## 2000

### FUTURE

THE NEXT STEP IN THE FILAMENT LAMP EVOLUTION

Now Available in 120V

Handling - can be installed with bare hands without affecting lamp life

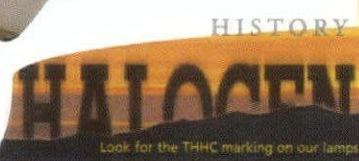

Dimmable - dimming does not shorten lamp life

Long life - 5,000 hours

Filled with low-pressured Xelogen gas - glass shielding not required

Lower heat output - safer and offers more flexibility in fixture design

Do not emit damaging UV rays - ideal for artwork and sensitive fabric

FEATURES

## CRUISIN' INTO A NEW YEAR ...

Once again, it's the 2001 *Architectural Lighting* annual Lighting Source Directory! This reference guide provides access to more than 1,400 manufacturers and suppliers of lighting (and some related) products. The Directory is easy to use and understand—just follow these simple guidelines:

**Alphabetical Listings:** In the first part of the Directory, you will find companies' names, addresses, phone and fax numbers, email addresses and websites. Some manufacturers are specially advertised with a logo and a short description of their company and its capabilities, in their own words.

**Product Category Listings:** The companies listed in this Directory responded to a survey to tell us what product categories they manufacture. In this section, you will see category headings for all major lighting product types, then a list of manufacturers. To contact these manufacturers, look them up in the alphabetical listings. Some companies are specially advertised with a "company profile" page, which provides readers with further information about their products and services.

It is extremely important to us at *Architectural Lighting* and to your fellow readers that you report a mistake if noticed. If you believe your company should be listed, want to suggest new product categories or see a company listed that is not appropriate for this Directory, please fax (212) 279-3955, Attn: Lighting Source Directory. Please send all other comments to me at [ctrauthwein@billcom.com](mailto:ctrauthwein@billcom.com).

And, thanks—as usual—to Dave Burtner of inter.Light, whose assistance in this tremendous undertaking is invaluable and much appreciated.

**On the cover:** The Royal Promenade Oculus, designed by Larry Kirkland and lighted in collaboration with Fisher Marantz Stone, graces the promenade of Royal Caribbean Cruise Lines' Voyager of the Seas, the world's largest cruise ship. The challenge of this project was to illuminate and animate a glass oculus mounted four decks above the interior promenade, making it a central feature of the ship. The oculus is installed in a 15-ft.-diameter, 33-ft.-high drum, culminating in a pyramidal skylight penetrating the pool deck. "We had a wonderful opportunity to create something that was kind of a surprise, that was forever-changing and that could bring the magic of light into an interior space that really had very little," said Kirkland, "connecting the outside world to the interior environment."

Kirkland stacked 13 layers of concentric aluminum rings supporting 13 glass shelves, forming square openings of diminishing aperture, each offset by 15 degrees. The beveled and frosted inner edge of each glass shelf is illuminated by a concealed source attached to the polished glass edge, creating glowing stripes that define the square openings. "The sculptural form truly comes to life with light," said Kirkland.

The nearly inaccessible application required special consideration. LEDs were used for their inherent directionality, durability and low energy consumption. In addition, control options using DMX control signals offer animation and RGB color mixing. A custom extruded channel mounts the LED strip directly to the 3/4-in.-thick glass panels. "Because you can drive the narrow-beam LEDs into the edge of the glass, these lamps become an effective source for edgelighting," said lighting designer Charles Stone.

Theatrical floodlights illuminate the interior of the drum and miniature striplights uplight the pyramid. For the circular frame at the base of the oculus, which, according to Stone, "Larry calls the Beauty Ring," the artist designed eight jewels as beacons, drawing viewers' eyes upward. LED-based floodlight fittings within the jewels are used again to provide a low-maintenance, low-power-consumption, highly

controllable source with RGB color mixing. Control is provided by a DMX playback unit, which is integrated into the ship control system for pre-programmed shows, as well as direct DMX control by a theatrical control board.

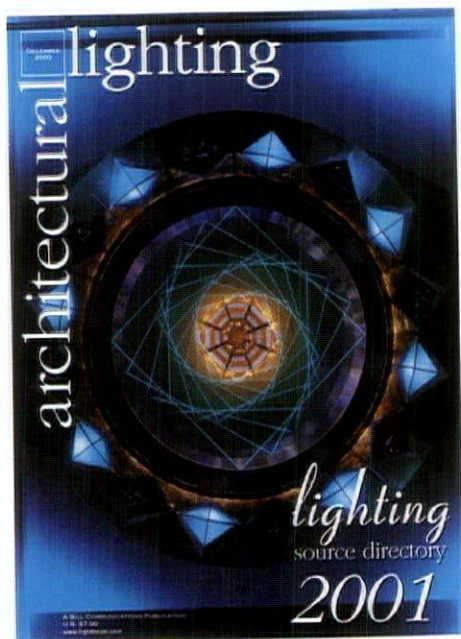

"What started out as 'how do we light this glass to make it interesting as a piece of glass sculpture?' became a piece of light sculpture," said Stone. "Standing there and watching the slowly changing colored edges in the spiral of glass is pretty exciting, as is being able to find a cool application for LEDs."

*Lighting designers: Fisher Marantz Stone—Charles G. Stone II, Robert Schoenbohm; Larry Kirkland; Lighting manufacturers: Color Kinetics; Flying Pig Systems; Alcorn McBride; Photographer: Edward Hill* ■

# Handsome ... and Loaded.

Enjoy loads of features in a trim, architectural-styled package with the Yosemite™ and Sequoia™ Series of outdoor fixtures from B-K Lighting. Their unique Optikit™ modules give you ultimate flexibility in creating spot, flood or wall-wash patterns using the T6 ceramic metal halide lamp. And B-K Lighting's patented 360HD™ Mounting System with 'aim-and-lock' technology ensures that the light goes precisely where you want it to go - and stays there.

The list of convenience features goes on with ...

- slide-out end caps for easy re-lamping
- a full range of accessories to help you shape the beam
- B-K Lighting's exclusive ACV™ Valve System to eliminate internal condensation and corrosion.

Above all, the Yosemite and Sequoia Series deliver what you've come to expect from B-K Lighting ...  
Quality to Last a Lifetime.

**B-K LIGHTING**  
Quality to Last a Lifetime™

The advertisement features a large, curved, textured wall in shades of tan and gold. A modern, white, wing-shaped luminaire is mounted on the wall, casting a soft, wide glow. In the background, a modern building with large windows and trees are visible under a clear sky. The overall aesthetic is clean and architectural.

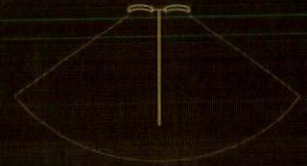

Gullwing luminaires seamlessly and elegantly disappear into architecture and landscape. By night, illumination is precisely controlled, with no high angle brightness or glare into neighboring property. Gullwing blurs the lines between architecture, engineering and performance, and in so doing, advances the proposition that lighting at its best, is all but invisible.

## BOA

### Dual circuit. Greater lighting options.

Bruck Lighting introduces BOA, a low profile *two-circuit* track system with dual switching ability listed for up to 600 watts. The system can be suspended or semi-flush mounted, installed vertically or horizontally. Finished in chrome or matte chrome.

All Uni-Light fixtures can be utilized with BOA as well as all seven other systems manufactured by **BRUCK**.

## Downlighting gets Downsized by CON-TECH

residential

retail

commercial

IN THE WORLD OF LIGHTING TODAY THE BIG TREND IS GOING SMALLER.

**Series-3**, featuring the Star-3™ trim, is a new line of mini-recessed downlights created specifically for use with energy efficient, low voltage MR16 halogen lamps. Select from 16 petite trim styles. Available in up to 6 modern finishes. Series-3 gives today's creative and value-conscious specifiers quality and range of selection for general, accent, or task lighting. Call **1-800-728-0312** today to request CON-TECH's Series-3 Mini-Recessed Lighting catalog. When you need lighting right now...ask about our *speed of light™* shipping service.

Our fixtures are so highly coveted,  
that when customers buy them...  
*they promptly hide them.*

Our 'Hole in the Wall' fixtures are plaster/fiberglass castings. They illuminate your space without calling attention to themselves. Call us for more information at 626.579.0943 or visit our website at [www.elplighting.com](http://www.elplighting.com).

*Kim Lighting has been creating innovative outdoor lighting solutions since 1933. From the beginning, it has taken a lighting design perspective toward product development. Today, this approach remains intact and is the core of the company's focus. New products are developed to solve lighting needs and to provide efficient and attractive solutions. See our ad on page 37.*

## A CROWNING ACHIEVEMENT IN FIXTURE DESIGN

Each member of Lumière's Coronado line of metal halide fixtures is a unique specification grade fixture designed to use the newest in high technology natural color rendering metal halide lamps.

Unique, timeless, and patented design, and patented fixture aiming mechanism set these fixtures at the summit, above all others in their class. The ADEX Award winner for landscape lighting, the Coronado series adds to the long roster of Lumière fixtures honored for design excellence.

Available in versions to accept the PAR 20, 35 watt (Cat. #720), PAR 30, 35 or 70 watt (Cat. #730, pictured), and PAR 38, 70 or 100 watt (Cat. #740) metal halide lamps. Coronado fixtures can be mounted in the ground, on trees or walls, and can be remoted from their waterproof composite ballast compartment.

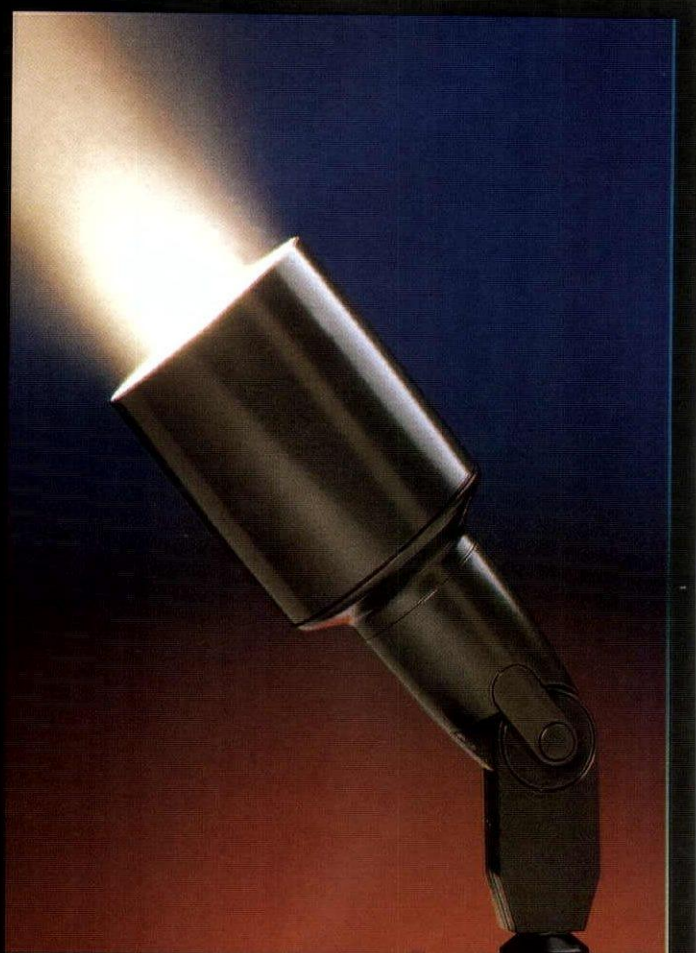

Another groundbreaking, award winning fixture?

Of course, its Lumière!

Lumière

## Exterior 600

ARCHITECTURAL  
LIVING LIGHT

Integrated Architecture

# Enhance...

...contemporary building design with an attractive wash of color from Martin architectural lighting. From subtle hues for delicate illumination, to saturated rich shades, create unique environments that tastefully enhance today's modern architectural designs. Even use pattern projection and movement to create truly eye-catching facades. Martin Professional – the Living Light Company.

## Handcrafted by us. Handpicked by you.

Decisions, decisions. The DP-83 pendant from Manning Lighting gives you five decorative castings to choose from—all carefully hand-applied to the spun trim band. And that's just the beginning. You can also choose from aluminum or brass materials; five different sizes; three acrylic styles; incandescent, fluorescent or metal halide lamp packages; and many stem options. Whew! Did we mention the matching sconces and ceiling-mounted fixtures? Whatever your choices, you'll pick a winner hands down.

*Pappi Lighting is a world-class manufacturer of quality fixtures and poles with outstanding aerodynamic properties. Made from high-purity extruded aluminum available in diamond-hard anodized colors and a variety of finishes. Engineered with high-performance, segmented, fully rotatable optics to outperform and outlast all others. Our patented no-weld poles are currently in use world-wide and are lighter and stronger, pound-for-pound, than any other aluminum pole on the planet. For more information or a list of the office/agent nearest you, call 905-625-1139 or visit our website at www.pappilighting.com.*

# Presc•lite

A NEW QUALITY OF LIGHT

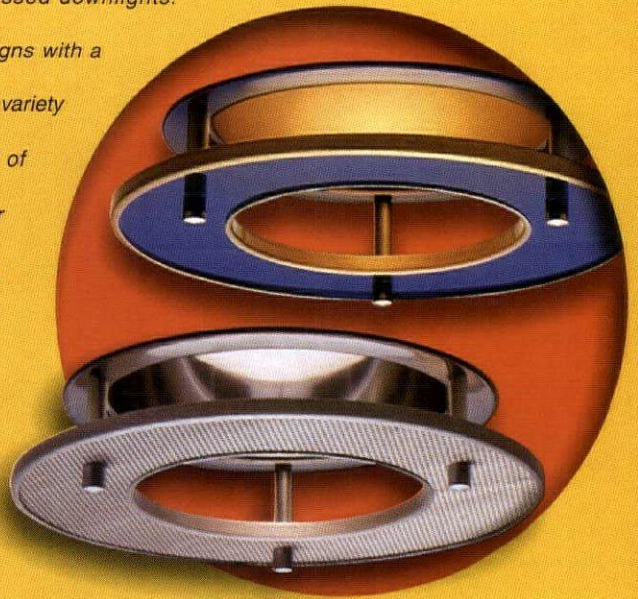

**YOU** like 'em? You should. You asked us to build them. You were looking for beauty. Sophistication. Style. And simplicity. You wanted quality. Easy maintenance. High durability. And exceptional performance. You asked us to focus on color. Accents. And architectural relevance. And you wanted a low price. We **love** a challenge. We scratched our heads. Searched for new technologies. Manufacturing processes. Materials. And designs. The result: our new, innovative Lite Deco™ trims. Our hard work is paying off. Not just our work at the factory, but our collaborative efforts with top interior designers and lighting professionals to create the most architecturally relevant and effective lighting solutions possible. *Really* focusing on your needs. Maybe that's the most important innovation of all. So, what do you want to **focus** on now?

TRUSTING YOU  
T R U S T I N G

Introducing Lite Deco™. Essential architectural trims for Lite Box® recessed downlights.

This offering is truly unique because it is comprised of seven distinct designs with a large selection of reflector and lamp choices, finish options, and a wide variety of beautiful, decorative elements from which to choose. What's more, all of this design freedom is offered at an uncommonly low price. Visit our website to learn more about our new vision of decorative downlighting.

*Selc was set up in 1982 to develop a range of reliable and sophisticated public lighting controllers and accessories. These ranged from photocell devices that switch lighting on or off depending on the prevailing daylight levels to sophisticated timing devices that automatically adjust switching times according to in-built software algorithms. Having established itself internationally as a leader in the design and manufacture of lighting control systems, Selc has now expanded into the international public lighting and heating market with a wide range of control products.*

**10,000  
Hour MR16**  
with no color loss...  
now that's  
brilliant!

The Ultraline™ lamp from Ushio is rated at twice the life of any MR16 lamp on the market today.

Ultraline™ lamps maintain their bright color throughout their long life — our special titanium coated reflector makes this possible. And since the integrity of the reflector is maintained there's no degradation over time... so consistent white light brilliantly illuminates with no color shift or change in hues.

Every Ultraline™ lamp has a UV-cut inner burner to eliminate potentially harmful ultraviolet wavelengths; valuable apparel or art is no longer an easy target for discoloration and fading from ultraviolet exposure. Installing Ultraline™ lamps buys you time and money, too. At 10,000 hours life, frequency of lamp changes are reduced by better than half, so savings on maintenance related costs are soon realized. Call us today. Make sure you're up-to-date on the most extensive line of MR16 and MR11 lamps in the industry — available only from...

# UNI-FORM<sup>®</sup> The First Name in Pulse Start

Venture was the **FIRST** to offer ground-breaking pulse start lamp/ballast systems as a complete line. We set the industry standard by introducing over 80% of the metal halide lamp types used today.

Venture gives you the **MOST** pulse start systems in the largest selection of wattages. *Uni-Form* technology offers the best pulse start lamps featuring our exclusive formed body arc tube.

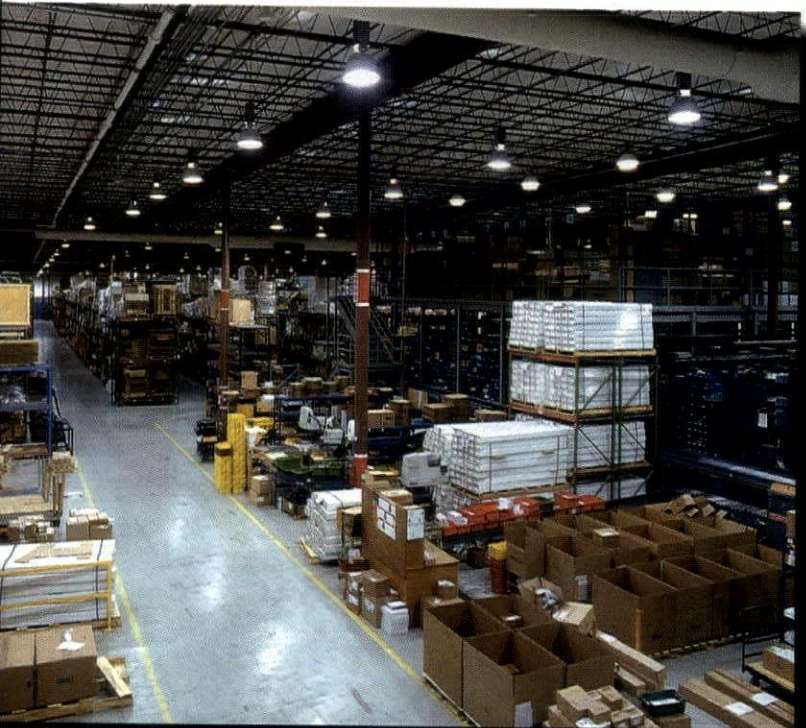

Venture provides the **BEST** performance from its *Uni-Form* pulse start system, delivering more light, better color and greater energy savings than traditional metal halide lighting.

Venture leads the metal halide revolution with *Uni-Form* lamps and ballasts. Why settle for anything less when one company gives you the first, best and most in pulse start?

## Prudential

*Forty-five years as a family-owned business have allowed Prudential Lighting the independence to build a solid reputation based upon one fundamental principle: Listen to the needs of customers and give them what they want.*

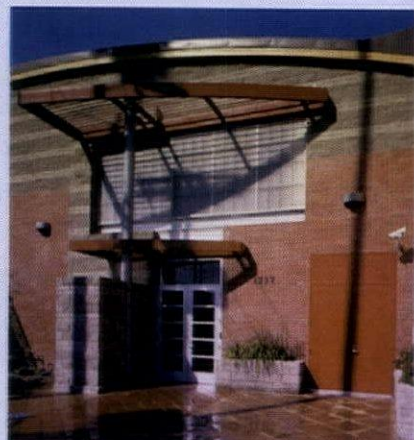

Experience has taught us that in an environment where change is the only constant, continued success relies upon adaptability and versatility. Our awareness of trends within and outside the industry has let us meet those changes. The attention to detail employed during design, construction and assembly ensures superior quality of fit and finish.

Prudential Lighting has six categories of customized and stock fixtures:

- **Shapes and Systems**—with over 12 shapes and perimeter lighting systems
- **Surface and Suspended**—the industry's largest selection of standardized wall- or ceiling-mounted fixtures and components
- **Recessed Troffers**
- **Strips and Industrials**—commercial-grade standard strips
- **Special Applications**—for unusual location and unique environments
- **Custom**—unique applications with custom fixtures

Prudential Lighting has been represented in all 50 states since 1973. Local representation on a national level provides any lighting specifier, regardless of building site location, with responsive service.

For more information about Prudential Lighting, please contact your local representative, call corporate headquarters in Los Angeles at (213) 746-0360 or visit Prudential's website at [www.prulite.com](http://www.prulite.com).

## Bruck Lighting Systems

*Bruck is internationally recognized as a leader in the development of innovative lighting systems with particular emphasis in the application of low-voltage, halogen light sources. The pioneer of a new approach to design, Bruck places three-dimensional technology at the forefront. Since the beginning, Bruck has been a developer and promoter of new standards in aesthetics, product quality and safety.*

Bruck Lighting offers a high diversity of product styles developed from the needs and imagination of our customers and our designers. The range of styles facilitates a variety of applications from the discreet highlighting within an architectural frame to the vibrant illumination of a room or interior space. Following are some of the more popular Bruck systems:

**Flex-Line**—a unique track that flexes (not bends) to allow for curved or linear installation. Can be installed vertically, horizontally or on a sloped ceiling. Lightweight and easy to install.

**V/A**—a low-profile track system constructed of two hollow copper tubes that can change direction and elevations in straight or pre-curved sections.

**High-Line**—a lighting system of two copper-stranded cables, which are braced parallel to each other. This lighting system can be spanned from wall to wall, wall to ceiling or ceiling to ceiling.

**BOA**—the latest system from Bruck, which was introduced in 2000. BOA is a 12V low-profile, two-circuit track system with dual switching ability that allows utilization of up to 600W of power.

In addition, we have added **Jasmine**, the adjustable counterweight suspension uni-light with an illuminated ball, along with a series of handmade glass pendants. Nearly all Bruck fixtures have the same universal plug-in connector that gives you the freedom to use them with any of Bruck's eight different track systems. Look for our product release for 2001—our creativity will set a new standard in imagination.

At Bruck Lighting Systems in southern California, we have more than 30 employees. In Germany, we employ more than 100 people at our headquarters. Our staff takes pride in our customer service, our professionalism, our quick delivery and the quality of our product.

For more information, email us at [info@brucklightingsystems.com](mailto:info@brucklightingsystems.com) or call us directly at (714) 424-0500.

*Competence and know-how, technical and artistic innovations, aesthetics with the highest functionality. Bruck Lighting Systems—The perfect synonym for the perfect synthesis of atmosphere and functionality in lighting technology.*

*Flex-Line with Takato 75*

*High-Line with Takato 75*

*Flex-Line with (left to right) Pin III with Pin Cap, Pin I with integrated adapter with Pin Cap and Pin III with Pin Cap.*

## Engineered Lighting Products

*Engineered Lighting Products was actually started as a response to a recurring lighting design problem. The founder, Ralph W. Swarens, has applied his degree in Illuminating Engineering to many facets of the lighting industry since 1961. After owning a rep agency, he started his own lighting consulting firm in 1976, which ultimately served as the foundation to launch Engineered Lighting Products in 1985. As a lighting consultant, Mr. Swarens solved lighting problems. As a manufacturer, he designs and builds the solutions.*

Since its solution-based inception, Engineered Lighting Products (E.L.P.) has never wavered from its problem-solving dedication in new fixture development. The company continues to utilize new technology for developing more effective and efficient luminaires. Over the years, E.L.P. has been granted several U.S. patents because of its innovative fixture designs, which provide superior answers for today's lighting problems.

The majority of the luminaires use efficient high-color-rendering fluorescent and metal halide lamps and are designed to light a room or surface without glare. E.L.P. offers numerous lamping configurations, and its unequalled line of wall-wash fixtures are varied enough to be used in retail, offices, medical facilities, institutions, schools and residences. Many of the company's fixtures, such as cove lights or wall-recessed fixtures, light spaces indirectly. Even the revolutionary, patented 2x2s and 2x4s light computer spaces indirectly to promote comfort and productivity.

When you combine superior fixture designs that offer function, efficiency and aesthetics with a knowledgeable, long-term staff that provides timely assistance with lighting design, layout, technical questions and order servicing, you have the reason for the company's continuing growth and success.

## Lumière Design & Manufacturing

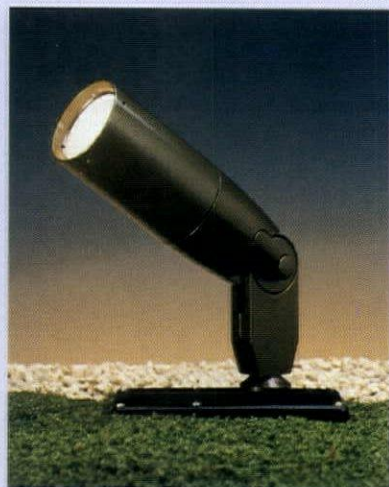

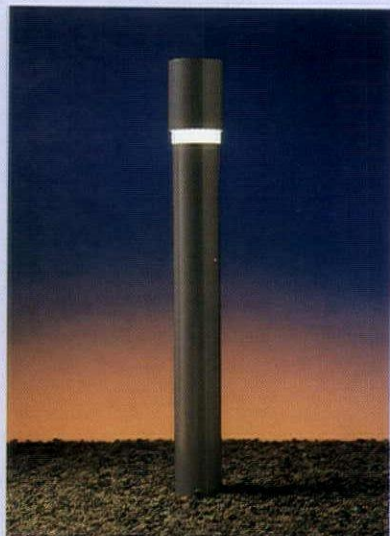

*The name Lumière Design & Manufacturing, Inc. has become synonymous with design, quality and function in outdoor architectural, landscape and specialty fixture lighting. As a result, Lumière fixtures have been specified on many noteworthy projects around the world, including this small sample: Franklin Delano Roosevelt Memorial, Ronald Reagan Library, United States Marine Corps Korean War Veterans Memorial, Disneyland, Disney World, Disneyland Paris, Grand Wailea Hotel (Maui), Legoland, Olympic Village (Barcelona), Sea World and the Nikko Hotel (Tokyo). Lighting designers, landscape architects and architects the world over rely on Lumière fixtures to add that extra measure of performance and beauty to their projects.*

Lumière makes a wide variety of fixtures and accessories for every application, including area, accent and downlights, path lights, mini bollards, step lights, wall-mounted lights, well lights, unique underwater accent lights and outdoor imaging projectors. Light sources include 12V MR16 and MR11, HID, fluorescent and standard line-voltage incandescent and halogen.

Many of our fixtures are award winners. For example, our Hollywood #1701 imaging projector won the Design Excellence Award at a recent Lightfair International, as well as an ADEX Award from Design Journal Magazine. The prior year, our metal halide Coronado Series won the ADEX award. Lumière also received the coveted "G" Mark Certificate of Merit from the Japanese Ministry of International Trade and Industry for "originality, excellence of design and outstanding contribution to the landscape environment." Other fixtures, such as our Cambria #203, have become industry standards.

Lumière fixtures are featured as an integral part of many acclaimed lighting designs and projects.

Like the award-winning artists who created these projects, you too can specify Lumière fixtures with pride, conviction and confidence. We invite you to do so.

## LightingUniverse.com

*LightingUniverse.com is the largest online lighting distributor, serving the needs of architects, interior designers, building and electrical contractors and lighting designers by supplying the largest selection of lighting products via the Internet, with a focus on serving the needs of the professional design and builder communities.*

LightingUniverse.com offers tools and services to save trade professionals and their clients time and money. Instead of sifting through stacks of catalogs that can contain out-of-date pricing or supply information or surfing through dozens of manufacturers' websites, trade professionals can access up-to-date information on thousands of products at LightingUniverse.com. They can also use LightingUniverse.com's business tools to create online catalogs for their clients. By using the Project Builder and Catalog Wizard, users get instant access to current product information and can conveniently build a Bill of Materials and email it to their clients. The Catalog Wizard also allows the trade user to email their clients a customized catalog from which to make their lighting selections. Clients can then notify their designer of their selections via email. Customizable professional spec sheets can also be printed from LightingUniverse's product database. Trade users can also look for products by specific criteria, such as price, style and application, to speed up the search.

LightingUniverse.com has established relationships with more than 85 manufacturers and offers in excess of 115,000 lighting products, parts and accessories. Manufacturers are selected based upon uniqueness, quality, availability and value of their products.

Categories include commercial, residential, decorative, theatrical, landscape, photographic, lamps, lighting parts and accessories. Manufacturers include: Hampstead, Translite, Sonoma, Effetre, Hubbardton Forge, Justice Design, Gresco Lighting, Architectural Details Inc., Baga SRL, 2nd Ave. Design, LBL Lighting, Yamagiwa, Lutkus III Designs, Con-Tech, Lux Luce, Norwell, Prima, Cherry Tree Designs, Crystorama, Altman Stage Lighting, American DJ Supply Inc., Craftmade, Nicor, Kenroy, SP Studio Systems, Nightscaping and Rockscapes.

## Prescolite

### Prescolite

*"Trusting Your Vision" is Prescolite's new theme for 2001. It is an especially significant theme for Prescolite, representing on one hand a culmination of a five-year plan and on the other hand, the inauguration of a new plan as we enter a new century.*

*6-in. Lite Deco architectural trims for incandescent, compact fluorescent and metal halide sources.*

*New Lite Trac line-voltage MR-16 Classic Miniatures.*

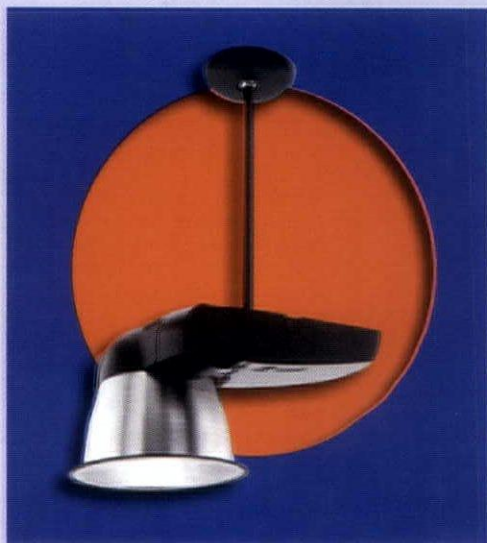

In 1995, we attended Lightfair in New York as part of a new company, CPM (Columbia-Prescolite-Moldcast). At that event, Prescolite kicked off a national roundtable of best practices in design that we called Illume 2000. We built a home for it in San Leandro, our award-winning Concept Center, and we traveled throughout the United States, holding meetings with leading professional lighting designers, engineers and architects. Our purpose was to listen, learn and develop new products that were different. The difference we hoped for would be in the relevance of these new product ideas. We wanted to create new products that met real-world needs, that were rich in meaningful, application-oriented benefits and that would meet with the acceptance of the professional designer, professional installer and end user.

Simply put, we would trust in the vision of the professional lighting community. We would listen and then respond with meaningful products. The results from Illume 2000 have changed our company in significant ways. We think all of these changes are for the better and we are extremely grateful for the time and energy so many industry professionals have given us.

With increased marketing, design and manufacturing focus, Prescolite has released an unusually large number of new product concepts since 1995, which have all been based on the vision of the professional lighting community. Only a few of these products are featured on these pages, including Lite Deco, the industry's first complete line of decorative downlight trims for incandescent, compact fluorescent and metal halide sources, with architecturally relevant designs for both residential and commercial applications. We've also introduced a breakthrough in track lighting technology with a new series of Lite Trac Classic Miniature track heads utilizing new line-voltage (120V) MR16 lamps. And, of course, we've received our greatest recognition with Prescolite's modern reinvention of the classic surface cylinder: the new Phos surface-, track-, and pendant-mounted downlight with exclusive Virtual Source optics, honored by Lightfair International, Industrie Forum and ADEX as the best new product of the year.

As Prescolite concludes its five-year Illume 2000 plan, we are now beginning a new corporate initiative that we are calling "Trusting Your Vision." This new program will be similar to the original Illume program, except broader in scope and with increased focus. We will be expanding the number of events and

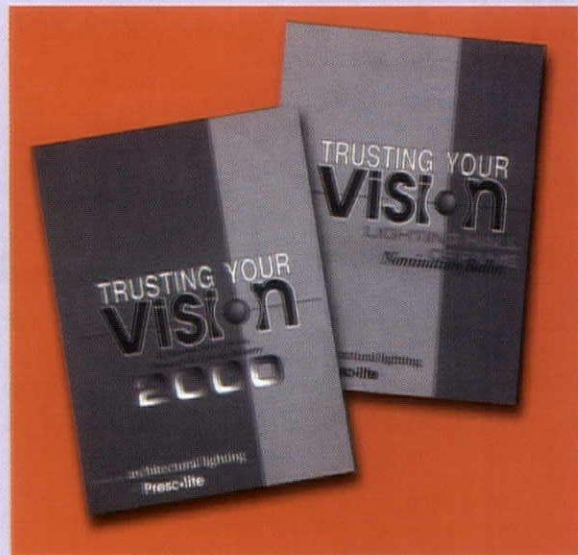

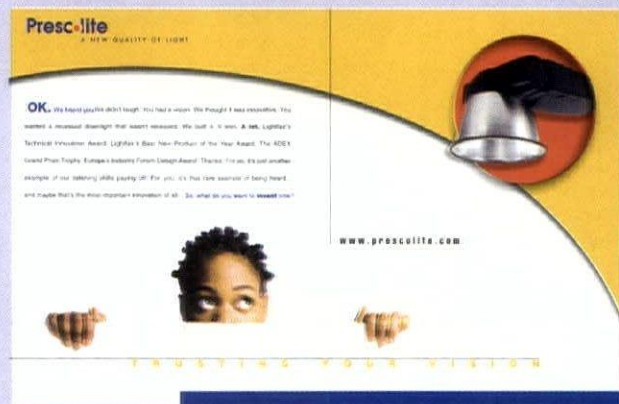

Award winning Phos surface-, track- or pendant-mounted downlight with patented Virtual Source optics.

contacts and we will be involving lighting professionals even earlier in the design process to allow greater ability on our part to include the ideas and features defined for us by the professional lighting community in our new product development program.

As a kickoff for our new "Trusting Your Vision" initiative, we have invited leading professionals from around the country to participate in a special lighting survey. Key results of this survey will be shared not only with participants, but also with the full professional lighting community through an arrangement with the cosponsor of our original Illume 2000 and new "Trusting Your Vision" program, Architectural Lighting Magazine. Prescolite is also a founder and sponsor of the industry's first Lighting Hall of Fame. *Architectural Lighting* has the commitment of Prescolite to provide funding for the establishment of this permanent recognition of lighting excellence and for what we hope will become the institutional means for our industry to recognize and celebrate its rich history. Results of both the "Trusting Your Vision" survey and Hall of Fame will be published in the March 2001 issue of *Architectural Lighting*.

Prescolite's success is due to our trusting the vision of the professional lighting community. By listening and then faithfully interpreting and responding, we have a formula that results in better product ideas with better value for the designer, the installer and the end user. And by embracing our past, we can learn from those in our industry whose passion and vision for

lighting have created and shaped our history as an industry and have defined for us all what true excellence in lighting means.

Prescolite and Architectural Lighting's "Trusting Your Vision 2000" Survey and Hall of Fame.

## Bartco Lighting

*Through the years, Bartco Lighting, Inc., a manufacturer of high quality fluorescent and incandescent lighting fixtures for architectural and display applications, has become a symbol for quality, customer service and dependability. Bartco's fixtures, used for retail, commercial, institutional and residential installations, have established a loyal following among lighting designers, retail store planners and architects due to their reliability and innovative style. Customers have come to know Bartco's dependable service and quality products as the rule, rather than the exception.*

Focusing on various types of lighting needs, Bartco's fixtures have become a functional asset to hundreds of different lighting situations, in everything from showcase fixtures to hotels.

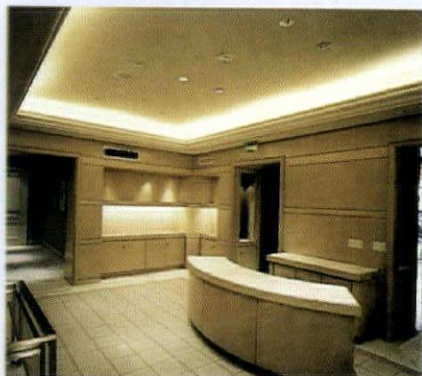

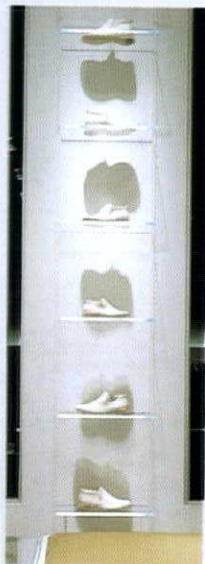

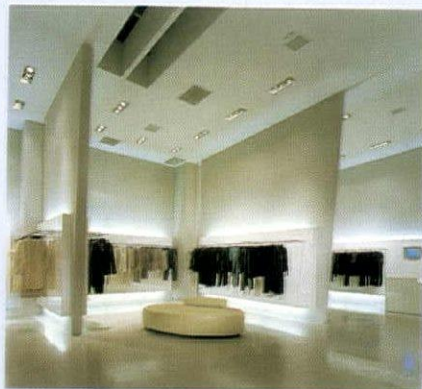

Bartco Lighting specializes in a variety of low-profile, linear fixtures with an emphasis on T5 miniature fluorescent, offering architectural and showcase fixtures with the smallest profiles available. Bartco's large variety of lighting fixtures contains the most extensive product line of T5 fixtures, both remote and integral ballast models, in the lighting industry.

Additionally, Bartco Lighting provides custom-designed products and systems to meet the customer's evolving needs. Some of these include fixtures for high-output fluorescent, HID, fiber-optic and LED sources. Bartco has also developed original design concepts, including the Slide by Side Adjustable Stagger Fixture and Lightfair 2000 Blue Ribbon winners, the Diamond Light and the Adjusta Lock Track Fixture.

Bartco Lighting's experienced staff welcomes the opportunity to assist customers with their lighting projects—everyone at Bartco understands the importance of quick lead times and exceptional customer service.

Bartco Lighting's fixtures have become key elements in lighting that makes a difference, a statement and an impact.

*Customer-driven, customer-oriented Bartco Lighting—leading the way and lighting it.*

## Lighting Services Inc

*Lighting Services Inc (LSI) is the leading specialty manufacturer of track, accent, display and fiber-optic lighting systems for museum, retail, architectural, contract and residential use. Since 1958, LSI has been dedicated to designing, engineering and manufacturing lighting fixtures of the highest quality. Our reputation for creativity and innovative design, coupled with specification-grade products and intelligent personalized service, has made us the manufacturer of choice among the most discriminating specifiers of lighting.*

Lighting Services Inc is the manufacturer of choice for most museums, including the Metropolitan Museum of Art, Guggenheim Museum, Art Institute of Chicago, U.S. Holocaust Memorial Museum, Norton Simon Museum, San Francisco Museum of Modern Art, Museum of the American Indian, American Museum of Natural History and many, many others.

Lighting Services Inc provides display lighting for most of the nationally prominent stores such as Nordstrom, Tiffany & Co., Gucci, Saks Fifth Avenue, Ralph Lauren Polo, Neiman Marcus, Barneys, Bloomingdale's, Bergdorf Goodman and many, many others.

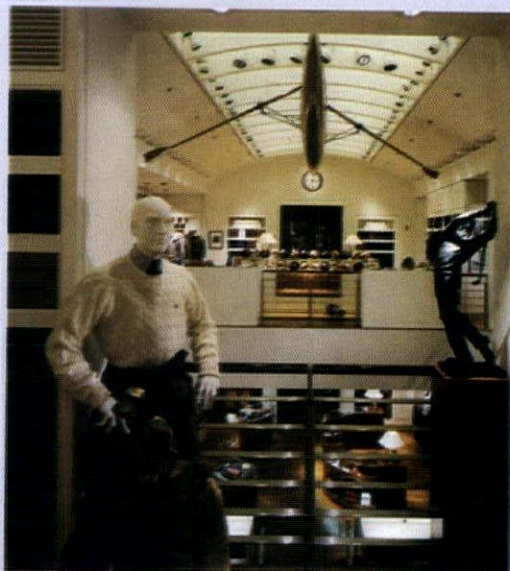

Lighting Services Inc's track and fixtures are specified for attractions such as Disneyland, Disney World, Epcot Center, MGM Studios, Universal Studios, Monterey Bay Aquarium, Baseball Hall of Fame, Cowboy Hall of Fame, NCAA Basketball Hall of Fame, NBC, CBS and many, many others.

Lighting Services Inc's lighting systems and accessories are used internationally at the Hong Kong Convention Centre in Hong Kong, Empress Palace Exhibition Hall in Singapore, Hyatt Hotel in Osaka, Coca Cola in Moscow, Mandarin Oriental in Indonesia and many, many others.

Lighting Services Inc has worldwide representation serviced by regional sales managers and more than 100 local representative organizations. For your local representative, call toll-free (800) 999-9574.

## Gardco Lighting

*Thirty years ago, Gardco invented the lighting technology that is today a fixture on landmark architecture across America. The technology was the high-performance, sharp-cutoff luminaire and the product was the Form Ten.*

Interchangeable, rotatable optics, detailed photometric layouts, architectural-quality aesthetics and elimination of glare redefined the theory and practice of outdoor lighting. Notable by eliminating light trespass at the site's perimeter and the "halo" of high-angle brightness, Gardco helped to attract the eye instead of driving it away.

Building owners were able to enjoy initial luminaire and installation savings, along with long-term energy cost reductions, as fewer luminaires (using wider pole spacings) were possible with Gardco. Today, more than ever, Gardco luminaires offer these multiple advantages ... and bring new life to daytime and nighttime environments with styling that continually redefines as it refreshes.

In the ensuing three decades, Gardco has secured its position as the industry's de facto supplier of performance lighting products. Often imitated but never equaled, Gardco's offerings today include area, pedestrian and landscape lighting with styles, quality construction and finishes that make a lasting impression.

# company profile

## B-K Lighting

*B-K Lighting is a leading manufacturer of specification-grade architectural and landscape lighting fixtures and accessories. The company's products are featured in prominent venues around the world, including Universal Studios Florida, Walt Disney World, New York's World Trade Center and many of the newer Las Vegas resort casinos.*

B-K Lighting products work together as integral systems to seal internal components from outside elements. All of its products are hermetically sealed. Nearly all are precision-crafted from solid aircraft-grade aluminum or from solid brass.

B-K Lighting recently introduced five new products to its growing line of architectural lighting fixtures. Two are featured here. They are the Yosemite and Sequoia Series fixtures for use with the T6 ceramic metal halide lamp. Both fixtures offer multiple convenience features in a trim, architectural-styled housing. Their unique Optikit modules offer designers the flexibility to create spot, flood or wall-wash patterns of light. Light patterns may be refined using an array of cutoff accessories, including the visor, cutoff snoot, honeycomb baffle and adjustable barn doors.

Convenience features of the Yosemite and Sequoia Series include:

- Slide-out end caps for easy re-lamping
- B-K Lighting's unique 360HD Mounting System for precise positioning
- B-K Lighting's unique ACV Valve System to protect against internal condensation and corrosion

For more information about these and other B-K Lighting products, call (559) 438-5800.

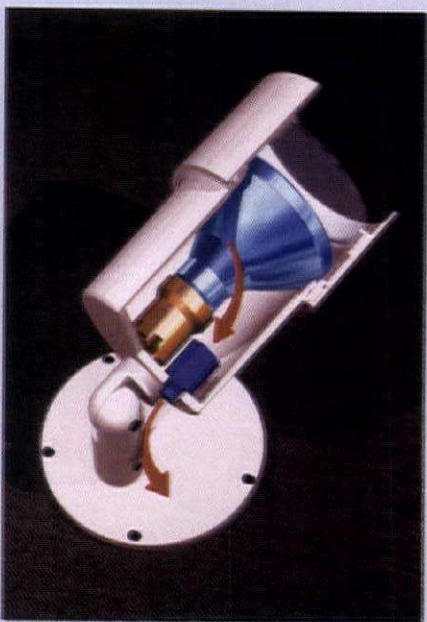

*B-K Lighting. Quality to last a lifetime.*

*360HD Mounting System*

*Yosemite Series fixtures*

*ACV Valve System*

## Kim Lighting

*Kim Lighting has been creating innovative outdoor lighting solutions since 1933. From the beginning, it has taken a lighting design perspective toward product development. Today, this approach remains intact and is the core of the company's focus. New products are developed to solve lighting needs and to provide efficient and attractive solutions.*

Kim's approach to design has evolved into a special "Theory of Relativity." This defines the relationship of luminaires to the position they occupy in the site environment. Area lighting is developed to an entirely different set of design and performance criteria from pedestrian-level luminaires, which are different from criteria used for wall-mounted products. This approach addresses performance requirements, physical scale, detailing and the perspective from which products are viewed when installed in real-world environments. The process also recognizes that outdoor area lighting is seen most often when it is not functional, during the day. This daylight visibility means Kim products must be attractive when they are not in use and perform well when the sun goes down. This sensitivity to product visibility, placement and function is a Kim hallmark.

The integration of design, from site/area lighting to mounting intimately with architectural surfaces, produces a unification that appears well-considered to site occupants. For example, the Solitaire, Structural and Era designs, for site/area and roadway illumination, share optical systems, providing the unprecedented opportunity to design around optical performance without compromising aesthetic considerations. For illuminating building surfaces and site features, Landscape Accents and AFL floodlights offer a wide range of options to satisfy virtually any need.

Every Kim product is produced to last from premium materials, finished in-house in Super TGIC powder coat and supervised through a program that is audited to an ISO-9001 standard. While several others have come to copy Kim product appearances, they fail to capture the attention to detail and spirit that come from being the originator of ideas.

## NoUVIR Research

*Concerned that our national heritage was slowly being destroyed by lighting, NoUVIR (pronounced new•veer) was formed 10 years ago to provide breakthrough lighting for museums and save the artwork of the world. Light fades and damages—even in top museums—in less than five years. After more than three years of intense research, this unique company invented the only 100-percent no UV (ultraviolet) and no IR (heat) lighting systems.*

NoUVIR uses acrylic fiber optics and a series of breakthroughs, including the only fiber-optic reflector, fiber-optic zoom lens, "headless" track, 60-second lamp change, etc., all resulting in 16 U.S. patents (with more pending). Today, NoUVIR's customers are top museums, archives, libraries, historic homes and private collections.

NoUVIR has changed fiber optics from sparkle-and-glow special effects to practical, highly efficient illumination systems. The lighting has predictable performance based on precise photometry.

The qualities needed to light and preserve fine objects are:

**Presentation**—enhancing beauty, color and brilliance with reflection-free, pure-white light with a CRI of 100 and color temperature of 3200K

**Preservation**—extending object life many times, compared to ordinary lighting, by using perfectly color-balanced visible light

**Conservation**—saving materials, manpower and operating costs through low-cost fiber with 10-year warranty, using one-third the energy of ordinary lights

These same criteria apply to non-museum artifacts, including clothing, shoes, jewelry, accessories, cosmetics, upholstery and even foods, where sales are based on appearance and profits are based on costs. Thus, NoUVIR fiber-optic systems are appearing in a variety of commercial and residential applications specified by architects and designers nationwide.

NoUVIR provides designers with pure-white, stone-cold illumination. The light is transmitted through durable, non-yellowing acrylic optical fibers. The light has absolutely no UV energy and no IR energy. No UV and no IR ... NoUVIR.

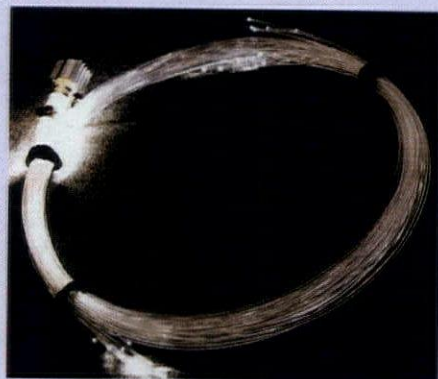

NoUVIR fiber-optic systems are simple and easy to install. A system is made up of a Cold-Nose high-performance projector that powers 32 fibers. Each fiber ends in a miniature light fixture. NoUVIR offers 50 different luminaires, five tracks, two lighting banisters and a variety of historic fixtures with flames replicated with fiber optics. In the photo (bottom), three basic downlights show beam quality and control: One 5-50-degree zoom pinspot can put 1500 fc in a 1-in.-diameter beam on a gemstone 12 in. away or put 10 fc in an 18-in.-diameter beam on a painting 18 ft. away across the room.

The company's 120-page catalog is an education in fiber optics. It is virtually a design manual. It includes specifications, applications, full-scale clip art, design data and detailed, measured photometry. Or go to a new website, [www.nouvir.com](http://www.nouvir.com), for more information.

*NoUVIR. No other manufacturer comes close to the superior performance and reliability of these products.*

*One Cold-Nose projector with one lamp.*

*Powers bundle of 32 optical fibers.*

*For 32 lights. Photo shows a selection of standard downlights: flood zooms from 36 to 72 degrees, spot from 15 to 50 degrees and pinspot from 5 to 50 degrees (10:1 zoom range).*

# company profile

## Lutron Electronics Co.

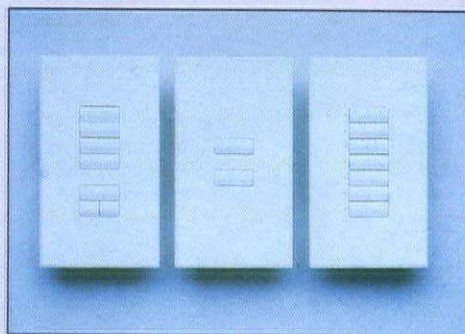

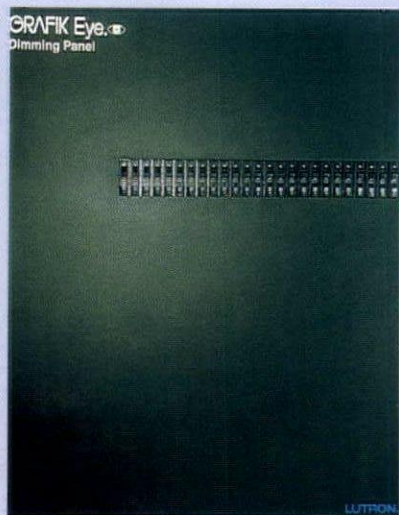

*Since its founding 40 years ago, Lutron Electronics Co., Inc. has emerged as the world leader in residential and commercial lighting control. Through continued innovation, Lutron has grown from a modest business that marketed two products to a company that now provides more than 11,000 products worldwide. Lutron's products range from simple dimmers that control the lights in one room to comprehensive architectural systems that control every lighting circuit throughout large facilities.*

Well-known for reliability, elegant design and superior performance, Lutron is the brand preferred by lighting designers and specifiers. Lutron's lighting controls are used in all kinds of spaces including homes, office buildings, restaurants, hotels, airports, museums, conference centers, schools and houses of worship. Lutron's systems also control the lighting environment in countless high-profile locations such as the Getty Center, Trump Tower, St. Patrick's Cathedral, the Taj Mahal, the Guggenheim Museum in Spain, the Mayo Clinic, Buckingham Palace, Lincoln Center and the Statue of Liberty. In addition, Lutron controls are regularly selected for corporate boardrooms and for the most exclusive private residences.

Lutron's technological achievements and uncompromising quality standards are acknowledged throughout the lighting industry. Lutron now holds more than 85 United States patents and many foreign equivalents. Lutron was also one of the first 20 companies in the United States to be registered ISO 9001, the strict international quality process standard.

In 1961, Joel Spira—Lutron's founder, chairman, CEO and director of research—invented and patented the first commercial electronic solid-state dimmer, one of the most important milestones in the evolution of lighting control. Starting with this invention, one that literally redefined the concept of dimming, the company has continued to pioneer the design and manufacture of lighting control products that not only add beauty, convenience and flexibility to any space, but also save energy.

Lutron offers international sales and service for its lighting controls, with offices in London, Berlin, Hong Kong, Singapore and Tokyo. Service is available within 24 hours in the continental United States and within 48 hours worldwide. For information or professional assistance on any product, Lutron maintains a toll-free Hotline 24 hours a day, seven days a week—(800) 523-9466—and a comprehensive website at [www.Lutron.com](http://www.Lutron.com).

Early Application Deadline: **August 24, 2001**

Final Application Deadline: **September 21, 2001**

Examination Date: **November 3, 2001**

# 2001 lighting certification examination

The LC is a professional credential and may only be used by individuals who have successfully met the eligibility and examination requirements.

LCs have a broad knowledge base in an increasingly specialized practice, and the certification demonstrates value to the public at large as well as the industry.

It's a competitive world out there. To build your business, and keep it thriving, you need every advantage you can get. If you design or specify lighting, or if you buy, sell, install, maintain or manufacture lighting products, you can't afford to overlook the benefits of professional certification through the NCQLP.

The NCQLP is a non-profit independent certifying body founded by government agencies and other organizations in the lighting industry. Its mission is to protect the well-being of the public through effective, efficient lighting practice. The NCQLP establishes the education, experience and examination requirements for lighting certification.

Comprised of 17 member organizations representing government agencies and lighting-related organizations, the NCQLP is supported by its member organizations and industry contributions supplemented by major grants from the Environmental Protection Agency (EPA) and the Department of Energy (DOE). Membership is open to organizations and associations in lighting and related industries.

NCQLP Certification is a voluntary, industry-led effort that recognizes professionals who have met specified basic standards as measured by the Lighting Certification Examination and demonstrates to the public that the individual can apply fundamental lighting principles and techniques.

## NCQLP

National Council on Qualifications  
for the Lighting Professions

- Yes, please forward a copy of the 2001 LC Candidate Handbook and add me to the NCQLP mailing list.

## Ushio America, Inc.

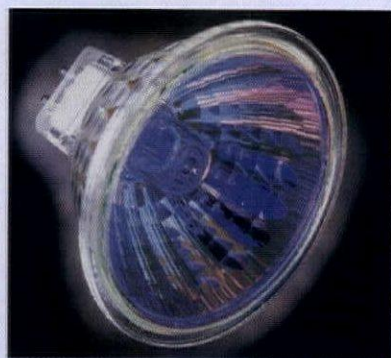

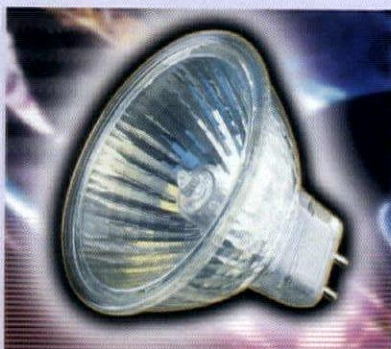

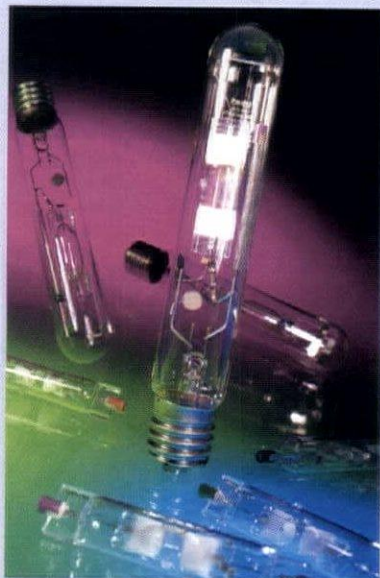

*Ushio is an international manufacturer of specialty HID and halogen light sources for a variety of general illumination applications, including landscape, architectural and fiber-optic designs.*

Ushio's series of Ultraline MR16 reflector lamps are rated at 10,000 hours of useful lamp life. Our Ultraline series is available in 35W and 50W versions with wide, medium and spot beam spreads. The special quartz burner on the Ultraline lamps eliminates 90 percent of the UV emissions, which tend to fade and discolor sensitive objects. Another unique attribute of the Ultraline series is the titanium oxide coating on the lamp reflector. While the dichroic reflector coatings of generic MR16s tend to degrade with lamp life, leading to color shift and light loss problems, the titanium oxide coating on the Ultraline eliminates this problem and provides consistent color throughout the life of the lamp.

Ushio's new UHI Colorlite series of colored, compact metal halide lamps produces saturated colors of green, blue, magenta and orange without the use of colored lenses or gels. Ushio's Colorlite series is available in double-ended, recessed single-contact-based 150W versions. Lighting applications include amusement parks, open-air theaters, museums, galleries, stage effects, building accents and garden lighting.

Ushio's Whitestar is the newest 4200K high-color-temperature lamp added to our series of specialty MR16 lamps. Balanced for light in the visible spectrum range between 480nm and 630nm, the Whitestar lamps also reduce emissions in the UV range. The Whitestar provides a better alternative to other "full spectrum" MR16s. The Whitestar is available in a 12V 50W version with a 36-degree beam spread. The Whitestar features a luminous intensity of 1,200 candelas and a useful lamp life of 4,000 hours.

For more information on these and other lamps from Ushio America, Inc., call our Marketing Support team at (800) 218-7446.

setting the global standard for lighting design excellence

# 18th annual international lighting design awards

# IALAID

# call for entries

INTERNATIONAL ASSOCIATION OF LIGHTING DESIGNERS

# IALD

## Program Description

The Lighting Design Awards were established to increase awareness of quality lighting design by recognizing lighting installations which display high aesthetic achievement backed by technical expertise. The awards exemplify a synthesis of the architectural and lighting design process and a sensibility to energy usage, economics, and sustainable design. As a collection of work, the awarded projects illustrate the diversity of techniques used to create outstanding lighting design.

## 2001 Eligibility

Anyone may enter a project for an award. The project must be a permanent architectural lighting design solution, interior or exterior, for which construction was completed after 1 June 1998. Lighting products, lighting equipment, and lighting design for theatrical performances are not eligible.

## Judging

Projects will be judged individually based on aesthetic achievement and technical merit in accordance with the designer's concepts and goals. The IALD encourages submissions of all types and sizes of projects. This is not a competition, there is no minimum or maximum number of awards granted. Each project will be judged on its own merits, not against other projects. Judging will take place over two days in February.

## Awards

There are two types of awards, Awards of Excellence and Awards of Merit. Special recognition may be given for certain unique solutions. Award winning projects will be recognized at the IALD Awards Dinner and Presentation on May 31, 2001, in conjunction with LIGHTFAIR INTERNATIONAL in Las Vegas, Nevada. Winning projects will be published in leading architectural and design publications and included in the IALD slide library.

## Submission Requirements

All submissions must be in an 8-1/2 x 11 inches or equivalent format. No mention or identifiable illustration of a specific lighting design firm or designer may appear as any part of the presentation except the cover page.

INTERNATIONAL ASSOCIATION OF LIGHTING DESIGNERS

# 18th Annual International Lighting Design Awards

CO-SPONSORED BY ARCHITECTURAL LIGHTING MAGAZINE

## CALL FOR ENTRIES

Please include all of the following for each entry:

**Cover Page:** Please provide the IALD with the following information on a cover page to your entry:

- Entrant's Name
- Street Address, City, State or Province, Postal Code, Country
- Phone and Fax Number
- Name of Project
- Location of Project
- Date of Completion of the Project
- Lighting Designer on Project
- Size of Project (in square feet or meters)
- Installation Cost of the Project
- Watts per Square Foot or Meter

**Written Brief:** A synopsis of the special challenge(s) or restraints of the project and a description of your design solution (75 word max.) This is a critical part of your submission and is the only written information read in the first round of review.

**Keyed Description:** A technical and conceptual summary of the project that is cross-referenced by number to the slides you have submitted (50 words per slide max.). The description should include types of fixtures used and reasons for their selection.

**Slides:** The IALD recommends a minimum of six slides and maximum of ten slides per project. The quality of the photography is important in the judging process. Although the images do not need to be professionally photographed, they should be of sufficient quality to illustrate your work. Please avoid the use of fill light, or, if that is not possible, clearly identify images which include fill light or daylight. Digitally enhanced or retouched photographs are not allowed. Please identify any areas in photographs that were not the work of the submitting lighting designer. Entrants are encouraged to include photographs, which show the project in use, in context with its surroundings, and from a human vantage point. Smaller scale projects should show more detail rather than reducing the number of slides. If plans and drawings are required to describe the lighting solution, we recommend photographing essential information and including them as slides. If the project is a renovation, an image of the project before changes is recommended. If the project includes exterior lighting, at least one daytime photograph is recommended. All slides must be labeled with project and firm name and numbered to correspond with the keyed description. With slides positioned right reading, number each slide in the upper right corner and place project name in the upper left corner of the slide. Photographs, drawing, and/or magazine articles will not be considered.

**Return of Slides:** The IALD will retain the slides of all entries for educational purposes unless you specifically request that they be returned. If you wish your submission to be returned, please indicate so in writing and include a return self-addressed envelope with the submission.

**Entry Fee:** (per entry):

- \$40 (U S ) IALD and LIRC Members
- \$75 Non-Members

Payment is by check, money order, or Visa or MasterCard credit cards. Checks must be payable in United States currency, made payable to IALD. A single payment may be used for multiple entries. Please do not send cash.

**Address entries to:** IALD Awards Program, International Association of Lighting Designers, The Merchandise Mart, Suite 11-114A, 200 World Trade Center, Chicago, IL 60654 USA Telephone 312-527-3677 Facsimile 312-527-3680 E-mail: iald@iald.org Make sure you include:

- Cover Page
- Keyed Description
- Entry Fee
- Written Brief
- Slides

**Incomplete entries will not be considered.**

**Deadline:** Submissions must be received no later than February 1, 2001.

## Aromat Corp.

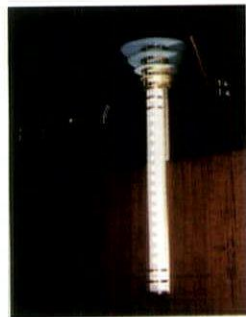

Aromat Corp. offers the NAI S DCP 39, 70, 100 and 150W electronic metal halide ballast, featuring DCP technology, providing superior color rendition, uniform lamp color and improved lamp life. All NAI S DCP ballasts feature a five-year warranty, energy savings, a "shut-down" function protecting the entire system at end-of-lamp life, thermal protection for high-heat applications and cool, quiet operation. All models are available for side-lead or junction box applications for 120 or 277V.

CIRCLE NO. 50

## C.W. Cole & Co., Inc.

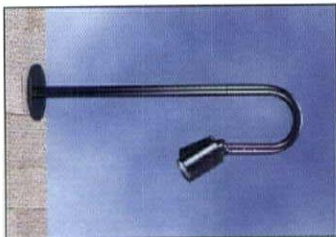

C.W. Cole & Co., Inc. offers the ability to develop custom lighting fixture designs—from the simple to the complex. Designs move from concept to finished product with Cole's full knowledge of the various light sources, materials and application conditions. Whether the requirement is decorative or functional, a custom fixture demonstrates a commitment to excellent building design.

CIRCLE NO. 53

## B-K Lighting

The Sign Star series delivers high illumination from trim 10W-voltage fixtures. The Twin Sign Star B (shown) uses two MR16 halogen lamps to 50W. Can be mounted in the up or down positions. Choose rectangular lenses to achieve a wide, even distribution of light. For more information, phone (559) 438-5800, fax (559) 438-5900 or email [info@bklighting.com](mailto:info@bklighting.com).

CIRCLE NO. 51

## Cherry Tree Design

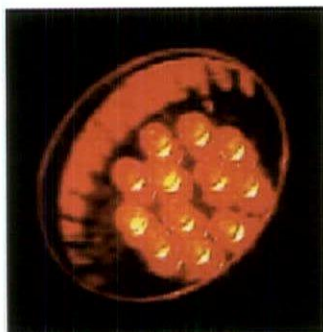

The Kyoto Pendant—Japanese architecture echoed in the gently flared lines and interlocking joinery. Shown in Solid Cherry with Ocean Mist Paper, this pendant is also available in Walnut and Maple, plus a variety of diffuser options. Our lighting catalog features Asian-, Contemporary- and Craftsman-style lamps and fixtures. We also build custom lights for commercial and residential projects. For more information, contact us at (800) 634-3268 or visit us at [www.cherrytreedesign.com](http://www.cherrytreedesign.com).

CIRCLE NO. 54

## Boca Flasher

Boca Flasher is proud to introduce its newest LED lighting fixture: the 12V MR16 replacement lamp. Boca offers the MR16 in red, blue, green, amber and white and a color-changing version that runs through a rainbow of colors in a continuous loop. For information on this and other products, visit [www.bocafasher.com](http://www.bocafasher.com).

CIRCLE NO. 52

## Cogent Light Technologies

Cogent Light Micro Illumination Technology takes light where it's never been before. Patented optical platforms from Cogent Light capture the maximum amount of light energy and efficiently launch this energy into fiber optics—without the damage of IR and UV light. The new SolarTec CL illuminator from Cogent Light uses this technology to provide the highest level of performance to the entertainment, architectural and pool/spa markets.
