IN THIS ISSUE...

According to Kermit the Frog, "it's not easy being green," but a dedicated group of Hawaii professionals who are promoting green architecture may disagree with that statement. In fact, environmentally responsible design and construction practices do not have to be expensive and may be easily attainable in Hawaii, as the articles in this issue point out.

COVER: A rural structure in Thailand built of bricks from on-site soil integrates with the environment both ecologically and aesthetically. Could this technology be used in Hawaii? See the story on page 5.

Hawaii Pacific Architecture is the bi-monthly journal of the AIA Hawaii State Council. Subscriptions are \$24 per year. Foreign subscriptions: \$48. Opinions expressed by authors do not necessarily reflect those of either the AIA Hawaii State Council or the publisher.
