that's specially built for safer, more comfortable hauling. Sturdy all-steel construction adds to safety; roof's unique inner reinforcement insulates the overhead against heat.

2 A gleaming, durable baked enamel outside finish. Here's the reason your Chevy's exterior will resist wear better, look like new longer! This handsome finish is available in a wide variety of colors.

3 A Nu-Flex seat that beats the bumps! Deep-comfort coil springs, metered air shock damping and 3-way adjustment let you take it easy on tough jobs!

4 A cab that's rustproofed to last! Doors and similar surfaces are rustproofed on the inside as well as on the outside by immersion.

5 Concealed Safety Steps for convenience. Inside each cab door, they give you firmer footing, make entering or leaving the cab easier and safer.

6 An undercoated floor, cowl side panels and fender flanges. Virtually all exposed surfaces on the underside of the cab are protected by an anti-rust coating.

7 A non-glare instrument panel to make driving safer! The textured finish on upper portion of Chevy's instrument panel reduces blinding sun reflections, minimizes eyestrain.

8 A reliable 2-speed electric windshield wiper* on each side. Powered by electricity, their action remains constant under all conditions.

Such advantages as these (we've shown only a few) combine to make *everything* better in a 1957 Chevrolet truck! You'll see for yourself when you visit your Chevrolet dealer's. . . . Chevrolet Division of General Motors, Detroit 2, Michigan.

*Standard in Series 5-6-7-8-9-10000 models.

... biggest sellers because they're the biggest savers!

CHEVROLET

CHEVROLET TASK-FORCE 57 TRUCKS

**Averaged 16²/₃ cubic yards an hour,
for 8 hours, with 24 location changes!**

ONE SHERMAN POWER DIGGER averaged 16²/₃ cubic yards of excavation an hour, for 8 hours, for a southwestern plumbing contractor. And this figure included time necessary for 24 location changes! The Sherman is used, primarily, for digging water, gas and electrical service lines for new homes.

Here are some reasons why this plumbing contractor gets more production from his Sherman: Fast operating cycle; high visibility around other utility lines; and top-notch bell-hole performance. And the local Ford Tractor dealer, having sold so many, is equipped and skilled to keep his machine on the job, working at peak output without costly downtime.

See your local Ford Tractor dealer **TODAY** for a demonstration or write for Bulletin No. 745

*Designed, Engineered and Manufactured jointly by Sherman Products, Inc., Royal Oak, Michigan, Wain-Roy Corporation, Hubbardston, Mass.

Case History
#139

Ridgewood, New Jersey, Contractor Reports:

"CONCRETE FORM ERECTION COSTS CUT 47% WITH ROCFORM SYSTEMS"

on the erection of 'Nike Sites' for the United States Government under the direction of the Corps of Engineers, U.S. Army we were able to reduce our erection costs by 47% less than they formerly were when we used a less advanced forming method that employed snaptys, 4' x 8' panels, and 2 x 4, 2 x 6 walers, strongbacks, etc. In addition to these savings, Rocform Systems eliminate 90% of standard bracing, strongbacking and all tie rod and hardware expense

These savings aid us materially in obtaining new construction jobs

Yours very truly,
CRETE CONCRETE CORPORATION

Exterior view of Rocform Systems as used in the construction of "Nike Sites" at Springvalley, New York. Note total absence of bracing timbers, strongbacking and wood walers.

UNRETOUCHED PHOTOGRAPH

Above ground portion of "Nike Site" after Rocform panels have been removed. Note smoothness of walls, tight fit of windows and total absence of snaptys.

10 Huge Reasons Why ROCFORM SYSTEMS Can Cut Your Forming Costs

- All metal walers
- All hardware is guaranteed and replaced without charge when necessary
- No snaptys
- Eliminates 90% of standard bracing and strongbacking
- Reduces erection costs as much as 50%
- Gives up to 300 pours and more before reconditioning is required
- Patented clamping device eliminates nailing
- Extreme versatility makes Rocforms easily adaptable to any concrete forming job
- Reusable, heavy-duty tie rods
- Extreme handling ease reduces labor costs to an absolute minimum

You cut costs with BOSTITCH stapling from underfloor to rooftop

H4 Hammer lays asphalt shingles 4 times faster than old method

Substantial cost savings are realized by the builder or roofer who installs asphalt shingles on new roofs with this efficient tool. One hand is free to position the shingle or maintain balance, other drives staple all the way home with one blow. Less staging required because H4 Hammer will reach more area from each working position. Staple legs spread inside wood, giving holding power with superiority proved in all kinds of weather.

Better tacking with T5 Tacker — rugged, dependable favorite with builders everywhere. 3 models, 3 wire sizes, 5 leg lengths!

Fasten it better and faster with

BOSTITCH[®]
STAPLERS AND STAPLES

Better light nailing with H2B Hammer. 3 models, 2 wire sizes, 3 leg lengths. H2BR with wide, flat staple is excellent for laying under-felt or building paper.

Westerly, Rhode Island

Time is money—Bostitch stapling saves lots of it!

Speed undercourse shingling with H2B Hammer's one-hand, one-blow operation. A foot longer reach!

No helper needed to hold accordion-type insulation when installed with H2B Hammer. 160 staple load!

Metal lath goes up faster, with less effort, when one hand positions lath on studs, other drives staple.

Tacking foil insulation to face of studs is fast, neat and secure with the H2B Hammer.

T5 Tacker installs cornerite quickly, easily and accurately. Tacks within 1/16" of corner.

Installing roll or batt insulation in attics and other tight places is easier and faster with T5 Tacker.

Saves precious hours, stops handling tacks when you fasten screening with T5. One hand does it.

Install flanged ceiling tile in half the time with T5-8 Tacker and 9/16" or 1/2" staples. No dents in tile!

Bostitch, 824 Mechanic St., Westerly, R. I.

ELECTRIC PLANTS

500 to 75,000 WATTS

AK SERIES—500, 750 and 1,500 watts, A.C. 115 and 230-volt models. One-cylinder air-cooled, 4-cycle gasoline engine. Available with recoil starter, carrying frame, 2-wheel dolly, plug-in receptacles.

AJ SERIES—(Shown with carrying frame) 1,000 and 2,500 watts A.C. 115 and 230-volt models. One-cylinder, air-cooled, 4-cycle gasoline engine. Standard portable has recoil starter, carrying frame, 4-plug-in receptacles.

AJ SERIES—(Shown dolly-mounted) Same general description as at left. Dolly-mounting is preferred where the electric plant is moved around frequently on the job. Available with recoil starter, 4 plug-in receptacles.

LK SERIES—2,000 watts A.C. 115 or 230 volts. One-cylinder, air-cooled, 4-cycle gasoline engine. Available with carrying frame, 2-wheel dolly, recoil starter and plug-in receptacles. Heavy-duty model.

CCK SERIES—3,500 and 5,000 watts A.C. 115 or 230 volts. Two-cylinder, air-cooled, 4-cycle gasoline engine. Available with carrying frame, 2-wheel dolly, 6 plug-in receptacles. Smooth-running; high capacity.

CW SERIES—7,500 and 10,000 watts. All standard voltages. Two-cylinder, air-cooled, 4-cycle gasoline engine. Electric starting. Model shown has weatherproof housing, and is mounted on high-speed trailer.

AIR-COOLED DIESEL PLANTS—3KW, single-cylinder; 5KW, two-cylinder (shown). All standard voltages. Full Diesel. Electric starting. Built for continuous heavy duty. Economical operation.

HOUSED WATER-COOLED MODELS—10, 15, 25 and 35KW, A.C. All standard voltages. Powered by heavy-duty industrial engines. Voltage regulated. Equipped with all necessary instruments and controls.

UNHOUSED WATER-COOLED MODELS—10, 15, 25, 35, 50 and 75KW, A.C. All standard voltages. Powered by 4, 6, and 8-cylinder heavy-duty industrial engines. Voltage regulated. Equipped with controls and instruments.

WORLD-WIDE PARTS AND SERVICE CENTERS

Throughout the U.S., Canada, and most of the world, Onan has set up special service centers with complete stocks of engine and generator parts . . . and trained service men. Onan service is another reason why Onan Plants serve you better . . . longer.

All Onan Portable Electric Plants are completely Onan-built. Specially-designed, longer-life, short-stroke, Onan 4-cycle engines are direct-connected to Onan all-climate generators in compact, rugged units. Pressure lubrication, Stellite-faced exhaust valves, solid Stellite valve-seat inserts, and extra-large bearings are a few of many Onan quality features. Onan water-cooled plants are powered by heavy-duty industrial engines. All Onan plants are factory-tested, ready to run.

Call your Onan distributor listed in the yellow section of your phone book or write for specifications.

E41

Ford's tandem models go modern in a big way. GVW up to 45,000 lb. GCW up to 65,000 lb. Up to 212 horsepower. (Model T-800 shown.)

Only Ford Gives You All These Modern Features

NEW Heavy Duty V-8 engines now have 4-barrel carburetion standard. Fresh-air intake with new thermostatic control optional on 302 and 332 V-8 engines. Dual exhausts also available.

NEW styleside pickup bodies, standard at no extra cost. America's biggest pickup bodies! Built wider with all-steel rugged box section corner reinforcements and recessed taillights.

NEW riding comfort! A completely new chassis suspension, roomy cabs with increased visibility, greatly improved handling ease.

NEW power advances! New higher horsepower, new freer breathing, new higher compression ratios, new Super-Filter air cleaner. New advancements from camshafts to carburetors.

NEW Driverized cabs—completely new—stronger, roomier, smarter! New wider full-wrap windshield. New inboard cab step, new Hi-Dri ventilation, new easy-to-read instrument panel!

NEW chassis strength! New frames, up to 13% stronger. New sturdier axles! New higher capacity, easier riding front and rear springs!

Modern with a purpose—that's the Ford truck story for '57. Deep-down modern design to give high-efficiency performance that costs you less!

And, thanks to volume production, Ford trucks cost you less right from the start. Look at the new Ford Tilt Cabs—in addition to being America's most advanced line of Tilt Cabs, they're the lowest-priced!*

Ford's tandem axle models are built from the ground up for extra-heavy-duty work. They're rated to carry as much as 6,000 pounds more payload than other leading tandems with comparable specifications. And for real savings in the Light Duty field, consider Ford's new pickups with Styleside body—standard at no extra cost.

New '57 Ford

Modern through and through

...to cost you less!

New Tilt Cab line offers six series ranging from 18,000-lb. GVW to 60,000-lb. GCW. Now, all the advantages of "cab forward" compactness, plus bigger payload capacity. (Model C-800 illustrated.)

For durability, there's new toughness everywhere—in stronger frames, in sturdier axles, in higher-capacity springs . . . more reason than ever why *Ford trucks last longer than any other leading make.*

One look tells you—here's something new, really new, in trucks. For the *full* story on what they can do for you, contact your Ford Dealer today! He'll be glad to discuss it with you.

*Based on a comparison of factory-suggested list prices

Don't call
a doctor...

Carpenters! You're working men, not medicine men. Use a folding rule that doesn't need a doctor just when you need a rule. When you buy your next one, be precise . . . say Stanley, it's a good rule.

NEW EXTENSION RULE

Take this new Stanley "100 PLUS" No. X226 6 ft. Extension Rule for example. No comparable rule lasts longer. It never gets "rule arthritis." Its joints have been permanently lubricated. They're young and springy. They can take it. The black, deep-cut markings with their protective plastic finish wear four times longer than those on thin-skinned rules that may suffer from "tired ink." Buy No. X226, and make a note of how long it measures up for you. You'll agree that Stanley Rules are your best buy.

GLIDE-O-MATIC

Have you seen the new Stanley Glide-O-Matic? This smooth acting tape rule locks blade in place, marks work with metal scribes and retracts automatically. The best in tape rules. 8, 10 and 12 ft. lengths. Try one yourself and see.

DO A SKILLED HAND-TROWEL JOB SIX TIMES AS FAST

with a Master Midget Power Trowel

Like all good power tools, the new 24" Master Midget Power Trowel gets more work done faster, with less effort . . . and does a better job.

You're an expert with it in 15 minutes, can make float, sweat, smooth, or hard trowel finishes . . . on slabs, sidewalks, basements, doorways, porches, driveways or small rooms . . . with the same sweep finish that takes years to learn to do by hand.

The concrete sets up better than by hand. The surface is denser, harder and more accurate. You can work with coarser, dryer mixes at the start and waste less time between float and finish. The Master really "pays for itself in no time."

Most important of all, one man with a MASTER can "beat the set-up" on a load of concrete on the hottest, windiest days.

A midwestern contractor reports, "This new trowel is a natural. We can take it everywhere, even on small jobs. It will lick our concrete finishing problems."

Every concrete finisher can do better work and make more money with the 24" Master Midget. You, too.

This is the year to cut your costs. Order a Master Midget today. See your local Master Distributor or write directly to Master Vibrator Company, Dayton.

NOW! The Revolutionary New HORTON UNDERBENCH CUT-OFF SAW

Embodying the remarkable Quick-Set Turntable design to give you—

- Full Multi-Angle Cut-Off Range
- Instant Positioning For Any Cut
- Rapid Changing To Regular Table-Type Rip Saw

The table turns! The blade tilts! The blade travels! . . . and every motion is made beneath the working surface. Nothing overhead to obstruct vision or interfere with safe operation.

THE HORTON UNIVERSAL UNDERBENCH SAW

Here is a saw without equal for speed, ruggedness, versatility, safety. For the first time, a professional engineer has put more profit, more craftsmanship into building—at an appreciably lower tool investment.

The Horton Universal Underbench Saw is based on the newly-invented "Quick-Set Turntable" design, resulting in amazing improvements in accuracy and drastic reductions in cutting time.

Now, one saw performs like a hand saw, portable saw and radial saw combined. Does virtually every cutting job in home construction . . . faster, better, easier. Switches from rip to cut-off in an incredible 4½ seconds. Rip guide adjusts precisely in 4 seconds. Blade tilts to desired angle in 3-3/10 seconds.

Makes perfect miters, compound cuts. Saws 4' x 8' plywood, asbestos siding, aluminum, etc. Movable through doorways to scene of work. Reduces tool idleness; laps off waste and inefficiency; stimulates craftsmanship. Net result: a tremendous increase in labor savings and building profits!

If you make your living with wood, you'll make a better living with a Horton Universal Underbench Saw. Get the complete Horton story today! See your tool dealer, or send now for Free Illustrated Brochure.

4-wheel drive supplies the extra traction to transport men, equipment, tools through mud and loose fill, in all kinds of weather. The Universal 'Jeep' carries up to 7 workers, up to half a ton of tools or supplies... pulls heavy trailer loads of materials.

How 4-Wheel-Drive 'Jeep' vehicles save you time and money

All-New Forward Control 'Jeep' FC-150 Truck. It's the first time a 4-wheel drive truck has so effectively combined so much cargo capacity (74" pickup box), with such exceptional maneuverability (81" wheelbase).

The 'Jeep' Utility Wagon serves your family and business needs. It's two vehicles in one—a passenger carrier and, with seats removed, a cargo vehicle for hauling... on or off the road.

Only 4-wheel drive 'Jeep' vehicles spread their cost over so many jobs. They transport men, tools and equipment; haul trailers; and supply mobile power for welders... compressors... trenchers... and other equipment.

'Jeep' vehicles travel at highway speeds in conventional 2-wheel drive. When your work calls for travel over unpaved roads, through mud, sand, or loose fill, the extra traction of their 4-wheel drive takes you where other vehicles can't go.

Operating economy, long life, low maintenance costs and high resale value make 'Jeep' vehicles your best investment. Your Willys dealer can show you why. See him today, or write for information.

How to Build Better Walls

It's easy . . . use Sure-Grip concrete accessories.

When you use Sure-Grip Snap-In form ties, your walls line up better, don't leak at tie points and are easier to point. They look better too, because there aren't any big, loose cone patches staring you in the eye.

Sure-Grip's patented Snap-In tie which has special flat pieces or clevises fastened to the rod does the job. These clevises keep the tie from turning and breaking the bond with the concrete. Result . . . no leaking, positive snapping and a lot of time saved. Try Sure-Grip Snap-In form ties on your next job and see how much better they are than other ties or twisted wire.

Flat clevises keep tie from turning and breaking bond with concrete. Tie always breaks at proper point.

Special coating on rod between clevises and spreaders prevents bonding to concrete. 1/2 turn snaps off rod.

Sure-Grip Anchors & Anchor Slot

. . . the surest and fastest way to fasten brick, stone, tile or terra cotta to concrete walls, columns and beams. Just nail the anchor slot to the forms. The patented double nailing feature supports the sides of the slot and keeps them from caving in when pouring. You don't have to grind anchors to make them fit. Sure-Grip anchor slot is made from rust resisting material; galvanized steel, Zinaloy, copper, etc., and is available in lengths from 6" to 10' either with or without the slot filler.

We also make a full line of stone, brick and furring anchors for every application.

FREE — Mail the coupon below for our 48 page catalog of concrete accessories and your nearest Sure-Grip dealer's name.

STOW ANNOUNCES NEW ROTO-TROWEL

"This does a smoother job of finishing, than any small size machine I've ever used."

That is what the contractor in the above photograph said about his STOW G-29 Roto-Trowel. This smooth trowelling is just one of the reasons why the G-29 is becoming so popular throughout the country for small jobs like basement floors, house floors, garage floors and sidewalks. Contractors find it easy to work with in small areas, since it is only 29 inches in diameter, and weighs only 70 lbs.

Within one-sixth of a second, the unique manual clutch shown above stops the trowel blades, leaves the engine running. This makes the machine safer to work with, and much easier to start since full throttle can be used if necessary.

Send in this coupon for more information on the G-24 and G-29 Roto-Trowels. We'll send you a bulletin with on-the-job pictures and specifications. Or, if you prefer, check the yellow section of your phone book under "CONCRETE VIBRATORS".

For complete information on Vibrators, Screeds, Roto-Trowels, Concrete Grinders, write for Stow Cat. 560.

NEW INLAND 700 SERIES

CONTEMP

TO SELL FOR \$9,000.....

ECONOMY LINE—MODEL 703 A

CHOOSE GARAGE OR CARPORT MODEL

—full basement, wood floor and crawl space, or slab model. 90 different elevations for variety in project building.

WIDE VARIETY OF EXTERIOR TRIM

—choose from brick, stone, horizontal siding, asbestos board and batten or double-course cedar shakes. Give each house an individual look.

END-TO-THE-STREET

or front to the street construction. Few houses can be attractively built with the end facing the street. Inland has designed special end elevation options to whip the problem of building on narrow or odd-shaped lots.

PRE-PLANNED COLORS

—select from a wide range of harmonizing colors, including modern pastels.

INDOOR-OUTDOOR LIVING

—attractive patio with many possible enclosure designs for privacy. Easy access from patio to either kitchen or bath.

SPACIOUS, OPEN PLANNING

—a house with 1144 square feet of living space. Glass wall and Modernfold doors for added spaciousness. 3 bedrooms, 1½ baths and separated dining room.

PORARY

.....\$ **16,000***

DELUXE LINE—MODEL 715 A-G

*Less lot, depending on local area costs.

SWEDISH-MODERN FIREPLACE

provides striking center of interest in living room—the luxury touch that makes a strong selling feature.

KITCHEN BUILT-INS

include Youngstown steel cabinets with birch doors, Tappan oven and countertop range, sink-dishwasher combination. Westinghouse washer-drier in bathroom alcove.

CONSTRUCTION MONEY IS AVAILABLE through the Inland Mortgage Corporation, if you qualify. Assistance in arranging permanent financing.

FREE ILLUSTRATED BOOKLET gives full details on the 700 series. Write on your letterhead for your copy now!

Prefabricated Home Manufacturers

This section comprises a comprehensive directory of companies engaged in the manufacturing of Prefabricated Homes. Every effort has been made to include all manufacturers who distribute through builders or other qualified dealers.

Information on each company has been compiled from the latest available at the time this issue went to press and any omission is unintentional. Every attempt has been made to standardize the data on each manufacturer giving only that information which is of interest to the builder, or prospective buyer, of prefabricated homes. Manufacturers are listed alphabetically by States to make it easier for the reader to find the plant in his locality. Those companies who have plants in

other States are also listed with a cross reference since in most cases the shipping radius given is from manufacturing plants or warehouses.

For further information and literature direct all inquiries to the contact given at the address of the main plant.

This symbol indicates the manufacturer is a member of the Prefabricated Home Manufacturers' Institute, an association whose purpose is to establish high quality standards for the industry. For general information on the subject of prefabrication write: Prefabricated Home Manufacturers' Institute, 908 20th St., N. W., Washington 6, D. C.

PERMABILIT[®]

THE BROOKFIELD—A spacious 3 bedroom model designed for casual modern living.

ADD A "TOUCH OF GOLD" TO YOUR OPERATION

THE CORAL GABLES—A lovely split-level design with 3 bedrooms, 2 baths.

Get a faster turn-over on your building dollar in '57

The new Permabilt homes are a beautiful buy for your customers anyway you look at it. These homes are built of top quality materials . . . professionally designed with a modern flair . . . and completely packaged for fast, on-site erection.

Don't miss this profit opportunity! If you are an established builder who believes in a quality product, if you operate in Michigan, Illinois, Wisconsin, Ohio or Indiana, WRITE TODAY on your letterhead to Manufactured Homes, Inc., 332 So. Kalamazoo Ave., Marshall, Michigan.

An intensive advertising effort in leading magazines and newspapers pre-sells your customers on PERMABILIT homes . . . helps reduce your sales costs, too!

DETAILS MAKE A BIG DIFFERENCE

ROOF TRUSSES—All Thyer homes with the exception of contemporary models have trussed roofs. The truss provides an even distribution of roof load over the entire roof area. Thus the load is carried only by the outside walls . . . and bearing partitions are eliminated.

EXTERIOR WALL FINISH—Cedar shakes and asphalt impregnated shingle backer applied over leatherback all purpose paper on a 1-inch nominal sheathing. This sturdy wall, insulated with reflective aluminum, provides a warm, tight home. Vertical siding is used on some models to create special design effects.

FLOOR SYSTEM—Floor framing is 2 x 8 on 16-inch centers. A double row of bridging providing additional strength; subfloor is nominal 1-inch sheathing; finish floor 3/4"-2 1/4 inch face select hardwood in all principal rooms with 1/2 inch plywood elsewhere.

FRAMING—Exterior walls and interior partitions are 2 x 4 on 16-inch center with double 2 x 4 top plate. To provide added rigidity for the frame, corner bracing is used in all outside corner panels.

INTERIOR WALL FINISH—1/2 inch gypsum board with invisible joints "welded" with tape and gypsum cement assure a wall that is virtually crack-proof and can be decorated with one of the modern wall treatments.

"Thyer fabricated units have been awarded Parents' Magazine Commendation Seal."

MAN TO MAN . . . Thyer details sell themselves

Sure it's the woman who buys . . . but it's the man in the family who puts his stamp of approval on construction details. He's the one who critically views the technical aspects of a new home and gives a silent nod or con.

Once you sell "Jones" on construction and what it means to his family, Mrs. Jones will take it from there. And, of course, when you're talking details you'll want Thyer construction in the homes you sell.

For further information on Thyer's unique construction details, mail the attached coupon today.

Want to build—and sell—

5 to 50 homes this year?

TEAM UP WITH HARNISCHFEGER

Enjoy big-tract benefits... make
more profit with less risk!

It takes *teamwork* to make more money in today's tight home building market—the kind of teamwork you see here, which brings specialists into action who can help you make more profit from every home you sell.

By teaming up with Harnischfeger, you enjoy all the big tract benefits and economies you need to compete with successful, larger builder organizations. Substantial benefits like professional pre-tested home designs . . . project

planning advice . . . liberal financing services . . . realistic cost analysis . . . advertising . . . complete promotional planning . . . sales counseling—all backed by Harnischfeger's 22 years' experience in the home building field.

So, if you're planning to build 5 to 50 (or more) homes this year, it will pay you well to get all the facts on the new Harnischfeger plan . . . see how it can help you take the risks *out* of home building . . . put the profits *in!*

Shown on the opposite page is the actual job site of a leading Midwest P & H project builder.

**You Have No Construction Money
Worries With Harnischfeger!**

Through Harnischfeger Homes Acceptance Corporation you get the industry's most liberal construction financing plan. It pays you up to 90% of the work done during the first, second, and third draw stages. As a result, your capital turns over faster, you sell more homes. Harnischfeger also helps you locate permanent financing, handles loan processing for you.

ACT NOW!

A few select dealerships are still available in Wisconsin, Indiana, Illinois, Ohio, Michigan, eastern Minnesota, Iowa, Missouri, northern Kentucky. Call, wire or write today!

Builder Edward Stoll and son, of Bridgeport, Conn., sold 55 of these homes in their first week. Mr. Stoll says:

"I'm proud to build
American Houses
they give the most
for the money"

PHOTOGRAPHY BY NATIONAL NEWS AND ILLUSTRATION SERVICE INC.

PLANNING QUALITY, as well as construction quality, shows in this utility room which can convert to a fourth bedroom or den. American Houses installs insulation where needed.

FINISHED BASEMENT RECREATION ROOM is another place where American Houses' generous windows pay off in sales appeal. Note basement half-bathroom.

A DRAMATIC FIRST IMPRESSION goes a long way toward selling the home. American Houses interiors show their quality in the way they lend themselves to eye-catching, sales-making decorative effects. Even the handsome wrought-iron railing is a part of the complete "package" supplied by American Houses, Inc.

Edward Stoll and his son agreed on American Houses because, as they said, "American Houses have the look and the quality of a more costly, conventionally-built home. As builders, we also make big savings by eliminating pilferage and wasted materials." American Houses gives you the value you need in these times of scarce mortgage money—and helps you build and sell more homes in less time.

For prompt information on American Houses, and an American Houses franchise, fill in the coupon.

Breakfasts

(Continued from page 27)

couples will need a vastly greater proportion of new dwellings.

More children

Cold statistics bring out the most spectacular phases of the U. S. population increase.

In the 35 years 1940-1975, the number of children below 14 will double: 33 to 66 million. And people 65 or over will more than double: 9 to almost 21 million.

Thus our population is growing by leaps and bounds at both extremes, and the still-ebbing tide of young adults will turn after 1957.

So once we get into the 1960's, the home-building industry will have a Herculean job cut out for it. It will have to supply many millions of homes of considerable spaciousness for families with, in the aggregate, a vastly increased number of children. And a vast number of specially designed homes suited to old couples. On that project it hasn't even begun.

Can it do the job of building no less than 2 million homes priced at people's pocketbooks? If not, we can be certain of this: by the time we get into the 1960's the most pressing job in the whole American picture will be the need to house more people, at American standards, than most of us can even grasp at present. And the pressure to get government into the picture to house vast numbers through subsidization in welfare-state fashion will be tremendous.

That brings with it all the inefficiencies and irksome controls inherent in bureaucratic management of social and economic problems. The private-enterprise home-building industry can avoid this disaster in only one way: by ceaseless progress in the methods of producing, distributing and financing homes. In other words, giving more value for the customer's money. That is the American solution. Toward that end, in full realization of the giant mass market that lies ahead, let us all set our minds.

Distribution Area: West Coast to east of Mississippi
No. Basic Plans: 150; modular components for any plan
Package Price: \$1,900 to \$9,500 f.o.b.
Sales Policy: Qualified builders and franchised dealers
Minimum Order: None

Financing: Mortgage assignment or cash
Description: Fully fabricated wall and partition panels; drywall lining applied; lath and plaster optional; insulation; doors, windows, trim installed; ceiling and roof panels; roofing and siding site applied.
Literature: Color brochure and price lists

► Must we boost our ad budget?

'YES'

(Continued from page 20)

spends \$400 for 10,000 brochures to hand out in his model. Likewise, he puts up \$400 for road signs and \$1,000 for point-of-sale materials such as displays, renderings, models, plat layouts, etc.

This leaves us \$9,450, or \$787.50 a month, or \$181.73 a week for advertising, merchandising, and promotion calculated to bring viewers out to see his model so the salesman and point-of-sale material can work on them. You cannot buy much beyond classified ad space for \$181 a week. And your sales are not going to be what they would be (assuming your product and its price are competitive) if you loosened up the purse strings.

Now, let's take a look at our theoretical builder after he has read this article and is convinced of the short-sighted error of his ways.

Allocating 2 per cent of his gross for merchandising program will give him \$30,000 to play with. First, let's take \$5,000 and retain a good advertising agency to handle the whole program, including publicity. Instead of a cheaper \$400 folder, let's spend \$1,500 for our brochure and get one in four colors with professional-appearing artwork—one that will not suffer by comparison with the one the local Cadillac dealer hands out.

For road signs, let's spend \$2,000 instead of \$400 and get the very best and enough of them to blanket every pole, fence, and vacant lot for five miles around the subdivision. And why not budget \$2,000 instead of \$1,000 for point-of-sale material, including effects and other impressive sales gimmicks.

This leaves over \$19,000, or \$1,582 a month, or \$365 a week for advertising. Now we have something to work with.

In most markets for this amount you could afford co-sponsorship of a weekly local or filmed TV show plus a weekly quarter-page in one or two newspapers. Enough would be left over for a double-page spread or a radio or TV saturation announcement campaign when a new subdivision opens.

To be good merchandisers builders must play down this conserva-

tive-businessman attitude. We have a product to sell; we have to get out and sell it—not merely by listing the model address in the classified ad columns.

It is this sort of aggressive merchandising that the building industry needs. New ideas, new media, more intelligent people and, most of all, more money are all that is needed for the sales picture of this industry to rival that of many others.

'NO'

(Continued from page 21)

For example:

- Good plats that have houses facing each other across lawns and malls, with garages facing traffic and parking areas.
- Play yards for younger children, completely enclosed by back and side yards, which could be supervised by mother from her kitchen window. Such play areas, for every half-dozen houses, would cost but a few dollars per house.
- How about a community club house, tennis courts, putting greens, etc.? Sure, they take land away from houses, but they bring sales. How about a swimming pool for the 100 families for whom Mr. Rose's mythical builder is going to build this year? It would cost only about \$100 per house.

By working with church and school people, the builder can assure his buyers of the proper moral and cultural facilities before the sale and before the lack of same becomes a problem.

Some of the items mentioned obviously are out of the builder's reach without pricing his homes out of competitive range. Others cost little or nothing directly. In many cases, he would be well advised to join with 2 or 3 other builders in a merger of land development and community-facility responsibilities, with each one remaining independent in the building and sales fields.

I am convinced that home builders who offer planned communities that provide most or all of the advantages I have outlined would find themselves worrying not about sales and financing but about production.

The lesson we must learn from

competing industries, which may have passed us by, is not that our merchandising is old-hat, but that our product has not improved with the times.

Home design, construction techniques, mass production of building materials, prefabrication, and mechanical equipment for the home and for production have advanced in great strides in the last 15 years. So, I am convinced, have our advertising and merchandising methods.

Our conception that a good home at a reasonably good price fills the bill belongs in the middle ages. It takes much more. The surroundings, the immediate neighborhood, and the community as a whole make up the package for which the home buyer shops and compares. These can be improved. The power to improve them lies primarily with the builder.

No matter how well-planned and attractive your subdivision and your houses may be, you must advertise to tell the public what you have and where it is. For 100 homes, an outlay of \$10,000 should be ample for a continuing, well-thought-out *institutional* campaign, stressing your achievements in providing planned communities.

And a modest splash once or twice a year when a new model or sub is opened would be adequate. And a well-rounded public relations program, including the kind of post-sale customer treatment which cuts down dissatisfaction and complaints, would sufficiently augment the over-all effort.

Word-of-mouth praise from satisfied buyers (and lookers) plus the reaction to the institutional theme of your regular ads and whatever worthwhile public-relations activities which come your way will result in a reputation that brings resold customers to your model.

To anyone who has taken part in more than one real estate transaction, it is apparent that sales resistance is most often motivated by fear. My program is based upon creating a home-builder reputation that tends to overcome this fear which some families feel when about to part with their life savings or tie themselves to a 25-year debt.

This kind of program, emphasizing over-all planning, will sell more homes than any number of saturation advertising campaigns.

BOOKS

for better planning . .

NEW REVIEWS

TIMBER DESIGN AND CONSTRUCTION HANDBOOK. Prepared by Timber Engineering Company. F. W. Dodge Corp. (New York) 1956. 622 pp, illus. \$12.75.

This new work offers all the essential information needed to develop better, more economical wood structures. Included is results of the latest research timber scientists.

It should prove a valuable working tool for builders, architects, and others concerned with wood as a structural material. The book is divided into three sections. The first covers fundamental structures and characteristics of wood. The second section on design explores and analyzes preliminary considerations, design procedure and details, fabrication and erection. Section three covers design standards and provides design and engineering specifications and tabular data.

The Timber Engineering Company, engineering and research affiliate of the National Lumber Manufacturers Association, is qualified to prepare this handbook, by its long experience as a non-profit service organization.

STRUCTURES. Pier Luigi Nervi. Translated by Giuseppina and Mario Salvadori. F. W. Dodge Corp. (New York) 1956. 117 pp, illus. \$6.95.

The author of this work is a master builder who conceives, designs, and engineers his own structures.

One of Nervi's many accomplishments is the invention of *Ferrocemento*, a reinforced concrete of an entirely new concept, which combines concrete's freedom of form with steel's qualities of strength. He has put this material to use in building large and beautiful thin-shell concrete structures.

The book, with many photographs, shows over 30 years of the author's activity. In addition it conveys practical information for builders. Several chapters offer thorough analyses of such topics as structural characteristics of reinforced concrete, imperfect elastic behavior of concrete, *Ferrocemento*, structural prefabrication, and others.

► GENERAL REFERENCE

Simplified Carpentry Estimating

by J. Douglas Wilson and C. M. Rogers

Clear explanations of how to take off from a set of blueprints and specifications a bill of materials for the construction of a frame house. Arithmetical methods of accurately estimating and cross-checking against mistakes. Suitable for use of small contractors and lumber dealers. Widely adopted as a textbook for students. 5th edition. Pocket size. 304 pages, 123 illus. 60 tables. (#105) \$3.75

Time-Saver Standards

by the Editors of *Architectural Record*

Of great utility to the architect and builder and many other technicians. A standard reference work kept up-to-date since its inception. Large page format, 8½ x 11, shows charts and illustrations in high legibility, along with text descriptive of every detail of building practice from site planning and functional elements to the latch on the door for all types of structures. May be inspected on our approval plan. 884 pages. (#101) \$12.50

Richey's Reference Handbook

by H. G. Richey

A working reference for builders, contractors, architects, building materials dealers, carpenters, and building construction foremen. Conveniently arranged for easy use. Among its complete coverage of topics are waterproofing, building stones, fireproofing, paperhanging, plumbing, heating and ventilation, electric wiring, hydraulics. Has glossary of engineering, architectural, and trade terms. 1,640 pages. 544 illus. (#103) \$9.95

Legal Cases for Contractors, Architects and Engineers

by I. Vernon Werbin

Points out rights and liabilities and the more common trouble spots in construction, engineering, and architectural contracts and in general how to protect your interests when entering into a contract and how to avoid legal difficulties. 5½ x 8. 453 pages. 1956. (#107) \$6.00

Contractor's Material List and Labor Cost Estimate Forms for Home Building

A 15-sheet set of take-off forms for complete listing of material and labor costs involved in the construction of a house. (#108) \$1.00

The Business Law of Real Estate

by Gerald O. and Lillian G. Dykstra

For those engaged in any business or

profession involving realty, including builders, homeowners, storekeepers, this is the ideal book for answering innumerable questions. 852 pages. 1956. (#119) \$10.00

Specifications Kit for Home Building

Simplified specification forms, which when properly filled out describe all materials, construction details, and quality of workmanship to be used in the erection of a home. Set of 14 different sheets. (#109) \$5¢

Handbook of Building Terms and Definitions

by Herbert R. Waugh and Nelson L. Burbank

A dictionary which includes also architectural symbols, plumbing symbols, pipe fittings, geometric figures, and an illustration of the 100 principal parts of a house. 421 pages. 110 illus. (#110) \$5.00

Building Estimators' Reference Book

by Frank R. Walker

Latest estimating and cost data on everything that goes into a house, apartment, or institutional, commercial, or industrial project. Fully indexed. 12th ed. 1,774 pages. Vest-pocket size Estimator, 220 pages, free with Reference Book. (#104) \$12.00

Hogg's Wage Tables for Building Contractors

A complete set of wage tables worked out by quarter hours for any length of time from 1 to 60¾ hours, and every wage rate from 75¢, increasing 2½¢ per hour to \$5.00 per hour. It also includes all odd rates in cents and quarter cents. Pocket size, flexible, loose-leaf bound. (#102) \$6.00

► CARPENTRY

House Construction Details

by Nelson L. Burbank

Drawings and photographs explain each detail step by step from foundation to finish. Tells how to alter stock plans and remodel as well as build new construction. 80 additional full-page drawings of house details. Conforms to national building regulations. 8½ x 11. 395 pages. 2,100 illus. (#112) \$4.95

House Carpentry and Joinery

by Nelson L. Burbank

5th edition. Latest accepted building methods for all phases of carpentry in and around the house. Contains clear details on house plans, excavations, foundations, roofing, stairs, hardware, built-in equipment, finishing, etc. Used by many schools as a textbook. 8½ x 11. 225 pages. (#111) \$4.75

buying . . . building . . . selling

▶ ACOUSTICS

Acoustic Principles— Practical Application

by D. J. W. Cullum

A key to acoustic problems. Important constructional features are selected for analysis, with common acoustical faults pointed out as well as those features which have given satisfaction. Treats noise reduction, isolation, amplification, reverberation, vibration, insulation; floors, ceilings, walls, partitions, doors, windows; machinery isolation. 200 p. Edition of 1955. (#139) **Only \$2.00**

▶ TEMPERATURE CONTROL

Home Air Conditioning

by G. J. Stout

A 1956 book recommended to professional builders, conditioning dealers, owners, and technicians. A readable and instructive coverage of the subject. Chapters such as Planning for Air Conditioning in New Homes, Installing in Homes Already Built, Combining Heating and Cooling Systems, Humidity and Condensation Problems, Central Air Conditioning Systems, Secondary Benefits From Air Conditioning. 6 x 9, 276 pages. (#134) **\$5.95**

Heating, Cooling, and Air Conditioning Handbook

by H. P. Manly

Working and reference manual for selection, installation, and maintenance of heating, cooling, or air-conditioning equipment in buildings of all but the largest sizes. Includes 64 tables and charts with 6 pages of various regional conditions. 4 3/4 x 7 1/4. 758 pages. 1947 ed. (#136) **\$4.00**

Steam and Hot Water Fitting

by W. T. Walters and
B. E. Ferrell, Jr.

Selection, design, and installation of steam and hot water systems. Chapters include Tools, Pipe and Fittings, Boilers, Steam Systems, Hot Water Systems, Radiant Heating. 5 1/2 x 8 1/4. 239 pages. 211 illus. (#138) **\$3.50**

▶ COMMERCIAL STRUCTURES

Motels

by Geoffrey Baker and
Bruno Funaro

An up-to-date book for everyone concerned with the fast-growing motel field. Hundreds of photos and plans credited to 112 architects, designers, and other sources make this a stimulating book. Such factors as lighting, heating, air conditioning, sound-proofing, site planning, parking, pools and play areas, furnishings, laundries, restaurants, also are included. 9 x 12. 264 pages. 1955. (#148) **\$13.50**

▶ LANDSCAPING

A Guide To Home Landscaping

by Donald J. Bushey

Guide to landscaping property for maximum use and enjoyment, including site and house location, drainage, drives and sidewalks, lawns and other plantings. 288 p. 6 x 9. Illustrated. 1956. (#151) **\$4.95**

▶ ARCHITECTURAL

Climate and Architecture

by Jeffrey Ellis Aronin

All the elements of climate are described in full, acquainting the reader with the limitations that are imposed on buildings by climate—sun, temperature, wind, precipitation, lightning, humidity—and their control through orientation and planning. A well-planned and beautifully printed book including 55 tables and 300 illustrations presenting problems and solutions clearly and logically. 9 x 12. 304. pages. (#144) **\$12.50**

An American Architecture

by Frank Lloyd Wright;
edited by Edgar Kaufman

A beautiful volume that will be highly prized by all who enjoy the works of this famous architect, teacher, and personality. 9 1/4 x 12 1/4. 269 pages. 250 illus. (#145) **\$10.00**

▶ DRAWING

Architectural Drawing for the Building Trades

by Kenney and McGrail

Practical drawing instruction for builders, contractors, draftsmen, and students, demonstrated by drawings, explanations, and instructions. 8 3/4 x 12. 128 pages. (#141) **\$4.80**

▶ BLUEPRINT READING

Blueprint Reading for the Building Trades

by J. E. Kenney

A basic book that explains what blueprints are, how they are drawn, how used. Drawings designed for use in building technology courses, with question-and-answer approach. 9 x 12. 160 pages. 2nd Edition, 1955. (#140) **\$4.75**

Blueprint Reading for Home Builders

by J. Ralph Dalzell

How to visualize and read blueprints in a way helpful to builders and their mechanics, and to realtors, homeowners, and all concerned with the erection, improvement, and repair of buildings. Instructively progresses through the reading of three complete sets of working drawings. 9 x 12. 138 pages. 1955. (#142) **\$5.50**

▶ HOUSE PLANS

American Builder Blueprint Houses

Blueprints of working drawings of "Blueprint Houses" as illustrated and described in *American Builder* magazine from month to month. (#147)

Shipped by first-class mail

Per set of 1 house **\$15.00**

2 sets **25.00**

Each additional set
over 2 **5.00**

Homes for Living— House Plans

by Samuel Paul

Architect's sketches and detailed floor plans of over 75 ranch, contemporary, Cape Cod, split-level, and colonial styles. Houses are grouped into 3 price categories according to the family income. Plans and specifications for these houses are available from the architect. 8 1/2 x 11. (#143) **\$3.95**

Western Ranch Houses

Sunset

Pictorial descriptions and ground floor and site drawings. (#146) **\$3.00**

Employees may receive coffee break compensation

By **JOHN F. McCARTHY**
Attorney-at-law

You may be required to compensate your employees for coffee breaks. This interesting observation arises from a recent decision of the Federal Court of Appeals for the Tenth Circuit in the case of *Mitchell v. Greinetz*, (1956) 235 F 2d. 621.

This action was brought under the Fair Labor Standards Act which fixes minimum wages for workers who produce goods that go into interstate commerce. The employer required his employees to take fifteen minute rest periods during the morning and afternoon working hours. This litigation arose because if the required rest periods constituted compensable time, the wages of the employees did not equal the minimum amount required by the Act, since those wages did not include any payment for the rest periods.

The employer was engaged in the business of manufacturing neckties, mufflers and stoles. These were produced by hand operated looms and the work was intricate and fatiguing. The employees were paid on a piece work basis. There were two fifteen minute rest periods, one in mid-morning and one in mid-afternoon, so that the employees might relax and have refreshments. At first the breaks were optional, but later they became compulsory. They were not considered part of the working day. New employees were informed of the rest periods and were told they would not receive any compensation for that time.

The Court decided that the two

breaks were part of the time of employment and therefore were compensable. It concluded that the employer was not paying the minimum wages required by the Fair Labor Standards Act. The Court observed that it was not unaware of the fact that the rest periods were beneficial to the employees since they were paid on a piece work basis. However, the Court emphasized the obvious benefits to the employer arising from these breaks. The Court said at p. 625:

"We may well take judicial knowledge of the fact, as pointed out in the interpretative bulletin, that coffee breaks or short rest periods are rapidly becoming an accepted part of employment generally. While no doubt they are beneficial to the employees, they are equally beneficial to the employer in that they promote more efficiency and result in greater output, and that this increased production is one of the primary factors, if not the prime factor, which leads the employer to institute such break periods. Significant of this trend is the fact that a number of states by statute or orders provide for short rest periods and provide that such periods shall be compensated as work time."

"The benefits to the employer are so substantial that the rest periods are now mandatory and the employees may not use them if they desire to try to increase their earnings. Under all the facts and circumstances of the case, we conclude that the time in question bears a close relationship to employment and is, therefore, compensable."

Quality

that builds
your name...

Builders know that the satisfaction of the customer heads the long list of factors contributing to building success. . . .

Attention paid to small details often pay big dividends. Attention which you may give to fasteners, for example. . . .

The Quality and Permanence that forms an integral part of the screws and bolts employed in today's building hardware is yours for the asking. Yet your projects do not always receive the best fasteners, unless you so specify!

Southern fasteners, manufactured under rigid quality controls, in the U. S. A., from U. S. A. materials and by U. S. A. workers, is an excellent example of the fasteners you can specify with complete confidence. Building hardware manufacturers and suppliers can't buy better fasteners than Southern's—yet Southern screws and bolts cost no more than run-of-the-mill fasteners. Why settle for less?

Specify "Southern Fasteners" when you buy building hardware. That means assurance of quality and permanence—and satisfaction that helps build success!

May we send you samples, and an interesting, colorful descriptive brochure about Southern Screw Company. Address P. O. Box 1360-AB, Statesville, North Carolina.

The Month Ahead

SOME LOOSE MONEY

In the National News section of this issue of AB there's an item on a confab of OHI VIP's in Tuscon, Ariz., that should cheer up those who are feeling tight money (i.e., everybody). In the home improvement business, at least, money should be plentiful. Banks apparently like to make the short term Title 1 loans, and bankers predict a record year.

BAD NEWS DEPT.

If you're an individual contractor or part of a partnership, your final 1956 tax return must be filed by April 15th, along with the balance due. Also, file your 1957 estimated tax, and one quarter of the estimated amount.

On April 30th you must file Form 941 for your employees' withholdings for the first quarter of 1957, and pay the amounts due.

ANOTHER "MONTH"

There are so many official "Months" that they're beginning to double up. May is also Plumbing — Heating — Cooling Month, which is a mouthful, but before you slough it off, remember that these promotions wouldn't exist if they didn't pay off. Find out from your plumbing and heating subs if this publicity can help sell their products in your houses.

FOR LAND'S SAKE

Feeling the land pinch, either price-wise or space-wise? Next month's land-planning section will show you how a Savannah group of builders handled the problem, and without fighting city hall.

Another blast for OHI

May has been designated as Home Improvement Month. This means another big boost for the Operation Home Improvement program, and a boost that you can take advantage of too, if remodeling is at all important in your business.

OHI has had a spotty existence to date. In cities where builders, utility companies and municipal officials have gotten out of their swivel chairs and really worked, it has boomed. In other areas, where everyone has waited for George to do it, OHI has gone over like the proverbial lead balloon.

It's up to you

The moral is that OHI is just what you make it. The market is there—that's been proven a hundred times—but it's not like the new house market. The family that's looking for a new home knows just what it wants and why it wants it. The potential remodeling client, on the other hand, may be sitting quite comfortably in the house he fully expects to die in. He may be only vaguely conscious of the slight crowding that would prompt him to invest in a new porch or an additional bedroom. This person has to be sold, so you have to go out and explain to him just how miserable his condition really is. Your best bet might be to check with your retail lumber dealer. Chances are he's in OHI up to his eyeballs, and he'd be glad to help you.

Summer is icumen in

For those of us in the North, at least, it's been the worst winter in years, which shouldn't blind you to the fact that to house hunters, Spring is the first warm weekend. They'll be out like flies, and the guy with the first open model will be amply repaid for any rushing he did to open it.

Plug in to us in May

Our May issue will carry a feature on electrical living, and how it sells houses. There'll be stories on remodeling and commercial work as well as new homes—something for all in other words.

FLOORS AND WALLS

New hardware creations by *National*

Here are fresh ideas and designs that will interest the modern home owner. The new products here illustrated have been added to the extensive National line to meet today's demand of style conscious home builders.

Smart new contours have been designed for these Semi-Concealed Hinges and Pulls. Sparkling finishes applied to the hardware enhance their installation and are easy to keep clean.

The No. 712 Magnetic Catch illustrated at right has flush strike mounted on door eliminating unsightly projections. Permanent magnet has approximately 14 pound holding power.

Many of our products are now sold in the attractive Visual Pack, where you see all the actual merchandise at a glance. Strong polyethylene bags protect the hardware finishes from injury and prevent loss of any of the component parts.
