FOCUS ON PROGRAMS

Planning & Urban Affairs Committee: the National Perspective

Wed., Feb. 2, Noon; AIA Chicago Board Room
Sponsor: Planning & Urban Affairs Committee
Free; RSVP to Chapter office

Martha Lampkin, AIA, chair of the national Planning and Development Committee, will report to the Committee on national and component chapter activities in planning and will recap the national conference on sustainability held in October, 1993.

JRSA Midwestern Directors Reception

Thurs., Feb. 3, 5:30 PM; AIA Chicago Board Room
Sponsor: Government Affairs Committee
Free; reservations required; RSVP to Chapter office. Space is limited to first 25 respondents

Members who work in the area of justice facilities are invited to a hosted reception for attendees of the Justice Research & Statistics Midwestern Regional Conference. State level criminal justice research and planning directors from thirteen midwestern states and staff members of the US. Dept. of Justice, the Illinois Criminal Justice Information Authority, the Illinois State Police and the Chicago Police Dept. will be in attendance. Examples of AIAC members' work will be shown. The reception is hosted by the Illinois Probation and Court Services Association.

Forum on Chicago Regionalism

Tues., Feb. 8, 6:00 PM
Chicago Cultural Center, 5th Fl. Conference Room
Michigan Ave. at Randolph St.
Sponsor: Planning & Urban Affairs Committee
Cost: \$5.00 payable at the door; fax reservations to AIA Chicago are required

This forum will explore the potential differences in land use planning and building development comparing a "straight line" extension of our current transporta-

tion system with radically different alternatives. The program will review the region's development history, regional planning projections, alternative futures, along with a dose of "developer's reality."

The panel will be chaired by Larry Christmas, Senior Advisor to and past Executive Director of the Northeastern Illinois Planning Commission and President of the Village of Oak Park. He will be joined by Maxine Hansen, past Chairman of the DuPage County Plan Commission, and Scott Bernstein, President of the Center for Neighborhood Technology and a member of the Surface Transportation Policy Planning Commission.

University of Chicago Biological Sciences Learning Center and Research Facility Tour

Tues., Feb. 15, 5:30; PM 924 E. 57th St., Chicago
Sponsor: Corporate Architects Committee
Free; RSVP to Chapter office

James S. Gimpel, AIA, University Architect, will lead a tour of this newly completed building along with the building manager and project architects from the University and Loeb, Schlossman & Hackl. Meet in the lobby on 57th St.

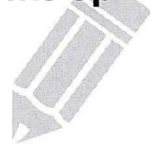

Demolition Permit Process/ Environmental Permit Process Issues

Thurs., Feb. 17, 4:00; Harold Washington Library
Sponsor: Government Affairs Committee with the Building Owners and Managers Association (BOMA), and the Chicago Development Council
Free; RSVP: City of Chicago, Chris Lynch, FAX 312/744-0682 or VOICE 312/744-3973

This is the next program in a series developed with the City of Chicago Department of Buildings. Program is free; City permit handbooks will be available at the meeting for \$15.

Multimedia Applications in Architecture

Wed., Feb. 17, 5:30 PM; Apple Computer Market Center, 10 S. Wacker Dr., Suite 3300
Sponsor: Computer Committee
Free; RSVP to Chapter office

Representatives from Apple will demonstrate current trends in creating and using various types of multimedia computer data depicting still and time dependent project information. AIAC members will show examples of their project work that takes advantage of computer-aided multimedia techniques. Attendance is limited.

It's Time to Peek out of the Bunker: Lessons Learned from Surviving the Recession

Tues., Feb. 22, 5:30 PM; AIA Chicago Board Room
Sponsor: Office Practice Committee

After three years of defensive thinking, tough decision-making and struggling for survival, there are signs of improvement. It's time to get out of the bunker and once again think about profits and even growth.

What have you learned or done differently in the past three years which should be continued even as we see some improvement in the industry? You may have made changes in staffing, training, computerization, marketing, clientele, contracts, collections, fee structures, or the services you provide. Which changes should be kept? In what areas is it safe to return to the 1980s?

Join us to discuss these issues with members of three prominent firms. William D. Bradford, AIA of VOA Associates, James C. Jankowski, AIA of Ross Barney + Jankowski, and Dan Wheeler, AIA of Wheeler Kearns will share what they've learned and how these lessons have changed the way they plan to operate in the future.

Technical Committee: Time for Feedback

Thurs., Feb. 24, Noon; Chicago Bar Association, 321 S. Plymouth Ct. Sponsor: Technical Committee
Cost: \$7.50 for a lunch ticket; purchase in the 1st fl. membership office of the CBA before program

As an experimental attempt to develop more "architect to architect" communication, the Technical Committee will sponsor this feedback session intended for those architects who wish to share knowledge and experience or wish to learn from other architects.

Improving Indoor Air Quality and Energy Efficiency through Integrated Planning

Tues., March 15, 5:30 PM; AIA Chicago Board Room
Sponsor: Committee on the Environment
Free

Architectural design, mechanical design and the integration of the two have a significant and long-term impact on energy use, capital costs, operating and maintenance costs and attainable indoor air quality. In this presentation, Paul D. Gilson, PE, Fellow ASHRAE, and mechanical engineering consultant, will discuss the design considerations within the scope of the architect and the engineer that can be taken to avoid the problems associated with "sick" buildings. A "sick" building can be described as one with any combination of poor quality ventilation, noisy air distribution, drafty air diffusion, illness-producing legionella, allergy trippers, volatile organic compounds in the work environment and other possible problems.

Soils Reports: What's in Them, How to Read Them, What You Should Know

Wed. March 23, Noon; Chicago Bar Association, 321 S. Plymouth Ct. (note change of date)
Sponsor: Technical Committee
Cost: \$7.50 for a lunch ticket; purchase in the 1st fl. membership office of the CBA before program

Clyde Baker, P.E. with STS, will not only instruct on how to read the reports but what information should be contained within them when the reports are prepared. The program, part of the continuing series of Senior Roundtable Programs, will be chaired by Richard E. Fencl, AIA.

LOOKING AHEAD

Planning continues for programs in the spring and summer. Mark your calendars now for these programs. Registration forms and more information will follow in the FOCUS and the Quarterly Calendar.

The Nuts and Bolts of Facilities Management

IFMA/Chicago and the Corporate Architects Committee are co-sponsoring this lunch meeting to be held Thurs., March 17 from 11:30 to 1:30 PM at the Federal Reserve Bank Building, 230 S. LaSalle St. It will focus on the implications of interior product selection and specification and feature speakers Donald Robideau of Turner SPD and Jeffrey L. Marcowitz, AIA of Project Management Advisors, Inc. Pre-registration will be handled by IFMA/Chicago.

Government Job Fair

The Government Affairs Committee will sponsor a seminar entitled "Business Opportunities in the Public Marketplace" on April 9 from 9:00 to 3:00 in the Conference Center of the Apparel Mart. The purpose of the seminar is to inform architects and engineers of the public agencies in the Chicago area that retain design professionals, their A/E selection procedures, and information about working with these agencies. Participants will include the Dept. of Aviation, the General Services Administration-Chicago, the Capital Development Board (CDB) Chicago office, the CHA, the CTA, METRA, the Chicago Park District, the US Postal Service, the PBCC, the University of Illinois at Chicago, Cook County, and Northern Illinois University. The cost will be \$30 for AIAC members and \$40 for non-members, lunch included.

Internship Development Program: What, Where, Why, and When

On April 12, the Young Architects Committee will present this free program at the Conference Center of the Apparel Mart. It will educate practitioners as well as intern architects about IDP, which will soon be mandatory for all Architectural Registration Exam candidates. Speakers will include Rob Rosenfeld, Director of Intern Services for NCARB; Gigi McCabe-Miele, AIA, Vice President of AIA Chicago; and Walter Lewis, FAIA, Chair of the Practice and Technology Division of the School of Architecture at the University of Illinois at Urbana-Champaign.

HOW'S BUSINESS?

by Alice Sinkevitch

A year ago, the answer was cautiously optimistic: not much new work yet, but a great increase in the number of RFPs and interviews. Recently, workloads are up—not to the levels of 1988, but significantly higher than in 1991. Beyond the usual responses of “we could always use more,” or “there’s never enough,” firms of all sizes report feeling less uncomfortable. They are signing new contracts and finding that delayed or shelved projects are coming back to life.

Some firms credit diversification; others cite specialization. Ray Green, AIA, of Green Associates Architects credits a focus on schools for his firm’s stability. Because of the tax cap law recently enacted in the collar counties, which requires a referendum for expenditures that used to be available within ordinary budget increases, Green has expanded his market geographically throughout northern Illinois and southern Wisconsin. In the past three months, he has added two new school districts as clients.

Frederick Phillips, AIA, of Frederick Phillips & Associates reports that 1993 was a very good year, largely due to a single residential developer. The residential market continues to be strong; most recent new clients have been residential developers and clients seeking custom-designed single-family homes. University work will make up the largest new market segment for his firm in 1994.

Jim Torvik, AIA, of Harry Weese Associates, anticipates continued strong interest in educational facilities. At Chicago State University, HWA is designing in association with Johnson & Lee a new student union building and a 360 bed student residence. They are also working on the restoration of the

Buckingham Fountain and a new church in Valmeyer, Illinois.

James Baird, AIA, reports that sixty percent of Holabird & Root’s new work is for universities, with the remaining forty percent split between corporate research and development, municipal, and other institutional work. Their most recent commissions include a new School of Law for the University of Dayton and a major addition to and renovation of the science buildings at Macalester College. Other projects in process include a Law School addition and renovation for the University of Wisconsin and a Science and Technology Facility for the University of St. Thomas in St. Paul, Minnesota.

Carol Ross Barney, FAIA, of Ross Barney + Jankowski Inc. sees transportation remaining a strong market area for her firm. They are also designing the installation of the “retired” Boeing 727 in the “Taking Flight” exhibit at the Museum of Science and Industry and will soon start repairs and renovations of Carl Schurz High School on the northwest side of Chicago.

Many of Perkins & Will’s most recent commissions are also institutional. Vice President of Marketing Liz Quebe reports work on a \$53 million K-12 school for American students living in Singapore and a \$35 million high school in St. Paul, Minnesota. Major medical projects include the University of Arkansas Medical Sciences facility, the St. Joseph Medical Center in Joliet, and a new ambulatory care center in Painesville, Ohio.

After the end of the commercial office boom of the 1980s, Skidmore, Owings & Merrill’s practice has returned to the more diversified mix that characterized the firm in the 1970s and early 1980s. The commer-

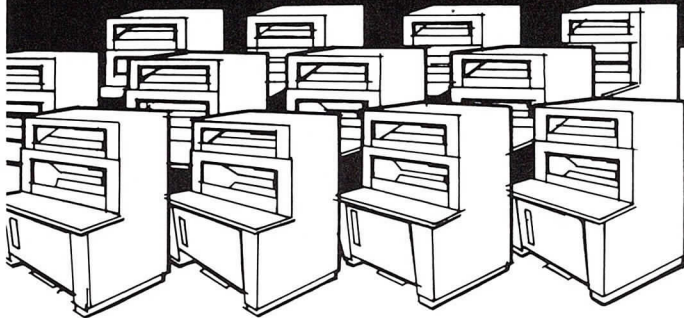

cial work is still strong but largely international. Among their biggest projects are the Jin Mao Building, a 3 million sq. ft. multi-use complex in Shanghai, China (completion 1997), and a 1.3 million sq. ft. Operations Center for KAL in Seoul (completion 1995). Due to be completed this year are the Sioux City Art Center in Sioux City, Iowa; a luxury resort condominium in Ixtapa, Mexico; and a new Psychology Building for Washington University in St. Louis.

Leonard Peterson, AIA, of O’Donnell, Wicklund, Pigozzi & Peterson (OWP&P), credits the firm’s diversity and their high percentage of repeat clients for their continued steady growth. Health care and interior architecture are two of their strong markets, and he sees increasing opportunities in housing, elementary and high schools, and planning. New commissions include interiors for the University of Chicago Center for Advanced Medicine, a learning center for Ameritech in Hoffman Estates, and a 50,000 sq. ft. renovation of a building for Hewitt Associates in Lincolnshire.

For many firms, the year is beginning with a healthier backlog. But principals and marketing directors remain cautious. Short lists are long. Gate-keepers are many. Continually rising is the power of the consultant/project manager (“public aid for out-of-work developers,” one architect calls it) on both private and public projects. Well-defined markets, strategic affiliations, and geographic expansion will be priorities for firms of all sizes in 1994.

Join the Office Practice Committee for their February program, “Lessons Learned from Surviving the Recession,” to find out how three successful firms that learned from the 1980s are managing in the 1990s. See p. 4 for details.

AIA Chicago's 125th Anniversary Lecture Series

Through the generosity of sponsors Petersen Aluminum Corporation and Herman Miller, Inc., AIAC will present a series of lectures to commemorate the 125th anniversary of the founding of the Chapter. The series will be co-sponsored by the City of Chicago, Department of Cultural Affairs. All programs are free and will be held in the Chicago Cultural Center second floor theater (Randolph Street entrance) beginning at 5:30 p.m.

The first lecture of the series will feature Thomas H. Beeby, FAIA of Hammond Beeby Babka and Cynthia Weese, FAIA, Dean of the School of Architecture, Washington University in St. Louis, Missouri with Victoria Lautman serving as moderator. The topic of the lecture, to be held on Wednesday March 16, 1994 at the

Cynthia Weese, FAIA

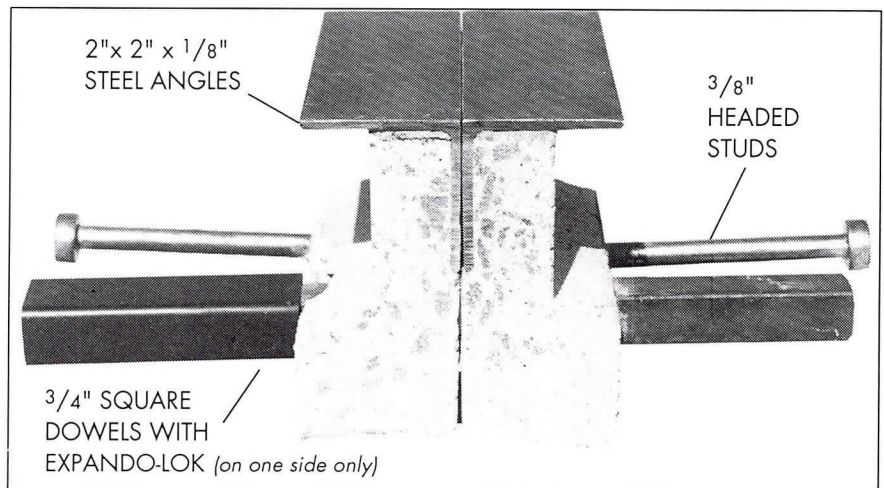

Thomas H. Beeby, FAIA

Chicago Cultural Center will be "Meanings". Speakers for future lectures will include Robert Brueggmann; Walter Netsch, Jr.; FAIA; Bertrand Goldberg, AIA; George Danforth, FAIA; Laurence O. Booth, FAIA;

James Nagle, FAIA; Stuart E. Cohen, FAIA; Ben Weese, FAIA; Gerald Horn, FAIA; C. William Brubaker, FAIA; and Stanley Tigerman, FAIA. Watch for a full schedule of lectures in the March FOCUS.

Introducing... the
STEEL ANGLE JOINT...
 another benefit of the
PERMABAN FORMING SYSTEM...
 for concrete floors

FEATURES OF THE STEEL ANGLE JOINT:

THE 2" x 2" x 1/8" STEEL ANGLE...

protects the joints in concrete floors at heavy vehicle traffic areas. (Aisles, doors, loading docks, etc.)

THE SQUARE DOWELS WITH EXPANDO-LOK

provide vertical load transfer while allowing horizontal movement due to shrinkage.

THE 3/8" HEADED STUDS...

are welded to the steel angle at 12 inches on center. They pass through the rail and extend into the concrete slab.

Chicagoans Win AIA Honor Awards

AIA Chicago members have been named winners of four of the Honor Awards for architecture and urban design to be awarded by the AIA at the 1994 National Convention and Design Exposition to be held May 13-16 in Los Angeles. From over 500 entries, a total of 17 Honor Awards for design excellence for individual buildings and 4 Honor Awards for urban design were selected.

The very successful Boston development **Rowes Wharf** by Skidmore, Owings & Merrill was cited for having set a new standard for waterside development and “demonstrating the power of architecture to capture the public imagination and restore life to neglected parts of the urban landscape.”

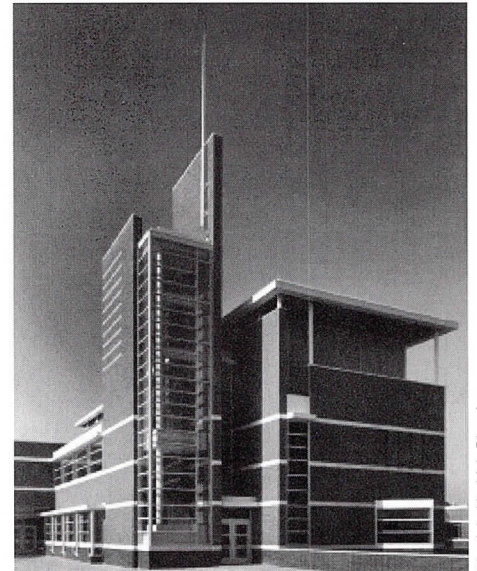

“A safe haven from a tough Chicago neighborhood,” **Cesar Chavez Elementary School** at 4747 S. Marshfield Ave., Chicago by Ross Barney + Jankowski Inc. was praised for being “playful and fun while demonstrating that seemingly diverse parts can be united to form an integrated whole.”

Nick Wheeler

The jury praised the “elegant, village like plan” of **Troy High School** in Troy, Michigan by Perkins & Will. “Though the school is quite large, its insistent horizontality allows it to be simultaneously monumental yet unimposing in its suburban site, a robust civic presence.”

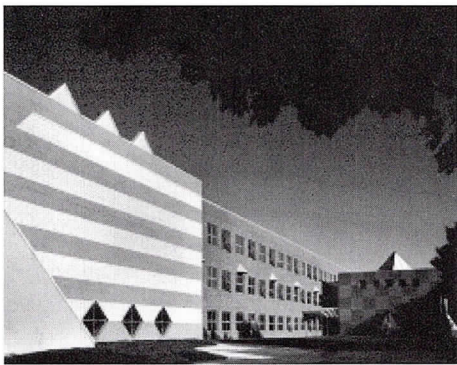

The Honor Award for Urban Design winner is **Paternoster Square Development Master Plan**, London, by Hammond Beeby Babka Inc. with master planners and building architects John Simpson & Partners and Terry Farrell & Company, London. This complex project addresses a seven-acre district of London in the shadow of St. Paul’s Cathedral, integrated modern, large-floor office buildings into a “scenographic urban precinct that will be a major

Merrick, Hedrich-Blessing

improvement over the nondescript commercial district built after World War II.” Hammond, Beeby & Babka were originally selected for the project because the clients, a consortium of Japanese and American developers, needed architects who had master planning experience and a thorough understanding of traditional approaches to design and planning. The project has recently received planning approval by the City of London and the architects are about to begin working drawings.

The awards are announced every year at the Accent on Architecture gala held at the National Building Museum.

Steve Hall, Hedrich-Blessing

American Institute of
Architects Chicago
1994 Awards Program

Call for Entries

American Institute of Architects Chicago 1994 Awards Program

Call for Entries

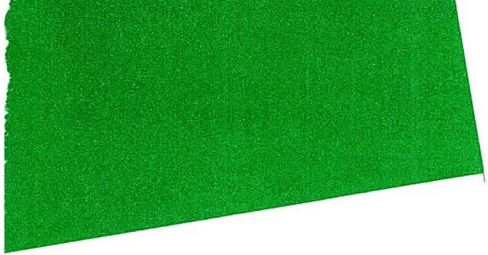

1994

marks a very special year for the American Institute of Architects (AIA) Chicago chapter: our 125th Anniversary. Founded in 1869, Chicago was the second chapter to be granted a charter in the United States. Our first President, William W. Boyington, was the architect of the Chicago Water Tower. As we begin to celebrate the valuable legacy that is Chicago architecture, we look to its future and it is with great pride that we present this year's Call for Entries.

The AIA Chicago Awards Programs began in 1955 with the Distinguished Building Awards. Since that time, new awards have been added, most notably the Interior Architecture Awards which were initiated in 1979 with a separate awards ceremony. In 1983, we published our first comprehensive catalogue of the awards. The catalogue, now known as *Architecture Chicago*, has come to be a yearbook of Chicago's best work. In 1991, the Design Commission combined the two awards programs to create a single gala awards celebration. Each year the awards have recognized a distinguished body of work from some of the top firms in the nation.

The Design Excellence Awards Ceremony will be held at the Hotel Nikko on Friday, **September 30, 1994.**

The Professional Excellence Awards will be presented at the Annual Meeting on Tuesday, **December 13, 1994.**

In order to properly recognize the varied contributions to the profession and our local built environment, citations for awards will be given at two separate events. The Design Excellence Awards will take place on September 30, 1994, and the Professional Excellence Awards will be presented at the Annual Meeting on December 13, 1994. As in past years, the Design Excellence Awards exhibit will again be displayed in a place of prominence for public viewing.

AIA Chicago invites you to participate in the awards program by submitting entries and nominating individuals deserving recognition for accomplishment and service to the community.

This is your chance to display your best projects to your fellow professionals, the scholarly community, the interested public audience in Chicago, students, and prospective clients through the medium of *Architecture Chicago 1994*.

American Institute of Architects • Chicago • 1994 Awards Program

Call for Entries

Adopt-a-School

After a successful pilot program, the Education Committee is seeking Chapter firms to participate in the 1994 Adopt-a-School program. The goal of the program is to promote the public's appreciation of architecture as both art and function. The means used to achieve this goal is through the adoption by Chapter firms of a school for a three year period. The adoptive firm commits to sending architect/teachers to the school to present the hands-on program over four class sessions. Over the four sessions, the architect interacts with the students in developing a neighborhood designed by the students under the guidance and direction of the architect.

To help start up the program, Petersen Aluminum Corporation has agreed to underwrite the cost of the teaching "kits" the architects will take to each school. Architecture firms interested in participating in this outreach program that serves the children of AIA Chicago schools should have a representative call Peggy Adducci of

Jack Train Associates at 312/332-0363 for further information.

Call for Fellows Nominations

Advancement to the AIA College of Fellows is granted for significant achievement in design, preservation, education, literature, and service. In order to be considered for fellowship, an architect must have been a member of the AIA and a registered architect for at least ten years.

The Chapter is now accepting recommendations for fellowship and will forward suggestions to the Fellowship Committee, which will begin meeting in the spring. The Committee will forward its recommendations to the Board of Directors for their July meeting. Those nominated by the Chapter will submit applications to the AIA Fellows jury in the fall.

Everyone is encouraged to recommend members to the Committee. Letters of

recommendation outlining a member's qualifications should be sent to: Fellowship Committee Chair, AIA Chicago, 222 Merchandise Mart Plaza Suite 1049, Chicago, IL 60654.

Manufactured Housing Ideas Sought

The AIA national Design Committee seeks innovative designs for HUD Code homes and modular houses which will be presented to the annual Congress of the Manufactured Housing Industry in Las Vegas, NV April 7, 1994. The purpose of the presentation is to introduce architects' ideas to the industry and to inspire manufacturers to build one or more of these designs. Submissions will be juried; only the best ideas will be presented in April. Ideas are due March 14, 1994. For format and program information, contact Frederick Phillips, AIA 312/922-0092; fax 312/922-8092.

wellness programs, to employee attitudes toward healthcare insurance plans. The report is available for \$150 (\$95 for PSMA and American Consulting Engineers Council members); call 704/521-8890 for more information.

The law firm of Stein, Ray & Conway will hold its **Third Annual Symposium for Design Professionals** on Fri., Feb. 4 from 8:00 AM until noon at the Chicago Sheraton, 301 E. North Water St.. Topics include "Know Your Limits: Exclusions to Your Professional Liability Policy" and "Out of Left Field: Subrogation Claims Against A/E's." The fee of \$150 will be waived for clients of Stein, Ray & Conway, AVA Insurance, and Euclid Insurance. Call Sarah Kowal at 312/641-3700 for more information.

The Structural Engineers Association of Illinois will present Prof. Sidney A. Guralnick, Perlstein Distinguished Professor of Engineering at IIT, speaking on "The Nation's Infrastructure and High Technology" at their dinner meeting on Tues. March 1. Prof. Guralnick will examine the state of the US infrastructure in comparison to that of other industrialized nations and explore the relationship between a nation's investments in infrastructure and its growth in worker productivity. The dinner will be held at Como Inn, 546 N. Milwaukee Ave., beginning at 5:30. Cost is \$30; contact Barbara Pries at 312/372-4198 by Friday, February 25.

The Urban Land Institute Chicago District Council will present "An Agenda for Growth of the Chicago Region: A Challenge to Our Leadership," a four-part monthly breakfast series that will take a comprehensive look at the issues affecting growth in the Chicago region. Nationally recognized authors and speakers will explore topics such as creating jobs and educating our workforce; capitalizing on ethnic and economic diversity; identifying both hard and soft infrastructure

needs; financing economic growth; and sustaining and enhancing livability. The series begins on Thurs., Feb. 24 with "Prospects for Economic Growth of the Chicago Region," featuring among others Donald Haider of the Kellogg Graduate School of Management; David Rusk, guest

Scholar of the Woodrow Wilson Center of Johns Hopkins University and former Mayor of Albuquerque, NM; and Clarence Page, Pulitzer Prize-winning columnist of the Chicago Tribune. The series is \$165; individual sessions are \$55. Call 800/321-5011 to register.

POSITIONS AVAILABLE

Adjunct Teaching Positions

The School of Architecture at the University of Illinois at Chicago is seeking Faculty for adjunct positions for the academic year 1994 - 95 to teach in the professional degree Bachelor of Architecture undergraduate and the Master of Architecture graduate programs: computer science, building science and structures areas; and the Bachelor of Arts in Architectural Studies programs. Candidates for the latter position need to demonstrate expertise in joining architecture and the liberal arts.

Applicants must hold a terminal degree in their fields; M.Arch and Ph.D.s preferred.

Director, Bachelor of Arts in Architectural Studies Program

The School of Architecture at the University of Illinois at Chicago is seeking a distinguished candidate for the position of Director of the Bachelor of Arts in Architectural Studies program effective Fall semester 1994. The candidate should have strong educational, teaching and administrative skills and have expertise in joining architecture and the liberal arts.

The B.Arts in Architectural Studies is a new four-year program with a strong liberal arts component that prepares students to

pursue a professional degree at the graduate level.

The Director will be responsible for administering the development and implementation of the B.Arts in Architectural Studies program and will teach in one area of the curriculum. The position reports to the Director of the School of Architecture. The appointment will be a tenure-track position at the Assistant or Associate Professor level. Salary is commensurate with qualifications.

Nominees and/or applicants should have a terminal degree in their field.

Nominees and/or applicants for these positions should send letter of interest, resumé and references to: Kenneth Schroeder FAIA, Interim Director, School of Architecture, (M/C030), University of Illinois at Chicago, 845 W. Harrison, Chicago, IL 60607. Applications must be postmarked by **March 15, 1994.**

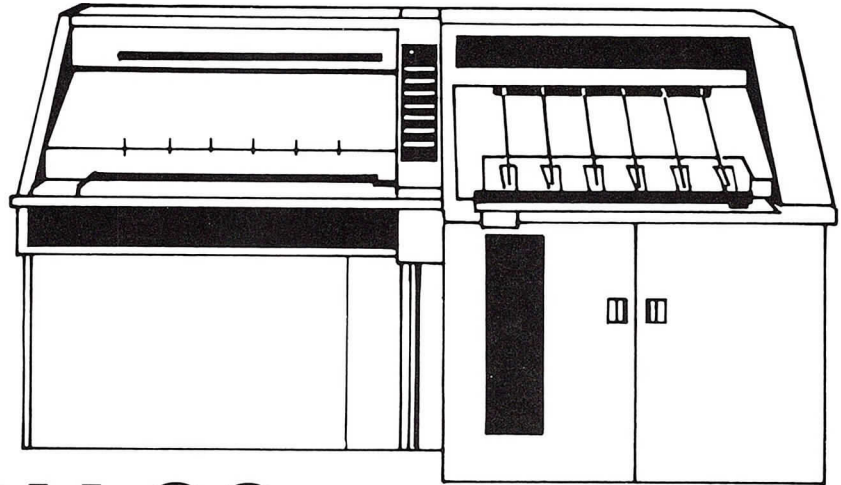

The University of Illinois is an Affirmative Action/Equal Opportunity Employer and is committed to providing equality of opportunity for all.

MOSSNER now has more repro-drafting capability than anyone in the Chicago area.

FIRST IN CHICAGO

Now...50% more capacity to enlarge and reduce drawings

INTRODUCING THE SHACOH 36 COPIER

- Enlargements to 210%
- Reductions to 45.8%
- Increments of 1/10 of 1%
- Widths to 36"
- Variable Lengths
- Exceptional Reproduction

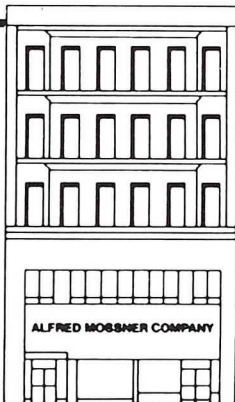

With the new SHACOH 36 added to our two XEROX 2080 copiers, Mossner has the most modern computer controlled repro-drafting capability in the Chicago area. The SHACOH 36 is the most versatile and the most accurate copier on the market today. And it's first in Chicago at Mossner, the largest reproduction house in the Midwest.

The new SHACOH 36 allows us to deliver exceptional quality copies in a shorter period of time to the exact specifications you require. You benefit with increased productivity and money savings. Compare our services. You'll see we can handle all of your repro-drafting requirements. With the greater capacity afforded by our new SHACOH 36 we have more capability than anyone in the area. Call 372-8600 for a quick pick-up and guaranteed delivery. We'll show you what service in repro-drafting is really all about.
