The MISSOURI ARCHITECT

OFFICIAL JOURNAL OF
THE MISSOURI STATE ASSOCIATION
OF REGISTERED ARCHITECTS

The Missouri Architect is published quarterly by the Missouri State Association of Registered Architects and is mailed to all members of the Association and to other groups or persons as directed, without charge. Names of products or services, or other matter, does not constitute an endorsement by the Officers and Directors of the Missouri State Association of Architects, whether contained in the editorial matter, or as paid advertising. Address all inquiries, articles for publication, and information regarding advertising to either of the following:

AROUND AND ABOUT

Due to space requirements for the complete roster publication, the editorial matter must necessarily be limited. We should like to call attention to a book of interest to the profession, the "Missouri Hospital Plan," 5th revision, which is available free by writing to Mr. John D. Paulus, Jr., Director, Bureau of Hospital Facilities, The Division of Health of Missouri, Jefferson City, Missouri. We believe it will be of interest to most architects. Revisions to this volume were completed in compliance with regulations for administering Hill-Burton Funds, Law 725, 79th Congress, for construction of hospitals and health facilities in Missouri.

"Architects Day"

We call your attention to "Annual Architects Day" which will be held on May 7, 1955, at the Missouri Hotel. We urge that all members possible mark this date and reserve reservations for the events of the day. It should produce an attendance of twice that of last year. The program will be announced in the April issue of the "Missouri Architect" and it will deserve your support.

We welcome our new advertiser the Ebony Paint Company, whose Hugh R. Ennis is Chairman of the Board of Zoning Adjustment of Kansas City, Mo. Mr. Ennis has served on this board for over 20 years. Lucky Kansas City!

"Salesmen"

The following article, edited for our Missouri readers is largely copied from a letter by The Joint Committee on Professional Practise of the Nebraska Architects Association, AIA and the Nebraska Engineering Society. We believe it to be of interest to the professions of Architecture and Engineering, and after consultation with our esteemed Counsel, Senator A. L. McCawley, we include it for your perusal and comment.

Many persons who are not architects or engineers, but represent such firms before school and church boards or building committees, have acquired the title of "salesmen." These men should be scrutinized carefully and in obtaining commissions for architects or engineers, it may be well to inquire into their ethics; quite often their methods are at least unethical if not downright illegal. Representations are made which cannot be classed as "good practise" in either profession, and the oft repeated term that, "being more proficient, and therefore much less expensive," than duly registered, capable men, who maintain the offices devoted to honest practise should be a matter of grave concern to both professions.

No professional man should have representatives who are not of professional status, and it is so recommended by this Association. If only the registered professional architect or engineer made such contacts, then we might be sure that promises made would be kept, and that the practise of each professional would be kept within the code of ethics and the State Laws governing both professions.

Legal opinion has been sought regarding this section of the registration laws, and an interpretation of such loose practises has been given as follows: "It shall be unlawful for any person to practise or to offer to practise the profession of architecture or engineering in this state unless such person has been duly registered or is exempted under the law." "A firm, co-partnership, corporation, or joint stock association may engage in the practise of professional architecture or engineering in this state, provided such practise is carried on by persons registered under the law." Certain exemptions have always been recognized. These have no bearing on the public or private work of the type which is usual in architectural and engineering offices

throughout the state.

If salesmen who are not registered men, are employed by architects or engineers, they should be thoroughly and completely schooled in the recommended code of ethics and fair practise standards, to the end that no stepping over the line of unwise promises, vague statements of cost saving methods, cutting of what many believe to be minimum fee standards for honest work, may eventually be eliminated from sound professional practise.

Quotations from the recommended code of ethics governing professional practise which may be helpful to all practitioners are as follows:

"He shall to the best of his ability advise his client or employer, before undertaking any work, of the conditions or influences tending to defeat the purpose or objectives of such work.

"He shall not seek to hold up the work of others as his own.

"He shall conduct his practise in a manner consistent with the ideals of courtesy, personal honor, and the ethics of a learned profession."

The Missouri State Association of Registered Architects is wholeheartedly concurrent in the above expressed standards of professional practise, and expects to take appropriate action through its various committees, of any violations of the state laws, code of professional practises, and conduct unbecoming professional men who violate such laws or ethics. It is illegal to represent ones self

as architect or engineer unless registration in the state wherein such work is undertaken is an accomplished fact. Attention shall be brought to all those who so violate the established law and ethics.

AIA Regional Meeting

From the comments received by ye ed, there must have been a fine meeting at Wichita on October 21, 22 and 23. The Kansas Chapter, AIA is to be congratulated on the down to earth theme of their meeting which blossomed forth under "Of Grass Roots and Architecture" and the reports as to attendance, program and seminars have been universally good. Space forbids an exhaustive comment on the meeting; ye ed was sorry to have missed the meeting, it being the first one missed since regional meetings began here in 1945. However missing had its compensations, since ye ed was presented a new 8 lb, 7 oz. grandson, "Patrick Kevin Halvorson" — an Irish Scandinavian, if ever I saw one!

WE EXPECT TO SEE NOT LESS THAN 150 ARCHITECTS, WIVES AND ANY A-I-T's WITH GIRL FRIENDS OR WIVES WHO MAY BE ABLE TO TALK THEIR BOSS OUT OF SATURDAY OVERTIME TO ATTEND THE ANNUAL ARCHITECTS DAY MEETING ON NEXT MAY 7TH. SEE YOU!

Your advertisement HERE will look much better than what you are now reading, and will reach many people who are not now receiving your message; which to you is important. The rates are moderate and the results significant. Contact any member of the Missouri State Association of Registered Architects, for space in this publication, or to Editor, at 210 Westover Bldg., Kansas City 9, Mo.

For assured quality specify...

COOK'S *because*

you can be certain that with every mention of the name COOK, you're adding an extra something to your building . . . that extra is an assurance of the quality so important in the finishing materials you use.

Every brush-full of COOK'S paint is a product of years of research and "know how" . . . a paint to fit any specification inside or outside . . . each batch laboratory-tested to meet your very highest standards of beauty and utility.

And . . . to be sure of the ultimate in style and durability in the other decorating materials you use, look to COOK'S for . . . an exclusive line of highly-styled imported and domestic wallpapers . . . floor coverings that carry the names of the world's leading manufacturers . . . and complete glass and glazing service anywhere in Missouri.

For complete planning service and product information, talk to the manager of your nearest COOK PAINT STORE or write COOK'S ARCHITECTURAL SALES, P. O. Box 389, Kansas City, Mo.

PAINTS**

"Best for Wear and Weather"

Roster

The complete roster of members of the Missouri State Association of Registered Architects appears in this issue. Also the names of all the Architects-in-Training, which also regularly receive the "Missouri Architect." We hope that all registered architects whose names do not appear will become members by the time we go to press with the next issue. All architects registered in Missouri have received this publication since the initial issue, without cost, and we hope it has been of some use; we are also hopeful in asking those of you who have not joined the Association to do so now and lend your support to carrying out the journal.

Meeting

The Association Officers and Directors met on Saturday, November 6, 1954. Among many matters discussed was the annual "Architects Day" meeting, which will be held at the Missouri Hotel on May 7, 1955. We shall have the complete program outlined in the April issue. Starting early with this date in mind we

hope to secure a much greater attendance than we have had the past two years.

Other Matters

President Rex Becker reported that he had been discussing the establishment of a State Building Code with members of the Missouri Society of Professional Engineers. M. Dwight Brown of Kansas City is Chairman of a Committee of two, the other member being Truman Martinie of Joplin, which will meet with Officers and Directors of the M.S.P.E. to determine if we jointly are to recommend the establishing of such a Code.

Discussing Seminars with John D. Paulus, of the State Division of Health, President Becker suggests the activities of the Health Division be covered by seminars at the forthcoming annual meeting. An alternate suggestion was the possibility of Washington University handling the seminars through their faculty.

"EBONY PAINT KILLS RUST"

A refined coal tar base paint.

The ordinary paints consist of two bodies, the pigment and the oil. The oil evaporates and you have a chalky pigment left where moisture enters and rust begins to develop.

The philosophy of Ebony Paint.

Tar is a homogeneous body. Certain minerals are introduced into the tar in colloidal form.

When applied, polymerization occurs, and when the solvent which is used to dissolve the minerals has evaporated, a tough elastic film is formed hermetically sealing the surface.

In all of its history of over 60 years, and no matter how old the job, 20 to 30 years from one coat, no rust has ever been found under Ebony Paint.

So, you can safely specify Ebony Paint to all steel structures, no matter what the condition, and to Sewage Disposal Plants where strong acids are generated.

Ebony fully preserves and waterproofs foundations, concrete and cinder block walls, and basins and protects against termites.

STATE BOARD OF REGISTRATION FOR ARCHITECTS AND PROFESSIONAL ENGINEERS

Meetings of the Board:

Semi-annual meetings of the Board authorized and required by statute are held the second Monday in February and August each year.

Regular intermediate meetings authorized but not required by statute are held the second Monday in May and November each year.

Special meetings may be held on such dates and at such places as may be designated by the Chairman of the Board or by the Chairman of either Division with the approval of the Chairman of the Board.

Examinations for Registration:

Examinations for registration as professional engineers are given at Jefferson City once a year on the first Monday and Tuesday in October. The fee fixed by law for examination for registration is \$25 which entitles applicant to one re-take if he fails all or any part of the examination. The law requires applications for examination to be filed in the office of the Board 60 days prior to date of examination. Examinations for registration cannot be permitted until an application has been referred to the Engineering Division and returned with the

recommendations of the Division. The thorough review and investigation required to be made of applications for registration cannot be completed in less than 60 days. The examination for registration is a 2-day examination.

Engineer-in-Training Examinations:

Examinations for enrollment of engineers-in-training only are given annually by the Board between the first day of March and the first day of June at Columbia, Kansas City, Rolla and St. Louis. Examinations for enrollment are also given on the first day of the examinations for registration at Jefferson City, which is the first Monday in October each year. Fee for examination for enrollment, as fixed by law, is \$5.00 which must accompany an application for enrollment. Payment of this fee entitles an applicant to one re-take if he fails all or either part of the examination. The examination for enrollment is a one-day examination.

Primary Purpose of the Registration Law:

The primary purpose of the Registration Law is: "To safeguard life

and property; to promote and protect the peace, health and safety of the people; and, generally, to conserve the public welfare."

These purposes are mainly accomplished through the examination, registration and general supervision of architects and professional engineers.

The Board's official concern with criminal cases is of a secondary nature. The most it can do in such cases is to make its records available and submit such evidence as may have to the prosecuting attorney of the county in which violation occurred.

The Board should not refer a case to the prosecuting attorney on mere rumor. It must exercise the same care in referring cases to the prosecuting attorney, as in determining whether a charge should be dismissed as trivial, or set for hearing.

The Board Acts Officially:

The Board acts officially only when in session. However, a duly appointed committee of its members may proceed to discharge the duties of the appointment, subject always to the approval of the Board in regular session.

OFFICERS:

Bruce Williams, Joplin,
Chairman of the Board
Clemmie V. Wall, Jefferson City,
Secretary
A. L. McCawley, Jefferson City,
Counsel for the Board

HAYDITE SOFFIT BLOCKS

Advantages Galore for Roof or Floor

- FIRE-SAFE
- RAPID CONSTRUCTION
- BUILT-IN INSULATION
- HIGH ACOUSTICAL VALUE
- CEILING OF UNIFORM TEXTURE
- IDEAL FOR RADIANT HEAT
- PLASTER OR PAINT DIRECT
- MEETS RIGID LOAD TESTS
- LIFELONG DURABILITY
- LOW CONSTRUCTION COST
- VERMIN-PROOF
- LOW UPKEEP COST

Section of Soffit Block floor or roof showing how the blocks provide economical forming for monolithic slab and joist construction. Standard sizes provide for 6", 8" or 10" joists on 21" centers for spans to 26'-0". The smooth ceiling below has excellent acoustical qualities and high insulation value. Where desired, paint or plaster or other coverings may be applied directly to the block.
