THE ARCHITECT'S OATH

I profess my competence under the discipline of architecture.

I promise unending devotion to the task of continually studying, learning, seeking, experimenting, that I may become ever better educated and trained for my work.

I promise to my community undeviating adherence to the ideal of service to my fellow men as the goal of my effort, that I may honestly and fully earn my living—my right to live among them.

I promise to maintain that integrity in practice which will insure to each client the finest possible stewardship of his interest.

I promise in the execution of every commission to strive to create beauty as well as order, character as well as safety, spiritual value as well as convenience.

I promise to join with my fellow architects to make our profession of greatest possible usefulness and benefit to our society, to share and disseminate all valuable professional knowledge, and to pass on to the succeeding generation the full and fine discipline of our profession, enriched because of my dedication.

New Hampshire Chapter, American Institute of Architects Holds Winter Meeting at Laconia

New Hampshire Chapter, American Institute of Architects, held their winter meeting at the Laconia Tavern, Laconia, N. H. on February 17. Chapter president E. H. Hunter presided at the executive committee meeting preceding the dinner, introduced the guest speaker and conducted the chapter business meeting which concluded the evening.

An unusually good response to the winter meeting made the event particularly interesting to the architects, their wives and guests.

Some of the business meeting items discussed were the incorporation of New Hampshire Chapter, selection of delegates to the national convention of The American Institute of Architects to be held at Philadelphia, selection of a nominating committee for chapter officers to be chosen at the May meeting.

John R. Holbrook briefed the members on the work of a committee of architects composed of Mr. Holbrook, Stephen P. Tracy, Andrew C. Isaak, Richard Koehler, Joseph F. Lampron and W. Brooke Fleck. This group is working with Paul Farnum, State Department of Education, and a group of school superintendents in updating and revision of the School Handbook Guide. Future meetings are planned until the revision is completed.

Nicholas Isaak told the group of a nice gesture in which chapter members could participate. At a conference with officials of Laconia State School the desire was expressed to secure photos, murals, paintings, or anything in art which could

be used to decorate and enhance the schools interiors, once it had served its purpose for the architect.

Richard Koehler made a motion that New Hampshire Chapter, A.I.A. go on record as endorsing the fine gesture of Alfred T. Granger, in establishing "The Alfred T. Granger Student Art Trust Fund."

Winslow B. Eaves of West Andover, N. H., a sculptor, gave an interesting narration with colored slides on sculpture, its place and relation to architecture, the uses of many metals, woods, stones, and most recently, the use of plastics in sculpture.

John D. Betley was named as program director for the May meeting to be held at Manchester, with date and location to be announced. John Carter proposed that the members avail themselves of a guest speaker on the subject of bonds related to construction and liability insurance at the May meeting.

MANCHESTER, N. H.

DORSON-FLEISHER, INC. MANCHESTER, N. H.

The new offices and manufacturing plant for Nuttbrook Realty, Inc. Manchester, N. H. will be occupied upon completion by Dorson-Fleisher, Incorporated; nationally known manufacturers of high style women's shoes. The company presently employs about 350 people, and with the opening of the new plant will add about 100 people to its payroll.

The new factory will be a one-story structure, 500 feet in length, made up of 25 bays each 20 feet in length, and 107 feet in width. In addition to the manufacturing area the building will house office spaces, a factory store, boiler room, cement room, cafeteria and other spaces essential to shoe manufacturing.

Construction will be a prefab steel building with aluminum roof covering the main portion of the plant. Other roof areas are flat. Masonry and curtain wall construction will be used, with Kalwall a Manchester-made curtain wall product predominating.

PLAN

Concord, New Hampshire Meeting Site for Northern Association of Sub-Contractors

On February 9, the Northern Association of Sub-Contractors met at Concord. A group of about fifty, including members, prospective members and guests enjoyed a social hour, dinner and business meeting.

Featured speaker of the event was Professor Wilbur W. Widicus Jr. who spoke on his survey of various methods presently being used to stop bid shopping and bid peddling in the construction industries. The association voted funds for the survey at a previous meeting, and a booklet on the subject was prepared and distributed to members for their use and consideration in further programming of the associations activities on the subject.

Plans were discussed to establish a program through the invitation and participation of guest groups related to construction to attend future meetings of the association.

Robert Galloway, president, conducted the meeting, expressed his gratitude for the continued growth and interest by members. The next meeting of the association will be at Rutland, Vermont on April 20th.

**BOOKLET SAVE CONSTRUCTION
DOLLARS SUPPORTS SINGLE
CONTRACT METHOD of
CONSTRUCTION**

Contract awarding authorities from private industry and from all levels of government are quoted as supporting the single contract method of construction in a new brochure published by the Associated General Contractors of America, Washington, D. C.

Titled, *Save Construction Dollars with America's Basic Construction Method, The Single Contract System*, the brochure states that about 95 per cent of federal contracts and 85 per cent of the states use the single contract method, as well as the overwhelming majority of local government and private contract awarding authorities.

"America's Basic Construction Method" is cited as a time and money-saver through

SPRAGUE'S #4 DISTILLATE FUEL OIL

Sprague at Portsmouth offers a special fuel oil for use

- where #6 (Bunker "C") fuel oil is not considered practicable
- where #5 blended oil results in inefficient operation, excessive service calls, or unsatisfactory performance
- where #2 fuel oil is over 20,000 gallons per year

This is SPRAGUE'S #4 DISTILLATE, a refined product of consistent analysis, delivered to Portsmouth by tanker direct from the refinery, and stored separately in a 4,000,000 gallon capacity tank.

The use of SPRAGUE'S #4 DISTILLATE eliminates the problems of poor combustion and excess soot caused by variations in the oil's characteristics from load to load, does away with starting failures in cold weather, high preheating costs, and sludge precipitation in storage tanks, and requires less attention and service.

Deliveries of SPRAGUE'S #4 DISTILLATE are made in Sprague trucks throughout New Hampshire and into Maine, Massachusetts, and Vermont.

SPRAGUE'S #4 DISTILLATE is competitive in price with #5 blended oil and superior in performance. Let one of our representatives tell you more about it.

Telephone Portsmouth, GENEVA 6-4120 for further information.

Efficient coordination of the myriad of complex details in a modern construction job by the general contractor.

It is pointed out that not only do owners save money, but that responsible and capable subcontractors gain under the single contract system because without the general contractor providing the necessary coordination, there are frequently costly slowdowns.

Copies of the booklet were sent to engineers, architects, private companies, and members of Congress and governmental agencies.

DURACRETE

Q. We are designing a large mountain lodge for tourists near a prominent national park. The Owner wants to motorize the shutters so that they can be opened for five-minute intervals by depositing a quarter in a slot. This disturbs us. What do you suggest?

A. By all means give this type of problem to your Engineer. The wear on your own esthetic judgment would be too much—he has the fortitude to stomach it.

Q. Do you think there is much "copying" in architecture today?

A. Edgar I. Williams, FAIA, says 50 years ago the "most original" architect was one who had the very rarest books to copy from. Today, he says, the current periodical has replaced the old books but true originality is no more common than it ever was. Today's slogan: **Have magazine—can do modern architecture.**

SPRAGUE FUELS for New Hampshire consumers

Q. We had about six houses on our boards with all the clients very lukewarm about getting started on construction. Suddenly the threat of inflation has made them all want the houses finished overnight. What can we do to space this work out?

A. Not much really. The threat is serious. An early American pewter bedpan designed by William Will of Philadelphia sold for \$1,000 at a Parke-Bernet auction last month.

Q. Is there any definite meaning for the word research. It seems to be used any old way these days . . .

A. In the U. S., research is a synonym for planning. The term "to plan" received such a bloody battering by the Opinion Makers of the 30's and 40's (who considered it pink-talk) it became totally useless. Both words are often euphemisms for **procastination.**
