O O D L E S

Your clients depend on you to be knowledgeable of materials and techniques while still providing professional design expertise. You can depend on John Deklewa and Sons, Inc., for quality workmanship and professional management on all your construction projects.

No area general contractor is better known or more respected than John Deklewa and Sons.

Our most recent project, The Clubhouse at Nevillewood is now home to the Family House Invitational Golf Tournament.

Sweating The Details Is No Sweat

In the seventy-five years since our founding, we've produced some of the most dramatic and functionally well-integrated buildings in Western Pennsylvania, Ohio and West Virginia.

The Armenian room located on the third floor of the Cathedral of Learning at the University of Pittsburgh is the 22nd nationality room to be established at the university. The stone arched room copies the masonry techniques of church and monastery builders of the 11th century. This magnificent classroom was designed by Torkom Khrimiam who emigrated from Armenia in 1978.

We offer a full range of contractor services. Our pre-construction planning and value engineering, for example, can detect trouble spots early to help smooth out the production process. This insures your project comes in on time and on budget.

Whether you're considering renovation and retrofit of an existing structure or new construction, consult the experts at John Deklewa & Sons, Inc.

For a more detailed analysis of your specific needs, contact John E. Deklewa, President at 257-9000.

"Elm Court", a 9-acre private estate located north of Pittsburgh, involves unique additions and renovations. For example, the pool above is heated and has an ozone purification system. The deep blue water is surrounded by a granite surface edged in limestone. The pool is lined with hand made ceramic tile. On the left is a pool house sitting area. To the right is the "Fish Slide" built to hold two antique Indian carved marble panels giving the appearance of two carved fish swimming in the current of the fountain.
