The State of the Art

Architects and designers have an inner drive to re-make the world around them. To improve it. Architects have an imagination that allows them to dwell in worlds beyond current realities.

And too, architects and designers are perpetually dissatisfied. This is actually a useful trait because it drives them to solve problems and invent new things all the time. This creative power not only makes the world a better place but it creates economic value. All around the world, architects and designers are acting as economic multipliers.

Here at *DesignIntelligence* and the *Almanac of Architecture & Design*, we like to track and measure progress. We have grown and expanded our data collection every year. And now, this 17th edition of the Almanac has established a new record for the sharing of data about professional practices and the award-winning work that is created by them.

Indeed, the inner drive to improve the world's built environment benefits us all. Architects understand the blend of the creative and the practical. They understand the taffy-pull between the two, where the really interesting solutions reveal themselves. We see innovation unfolding at satisfying and accelerated levels.

The power of design has never been more urgently needed to address global challenges. And while the design professions are relatively small, they carry great clout. There is potential for even more Impact. The growth of the design profession means that in 2016 we have reached full employment and there is a greater need for more architects and designers than ever before. The top 100 firms in this Almanac will invoice well over \$10 Billion dollars. That is just the largest 100 of over 10,000 firms. We rate and list the top 1,000. These are not only going concerns but also places of inspiration. Many are reinventing the industry norms. Our research reveals that there is strength, too, in small and medium size firms. Furthermore, the design professions are expanding beyond traditional boundaries. The data that is organized through our research, combined with the graphs and pictures, show how firms are leading not only in financial terms but also in the advancing quality of the work. Form and function. This translates into community development, planning, and placemaking. All for the common good. We celebrate design excellence.

We welcome you to visit with us about research needs that you have. We like to cover new ground. To solve puzzles. At our fundamental base we track trends every day. Thousands of them. All sizes.

We have discovered that architects and designers are not only adept at design, but also adept at business—clearly articulating value propositions to clients and communities. The trends we watch now include sustainability and all the savvy that goes along with it—integrated, collaborative design. Globalization. Talent shortages. Technology is marching

forward at advanced rates never before experienced. Demographic shifts show that the average age of the population is rising. People are living long, healthier and more productive lives. The productivity of design firms is advancing—thanks to better management. Architects and designers now show themselves to be leaders with strategic optimism. Design goes far beyond aesthetics, and so metrics count. Design matters.

As a reader of this *Almanac* we hope you will come to experience the richness of a new profession. Check out our web site at www.di.net/almanac and you will see even more data and information chronicled into meaningful information that you can use to understand and plan forward.

All of our research is underwritten by the Design Futures Council. Without them, this 17th edition would not be published. You can visit the DFC web site at www.designfuturescouncil.com. The DFC generates the flow of ideas to further strengthen our research and the applications that can further advance the quality of life and prosperity, worldwide.

Wishing you good health and prosperity,

Jim Cramer, Hon. AIA, Hon. IIDA, CAE

NORTH AMERICA'S TOP 1,000 ARCHITECTURE AND DESIGN FIRMS |

This chapter features an alphabetical listing of leading North American architecture and design firms with data about the type of services they offer; their size, headquarters, and geography; the market segments they work in; and metrics from the *DI Index*.

America's Leading Architecture & Design Firms 2016

This section of the *Almanac* features an alphabetical listing of leading North American design and engineering firms selected by the editors. Each year, *DesignIntelligence* polls architects and designers in North America regarding their firms' officers, firm size, primary services offered, market segments and geographical locations served, and the nature of their practices. The firms are invited to participate in additional research underwritten by the Design Futures Council, which includes surveys about trends and market shifts, compensation and fees, technology, mergers and acquisitions, and management strategies.

The key to interpreting the tables is featured below. Firm size, headquarters (HQ), firm type, and markets are determined by *DesignIntelligence* surveys or from record files. Although the concept of headquarters might be less normative than in the past, this convention is still often used for diagnostic purposes in many market-data studies. If your firm has no headquarters and we have listed one, please make sure to complete a survey next year at di.net. The list of services includes market segments and specific professional specializations. The DI Index was determined by survey responses, with further research conducted by *DesignIntelligence* analysts. The criteria include geographic service coverage and reputation (awards as listed in the *Almanac of Architecture & Design* and recognition in professional and business publications). Of the five tiers, only firms in the top three (as represented by 3–5 bars) are included due to space considerations. Abbreviations were used in some firm names due to space constraints: architecture = Arch.; architects = Archts.; associates = Assoc.; construction = Const.; engineers = Engrs.

Principals of firms who want to be included in our next *Almanac* can obtain and/or fill in a survey at di.net; email the editor, Jane Wolford, at jwolford@di.net for a copy; or call *DesignIntelligence* at (678) 879-0929. Firms appearing in this *Almanac* can expect to receive a copy of next year's survey in the mail soon or can request a survey by contacting DI or the editor.

DesignIntelligence 333 |

This chapter features a ranking of America's top 333 architecture firms, along with useful contact information and pertinent data.

DesignIntelligence 333

The *DesignIntelligence* 333 ranks the top 333 architecture and design firms in North America. To compile the most accurate and up-to-date information, firms throughout the United States and Canada were surveyed during the spring and summer of 2014. Under the direction of the editors, extensive research was conducted by the *Almanac* staff and the research staff of *DesignIntelligence* to compile a comprehensive geographically and demographically diverse group of firms that would qualify for inclusion. Professional associations, media lists, client organizations, and conference registrations of the Design Futures Council were also studied to determine the most active leading firms. *DesignIntelligence* also researched additional media sources, such as leading professional and business publications read by clients in each of the areas of specialty.

The firms were mailed a letter inviting them to participate in the survey, along with a copy of the survey. The survey asked for information regarding their areas of specialty, employment counts, number of offices, fields of professional practice, 2014 gross professional fee revenues, leading officers of the firms, and other relevant information. The data collected was also used for the *Almanac's* Directory of North America's Top 1,000 Architecture & Design Firms.

Telephone calls and emails followed mailed surveys if additional information was needed. Each firm included in this *Almanac* was contacted a minimum of three times by mail, email, or telephone. When firms did not respond, estimates were made based on previous surveys completed by the firms for *DesignIntelligence*, listings in business media, and private research databases, reliable information on the Internet regarding employee counts, and other credible sources. At least three independent sources were used to estimate gross revenues when the firms did not supply these figures. Blank fields in the ranking section or missing profile information were due to the firm not returning its survey. The number of reported firm locations and actual locations may differ. Totals may not equal 100 percent due to rounding.

To fill out a survey for next year's *Almanac*, visit www.di.net/almanac/, call DesignIntelligence at (678) 879-0929, or contact the editor at jwolford@di.net.

AMIE

ADDITIVE MANUFACTURING INTEGRATED ENERGY

Designing for Zero Waste

AMIE explores the potential for a 3D printed panel system to combine into a single integrated system with the many functions of a conventional wall system. This can lead to zero-waste construction and buildings that can be ground up and reprinted in different forms.

Applying Complex Organic Geometries

Three-dimensional printing allows for complex, organic geometries with rounded corners and curved surfaces that reduce localized stress and mitigate turbulent exterior air flow. The AM panels create a structural design optimized for live loads, lateral forces and impact resistance.

Maximizing Energy Efficiency + Renewable Energy

Its high level of solid surfaces (79%) to glazed areas (21%) results in an extremely efficient energy-conserving enclosure. Photovoltaic panels are integrated into the roof surface and supplement the vehicle energy source. The panels' interior ribs are designed for vacuum insulated panels for the greatest thermal barrier in the least amount of space.

Listings of architecturally significant airports, aquariums, art museums, convention centers, and sports stadiums, with their requisite architectural statistics, are available in this chapter.

Airports: 1990–2015

Airports have evolved over the past century from small, utilitarian structures to sprawling multi-purpose complexes. Engineering challenges, the popularity of regional airlines, the need to accommodate larger jets, and expansion in Asia have resulted in the construction of countless new airport terminals since 1990. Many of those noteworthy for their architecture or engineering are listed in the following chart.

Airport	Location	Architect	Opened
Astana International Airport (KZT), Passenger Terminal	Astana, Kazakhstan	Kisho Kurokawa Architect & Associates (Japan)	2005
Barcelona International Airport (BCN), T1	Barcelona, Spain	Taller de Arquitectura (Spain)	2009

Aquariums

The opening of Boston's New England Aquarium in 1969 ushered in a new age for aquariums, combining the traditional ideas found in the classic aquariums of the early 20th century with new technology and revised educational and research commitments. Aquariums have since proliferated. The following pages highlight the major free-standing aquariums in the United States.

Aquarium	Location	Opened	Cost
Alaska SeaLife Center	Seward, AK	1998	\$56 M
Aquarium of the Bay	San Francisco, CA	1996	\$38 M

Art Museums

By some calculations there are more than 16,000 museums in the United States. While the collections they hold are often priceless, the facilities that contain them are frequently significant, especially amidst the recent museum-building boom led by world-class architects. The following chart, while not comprehensive, lists architecturally significant US art museums.

Museum	Location	Architect (original)
Akron Art Museum	Akron, OH	Dalton, van Dijk, Johnson & Partners (conversion of the original 1899 post office)
Albright-Knox Art Gallery	Buffalo, NY	Edward B. Green

Pritzker Architecture Prize

In 1979, Jay and Cindy Pritzker established the Pritzker Architecture Prize to inspire **greater creativity in the profession** and to heighten public awareness about architecture. Today, it is revered as one of the field's highest honors. The prize, which includes a \$100,000 grant, is awarded each year to a living architect whose body of work represents a long-standing, significant contribution to the built environment.

Star Award

The International Interior Design Association's Star Award celebrates **individuals and organizations that have made extraordinary contributions to the interior design profession**. As the Star Award is merit-based, it is not necessarily granted each year. Although non-members are eligible, the IIDA board of directors (the selection body) only accepts nominations from IIDA fellows, chapter presidents, and directors.

Top Green Projects

The American Institute of Architects' Committee on the Environment annually selects the Top Green Projects to highlight **viable architectural design solutions that protect and enhance the environment**. Winning projects address significant environmental challenges, such as energy and water conservation, use of recycled materials, and improved indoor air quality. Responsible use of building materials, daylighting, efficient heating and cooling, and sensitivity to local environmental issues are some of the jury's considerations.

Twenty-five Year Award

The American Institute of Architects' Twenty-five Year Award celebrates **buildings that excel under the test of time**. Eligible projects must have been completed within the past 25 to 35 years by a licensed US architect, though the buildings may be located worldwide. Winning designs are still operating under the tenets of the original program, demonstrating continued viability in function and form, and contributing meaningfully to American life and architecture.

America's Best Architecture & Design Schools

America's Best Architecture & Design Schools is conducted annually by *DesignIntelligence* on behalf of the Design Futures Council. The research ranks undergraduate and graduate programs from the perspective of leading practitioners. This 16th annual survey was conducted in mid-2015.

Selected professional practice leaders, with direct experience hiring and supervising the performance of recent architecture and design graduates, were invited to participate in the research. Survey participants, who are drawn from the Greenway Group database of leading firms throughout the United States, verified that they are currently responsible for hiring or supervising design professionals in each of the design fields for which they responded: architecture, industrial design, interior design, and landscape architecture. Surveys from non-qualifying individuals were excluded from the results.

Fellows of the Design Futures Council

Senior fellowship in the Design Futures Council is granted annually to an outstanding individual(s) who has provided noteworthy leadership to the advancement of design, design solutions, and/or the design professions. Senior fellows of the DFC are recognized for significant contributions toward the understanding of changing trends, new research, and applied knowledge that improve the built environment and the human condition. Any person worldwide may nominate candidates. Final selection of the senior fellows is made by the Senior Fellows Selection Committee.

Number of Licensed Architects

Licensed architects in each state are divided into two categories: resident and reciprocal, or non-resident, registrants. Based on current population levels, the chart below also calculates the per capita number of resident architects in each state. The following information is from the National Council of Architectural Registration Boards' 2014 survey.

State	Resident Architects	Reciprocal Registrations	Total	Population	Per capita # of Resident Arch. (per 100,000)

AIGA, the professional association for design

One of the oldest and largest membership associations for professionals engaged in visual communication and graphic design, AIGA, the professional association for design was founded in 1914 as the American Institute of Graphic Arts. Its more than 25,000 members include professional designers, educators, and students in traditional communication design fields, such as type and book design, as well as such newer disciplines as interaction design, experience design, and motion graphics. In addition, AIGA supports the interests of those involved in design in other disciplines, professions, and businesses who are committed to advancing the understanding of the value of design. AIGA serves as a hub of information and activity within the design community through conferences, competitions, exhibitions, publications, educational activities, and its website.

About the Editors

James P. Cramer is founder and chairman of the Greenway Group, a management consulting firm specializing in strategy, leadership, and organizational health. He is the author of three best-selling books on professional practice leadership and the founding editor and publisher of the journal *DesignIntelligence*. Along with Jonas Salk, M.D., he founded the Design Futures Council in 1994 in La Jolla, CA, and in Washington, DC, at the Smithsonian Institute. Each year Cramer and his colleagues at Greenway Group conduct research on the future of the design professions. They currently have ongoing research in the fields of design education, executive compensation, business trends & shifts, and professional services value migration. His work has been featured in *Business Week*, the *Wall Street Journal*, *Architectural Record*, National Public Radio and elsewhere. Cramer is the former Executive Vice President and CEO of the American Institute of Architects and the former President of the American Architectural Foundation. He served as group publisher of *Architecture* magazine for eight years. He is an honorary member of the AIA, an honorary member of the International Interior Design Association (IIDA), and a Leadership Fellow of the Western Behavioral Sciences Institute (WBSI) in La Jolla. He is a Senior Fellow of the Design Futures Council, a Richard Upjohn Fellow of the American Institute of Architects, and past board director of the Society of Architectural Historians.

Jane Paradise Wolford, Ph.D., is an architectural historian and the editor of the *Almanac of Architecture & Design*. She is also a senior consultant with Greenway Communications and an editor for the Ostberg Library of Design Management. Wolford has a doctorate in architectural history, theory, and criticism from the Georgia Institute of Technology as well as a Master of Science degree in architectural history from there. Her doctoral thesis established the theoretical and practical framework for architectural contextualism in its definitions and aspects of construction that enable buildings to relate better to each other and encourage a more sustainable, cohesively built environment. She is a LEED accredited professional. She also studied at Westmont College in Santa Barbara, CA, where she earned her bachelor's degree in English, and the University of California Berkeley, where she received her teaching credential. She and her husband, Arol Wolford, founded Construction Market Data in 1981, a leading international construction information service. She served on the board of the American Architectural Foundation and the Octagon Museum for more than a decade. In our constantly changing environment she is passionate about the potential of architecture to transform our world—into a better place that nurtures our physical and spiritual health and supports our endeavors.

Library of Design Management

Every relationship of value requires constant care and commitment. At Östberg, we are relentless in our desire to create and bring forward only the best ideas in design, architecture, interiors, and design management. Using diverse mediums of communications, including books and the Internet, we are constantly searching for thoughtful ideas that are erudite, witty, and of lasting importance to the quality of life. Inspired by the architecture of Ragnar Östberg and the best of Scandinavian design and civility, the Östberg Library of Design Management seeks to restore the passion for creativity that makes better products, spaces, and communities. The essence of Östberg can be summed up in our quality charter to you: "Communicating concepts of leadership and design excellence."
