# The "Phantom" Passes Unnoticed... Until You Need Him.

When you need a sprinkler system that answers construction and aesthetic standards, "The Phantom" is your answer! Once installed, you'll hardly ever notice him—hidden behind a flush plate that blends with practically any ceiling. But if fire threatens, he strikes back . . . fast! Within seconds, the plate

falls away, "The Phantom" pops down, and fights back. Reliable performance that won't give failure a ghost of a chance. So when your project calls for a sprinkler system that's architec-

turally sensitive, just remember "The Phantom." You'll find him discreet and effective, beyond a shadow of a doubt.

# Wisconsin Architect

# How much change does our American Economic System need: A lot? A little? None?

You may be reassured—or troubled—by how a number of your fellow citizens answered this question recently.

A recent study shows that an overwhelming majority of Americans have a basic faith in our economic system. Only a relatively small number favor major structural changes. Yet almost all—92%—feel some modifications are needed.

In the months and years ahead, we're all going to be called upon to make great decisions as our American Economic System adjusts to new conditions everywhere, both home and around the world.

Obviously, the more we all know about our system and how it works, the better we can decide what to preserve, what to change.

To help give you a clearer picture of our system, a special booklet has been prepared. It's easy to read, interesting and free. Mail the coupon for your copy.

Every American ought to know what it says.

## **The American Economic System.**

It's one of your basic freedoms.

Booklets, P.O. Box 1887, New York, N.Y. 10001

☐ Please send me a free copy of the booklet about our economic system.

☐ I would also like a copy of the survey highlights.

## PRESIDENT'S LETTER

Dear WSA Member:

1977 presents a challenge both to the architectural profession and in turn the professional society. It is necessary during the coming year for us to expand our outreach through completion of a successful membership effort started during the past year. Secondly, we must improve communications to each other, to the Institute, to the government and to the public in general.

The above are sizable goals which we can achieve if we participate and work together. There are many opportunities for each member to take part in local Chapter activities and committees as well as those committees and programs at the State level. I urge you to drop me a line at the WSA Offices with your concerns and your interests in serving on specific committees.

In addition, this will be an especially busy year with legislative concerns important to architects and the construction industry. The success of WSA/AIA Minutemen effort in 1976 is a testimonial to the kind of work that can be done by your professional society through a concerted effort of participating members. With the Statute of Limitations now in effect, other issues before us center on Competitive Bidding on State projects, frivolous lawsuits, Plumbing Code centralization in State Offices, Registration, Recertification and more.

The WSA Officers, Executive Committee and staff along with Chapter officers will continue to keep you informed to the best of our ability through meetings, the Wisconsin Architect magazine, special minutemen mailings and other communiques.

A special thanks to Past President Dick Blake for his hard work during 1976. His leadership was evident as the WSA provided the many programs throughout the year.

Sincerely,

Wayne E. Spangler, AIA President  
Wisconsin Society of Architects

# Precision Metals' zinc-coated steel door frames stop rust before it starts.

Cold rolled steel.

Zinc-coated steel.

Both metals, painted with two coats of acrylic over Surface Treatment, were scratched and subjected to 1000 hour salt fog test.

The severe salt fog test proves Precision Metals' zinc-coated steel door frames have excellent resistance to rust and corrosion. The uniform zinc coating forms a durable barrier that wards off corrosive elements. If scratched, an electrochemical action "heals" the coating, so the steel remains undamaged.

Zinc-coated steel frames require no sanding before painting, which saves time and labor costs at the job site. The resulting finish is smooth, even and durable.

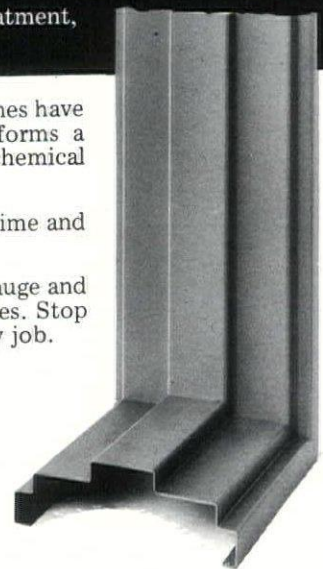

Precision Metals fabricates zinc-coated steel door frames, to your profile, gauge and size specifications. To meet your required quantity and delivery schedules. Stop rust at the door. Specify Precision Metals' zinc-coated steel frames for every job.

For more information, call or write today.

## PRECISION METALS, INC.

GENERAL OFFICE — 5265 N. 124th ST. — MILWAUKEE, WIS. 53225  
TEL (414) 781-3240

## **DIRECTORS-AT-LARGE ELECTED**

Congratulations are in order to those elected for two year terms on the Executive Committee. Elected were Henry K. Kanazawa and Ross T. Potter of the Southwest Chapter. Daniel Reginato, first runner up in the election, was appointed by President Wayne E. Spangler to fulfill the term of Lawrence E. Bray. Tellers for this years balloting were Wayne E. Spangler, AIA, John B. Hipp, AIA and Richard P. Blake, AIA.

Seven new members now start their service on the Society Executive Committee with the January meeting. In addition to Directors-At-Large, the following Vice Presidents start their terms of service: Thomas J. Miron, AIA, Northeast Chapter; James V. Hirsch, AIA, Northwest Chapter; Frederick E. Zimmerman, AIA, Southwest Chapter and Waiter E. Zoller, AIA, Southeast Chapter.

---

## **EXECUTIVE COMMITTEE ACTIONS**

Treasurer John B. Hipp, AIA reported to the Executive Committee that the financial condition of WSA is encouraging and we have improved our financial situation over the past year. The complete financial report will be presented to the members at the April Convention . . . The Office Relocation Task Force is negotiating for new office space in a building very interesting architecturally and within three blocks of the present offices. The new quarters will provide additional space as well as a reduction in rental. The monies saved are to be used for additional programs for the members . . . The 1977 WSA budget was approved at \$126,940.00 . . . The Executive Committee approved the continuation of the agreement with legal counsel Ray A. Tomlinson for the legislative and legal services . . .

G.A.D. Schuett, AIA, was presented a certificate for his three years of service as Regional Director and his service to the Society. Saul Smiley, AIA, of Minneapolis, Minnesota, takes over as Regional Director serving the states of Wisconsin, Minnesota, North and South Dakota . . . Also receiving certificates for their service to the Wisconsin Society of Architects as directors of the Executive Committee were: Richard C. Shutter, AIA Past President; James J. Angus, AIA; Louis H. Fields, AIA; Gary J. Kucko, AIA; John H. Simonitsch, AIA; Robert P. Torkelson, AIA and Leonard A. Widen, AIA. President Richard P. Blake, AIA, was also presented a certificate in recognition of his excellent leadership of WSA in 1976 . . .

A plan deposit system, similar to others authorized by WSA, was approved for the Plumbing-Heating Fund of Green Bay and the Plumbing-Heating Contractors Association of Green Bay.

---

## **PROXMIRE RESPONDS**

A letter to Senator Proxmire was reproduced in last month's issue of the Wisconsin Architect. It concerned works of art in budgets for Federal Building projects. Following is Senator Proxmire's response to Brian Larson, AIA:

# Ellenbecker Modelbuilding

HOW DO WE MAKE OUR CUSTOMERS SO HAPPY?

Dedication to craftsmanship

Knowledge of, and sensitivity to the principles of aesthetics

Experienced and imaginative use of a wide range of materials and processes

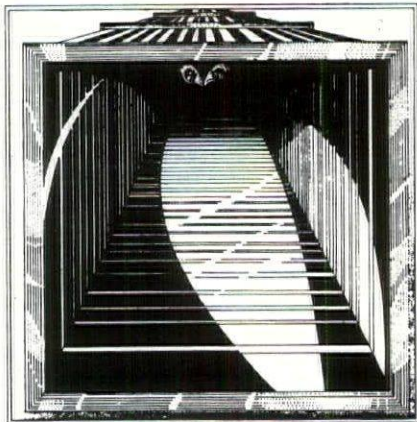

Well maintained precision machinery and equipment

We are specialists in the construction of the finest quality scale models and dioramas.

## "the fan that hides in the duct"

Now we've made the industry's most unique line of centrifugal duct fans -- the Greenheck SQ -- even more adaptable by

adding a 36" wheel size unit. So now capacities range from 100 to 20,000 cfm with wheel sizes ranging from 6" to 36". This unique air-mov-

ing package is completely self-contained and enclosed. The square shape fits right into discharge, intake, air-boosting and make-up ducts. Needs no costly site-labration, custom tailoring or extra hardware. Power unit is hinged to swing out for fast easy cleaning and service, regardless of position.

reducing upkeep costs to minimum. Cabinet can be insulated for noise reduction. Fan blades are welded and riveted to the cone

and wheel... can't creep out of balance. Field electrical connections are outside the housing. For full details on "the fan that hides in the duct",

Send for Bulletin SQ-4-70

Proxmire  
(Continued)

Dear Brian:

I appreciate having your letter and the constructive tone of it.

There has been an explosion in the amount of money we spend in support of the arts. Further, in this country there are vast tax benefits for the arts so that we, in fact, give greater public support to the arts than elsewhere.

However, while I would not consider criticizing art or artists in any official way when they support themselves, when they are the direct recipient of taxpayers' funds then it is both my duty and responsibility to criticize.

Some of the works now outside federal buildings are very hard to justify. When we do criticize them we are too often told that we are too ignorant to criticize and that the artist knows best. The Pentagon tells us this when we criticize weapons too. I'm sorry but I do not buy that line. And in the architectural field, a glance at the Rayburn Building, the new FBI building, and the new HEW building in Washington, passed on favorably by the Fine Arts Commission, makes me even more certain that the judgment of the average person may be as good as that of the expert in this field. Some of those buildings are horrible.

With best wishes.

Sincerely,  
William Proxmire, U.S.S.

**NEW  
MEMBER  
CAMPAIGN  
200+**

Have you talked to potential new members and submitted their names in the Campaign 200+ membership enrollment effort? Forty names have been submitted to the WSA Offices and appropriate applications have been sent. When the prospective member is approved by the Executive Committee, the current member sponsoring applicant earns points toward one of three weekends for two packages. Below are the descriptions of the incentive awards, the basis for determining the awards and the present status of the membership campaign.

Chairman Shutter urges, "there is much work ahead in the ensuing weeks to reach our goal of 210 members. It can be done if every member seeks at least one new member." There are over three hundred registered architects in Wisconsin who are qualified for membership but are not presently active in AIA. In addition there are approximately thirty two hundred in the state who are potential Associate, Professional Affiliate and Student Associate working in architecturally related occupations. If we achieve only 6% of the potential, we will reach our total goal of 210.

## **FOR BRINGING IN NEW MEMBERS**

You can share in prizes by encouraging other professionals to join us in WSA/AIA:

THREE FIRST PRIZES consisting of A WEEKEND VACATION FOR TWO at one of three Wisconsin's favorite resorts:

The Abbey on Lake Geneva OR  
The Playboy Resort at Lake Geneva OR  
The Olympia Princess in Oconomowoc

THE 4TH AND 5TH PRIZES will be \$50 worth of AIA documents and/or publications.

## **BASIS FOR DETERMINING AWARDS**

We are using a point system to make the qualifying of winners equitable in our Campaign 200+. For every member you sponsor who is approved for membership you will earn points according to the following scale:

One New Corporate Member .....	50 Points
One New Professional Associate Member .....	25 Points
One New Professional Affiliate Member .....	25 Points
One New Associate Member .....	20 Points
One New Student Member .....	5 Points

Incentive awards will be made on the total number of points accumulated by a member as of February 15, 1977.

## **DESCRIPTIONS OF FIRST PRIZES**

The THREE FIRST PRIZE WEEKEND-FOR-TWO PACKAGES will consist of the following:

THE ABBEY offers the "Weekend Un-Winder Package":

- \* Spacious Guest Room For Friday & Saturday Nights
- \* Dinner Each Evening In The Monaco Dining Room
- \* Breakfast Or Lunch Of Your Choice Saturday
- \* All-You-Can-Eat Champagne Sunday Brunch
- \* Tax & Gratuities On The Above

THE OLYMPIA PRINCESS offers the "Olympia Leisure Holiday Package":

- \* 2 Nights Accommodations In A Luxury Packed Guest Room
- \* 2 Dinners (\$9 Value Each. Surcharge If Over Allocated Amount)
- \* 1 Breakfast
- \* 1 Brunch On Sunday
- \* A Cocktail Party Saturday With Hors D'Oeuvres & Unlimited Drinks
- \* Unlimited Use Of Health Spas (Not Including Massage)

THE PLAYBOY RESORT offers the "Eat, Drink And Be Merry Package":

- \* Deluxe Accommodations For Friday And Saturday Evening
- \* A Dinner And Show In The Cabaret Showroom
- \* An Evening Dinner In The Livingroom Or Playboy Club
- \* Brunch In the Livingroom Both Saturday And Sunday
- \* All Tax And Gratuities On The Above

**New Member  
Campaign  
(Continued)**

	<u>Requests For Applications</u> –	<u>Approved New Members Sept. Thru Dec.*</u>
Southwest Chapter Chairman Dale Volkening	14	7
Southeast Chapter Chairman Mark Pfaller, FAIA	12	11
Northwest Chapter Chairman Brian Larson, AIA	2	0
Northeast Chapter Chairman James Gabriel, AIA	12	6
WSA Total Chairman Richard Shutter, AIA	40	24**

\*Includes those from start of campaign publicity and transfers but not attributed to any one member for contest purposes — make sure you tell us of those **you** are asking to join when the request for application is made.

\*\*As of this writing, 6 additional applicants are to be presented to the Executive Committee for membership in January.

**1977  
WSA  
CONVENTION**

**NEW MARKETS:** Weld Coxe, noted Consultant on Marketing Architectural Services will keynote the '77 Convention and moderate the Seminar Programs.

**NEW METHODS:** Seminars expanding the methods of selling architectural ideas and services.

**NEW MATERIALS:** A full house of exhibitors with the latest methods and materials.

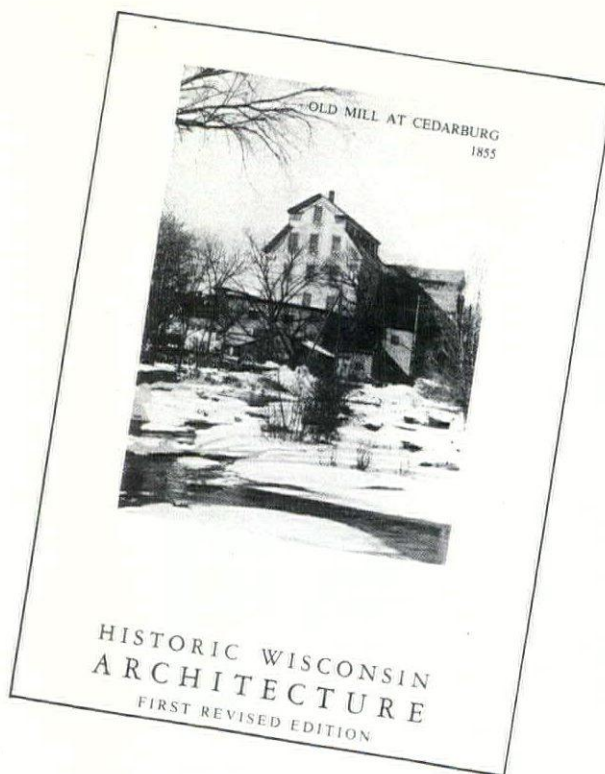

**SAVE THESE DATES:** April 26, 27, 28 — The Abbey, Fontana, WI

Each month we will be listing those suppliers who have contracted for exhibit space at the Convention.

Look for exhibitors who have contracted for booth space as of January 1, 1977. They are:

## **PEOPLE/ ACTIVITIES**

Robert L. Yarbro and Richard J. Kempinger have announced their association as Yarbro-Kempinger, Architects, effective January 1, 1977.

Bob Yarbro, a partner in the firm of Sandstedt-Knoop-Yarbro/Sandstedt-Yarbro & Associates for 20 years, has been practicing as an individual under the name of Sandstedt-Yarbro & Associates since Julius Sandstedt's retirement on December 31, 1975.

Dick Kempinger, a registered Architect in the State of Wisconsin, and a lifelong resident of the City of Oshkosh, was employed with the firm of Sandstedt-Yarbro & Associates, for the past ten years.

Yarbro-Kempinger, Architects is located at 1018 W. South Park Avenue, Oshkosh, Wisconsin, and looks forward to serving the architectural needs of the community, as well as the State of Wisconsin.

Michael Metcalf & John Haefner have announced the formation of a new architectural firm called Metcalf Haefner — Architects, with offices at 1133A Main Street, Stevens Point, Wisconsin 54481 and Flat Iron Building, Wisconsin Rapids, Wisconsin 54494.

Orput Associates, Inc., an architectural firm currently located at 11611 W. North Avenue in Wauwatosa, recently announced that Kenneth L. Lamers, architect, has joined their firm.

#### **MEMBERSHIP ACTIONS**

The following membership actions were approved by the Executive Committee of WSA/AIA:

RALPH H. KLOPPENBURG advanced to Emeritus membership in the Southeast Chapter.

JEFFREY L. MARCOWITZ advanced to Professional Associate membership in the Southeast Chapter.

JEFFREY G. MOTHS was approved for Associate membership in the Southeast Chapter.

ROBERT L. PFIEFER advanced to Corporate membership in the Southeast Chapter.

FLORIAN REMITZ was approved for Corporate membership in the Southwest Chapter.

The resignation of ROBERT F. WILCOX, Southeast Chapter, was accepted.

---

#### **HIRONS PRIZE, 1977**

The National Institute for Architectural Education announces the 1977 Hirons Prize, an architectural design competition for "THE REHABILITATION, RECYCLING OR RESTORATION OF AN OLD OR HISTORIC BUILDING". The competition is open to all persons in the architectural field under 35 years of age, up to June 1, 1977, and who are not enrolled in a "full time" architectural academic program.

The program has been formulated to promote entrepreneurship in architecture. It offers the young professional the opportunity to submit a realistic proposal for the rehabilitation, recycling or restoration of a building in his own community. The proposals will be judged by a jury from the NIAE and invited guests. Winners will be awarded prize funds with which to complete their proposals so that they can be used by the competitors in their community, city or region to assist them in bringing such proposals to fruition as projects.

The competition may be done any time between January 15 and June 15, 1977. All persons interested may obtain a copy of the program by writing to: Howard H. Juster, Director of Education, National Institute for Architectural Education, 139 East 52 Street, New York, New York 10022.

**PROFESSIONAL LIABILITY . . .**

ONE GOOD REASON TO SPECIFY

**. . . LIGHTNING PROTECTION**

Owners, Architects, Engineers, and Insurance Companies, can no longer plead that "Lightning is an act of God". Court decisions have recognized effective protection against lightning damage is available at a reasonable cost. Accordingly, those responsible for the design of buildings or structures which may be subjected to Lightning discharges, should protect themselves by designing and specifying a system meeting all the requirements of nationally recognized Lightning Protection codes. Systems should be designed by professionals and installed by firms specializing in such installations.

## **BRUNNER SCHOLARSHIP**

The New York Chapter, American Institute of Architects seeks applicants for the 1977 Brunner Scholarship Award.

It is open to any citizen of the United States engaged in the profession of architecture and its related fields who has a professional background more advanced and broader in scope by actual experience than is generally implied by four or five years of architectural school training.

"Its purpose is to further the development of architecture in the United States by granting one or more Scholarships, usually annually, for advanced study in some special field of architectural investigation which, in the judgement of the Chapter, will most effectively contribute to the practice, teaching, or knowledge of the Art and Science of Architecture."

The successful candidate will be awarded up to \$5,000 to finance his or her study, and will be required to meet a specific time schedule.

Application forms available to January 17, 1977.

Proposals may be submitted to February 7, 1977.

Announcement of award will be made in July 1977.

## **DEAN SOUGHT**

The College of Architecture, University of Arizona, seeks Dean to assume administrative responsibilities. Professional registration expected; minimum of Master of Architecture with teaching, administrative and professional experience. Position open after June, 1977. Send complete resume, with references, to Professor Gordon Heck, Chairman, Search Committee, College of Architecture, University of Arizona, Tucson, Arizona 85721, by March 15, 1977. The University of Arizona is an Equal Employment Opportunity/Affirmative Action Employer, under Federal and State Laws and Regulations, including Title IX, 1972 Education Amendments.

---

## **THIS ISSUE . . .**

It is a good time to take another good look at the ads as many feature new products or services. The Editorial Advisory Board would also like to remind you that you can make a substantial contribution to the WSA and its magazine simply by mentioning to the advertisers with whom you have contact, that you saw his ad in the Wisconsin Architect.

# IF YOU'RE PLANNING A BUILDING, AMERICA'S ENERGY CRISIS JUST MAY HAVE BECOME YOUR BIGGEST PROBLEM.

But there's a new computerized analysis program from TRANE that can help you. It's called TRACE . . . TRANE Air Conditioning Economics.

Before you design your next building, TRACE can evaluate thousands of design variables that can affect energy consumption and building cash flow.

Whatever your air conditioning need, check with TRANE first because we

are one of the few manufacturers with capability to provide complete, single source supply and service for commercial and industrial heating and cooling equipment.

For further information on TRACE or other TRANE capabilities, contact your nearby TRANE sales office or write The TRANE Company, Commercial Air Conditioning Division, La Crosse, Wisconsin 54601.

**WANTED:  
AIA  
SCHOLARSHIP  
APPLICANTS  
FOR  
1977-78**

The 1977 AIA Scholarship Program — a series of academic awards that last year provided nearly \$100,000 in funding to 146 architectural students and practicing professionals — has opened and applicants are being sought.

The AIA Scholarships are offered in five distinct programs:

— The AIA/AIA Foundation Scholarship Program, open to first professional degree candidates at accredited American and Canadian schools of architecture, and to graduates involved in advanced study or research;

— The William H. Scheick Research Fellowship, awarded to a graduate student working in the field of low-income, multi-family housing;

— The AIA Research Communications Fellowship, awarded to improve the link between architectural research and its practical applications;

— The AIA/AHA Fellowship in Health Facilities Design, awarded in conjunction with the American Hospital Association;

— The AIA Minority Disadvantaged Scholarship Program, awarded to enable qualified high school, junior college or technical college graduates to enroll in professional architectural studies.

Details on eligibility and application requirements for each of the AIA Scholarship programs are available from AIA's Education Programs Director at AIA Headquarters, tel. 202/785-7349.

**WISCONSIN  
ARCHITECT  
MAGAZINE  
REQUESTS  
PROJECT  
MATERIAL**

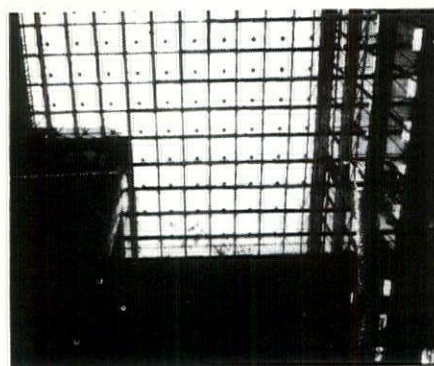

The Editorial Advisory Board will welcome information concerning projects to be considered for publication in theme issues for 1977. The purpose of the theme issues being a forum for the presentation of current projects by the membership. Projects should have been in design or built during 1976 and should include size, cost, location, clients, a paragraph describing the program and design considerations and photographs or rendering suitable for black and white production. The theme for February, 1977 issue — HOUSING. Material must be received at WSA Office no later than January 24, 1977.

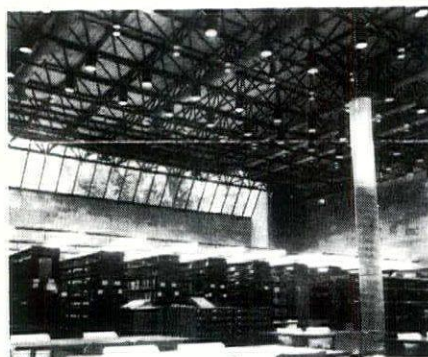

# SPACE-FRAME IDEAS at WORK

*...in residential complexes*

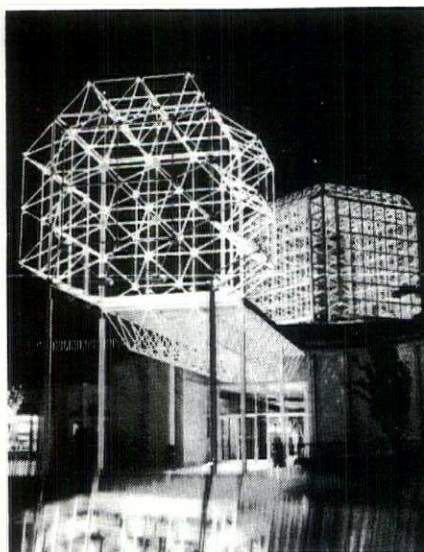

*...in office buildings*

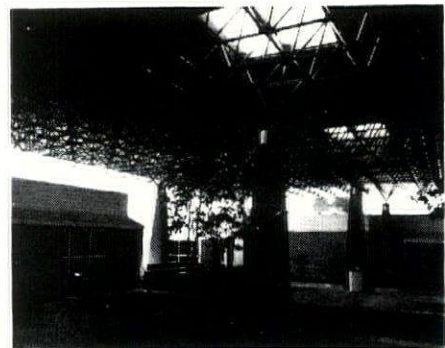

*...in cultural centers*

The UNISTRUT® Space-Frame system utilizes standardized components to achieve maximum design flexibility with predictable cost. Structures built from this unique system add eye appeal to shopping malls, schools, office buildings, restaurants—wherever the needs for function and visual impact meet. And ease of assembly frequently shortens construction time.

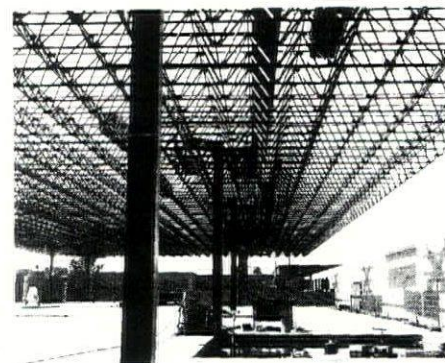

Available in 4 and 5 foot, as well as 1.2 and 1.5 meter planning modules. Write for complete information.

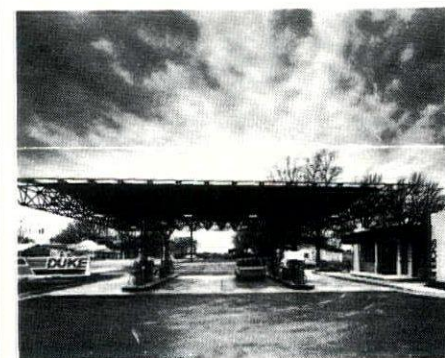

*...in shopping centers*

*...in schools*

*...in plants*

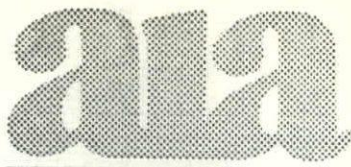

*...in service stations*

DOCUMENT PRICES  
Effective February 1, 1977

This is a new price list of AIA documents. The prices will be effective as of February 1, 1977. As in the past there is a 20% discount to all members. For the next six months there will be a 50% discount to members on all of the B-series documents if you purchase them through the WSA/AIA office. When ordering, please do not pay in advance. You will be invoiced in the correct amount when your order is shipped.

## **NEW** from Hickman...

### **the GUARANTEED COPING COVER SYSTEM**

We guarantee our new PERMASNAP COPING SYSTEM against water leakage. Period.

The secret is a styrene gutter chair at each joint that quietly carries water away.

We also make sure the system stays in place. Without expensive imbedded anchor bolts. A special adhesive replaces them. And it sticks against 60 lbs per square foot of uplift.

Permasnap Coping Covers are also simple to install. (It has to do with the "snap" in the name, but it's simpler if you see it for yourself.)

All in all, it's a pretty simple system. Only three parts. And we guarantee all of them. Specify Hickman.

## NORTHWEST CHAPTER EMERITUS

**BILLMEYER, Carl J., AIA**, 420 Third Street, S., Wisconsin Rapids, WI 54494  
**FUCHS, Frank J., AIA**, 1701 Miller Street, La Crosse, WI 54601  
**SCHOEPKE, Donald M., AIA**, Route #1, Box 218B, Minocqua, WI 54548  
**SCHUBERT, Carl W., AIA**, 2635 Schubert Place, La Crosse, WI 54601

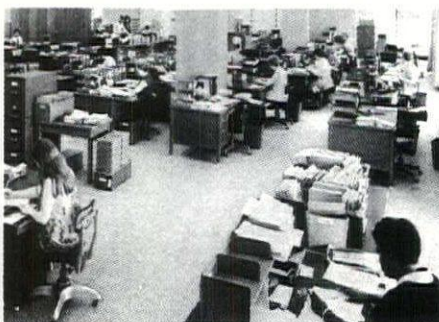

**Paper tiger...But afraid of nothing!  
Particularly paper. I organize it; classify it;  
manage it. In short, I eat it up! I reduce  
your costs; increase your profits.**

**My name is Paperflo. Here's how I work!**

**After Steelcase and Paperflo.**

- 1. Paperflo is six simple trays.**  
I hold every size of paper vertically. Helping classify, organize and manage paper.
- 2. Paperflo pays for itself.**  
I can easily save 10 minutes per day, per employee. I pay for myself. Fast!
- 3. Paperflo changes easily.**  
My trays are light, portable. Paper flows faster between people, between departments.
- 4. Paperflo works anywhere.**  
Although I do my best work with Steelcase Systems Furniture.
- 5. Paperflo is inexpensive, uncomplicated.** It's amazing that someone didn't think of me before.

**Before Steelcase and Paperflo.**

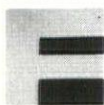

I'm easy to find. Easy to own. Your Steelcase Dealer and Regional office have Paperflo on display. Call for a demonstration. They're listed in the Yellow Pages.

Paperflo works with Steelcase Mobiles at Pennsylvania Blue Shield, Camp Hill. In space that originally housed 90 people, Paperflo and Mobiles combine to help house 143—a 57% increase.

Saving space, saving money, speeding paperwork, increasing productivity. That's what Steelcase Paperflo and Mobiles are all about.

Paperflo design concept by Ray Myers Associates, Inc., Endicott, N.Y.

**Steelcase**

## ASPHALT PAVEMENT

A DIRECT REFLECTION ON THE TOTAL BUILDING STRUCTURE.

This reflection can enhance or degrade the appearance of the total building structure for many years.

Asphalt Pavement starts to deteriorate as soon as it is laid.

**GILSABIND SEALING** is the way to help assure that this reflection of the asphalt pavement is an asset.

**GILSABIND** added to Asphalt Pavement: **THE RESULT IS:**

1. Effectively seals pavement pores or voids

Water and air can't get in to strip asphalt oils from aggregate. They are sealed out, so oxidation is effectively retarded.

2. Increases adhesive qualities of the asphalt mix

Fines and surface aggregates can't get out to begin the first step in pavement destruction.

3. Creates a stronger, denser surface

Pavement is tougher to resist the effects of normal traffic abrasions.

4. Restores normal rich look of freshly laid asphalt

Asphalt looks better and gives sharp contrast to traffic markings.

### Other Advantages of GILSABIND SEAL

1. Gilsabind can be placed on newly laid asphalt.
2. Gilsabind cures ready for striping in 1 to 12 hours.
3. Gilsabind treated pavement will not become soft or tacky.
4. Gilsabind can be applied any time of year (as long as pavement is dry).
5. Gilsabind is more economical than most other seals.

**Manufacturing Problems**

1. An electrical manufacturer needs insulation on switching rods on voltage transformers.

2. Metal grille work at motels and airports near the seashore provide good protection as balconies and dividers but suffer extreme corrosion because of salt spray.

3. A fast food chain uses cast metal seats that need a durable, sanitary attractive finish.

**Answers**

High dielectric epoxy conformal coating on the complicated shape gave desired protection and permitted electrical contacts in the required area.

PVC powder coating in bright, durable finishes gave long term corrosion protection against salt spray and normal abuse as well as improved appearance.

A colormatched vinyl coating resulted in a tough, easy to clean surface which also reduced noise and secondary operations on the metal part.

**CONRAD PICKEL OPENS  
GALLERY IN FLORIDA**

Conrad Pickel has opened a new art gallery in Boynton Beach, Florida.

The gallery, located at 1000 S. Federal Hwy, is showing more than 100 of Mr. Pickel's paintings. It also features unique new concepts in stained and faceted glass windows. The gallery is open every day and by appointment. If you are on the east coast of Florida this winter, stop by for a visit; you'll be amazed.

Of course, you are always welcome to visit our studios in New Berlin.

# Kohler originals

See what Kohler has done with color, shapes, and new ideas for modern living.

Kohler Fiberglass Walls 'n All bathing modules. Smoothly molded Fiberglass — easy to install and so easy to clean, and keep clean. No tile, no grout, or hard-to-get-at corners.

And because they're Kohler — they're in color. Six decorator acclaimed colors and white — including our newest Fresh Green and Pink Champagne.

Pictured. A. The Bimini — the newest addition to the Kohler line.

Measures only 32" x 36" and designed for remodeling projects. Shown in Pink Champagne.

B. The Barbados — a 5' bath and shower module, shown in New Orleans Blue.

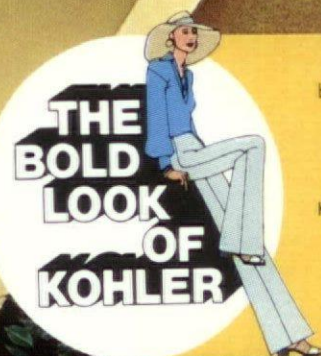

C. The Trinidad — a 36" x 34" shower cove in Harvest Gold.

D. The Tobago — showering luxury — it has a built-in seat. 48" x 36" shown in Fresh Green.

E. The Bath — 5½' x 7' of bathing luxury. Shown in Black Black.

**Three good  
reasons for selecting  
Weil-McLain**

**THE CHOICE** — Choose from a complete line of oil, atmospheric gas, and combination gas/oil boilers, from 187,800 to 6,060,900 BRU/Hr.

**THE FLEXIBILITY** — Match any job requirement with a choice of factory-tested packages, factory-assembled sections or individual sections.

**THE QUALITY** — Only Weil-McLain has such quality features as flame-retention oil burners, asbestos rope seal,

short draw rods, multiple tankless water heaters, forced draft firing and, of course, cast iron construction.

Choice, flexibility, and quality . . . three good reasons for contacting your nearest Weil-McLain distributor.

# RAPCO-FOAM

## FOAMED-IN-PLACE THERMAL AND ACOUSTICAL INSULATION

### PABST BREWERY

10 th & Juneau, Milwaukee, Wis. April 1976  
Architect: Chas. Yoder & Assoc.  
General Contractor: Hunzinger Const., Inc.

## SAVE THIS SPECIFICATION SHEET

ting takes place 10 to 60 seconds after it leaves the applicator gun. The material can be trowelled before setting.

There is no further expansion of the material after it leaves the applicator gun. Voids can be completely filled without danger of subsequent pressure build-up.

**Applicable Standards:** Applicable Standards are shown in Table I.

### 4. TECHNICAL DATA

**Thermal conductivity:** k-factor (ASTM C 177-63) nominally 0.2 at 70°F and 0.18 at 35°F mean temperature.

**Sound Absorption:** In a 1½ inch metal stud and plaster wall it improves the sound transmission class (STC) from 37 to 44. In dry wall construction it reduces sound transmission from 5 to 7 decibels.

### Sound Absorption

Foam Thickness (in.)	Percent of Sound Absorption Frequency (in Hertz)						
	100	200	400	800	1600	3200	6400
1¼	9	23	58	70	89	78	77
1½	10	34	78	85	93	86	79
2	12	44	83	92	95	92	83

### 1. PRODUCT NAME

Foamed-in-place insulation  
Rapco-Foam®

### 2. MANUFACTURERS

Rapco Chemical, Inc.  
Box F, Mayesville, S.C. 29104

305 East 40th St.  
New York, N.Y. 10016  
Phone: (212) 986-7030

to temperatures in excess of 210°F for prolonged periods. In exposed applications it requires a protective surface to prevent mechanical damage.

### Composition & Materials:

Rapco-Foam is a modified urea-formaldehyde resin, formulated in accordance with the patented Isoschaum process. It is cold-setting and forms a low-density, non-combustible resilient foam. The material has the ability to flow into odd-shaped spaces, around wires, piping, etc. Set-

### 3. PRODUCT DESCRIPTION

**Basic Uses:** Thermal and acoustic insulation. For application in floors, walls, partitions, pipe chases and other building cavities.

For use in houses, apartments, office buildings, manufacturing and commercial facilities, laboratories, sound studios, ships and other construction. Can be used for remedial work in occupied buildings as well as in new construction.

**Limitations:** The material should not be used where it will be subject

Table I—Physical Properties

Property	Value	Test Method
Thermal Conductivity (K-factor), norm. at 70°F at 35°F	0.2 0.18	ASTM C 177-63
(1) Density, standard, lbs./ft. <sup>3</sup> Fresh Weight, lbs./ft. <sup>3</sup>	0.7 2.5	
(2) Linear Shrinkage, normal, per cent	1.8-3.	ASTM E 96-66 (Proced. B)
Moisture Absorption, 24 hours in wet cavity wall, percent by weight	2.	
Water Vapor Transmission, 24 hours in wet cavity wall, perms	32-38	ASTM E 96-66 (Proced. B)
(3) Combustibility, Noncombustible below °F	1208	ASTM E 136-65
Surface Burning Characteristics (foam exposed)		ASTM E 84-70
Flame spread	25	
Smoke Density	0-5	
Fuel Contributed	10	

- (1) Density can be varied from 0.6 to 1.0 lbs./ft.<sup>3</sup>  
(2) Rapid or forced drying may cause shrinkage in excess of 3 per cent; slow drying will hold shrinkage to 1.8 per cent or less.  
(3) 1208°F heat causes material to decompose, releasing water vapors and, from a 2-gram sample in 5 cu. ft. cavity, 177 parts per million CO, 52 ppm HCHO, 7 ppm HCN, 59 ppm NH<sub>3</sub> and 8 ppm NO<sub>2</sub>.

The ten-point Spec-Data® format has been reproduced from publications copyrighted by CSI, 1964, 1965, 1966, 1967, and used by permission of The Construction Specifications Institute, Inc., Washington, D. C. 20036

**Structure & Density:** The structure is a microscopic sized cell agglomeration interspersed with microscopic capillaries which are irregular and discontinuous.

The standard density of Rapco-Foam is 0.7 lbs. cu. ft., although the density can be varied from 0.6 to 1.0 lbs. cu. ft. When fresh it weighs 2.5 lbs. cu. ft. at the standard density. It has 60% closed and 40% open cells.

**Volumetric Stability:** Temperature or humidity variations will not cause Rapco-Foam to change volume or exert pressure.

Normal shrinkage during the drying out period is 1.8% to 3% linear. Rapid or forced drying may cause shrinkage in excess of 3%; slow drying will hold the shrinkage to 1.8% or less.

**Resilience:** Rapco-Foam is a resilient material with a very high vibration resistance. The foam will support only light loads.

**Moisture Effects:** Rapco-Foam will not hydrolyze. Moisture absorption in wet cavity wall over 24 hour period, 2% by weight. Water vapor transmission, 32-38 perms (ASTM E 96-66, Procedure B).

**Fire Behavior:** Non-combustible per ASTM E 136-65. Will not ignite up to 1208°F.

ASTM E 84-70 with foam exposed, flamespread 25. Smoke density 0.5, fuel contributed 10.

Approved for use in New York City under MEA No. 55-73-M.

**Gas Evolution:** When subjected to a flame or radiant heat of 1208°F,

the material decomposes, releasing water vapors and, from a 2-gram sample in a 5-cubic-foot cavity, 177 parts per million CO, 52 ppm HCHO, 7 ppm HCN, 59 ppm NH<sub>3</sub> and 8 ppm NO<sub>2</sub>.

**Toxicity:** The material is nontoxic per Federal Hazardous Substances Act and complies with New York City Building Law.

**Pest Resistance:** The de-oiling effect of Rapco-Foam makes it a hostile environment for rodents, and insects.

The material is completely resistant to the common Mucor, Aspergilli and Alternaria types of mold. In addition, the foam is mildly bactericidal.

## 5. INSTALLATION

**Preparatory Work:** No preparatory work required. In existing structures the foam can be applied through an opening as small as one inch in diameter.

**Methods:** Rapco-Foam is applied from a patented gun, within which the foaming takes place. There is no further expansion after the foam leaves the gun. Working pressure of the gun is 65 lbs./sq. in.

Application can be made at any temperature, provided the components can be brought to the foaming apparatus at temperatures between 55°F and 85°F. The foam can be applied through open frames or through metal lath. Once in place it can be smoothed over with a trowel and sheathed over immediately. A typical between-studs

void is completely insulated in less than two minutes. The cured foam can be removed and replaced by hand.

**Cure Stages:** Initial setting takes place from 10 to 60 seconds after the foam leaves the applicator gun. Additional curing takes place within 2 to 4 hours, during which the foam acquires resilience. Drying takes 1 to 2 days; longer if in closed cavities or in very cold weather.

## 6. AVAILABILITY AND COSTS

**Availability:** Rapco-Foam is installed by

AUTUMN DAY, INC.  
831 W. Moreland Blvd.  
Waukesha, Wis. 53186  
414-542-8999

**COST:** Competitive with loose fill poured on site products (c.e. zonalite or pearlite.)

## 7. GUARANTEE

Stability of the material is guaranteed.

Foaming cores of Spancrete lightweight precast wall panels.

## CTS THERMAL BARRIER WINDOW WALL

Cronco-Lite Thermal Barrier Window Walls are an innovation in design and construction. There is no metal to metal contact between the interior and exterior, virtually eliminating frost and condensation with temperatures as low as -30°F.

The CTS Thermal Barrier Window Wall is unique in low rise window wall construction. It is comprised of aluminum face and gutter members internally joined and locked, but insulated from one another, by Cronco-Lite's exclusive T-Blocks. The versatility of CTS allows face and gutter members to be interchanged, making it possible to create a large variety of architectural effects in glazing for either new buildings or remodeling. All sections will create a flush glaze effect even with insulated glass.

# Spancrete Systems...

## tailored to your specific needs.

From a multi-story apartment to a parking structure...  
From a warehouse to a delightful condominium...  
Spancrete systems build it stronger, faster *and* at low cost.

Spancrete Industries has developed a variety of building systems to meet specific architectural needs. These developments have been the result of a close working relationship with architects and engineers. Spancrete systems are highly flexible and can be tailored to meet a variety of architectural and structural requirements.

If you thought that precast construction was expensive, look at the facts. Spancrete construction reduces on-site building costs by:

- 1) Reducing construction time.
- 2) Eliminating or reducing temporary bracing.
- 3) Eliminating or reducing finishing costs.
- 4) Precasting chases and other allowances for subsystems such as electrical, plumbing, heating, etc.

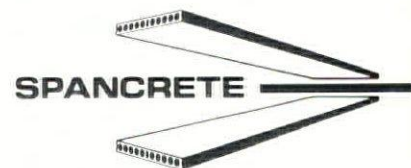

Once completed, the building continues to save

- 1) By reducing heating and cooling expenses.
- 2) Through lower insurance rates.
- 3) *And*, greatly decreasing maintenance costs.

Spancrete, a pioneer with over 30 years of experience in the industry, stands ready to serve you. Specialized building systems can be developed to meet your architectural and structural requirements.

For further information on how these systems can be tailored to your needs, contact:

# Presenting the best of the ball, gate and globe valves.

patented

Here are all the advantages of any type 1/2" to 2" valve you'd normally consider — with none of the disadvantages! And size for size, dollar for dollar, Butterball offers the best flow coefficient in its size range. You get full-port flow at restricted-port prices.

Butterball has a ball valve's quarter-turn closing speed. As with a gate valve,

the port size is the same size as the pipe it connects. And like a globe Butterball can be used to modulate flow. So it can replace any of these designs in virtually any application.

Butterball's ready to go to work on your application... now. In Stainless steel or bronze with DuPont VITON® seal. Get the details.
