# When plans call for contemporary grandeur to blend with kamaaina past

Allied Builders System can execute a community dream.

Case in point is the transformation of the Alice Cooke Spalding House, built in Makiki heights in 1925, into the beautiful new Contemporary Art Museum. The assignment called for a creative approach by CJS Group Architects Ltd. and sensitive craftsmanship by Allied Builders – to preserve the estate's historic spirit and charm.

Construction challenges included creating a Grand Gallery via basement-to-ceiling reconfiguration, bisected by a bridge suspended from two smaller galleries; rebuilding the roof to conform to its original missionary style; matching detailed wood flooring, ceilings and wall panels; and carefully eradicating termite damage.

Now a treasury of public appreciation, the museum showcases world class contemporary art in an environment that remains residential in character.

**ALLIED BUILDERS SYSTEM**

Teamwork. Our motto. Our method.

# Introducing Hardiliner.<sup>®</sup>

Cementitious wall and ceiling board with flush joints for ceramic tile, wallpaper and paint.

Hardiliner offers architects, builders and tile contractors a permanent, highly water resistant wall lining for wet areas. It's also a viable alternative to greenboard and drywall when used on adjacent ceilings or walls.

Unlike drywall, Hardiliner is designed for high traffic areas - wall and ceilings - in wet and dry environments. Its smooth surface is made for all surfaces - ceramic tile, paint - even wallpaper.

Hardiliner is the only cementitious board available in 4' x 8', 4' x 9' or 4' x 10' sheets. A real timesaver permitting floor to ceiling installations, virtually eliminating exposed joints.

Hardiliner features a tapered edge, accommodating tape just like drywall, providing a flush surface wherever two sheets meet.

# And Hardibacker.<sup>®</sup>

The remarkable cementitious ceramic tile underlay for floors, countertops and shower areas.

Size is just one reason Hardibacker is easier to work with. You can order it in 3' x 5' sheets or 4' x 8' sheets to minimize joints.

No backerboard on the market is as easy to score and snap with a good clean edge. Something to consider, especially if you don't want your work all ragged around the edges.

To protect our contractors, James Hardie Building Products, Inc. backs Hardiliner and Hardibacker with an unprecedented limited five-year warranty. Meaning, in the unlikely event of a product failure, James Hardie Building Products, Inc. will fix the problem. It won't cost you a dime.

When you order Hardiliner and Hardibacker, ask for a copy of our exclusive five-year warranty.

You're looking at the most workable backerboards money can buy. Thanks to Hardiliner's and Hardibacker's unique cementitious composition, they weigh up to 50% less than other backerboards, so they're easier to carry. Easier to cut. And easier to install.

Hardibacker is unaffected by water, steam or moisture. It's cementitious composition makes an attractive lightweight alternative to the cumbersome backer products you may currently be using.

A 100-year-old company building its second century of success.
