The architect specifies BELDEN for many reasons. More adaptable sizes to free the imagination is one reason. Combine the choice of sizes with more colors and more textures and you discover why BELDEN is known throughout the industry as the standard of comparison.

Your BELDEN Dealer will show you the facts, or write us at Box 910, Canton, Ohio 44701.

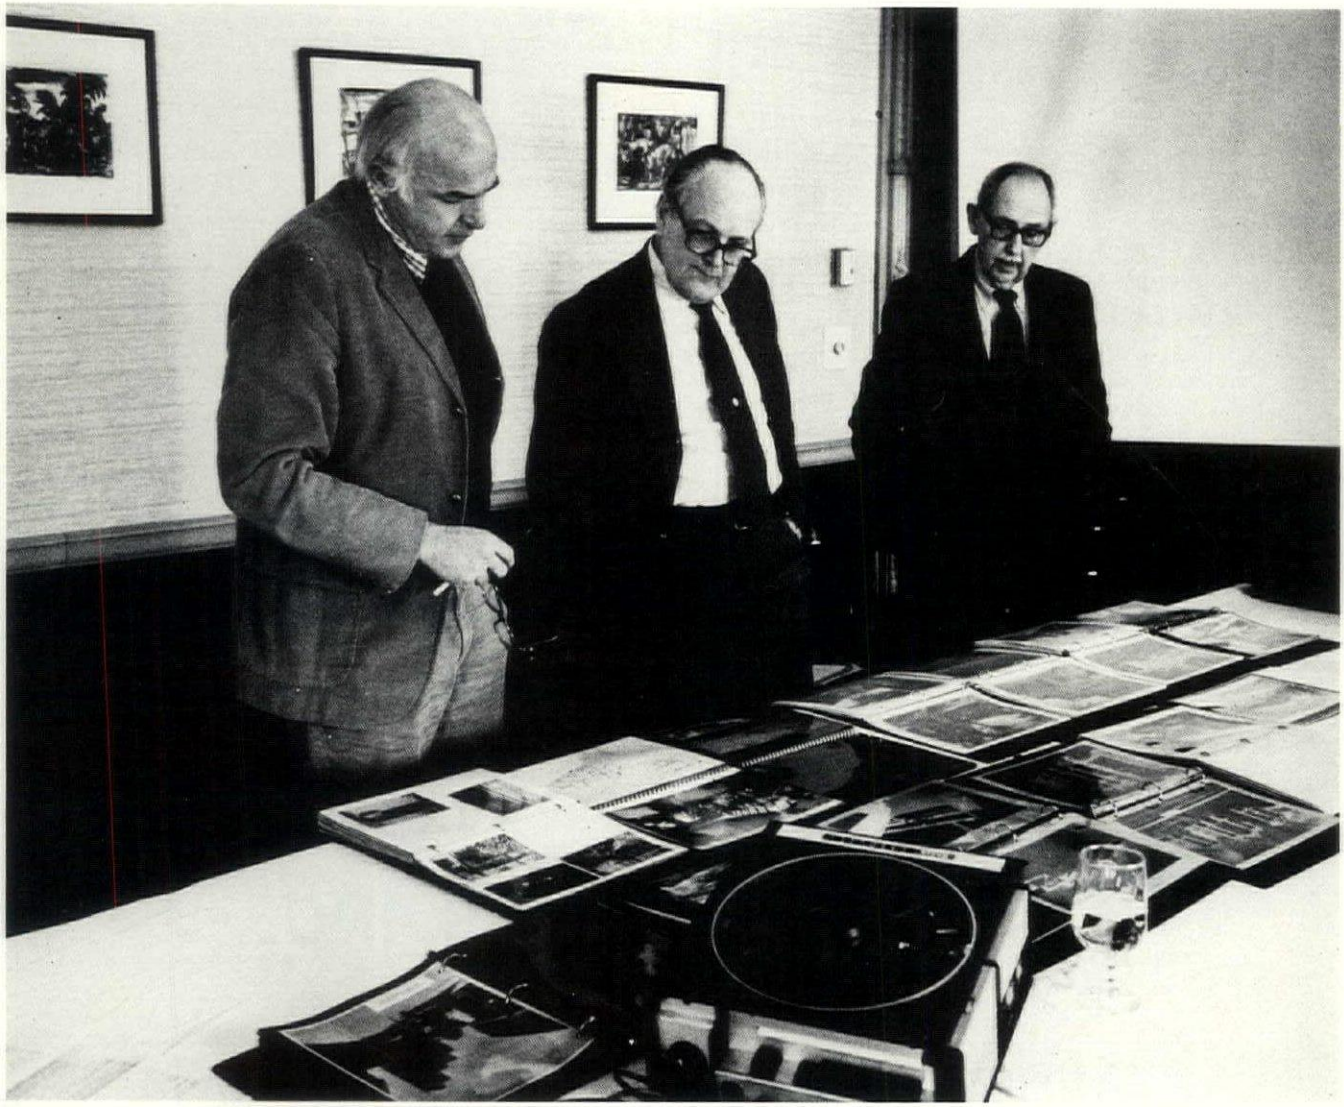
1979 AWARDS FOR EXCELLENCE IN ARCHITECTURE

Each year the Wisconsin Society of Architects sponsors an Awards Program to foster public awareness of the variety and scope of its members' design solutions. This year the designation of the Awards was changed. Winning projects no longer receive titles such as "Honor Awards" or "Special Mention". Instead, each project was evaluated on its ability to solve the design problems presented by the owner. An Award for Excellence in Architecture was then granted to those projects found to be most worthy.

Forty-six entries were submitted, and of those, thirteen received an Award for Excellence. Pictured below are the members of the 1979 Jury reviewing the thirteen winning projects.



The Jury consisted of (from left to right) John G. Rauma, FAIA, GRISWOLD & RAUMA, INC., Minneapolis; Raymond C. Ovresat, FAIA, VICKREY/OVRESAT/AWSUMB, Chicago and Robert G. Cerny, FAIA, THE CERNY ASSOCIATES, Minneapolis. Several of their pertinent quotes relating to all the entries include: "I am particularly impressed with the high quality of the submissions. There is wide variation among the buildings." "It is very encouraging to find the Wisconsin Society of Architects developing such a high standard in the State and Region." "It is quite clear that in Wisconsin the architectural profession is very seriously dealing with the energy issue."

The Award Certificates will be presented to architects, owners and contractors by President John B. Hipp, AIA and Wayne E. Spangler, AIA, Chairman of the Awards Committee at the Awards Luncheon during the State Convention on May 23, 1979.

On the following pages six of the thirteen Award winning projects are featured. The remaining seven will be presented in the June issue of the Wisconsin Architect.

IN A WORLD OF THE ORDINARY, **KOHLER** PRESENTS THE EXTRAORDINARY.

WOOD AND ONYX FAUCETS

FOR YOUR BATH OR POWDER ROOM.

Imagine being able to change the decor of your bathroom to fit your every whim. Now you can with Kohler's distinctive line of Alterna natural wood handles and onyx inserts. Each has its own individual beauty. A uniqueness that defies comparison.

You have a choice of faucet handles in Cocobolo or Zebrawood—durable hardwoods specially treated with protective oils. Plus genuine onyx inserts in exclusive colors and patterns—Tigereye, Rainbow, Pearl, light or dark browns, gentle green, or Petrified Onyx. Or you may prefer the simplicity of molded inserts. The choice is yours. And what a choice!

Alterna faucets, in chrome or 24-carat gold finish, are available in the U.S. and Canada. For more information, write Dept. RB, KOHLER CO., KOHLER, WIS. 53044.

Alterna faucets by Kohler. Extraordinary.

1979 W.S.A. AWARD FOR EXCELLENCE

Photo by Uel Ramey, AIA

Architect: Berners, Schober & Kilp
Green Bay, Wisconsin

Project: The Todd Wehr Library
De Pere, Wisconsin

Owner: St. Norbert College
De Pere, Wisconsin

Consultants: Brown, Davis, Mullins & Associates, Inc.
Electrical Consultants
1615 South Neil Street
Champaign, Illinois 61820

Contractor: De Coster Construction Co.
Green Bay, Wisconsin

Jury Comments: "A most creative case in point of how existing underused buildings can be put to new active use. By developing the stack area in the existing dormitory court, and utilizing the original building for the kind of smaller spaces needed for library use, a well functioning, attractive library has been realized, with creative economy of construction, land and resources."

Vertebra®

The most advanced seating system

Sit up

Tilt forward

Relax

Tilt backward

Giancarlo Piretti
(The Center for
Design Research
and Development)

OPEN AÎK

Patents Pending Worldwide
Copyright © 1978 by OPEN AÎK B.V.
U.S. Patents #3882785, #4046422
Other Patents Pending

Vertebra is one of the most extensively tested seating systems on the market today. Only after extremely stringent criteria governing its technology, and the quality standards of Krueger and OPEN AÎK were amply met, was Vertebra released for production. Over a year of grueling tests in the laboratory and field were required for proof. Now you are invited to test Vertebra.

Until now, seating has restricted body movement, denying the comfort that could only be found with complete freedom of movement. But now we have Vertebra. It reacts *automatically* to your changing desire for comfort.

Simply **relax**...and the seat slides forward while the backrest tilts backward; or **sit up**...and the chair automatically adopts a more comfortable upright position; ***lean forward***... and the seat and backrest tilt downward 6°; activate a release and the backrest **tilts backward** 12°, permitting you to stretch and relax.

Ergonomically conceived, Vertebra is the first seating system which deals scientifically and aesthetically with the special requirements of the seated person. Its simple, ingenious mechanisms react to any position you adopt. And, since no two bodies are alike, its mechanisms react independently to provide optimal weight distribution and continuous lumbar support for the comfort and efficiency of a wide variety of anatomies.

Vertebra's automatic operating mechanisms are covered with protective bellows which serve as armrests on certain versions. Seats and backrests are black injection molded thermoplastic with fabric upholstery covering seats and backrests.

These unique operating principles are available on stacking Institutional chairs, and pedestal base Operational, Managerial and Executive models for the office, plus Tandem versions for lounge and waiting areas.

Krueger is exclusive licensee of OPEN AÎK B.V. for production and distribution of its products in the United States and Canada. For Vertebra literature, contact:

Architect: Mochon, Hackworthy, Juerisson, Inc.
Milwaukee, Wisconsin

Project: Mochon Residence
Fox Point, Wisconsin

Owner: Lois and Clint Mochon
Fox Point, Wisconsin

Contractor: U.S. Housing, Inc. &
Matt Burazin

Jury Comments: "This residence is arranged to capture the panoramic views to Lake Michigan despite the limitation of the long and narrow site with limited lake frontage. The lightness of the enveloping trellis forms engage the various decks and outdoor living space with the forested character of the site."

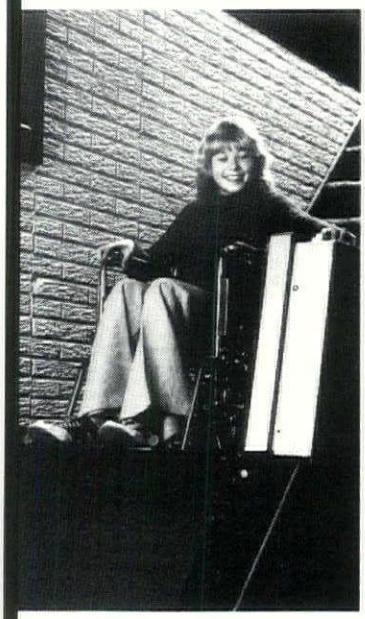
Cheney. When you design a building for everyone.



Many times the problems of designing a building to be totally accessible for people in wheelchairs can be solved simply by including a ***Cheney Wheelchair Lift.*** Cheney's patented, cog-drive wheelchair lifts are safe, durable, easy to operate and they can be installed in just hours. They allow someone confined to a wheelchair to move quickly from floor to floor. So when you're designing for everyone, specify Cheney and everyone will be happy. For a colorful brochure on ***Cheney Wheelchair Lifts, Wecolators***™, and ***Wheelchair Van Lifts,*** call your local Cheney representative or contact The Cheney Company, Dept. WA, 3015 S. 163rd St., New Berlin, WI 53151 (414) 782-1100.

power failures . . . can mean business failures.

When the power goes out, you can tally the hours with dollar signs. Electrical blackouts take their toll in lost production and lost sales.

But blackouts don't have to happen to you.

A Kohler automatic emergency standby system can meet your power needs. When power goes off, Kohler comes on, automatically. Your business stays in business.

See us for more information on Kohler's emergency generator systems for industry, institutions, business, farms, and private homes.

For Safe & Efficient Electrical Systems, Go With a Pro!

Today's electrical systems are more efficient than ever. They're also bigger and more complicated and require the expertise of a pro. A pro who understands such things as: Preventive Electrical Maintenance, Life Safety Systems, Electric Process Heat, Energy Efficient Lighting , Total Energy Management and more. That pro is a qualified electrical contractor. He is a specialist in all electrical systems.

A qualified electrical contractor has the experience and tools to get the job done safely . . . right the first time. Put his management skills, ability, financial responsibility on your team. Your electrical contractor can save you money in the long run.

ELECTRICITY MAKES IT POSSIBLE... A QUALIFIED ELECTRICAL CONTRACTOR MAKES IT PRACTICAL

'79 CONVENTION UPDATE

In just a few days, the 1979 WSA Convention will convene. It is packed with information, ideas, "How To's", product information, resource materials, friends, fun and prizes. In addition, the annual business meeting will provide a forum for members as we look at our own organization and the issues which are facing the architectural profession in the state of Wisconsin. Attendance at the Annual Meeting will keep you informed and update your knowledge of A/E selection, public access to records, Department of Regulation and Licensing activities and more.

A special series of spouses activities will provide a variety of opportunities. In addition, a Hospitality Room for women will be available with bridge tables and coffee and danish.

A TIME FOR SOCIALIZING

As always, the Convention provides an opportunity to see old friends and meet new ones. The first evening Dinner/Dance will provide an opportunity for mixing and catching up on what your friends have been up to. A sumptuous meal is planned. For those who want to watch and/or participate, there will be a special Disco Demonstration by John and Diane Olson. The music menu, with Roman Hanes and His Orchestra, will include something for everyone from ballroom, fox trot to polka and rock. Come join us for an informal evening of good food, conversation and dance.

"A Night On The Town" will start out with a private cocktail party at the elegant Park Avenue, newest and most exclusive night spot in Milwaukee. It compares with New York's Studio 54. You can stay on at the Park Avenue until 2:00 a.m. as guests of the Park Avenue or you may dine in any of Milwaukee's finest restaurants following the cocktail party. A limited number of reservations will be held at Karl Ratzsch's, Pfister English Room and Jacque's (Top of the Marine). The Park Avenue provides a cash bar with special prices ($1.25) during the cocktail hour. For those staying at the Olympia, a bus will depart at 6:30 p.m. for the Park Avenue and "A Night On The Town" will return to the Olympia departing from Milwaukee at 12:15 a.m. If you live in the Milwaukee metropolitan area you may use your own transportation to join with the architects from around the state at the cocktail hour at the Park Avenue.

SECOND ANNUAL CONSTRUCTION INDUSTRY RECEPTION

Invitation tickets have been sent to members and exhibitors. If you have people in your office or consultants or contractor friends who may wish to view the exhibits during the Construction Industry Reception, they are welcome to do so upon presentation of the invitation ticket on Tuesday, May 22, 1979, between the hours of 4:00 p.m. - 6:30 p.m. Additional tickets may be obtained from the WSA

What you should know about Fly Ash.
Architects, contractors, concrete producers! Interested in cutting construction costs while improving concrete performance? Then learn about fly ash!
Produced as waste at power plants, fly ash is the residue of pulverized coal. Its fine, spherical shape, and composition of silica, aluminum and iron, make it the ideal admixture in concrete, replacing tons of more costly portland cement. Its use results in improved workability and pumpability, plus reduced heat of hydration. And the finished product is more resistant to acid and sulfate attack, more watertight, stronger and more durable.
Today, fly ash can be found nationwide in major office buildings, highways, parking ramps, basement foundations and floors, sidewalks, general home constructions — anywhere ready-mixed concrete, concrete block or concrete pipe is used. And anywhere the highest quality product is wanted at the lowest possible price!
Find out what you should know about fly ash. Get your FREE Fly Ash Kit by contacting:

offices. Suppliers other than those exhibiting at the Convention are not to be extended the invitation. They should be encouraged to take booth space at our next Convention, since the exhibit spaces are sold out for this year.

OVERNIGHT ACCOMMODATIONS AT CONVENTION

The spacious Olympia Resort in Oconomowoc provides a multitude of indoor/outdoor sports and recreation facilities. It includes 5 restaurants, 5 lounges, 16 suites, 135 villas and 300 guest rooms. Room accommodations feature double or king-sized beds with plush carpeting and colored decor. The deluxe suites are furnished with open fireplaces and private bars.

For your use, Olympia has a "million dollar" health spa to help you relax and unwind with gyms, whirlpool baths, wet and dry saunas, steam room, grecian shower and sun lamps. Outdoor activities include boating, fishing, sailing, golf and tennis. (We've ordered special summer weather!)

Room rates for WSA members are: single - $38.00 and double - $44.00. Direct your reservations to Olympia Resort, 1350 Royale Mile Road, Oconomowoc, WI 53066 or call 800-558-9573 or (414) 567-0511.

PINS IDENTIFY WSA EXHIBITORS

Each year we are indebted to our exhibitors who provide an excellent display of their product/services through an educational exhibit at the building products exhibition.

In the past several years, WSA has given out small exhibitor lapel pins at Convention time. The lapel pins could be used when calling on architects following the Convention. It is ready means of recognition indicating that the supplier has supported WSA with an educational exhibit at the Convention. This year the 1979 WSA Exhibitor pins are being sent to our 87 exhibitors prior to the Convention. Be on the lookout for sales representatives with the small blue and gold WSA '79 Exhibitor Pin as shown above.

We would hope that you would give some time to those companies calling upon you who have supported and exhibited at our Convention. We feel the exhibitor pin concept is an excellent way to distinguish our faithful exhibitors from the numerous other representatives.

There will be ample time for you to view the exhibits at the Convention. We would encourage you to set aside this time for the many loyal and enthusiastic exhibitors who contribute generous amounts of time and money to support our Convention. Their well-designed booths and new product lines should be of interest to every member. Don't forget the Construction Industry Reception where you can invite others from your office just for the viewing of exhibits. This year we may have many new exhibitors including several interesting solar energy exhibits. Don't miss the 1979 Building Products Exhibition, it promises to be one of the most stimulating!

The Right Property Deserves
THE RIGHT OWNER

Now is the time to use your equity and increase your cash position.

Combine our experience with the fact that we represent The Travelers and you have a powerful and effective financial resource available to you.

Why not consider selling your existing or proposed warehouse, shopping center, office building, industrial plant (sell and lease back), apartment or other quality general purpose property? We represent a major investor, The Travelers Insurance Company, who is seeking to acquire attractive real estate investments.

For complete equity purchase information and mortgage financing service, call Tom Joswick or Dave Krill.

SOCIETY NEWS

NATIONAL AIA CONVENTION

In this issue there are several announcements encouraging participation at the National AIA Convention in Kansas City June 3-7. If you wish to be an official delegate to the Convention representing Wisconsin on all business matters, contact your local chapter officers or Alan Carlson, WSA Executive Director. President John B. Hipp, AIA, will head up the delegation to Kansas City. A strong delegation representative of our membership is necessary so that the thinking of Wisconsin architects can be heard at the National level. The Kansas City Convention, celebrating architecture, will provide important learning sessions and social events you won't want to miss.

PEOPLE/ PLACES

An added note to last month's announcement on newly elected Fellows: Fellowships run in the family of Gordon D. Orr Jr., FAIA. His uncle, the late Douglas W. Orr was also a Fellow of the American Institute of Architects and was its National President from 1947-49. The senior Orr made the presentation of the AIA Gold Medal to Frank Lloyd Wright.

James P. Schlueter, AIA, Vice President of the Northeast Chapter and Uel Ramey, AIA, recently made award presentations to the Wisconsin News Photographers Association members at their annual convention in Green Bay. The Wisconsin News Photographers Association and the Wisconsin Society of Architects annually conduct a joint architectural photography competition for news photographers. Uel Ramey, AIA and Maynard W. Meyer, FAIA along with Ted Roszumalski, professional photographer, were the jurors for this years' competition. The photographers were presented with certificates and checks for their winning entries by Schlueter and Ramey. The winning photos will appear in a future issue of the Wisconsin Architect magazine, and will be on display at the WSA Convention.

Richard D. Peeples, AIA, Second Vice President of the Southeast Chapter, has formed a new architectural firm under the name of PEEPLES & DEISS, ARCHITECTURE AND PLANNING with offices at 119 South 6th Avenue, West Bend, Wisconsin 53095 (phone 414-334-4699). The firm has an auxiliary office at 1524 Mower Court, Wauwatosa, Wisconsin 53213 (phone 414-475-6003).

William K. Davis, AIA, current President of the Wisconsin Architects Foundation, along with John Fatica have announced the formation of the architectural firm of DAVIS & FATICA, ARCHITECTS. Their offices are located at 733 N. Van Buren Street, Milwaukee, Wisconsin 53202 (phone 414-271-0103).

The firm of GUERIN-MOONEY, INC. has announced a change in their name to ARCHITECTURAL DESIGN AND CONSTRUCTION SERVICES, INC. William Losch is now associated with the firm. Their offices are located at 5645 N. Green Bay Avenue, Milwaukee, Wisconsin 53209 (phone 414-228-1190).

EDUCATION JUBILEE THEME OF ASA CONVENTION

The 10th Annual Convention of the Architectural Secretaries Association will be held at the Radisson Muehlebach Hotel in Kansas City, Missouri, June 2-7, 1979. The theme, Education Jubilee will complement the American Institute of Architect's "Celebration of Architecture" and will be a great learning experience for all who attend.

The Kansas City ASA chapter will host a reception Saturday evening from 7:00-9:00 p.m. for all members/guests and will play a key role in coordinating many local activities connected with the convention.

Education Jubilee has been planned for all ASA members, guests, and prospective members. All interested in receiving registration information, please contact a local AIA chapter or write:

Carole L. Miller, Chairman
Registration Committee

Columbus, Ohio 43229

CHANGES IN MAGAZINE THEME SCHEDULE

The Wisconsin Architect Editorial Board has approved changes in the following issues with regard to themes. This issue is the first of two Awards Issues. Awards II is scheduled for the June Issue. As a result, the theme schedule will be as follows: May - Awards I Issue; June - Awards II Issue; July - Post Convention Issue; August - Commercial/Retail-Energy Update; September - UWM/SARUP 10th Anniversary; October - Interiors; November - Second Time Around - Adaptive Reuse/Historic Preservation and December - Architecture for Worship.

MEMBERSHIP ACTIONS

The following membership actions were approved by the Chapter Officers of the WSA/AIA and The Institute:

JOSEPH W. ALBERT, III, AIA, was approved for AIA Membership in the Southeast Wisconsin Chapter;

JOSEPH G. DURRANT, FAIA, was approved for Member Emeritus in the Southwest Wisconsin Chapter;

CRAIG T. ELLSWORTH, was approved for Associate Membership in the Southeast Wisconsin Chapter;

COLIN L. GODDING, was approved for Associate Membership in the Southwest Wisconsin Chapter;

DAVID K. LAWRENCE, AIA, was approved for AIA Membership in the Southeast Wisconsin Chapter;

FREDERICK M. MARKS, was approved for Student Affiliate Membership in the Southeast Wisconsin Chapter;

DAVID NOELCK, was approved for Associate Membership in the Southwest Wisconsin Chapter;

THOMAS D. PETERSON, was approved for Student Affiliate Membership in the Southeast Wisconsin Chapter;

ROBERT J. SHERBURNE, AIA, was readmitted to AIA Membership in the Southeast Wisconsin Chapter.

WE CAN'T PROMISE YOU ROSE-COLORED GLASSES...

BUT WE CAN INSURE A CLEAR VIEW OF YOUR WORLD

No one can guarantee how long good vision will last. The odds are that you and your family will need glasses sometime in the future. In fact, 47% of all Americans wear eyeglasses.* That adds up to big expenses in eye examinations, prescription lenses and frames... expenses that typically come right out of your pocket.

H.I.C., Health Insurance Corporation, has the remedy--the Prepaid OpticalVision Program that offers optometric coverage at an affordable price.

Insure your good vision. Call your H.I.C. representative today.

BUILDING ENERGY CONSERVATION GRANT PROGRAM ANNOUNCEMENT

The University of Wisconsin - Extension (UWEX) Department of Engineering and Applied Science has announced their collaboration with the Wisconsin Division of State Planning and Energy (DSPE) in a new federal program that will assist schools, hospitals, local governments, and public care institutions in improving the energy efficiency of their facilities.

This is a 50/50 matching funds program, with the institution's share coming from non-federal monies or in-kind contributions. The program is divided into two major areas: schools and hospitals; and local government and public care buildings. The schools and hospitals funding for Wisconsin exceeds $19 million, which will be allocated over a three-year period. This funding is intended for preliminary energy audits, energy audits, technical assistance, and energy conservation projects. The local government and public care buildings program is similar; however, no funding is provided for energy conservation projects. Wisconsin will receive approximately $1.38 million over a two-year period for these facilities.

"The overall program will run in phases over the three-year period," said Charles Fafard of UWEX Engineering, technical manager of the program. "The first phase is already well underway. In late January, DSPE solicited basic building information from every eligible school, hospital, local government, and public care institution in the state. There were about 750 responses. At the same time DSPE was soliciting clients, engineers at UWEX were developing a Preliminary Energy Audit (PEA) form. This form will be sent to all of the buildings and institutions who responded to the January questionnaire. These forms, when returned, will provide a basic profile of all the buildings statewide participating in the program."

"When the PEA forms have been returned, DSPE will send to interested buildings and institutions a comprehensive energy audit form. This form must be prepared by someone familiar with the building being audited. When completed, it will be used as the basis for a walk-through audit conducted by a state-recognized auditor. Federal funds, on a matching 50 percent basis (generally not to exceed $300) are available for the walk-through audit."

"Participation in this program for engineering or architectural consultants really begins at this point," said Fafard. "In this second phase, auditors will be selected on the basis of energy audit knowledge and experience. These auditors will not be in the employ of either the state of Wisconsin or the University of Wisconsin but will be consultants retained by the individual buildings or institutions. We're now at the stage where we are inviting consultants to join the program."

If a firm or individual is interested in more information, they can contact Vernita Aigner of DSPE at (608) 266-7375, and ask to be placed on the auditor mailing list. People on this list will receive information on the program and the state's qualifications package.

Due to delays in final revisions in legislation in Washington, the turnaround time for submitting the auditor qualifications questionnaire will be short — probably two weeks or less. State and University personnel will review the applications, and the selected firms will be invited to a short meeting in Madison to explain the program in more depth and study the audit forms.

The audit forms for the walk-through energy audit have also been prepared by UWEX Engineering staff. The use of a consistent audit form will make the program operate more smoothly. Even institutions that go ahead and have an audit conducted on their own will be expected to use the University-developed form.

Fafard can think of two good reasons for a consultant to be interested in participating in the program. First, it gives consultants a chance to involve themselves more deeply in the ever-expanding business of energy audits, with opportunities for learning about various types of buildings and situations. At the same time, it gives these consultants a chance to apply their present expertise to the type of institutional facility particular to this program, and as this program will be around for three years, it gives A/E professionals a chance to become familiar with the program in general and the standardized audit forms.

Second, starting next year, the program will move more deeply into a technical assistance stage, in which detailed engineering analysis of facilities and energy conservation recommendations beyond operating and maintenance considerations will be prepared. The firms already familiar with the program will have a head start on participation under this technical assistance phase.

The energy audit phase of this program will generally require three steps: first, two-to-four hours of preparation for the walk-through audit, using building data and the preliminary energy audit data for each building; second, a three-to-six hour walk-through audit using the form prepared by UWEX Engineering; and third, preparation of a report to the building manager listing recommended low-cost, energy-saving operation and maintenance changes, and outline the need for energy conservation measures which would require larger capital investment.

Fafard urges all interested A/E consultants to contact Vernita Aigner at DSPE right away, as the entire auditor selection process should be completed by June 1. The list of selected consultants will then be issued to every participating institution, allowing them to select a firm close by, or with particular expertise with their type of building. Auditor participation in the energy audit phase does not entail a commitment for any future work on this program.

"ARCHITECTURE USA" STAMPS TO BE INTRODUCED AT AIA CONVENTION

WASHINGTON, D.C., April 14, 1979 — American architecture will be honored by the U.S. Postal Service through a commemorative series of stamps that will be introduced during special first-day-of-issue ceremonies June 4 at the American Institute of Architects' National Convention in Kansas City, Mo.

The four stamps, entitled "Architecture USA", depict historic structures from the Neoclassical period of American architecture (1780-1840). The landmarks, still in use today, were designed by four individuals — Thomas Jefferson, Benjamin Latrobe, William Strickland, and Charles Bulfinch — who helped shape American architecture.

The commemorative series marks a significant milestone in AIA's "Celebration of Architecture," a yearlong campaign to engender public awareness of architecture and its impact on the built environment. The stamps will be first sold from a special modular post office substation in Kansas City's H. Roe Bartle Convention Center, site of the AIA convention.

Three good reasons for selecting Weil-McLain

THE CHOICE — Choose from a complete line of oil, atmospheric gas, and combination gas/oil boilers, from 187,800 to 6,060,900 BRU/Hr.

THE FLEXIBILITY — Match any job requirement with a choice of factory-tested packages, factory-assembled sections or individual sections.

THE QUALITY — Only Weil-McLain has such quality features as flame-retention oil burners, asbestor rope seal, short draw rods, multiple tankless water heaters, forced draft firing and, of course, cast iron construction.

Choice, flexibility, and quality . . . three good reasons for contacting your nearest Weil-McLain distributor.

Pt. Barrow, Alaska Gives A Whole New Meaning To "Sitting On Top Of The World"

Cronco-Lite

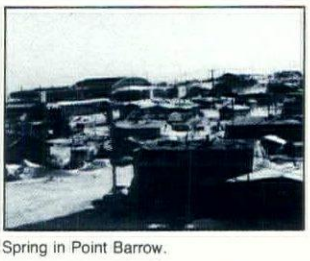
Over 50 Years

Point Barrow, Alaska, Your Typical Oceanside Village.
Artic Ocean that is, the northernmost point of the United States. North of the highest peak in North America. Where the permafrost makes the most routine matters a challenge for ingenuity and a struggle for survival.
There's no running water. No way to lay underground pipes. Water has to be trucked in, sewage trucked out. No paved roads. No foundations. All structures are built on pilings secured in the earth by mud. The diet? Forget about salads. Nothing green grows up here. Lots of walrus meat, though.

Cronstroms' Thermal Barrier Curtain Wall is the Largest, the Farthest North.
How did Cronstroms end up here at the top of the world? The building pictured is corporate headquarters for Arctic Slope Regional Corporation in Point Barrow, an impressive structure especially in this stark landscape. The architect specified Cronstroms' CTS thermal barrier curtain wall for a large portion of the exterior. The CTS energy-saving system eliminates metal to metal contact. No frost or condensation at temperatures to −30°F. The CTS thermal barrier keeps the outdoors in its place, even here. Cronstroms' was the *first* to develop a competitive thermal barrier system. Our system has already met the challenge on top of the world at Point Barrow. Now we're ready to meet your challenge.

Summer at the beach.

Typical street scene.



Spring in Point Barrow.
