THE OWNERS WERE SO
DISAPPOINTED WITH THE INTERIOR
THEY HIRED A FANCY PAINTER
to cover it up.

The Sistine Chapel. Tourists may flock to it today, but it wasn't such a work of art before Michelangelo got a hold of it. In fact, it was so uninspiring it took the persuasion of Pope Julius II to get him to lay brushes to it. If Big-D had built it, you wouldn't see a drop of paint on it. Why? Because our Design-Build delivery system helps ensure you never end up with a building you don't like. With Design-Build, we provide leadership throughout every phase of

the process. From the architecture, to the landscaping—and yes, the painting—we work with you as a team to deliver exactly what you have requested. Don't like something about your building? With Design-Build, you don't have to start over, live with it, or hire a world-famous artist to dress it up. We can adapt. To see how Big-D and Design-Build can add value to your next project, give us a call or drop by Big-D.com.
