

Wisconsin Architect

VANDE HEY RALEIGH

ARCHITECTURAL ROOF TILE

"Best Roof Under the Sun"

PERMANENT Vande Hey-Raleigh Architectural Roof Tile is a 50 year warranted roof. Completely weatherproof . . . withstands tropic summers, frigid winters, with equal ease. Termite-proof, rodent-proof, rot-proof concrete roof tile will offer protection from the elements for as long as the structure stands. Reroofing costs are eliminated.

BEAUTY Vande Hey-Raleigh Roof Tile offers a practical beauty never before possible. From the soft, flattering lines of the Rough Shake design to the more traditional styles, Vande Hey-Raleigh's distinctive designs add a roof of beauty and color that harmonizes with any style architecture.

PRECISION MADE Vande Hey-Raleigh Roof Tile is manufactured with all modern high production equipment . . . solving the problem of high cost and extreme weight with a completely new formulated mix impregnated with plasticizers giving the product a soft finish . . . each tile trimmed to size.

Vande Hey-Raleigh Architectural Roof Tile is a beautiful, maintenance free, non-combustible roof system.

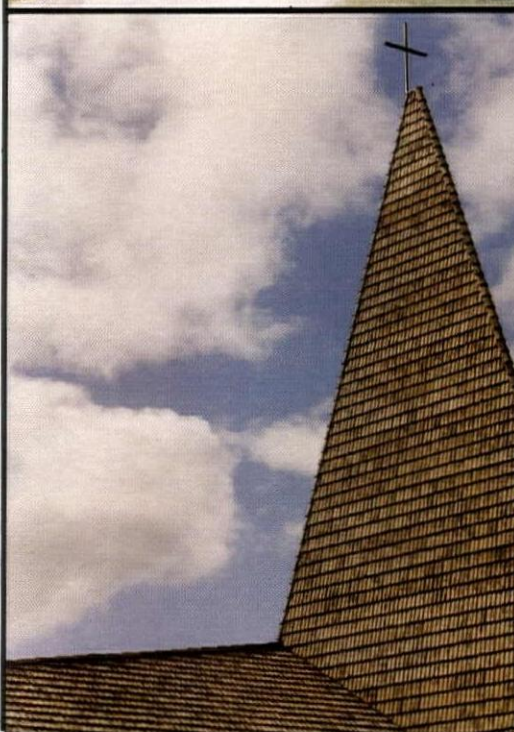

It cost less than fire treated cedar shakes, clay or slate.

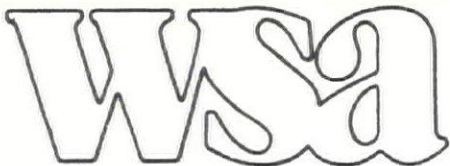

Call collect for your nearest sales representative. Our sales people are active throughout the state and will be happy to meet with you.

Membership Information

REGULAR MEMBERS are architects who are legal residents of and have been licensed or registered by any state, the District of Columbia or any U.S. Territory.

ASSOCIATE MEMBERS are persons who are legal residents of Wisconsin and are employed in a professional or technical capacity under the supervision of a licensed architect directly related to the practice of architecture, or are employed in circumstances recognized by licensing boards as constituting credits towards architectural licensing.

PROFESSIONAL AFFILIATES (State members only) are non-architects, registered to practice their professions where such requirements exist with established professional reputations. Professional Affiliates may include engineers, planners, landscape architects, sculptors, muralist and other artists, professionals in government, education, industry, research, and journalism, and other professionals whose work is related to the practice of architecture.

STUDENT AFFILIATE (State members only) are undergraduate or post-graduate students of architectural schools or secondary school students within the territory of the WSA.

DUES STRUCTURE

	AIA MEMBER	AIA ASSOCIATE MEMBER	PROFESSIONAL AFFILIATE	STUDENT
A I A	1st year \$80 plus \$10 admission fee 2nd year \$105 3rd year & after \$150	1st year \$25 plus \$10 admission fee 2nd-5th year \$35-65 6th year & after \$70	None (AIA)	None (AIA)

*1st year AIA member pays 40% of listed amount
2nd year AIA member pays 75% of listed amount
3rd year or more AIA member pays total amount

SUPPLEMENTAL DUES NOTES

The AIA Regular Member is also responsible to the Institute for supplemental dues beginning on January 1 of the year following admission based upon the number of registered architects in the firm (both employees and employers as of January 2) at the rate of \$170.00 each. The firm will be given a credit of \$100.00 against its supplemental dues obligation for each such registered architect who is an AIA member.

Invoices for national and state, dues will be mailed in December.

Members who have not paid WSA dues by July 31 shall be in default and shall be so notified. Members still in default as of September 31 shall be terminated.

Wisconsin Society of Architects Construction Industry Handbook

Fifth Edition, February 1985

The WSA Construction Industry Handbook is published as the February issue of the Wisconsin Architect as a reference handbook for all readers on matters pertaining to the Wisconsin Society of Architects.

The circulation of the Handbook is to all members of the Wisconsin Society of Architects of the American Institute of Architects (WSA). Additionally, copies of the Handbook have been sent to members of the Associated General Contractors, consulting engineers, interior designers, land-

scape architects, and many other individuals involved in the design and construction industries.

Your comments and suggestions are appreciated with reference to other individuals or organizations that should receive copies of this Handbook next year, as well as revisions or changes in content that you feel are appropriate.

One last word. Please continue to refer to the advertising portion of the Handbook when looking for products or services. Without this support the Wisconsin Architect and this Handbook would not be possible.

NOTICE: The Wisconsin Architect and/or the WSA are not responsible for materials that have been rendered obsolete or revised since this Handbook was printed.

President's Message

Dear Colleague:

All of us in the WSA can look back at 1984 with considerable pride of accomplishment. Our membership, our programs and our prominence in the professional world all achieved new improvements. Will 1985 continue the success of the past several years?

Yes! Our successes of the past offer us new opportunities to advance our profession as well as meet the present challenges to it.

The private practice of architecture is under considerable economic stress. The expense of maintaining a representative practice is increasing. Personnel development and technological improvements are often neglected for cost reasons. Clients are increasingly exploiting fee competition and uncompensated services. Individual compensation lags behind that of comparable professionals. Liability claims, and the costs of insurance are growing each year.

We, as a society, will vigorously attempt to confront these and other challenges to the welfare and quality of the profession in Wisconsin. To do this we must be financially sound, administratively alert and responsive, and professionally committed.

Our commitment should be expansive and forward-looking. It is not enough to resist the everyday attacks. We must recognize our leadership position and dedicate

ourselves to improving our professional skills, our sense of community worth, and our image as individuals of responsibility.

If we are to contribute to the quality of life in Wisconsin, we must challenge not only the adverse outside influences of economic short-sightedness, environmental deterioration and insensitive design, but we must also continually challenge ourselves to meet the highest standards of professional competence and conduct.

As a licensed profession, we are subject to the statutes, rules and regulations intended to protect the health, welfare and safety interests of the citizens of Wisconsin. We must remain faithful to those interests and at the same time, represent the concerns and standards of our profession.

I welcome the opportunity to share new ideas, creative approaches and the satisfaction of successes with you. Working together, I'm confident we can progress toward an improved climate for architectural practice in Wisconsin.

CAST ASIDE THE GALLEY SLAVE ROLE.

Tie into the Epicurean™, Kohler's food preparation center, and catch the latest in kitchen freedom.

Bring convenience on board. With the wooden drain deck, the hardwood cutting board and two basins — a scrubbing basin for the big jobs and a central disposal bay.

Run silent, run deep. The Epicurean is beautifully fashioned out of enduring, enameled cast iron. This minimizes disposal noise and vibration. The scrubbing basin plunges 9½ inches.

It's shown in Sequoia with Alterna faucet and optional sprayer. Other faucet and color combinations

are available.

The Epicurean from Kohler. It's a bold, beautiful way to cast aside the galley slave role.

See us for more information on this and all Kohler products for kitchen, bath and powder room.

AutoCAD brings sophisticated Computer Aided Design capability to microcomputers for 5% of mainframe price.

- Bi-directional Zoom allows drawing modifications at any level of detail from 1 to one trillion to one.
- Isometric perspective is easily generated using the isometric GRID and SNAP facility.
- With OBJECT SNAP drawing elements can be locked into reference points on existing objects.
- Blocks containing current drawing elements may be defined, saved, inserted, and used in subsequent drawings with attribute definition capabilities.
- Drawings can be infinitely layered, each with its own assigned color.
- Objects can be edited with MOVE, COPY, PAN, ARRAY, and ERASE functions.

AutoCAD runs on the IBM-PC, Texas Instruments Professional, and most IBM compatible microcomputers under MS-DOS. AutoCAD interfaces to over 15 input devices and more than ten plotters. For more information contact Craig Fonzen, Professional Systems Group.

SPANCRETE & EAA

TOGETHER, WE MADE A PERFECT LANDING.

Experimental Aircraft Association Aviation Center

Spancrete pays in many ways—from building design right through livability with low maintenance cost. Our customers—at all levels—appreciate this.

TOM POBEREZNY, PRESIDENT, EAA AVIATION FOUNDATION. "Our reasons for choosing Spancrete were simple and straightforward. We needed a building that could be constructed on schedule at a very reasonable cost, while providing low maintenance and maximum energy savings. We were also interested in a wall panel system which would make future expansion relatively easy and economical. Finally, we wanted an attractive building with rich color and a consistent textured surface that fit in well with the surrounding area. Spancrete has provided us with everything we've asked for. We are very pleased."

PAUL BRUMMUND, AIA SENIOR VICEPRESIDENT/PROJECT ARCHITECT, HEIKE/DESIGN ASSOCIATES, INC., ARCHITECTS, ENGINEERS, INTERIOR DESIGNERS. "We designed the EAA Aviation Center using Spancrete. It provided us with the flexibility to create an exciting structure contemporary in form and well suited to its site. The Spancrete Wall Panel with a buff colored exposed aggregate surface was our choice for appearance and practicality. The precast panel modular concept is well suited to the EAA. Anticipating future expansion, the building and panels were

designed to be removable for reuse on additions to come. The thermal mass characteristics of Spancrete Sandwich Panels with built-in insulated core delivers a high R-Value providing beneficial energy conserving qualities by helping to maintain a stable interior environment. Erected in freezing winter conditions, the panels went up quickly providing, in one step, a complete wall system from the exterior weathering surface through the insulation core to the finished durable interior surface requiring only painting."

FRITZ GANTHER, BEN GANTHER CO., GENERAL CONTRACTOR. "Using Spancrete on the EAA building made my job a lot easier. We've always been satisfied with their product, and since this project was to be constructed in the dead of winter, I knew it would be completed on time using Spancrete wall panels."

"Who can help me use greater freedom of design in concrete and keep project costs in line?"

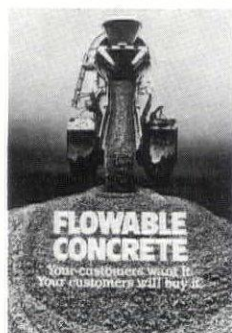

In today's economy, freedom of design in concrete goes beyond the drawing board. Concerns about high project costs often mean compromises that ultimately restrict freedom of design. And Master Builders is doing something about it.

We've developed an advanced admixture system that can help you bring your imaginative concrete designs to life, within budgets.

Master Builders exclusive Synergized Performance Systems can provide you with a flowable concrete which offers exceptional high quality and the aesthetic expression you're looking for. It lets you design more elaborate shapes and textures, and is capable of producing distinctive concrete forms — economically.

In addition, with flowable concrete through Synergized Performance Systems, contractors gain the economy of easier and quicker concrete placement with no compromise in quality or strength. It eliminates the problem of the contractor adding water or unproven materials at the jobsite.

Find out more about flowable concrete. Call your local Master Builders representative or write for our free folder. Contact Master Builders, 23700 Chagrin Boulevard, Cleveland, Ohio, 44122. Or phone (216) 831-5500.

Ask for John Aube or Chris Donajkowski, our Quality Control Technicians.

Just a few of the possibilities for VELUX® roof windows and skylights.

While the difference between roof windows and skylights is very straightforward, the choice offers you a virtually limitless array of attractive possibilities. A roof window opens and pivots so both glass surfaces can be cleaned from inside. A skylight does not pivot for cleaning. This means you can select exactly what you need for your home, your roof, and your life-style. As well as your budget. Of course, there is a difference in quality, selection, and value among manufacturers. But, any comparison will show you why VELUX is the world leader. With 44 years of experience and craftsmanship behind us, VELUX can give you a wider choice of models, more features, quick delivery, and higher quality, all at a remarkably competitive price.

In addition to our four distinctive models, VELUX also provides precision-engineered prefabricated flashing to make installation easy and weathertight. Plus, we offer a full range of optional accessories and glazings.

We'd like to tell you more. Write for our 24-page full-color brochure, "The Complete Guide to Roof Windows and Skylights," along with a price list. It's filled with facts and ideas. And it's free!

VELUX®

The world leader
in roof windows
and skylights.

Mail this coupon. We'll send you "The Complete Guide to Roof Windows and Skylights" and a price list within 24 hours.

Public Telephones from Wisconsin Bell...An Important Human Consideration.

An architect planning a modern building is faced with an overwhelming number of decisions. Federal, state and local codes must be met, energy efficiency strived for, and, above all, the human element considered. The wants and needs of the people who make a building their working "home" for some forty hours each week, as well as the convenience of others who visit the building daily, are considered in the early planning stages.

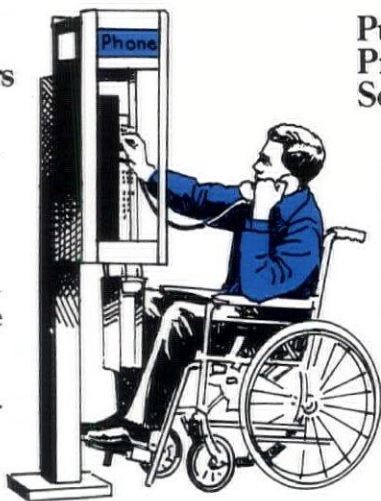

Public Telephones Provide A Service People Want, Need and Expect.

Experienced architects call on many support resources early-on in each project. Wisconsin Bell has Public Communications Specialists ready to survey the public telephone needs based on a building's location and anticipated traffic flow. Together with the architect, Wisconsin Bell's specialists determine public phone locations that blend in with the structure's design and remain convenient to the building's tenants and visitors. Wisconsin Bell specialists also can point out other important details.

Convenient Phone Placement Considers Special Needs.

Accommodating the disabled requires special consideration. Architects are aware of Federal mandates in this area, and Wisconsin Bell specialists have the resources to provide guidance in choosing barrier-free enclosures with correct heights of coin slots and dials.

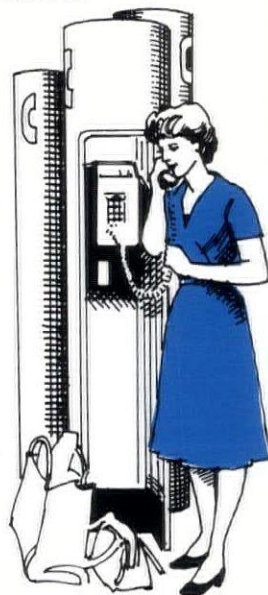

Public Telephones Provide A Revenue Source Without A Downside.

Commissions from public phone use can add up to an attractive sum. It's a revenue source without expenses. Because Wisconsin Bell owns the public telephones, they also install and maintain them.

Public Phone Planning Assistance Easily Available.

Wisconsin Bell is ready to help building designers add the convenience and efficiency of public telephone service. Our Public Communications Specialists are qualified to provide the guidance needed to equip a building with this much needed and desired service.

Call Wisconsin Bell toll-free at 1 800 242-2055.

Helpful Signage Points the Way.

A simple, recognizable, identifiable sign calls the public's attention to the service they seek. Public telephones that people cannot find are little better than no phones at all.

Wisconsin Bell Public Communications Specialists point the architect's way to signage in harmony with the texture, material, color and design of the area.

SHADOW STONE

Sierra Split

MR: **Designer Series Block** are manufactured and sold through an extensive network of Concrete Block Manufacturers throughout the United States and Canada. These manufacturers are licensed by Designer Blocks, Inc. who provides the equipment and owns the patent rights to these products. This network provides prompt service, competitive costs, and an appreciation of local needs and desires.

PP: Three new faces comprise the Designer Series. They are **Shadow Stone**™ which divides the 8" x 16" surface into three unequal sections that are split on different planes creating 6 separate shapes **Castle Rock** which divides the 8" x 16" surface into two unequal sections that are split on different planes creating 4 separate shapes and **Sierra Split** which divides the surface into four equal sections split in a saw-tooth pattern.

UA: APPLICATIONS: **Designer Series Block** may be installed wherever concrete masonry units are used. They are load-bearing, fire-resistant, noise reducing and durable. They are well suited for exterior and interior walls. **Designer Series Block** have been used on the following types of buildings: commercial, offices, industrial, churches, schools, apartments, motels, municipal, restaurants and residences.

AI: INSTALLATION: **Shadow Stone**™ and **Castle Rock** cmu's shall be laid in running bond (half-bond) pattern. Units shall be selected randomly from block cubes so as not to create a defined pattern. The backside of the wall shall be kept smooth and plumb. All mortar joints shall be tooled and/or compressed. Units may be laid randomly upside down. Care should be taken at control joints and jambs to maintain an irregular pattern. Quarter, half and three-quarter pieces will be allowed when needed.

Sierra Split cmu's shall be laid in stacked or running bond. Units should **not** be laid upside. Care should be taken to maintain a uniform pattern where the splitting angle is always in the same direction on each wall.

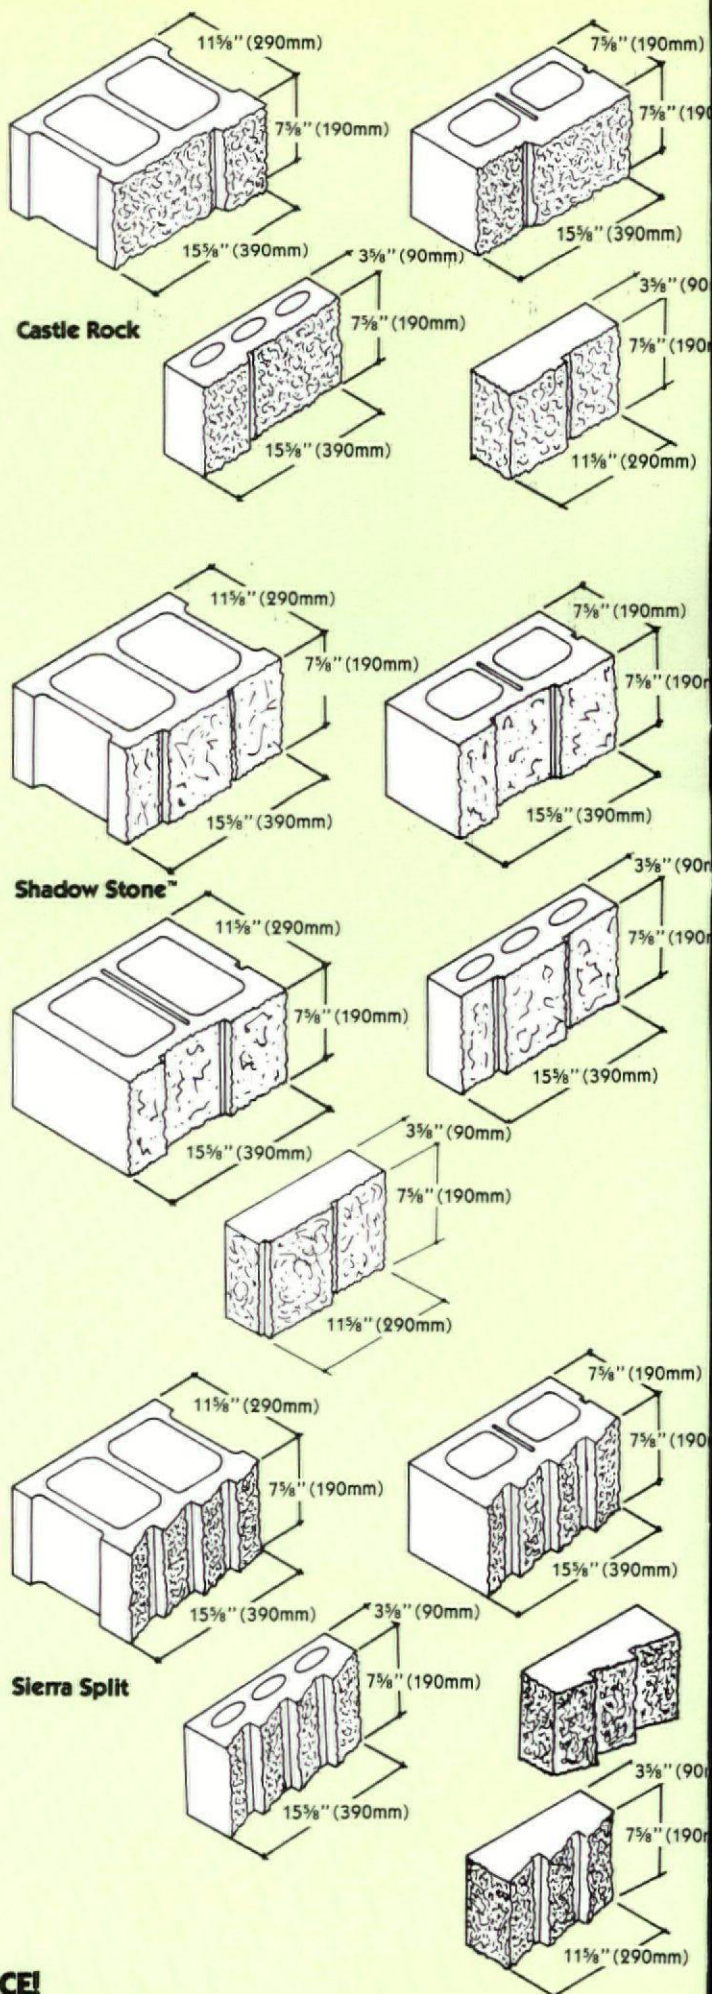

MF: MATERIALS: **Shadow Stone**™, **Castle Rock** and **Sierra Split** cmu's shall be made in normal weight aggregates complying with ASTM C-33 or where appropriate in lightweight aggregates complying with ASTM C-331.

COLOR: Where required, provide integral color to be mixed with cement and aggregates to match the color selection provided by the local licensee.

TS: TECHNICAL DATA: **Shadow Stone**™, **Castle Rock** and **Sierra Split** concrete masonry units shall be manufactured in nominal face dimensions 16" long x 8" high in standard thicknesses (4", 8", 12", etc.). Special shapes shall be provided as required for corners, jambs, control joints, and lintels.

CC: PERFORMANCE: **Shadow Stone**™, **Castle Rock** and **Sierra Split** cmu's shall be manufactured to comply with ASTM designation C-90 grade N.

AC: AVAILABILITY: **Designer Series Blocks** are available through an extensive network of concrete block manufacturers.

U.S. Patent No. 4,335,549 CANADIAN PAT. 1984

WSA Firm Directory

Wisconsin architects in recent years have won many important awards and commissions across the nation.

They have also served thousands of clients, large and small, throughout

Wisconsin and the Upper Midwest with skill and dedication. If you need the services of a highly qualified architectural firm, you will find a suitable one in this Directory. Or if you aren't sure you need an architect, any of the firms listed herein will welcome the opportunity to meet with you to provide professional advice and recommendations.

A handwritten signature in dark ink, appearing to read 'H. Schroeder', with a stylized, cursive script.

Masonry Institute of Wisconsin
8989 North Deerwood Road
Milwaukee, Wisconsin 53223

RE: Beth El Ner Tamid Synagogue

Dear Masonry Institute:

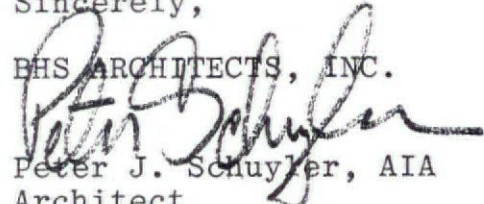

The design for the new School and Synagogue for Beth El Ner Tamid reflects both the Owner's and Architect's desire to take advantage of a natural site and to respect the traditions of Judaism. The selection of the primary building materials came very early in the design process, and set the theme for both the interior and exterior of the building.

A combination of textured concrete masonry and polished concrete masonry was chosen for all of the exterior walls and for the majority of the interior walls. The masonry material was selected for its' scale in relationship to the total building, as well as for its' ability to convey a sense of strength and permanence. The practical considerations of durability and relative cost were also factors in the decision. The block and mortar were both integrally colored to achieve a warm, earth-tone appearance. The texture of the block is accentuated in different ways by the play of light from skylights, windows, and strategically placed artificial sources. The polished block is used as a base for the building to rest upon, and it provides a visual contrast with the texture block above.

Masonry plays a key element in the success of the design for the new Synagogue. The color, texture, and practicality of the masonry materials make it an ideal choice for this application.

Sincerely,

BHS ARCHITECTS, INC.

Peter J. Schuyler, AIA

TRUE, BUT...

TRUE. J.W. Peters builds more precast/prestressed concrete parking structures in the Midwest than anyone else; perhaps even more than the next two or three producers combined.

BUT, that's not all we do. J. W. Peters produces architectural concrete and total framing for precast/prestressed concrete office buildings, warehouses, multi-housing projects, bridges and many other structures.

J.W. Peters...versatile, reputable, reliable.

Cheney Lifts provide the freedom to get up and down stairways.

The Liberty
Wheelchair Lift

The Handi-Lift

THE LIBERTY™ WHEELCHAIR LIFTS enable
individuals to ride safely and comfortably on a wide
variety of stairways. The Lifts are so versatile they
can accommodate top or bottom overruns and even
go across intermediate landings.

- Optional space saver rail
- 500 pound load rating
- Mounted to one wall only
- Outdoor installations

THE HANDI-LIFT® Vertical Wheelchair Lift provides
safe stairway and building access for people
confined to a wheelchair. Feature for feature, it's
unsurpassed for safety and versatility.

- Lifting range of 4 to 12 feet is highest in industry
- Provides a full 12 square foot platform
- Adapts to numerous indoor and outdoor applications
- 500 pound load rating ... optional 750 pound load rating available.

Where a restrictive access is required, you'll find
the Handi-Enclosure® unsurpassed for safety and
ease of installation.

To find out more about the freedom Cheney Lifts
can provide you with, call or write the
Cheney Company.

Contract Drafting
Computer Aided Design/Drafting
Software/Hardware Sales
AutoCad Training/Support

AutoCAD™ is a computer-aided drafting and design system that runs on any significant microcomputer, bringing the benefits of a high-performance CAD facility within the range of even the smallest drawing office. Prices for complete systems, including a multi-pen 24" x 36" plotter, start as low as \$10,000. The general-purpose AutoCAD system is suitable for a wide variety of applications, and is used worldwide by engineers of every discipline, architects, systems designers, shopfitters, graphic designers, and factory and facilities planners. AutoCAD is used to produce virtually any kind of drawing(s): mechanical, architectural, electrical, schematics and flowcharts of every description, PC board artwork, technical illustrations, office layouts, farms designs, site safety plans, cutting patterns, organization charts, and even such specialized things as archaeological site documentation or stained glass layout.

MAINFRAME CAD CAPABILITY AT 5% OF THE PRICE

AutoCAD is a complete, professional CAD system, with features you would expect on mini and mainframe systems costing 10 to 50 times more. AutoCAD is also easy to learn and use, requires no prior computer knowledge, and is exceptionally easy to tailor to each user's specialized requirements. Screen and tablet menus, component and shape libraries, text fonts and styles, line types, cross-hatching patterns, layer names, object attributes, can all be defined or modified by users to suit individual needs.

The well-designed menu structure offers simplicity to the infrequent or unskilled user, and speed to the skilled. Even complex command sequences, including user-defined parameters, can be activated by touching a single menu item.

The indexed User's Manual is comprehensive, well-illustrated and easy-to-read, while the on-line HELP facility provides detailed reminders as needed.

NO MORE 'BACK TO THE DRAWING BOARD'

AutoCAD handles drawings the way a word processor handles text. Drawings of any size are created and edited interactively, using a digitizer or mouse to point to screen or tablet menu items and to move the drawing cursor around the screen. Once stored on a floppy or hard disk, the drawings may be plotted out at any scale, as required, and can be used freely as components in other drawings.

The basic AutoCAD drawing elements are lines, arcs of any width, arcs, circles, solids — and inserts from other drawings. Drawings can be annotated with text of any size, position and angle, from a variety of fonts and styles. Rectangular or circular repeats of objects, e.g., brick walls, memory arrays, or gearwheels, can be generated automatically.

Drawing elements can be positioned on the screen by "Freehand" pointing — with or without the aid of GRID, SNAP, ORTHO and other drawing aids — and in most cases they can be interactively "dragged" into position. Exact dimension or position requirements can be entered through the keyboard, expressed either by absolute X,Y coordinates, lengths or angles, or as relative X and Y displacements or distance and angle from the last point.

Existing paper drawings can be copied into the system, in sections if necessary, using a digitizing tablet. A comprehensive set of editing commands allows drawn objects of any complexity to be moved, copied, repeated, changed, mirrored, rotated, partially or completely erased, and vertically or horizontally scaled. Any angular corner can be replaced by a fillet.

Drawings can be created on an unlimited number of layers, each with user-defined alphanumeric names. Different layers can be displayed and plotted with different non-continuous line types, in different colors if the system's display and/or plotter allow. Layers can be turned on and off in any combination, providing selective display or plotting of drawings as if on transparent overlays.

Cross-hatching can be generated automatically at any angle and pitch, either from a library of more than 40 standard patterns, or from user-defined additions.

AutoCAD's dimensioning facility can automatically create linear, angular, and radial dimensions, with or without tolerances. Dimensions, data input, and a continuously updated display of current coordinates can be expressed in either metric units (0 to 8 decimal places), scientific/exponential notation, or feet and inches. Angles can be displayed in degrees with decimal fractions, or in degrees, minutes, and seconds.

AutoCAD stores drawing data internally in full floating-point format, with an accuracy of 14 significant places and a ratio of over one trillion to one between the smallest and largest object. Accuracy of the final plotted output is limited only by the plotter resolution, not by the more limited display screen resolution.

DRAWING AIDS

An optional alignment GRID, with equal or different horizontal and vertical spacings, can be turned on and off at any time. SNAP can automatically align objects to the nearest grid point, and the grid can be rotated and the snap origin relocated. ORTHO forces lines and traces to run vertically and horizontally, or at corresponding angles if the grid has been rotated.

Isometric drawings can be easily generated using AutoCAD's isometric GRID and SNAP facility.

A geometric or OBJECT SNAP locks drawing elements onto reference points on existing objects: endpoint of line or arc, midpoint of line or arc, center of arc or circle, quadrant of arc or circle, intersection of lines, arcs, or circles, insertion point of block, shape, or text, perpendicular from last point to line, arc, or circle, tangent from last point to arc or circle.

AXIS displays "ruler lines" along the edge of the graphics screen, with tick marks for desired spacing.

AutoCAD's bi-directional zoom facility allows drawing modification at any level of detail. Particular "windows" onto a drawing can be saved and later recalled as named views. The viewing "window" can be moved in any direction by the PAN command.

For jobs such as tracing in maps or contours, the system can be set into SKETCH mode, allowing totally freehand sketching on the screen via the digitizer or mouse.

A screen status line displays current X,Y coordinates, the current layer name, and the status of SNAP and ORTHO. While lines are being drawn interactively, with AutoCAD's RUBBER BAND line display, the status line switches to show the length and angle of the line instead of X,Y coordinates.

The LIST command displays the coordinates and other database details, of any objects in the drawing. Distance and area commands measure and display the distance and angle between two points, plus the area and perimeter of a polygon marked by any number of points.

STATUS reports on the current state of a number of drawing parameters, such as overall size, size of current "window", base point, snap, grid and axis spacing and status, current layer name, and color and line type. The limits, or overall size of a drawing,

are set by default when it's first created, but may be expanded or contracted at any time.

The FILES command allows full or selective viewing of a disk directory, and renaming or deletion of files, without exiting AutoCAD.

Text styles give great flexibility for producing compressed or expanded, obliqued, mirrored or upside-down text. The five standard text fonts provided include italic and vertical; successive lines of text can be either left or right justified, centered, or scaled to precisely fit a particular space. QTEXT turns on quick text mode to optimize display speed on drawings containing substantial amounts of text.

ATTRIBUTES AND THE DATABASE LINK

AutoCAD includes powerful facilities for manipulating drawing data and exchanging it with other programs.

Blocks containing any selection of drawn objects can be designated and optionally written out to disk. Any number of attributes can be attached to these blocks. Attributes are text items for which the user defines the name, prompt, and default value, if any, and are typically such things as serial number, cost, power consumption and/or heat output, date of purchase, manufacturer code, individual's name and telephone extension.

Attributes may be visible or invisible on the drawing, and constant or variable. Whenever a block with variable attributes is inserted, AutoCAD automatically prompts for the values. Attribute values can be selectively edited, globally or individually.

Once a drawing containing blocks with attributes is completed, details of all or some of the attributes can be automatically extracted, in a format that can be fed directly into a standard database management program for data analysis, sorting, or specialized calculations. This makes it exceptionally easy to extract component listings for producing bills of material and costings, calculate total power consumption or heat output in a machine room, produce a sorted list of staff with new internal telephone extensions after an office reorganization, and do stress analysis or other engineering calculations on assemblies.

In addition to producing selective attribute extractions in a format directly useable by standard database packages, AutoCAD has its own drawing interchange file format to allow the passing of a complete drawing database, to and from both other specialized programs and other CAD systems. Translation programs under the Autolink™ family of translators are available for two way graphic data exchange between AutoCAD and INTERGRAPH™, CADAM™, ComputerVision™ and IGES™ translators will be available soon.

THE HARDWARE

If you have an IBM PC, PC/XT, PC/AT or 3270/GX, Apricot, Data General/One, DEC Rainbow, Duet-16, NCR, NEC, Victor/Sirius, Tandy Model 2000, TI, Wang, Zenith, or one of more than 20 desktop computers which AutoCAD currently supports, you already own the most expensive part of a CAD system. See the separate list for details of the computers on which AutoCAD runs: new ones are being added regularly. AutoCAD runs under the MS-DOS/PC-DOS operating system on almost all the currently-supported computers.

As they become available, AutoCAD will run on newer, more powerful computers. There will always be the option to move existing drawings from one AutoCAD machine to another, so your investment in learning AutoCAD and creating drawings will never be wasted.

AutoCAD also supports an exceptionally wide range of plotters, digitizing tablets, mice and other pointing devices. The list of more than 50 devices

includes digitizers and single or multi-pen plotters from A to E size, and from such industry-standard suppliers as CALCOMP, Gould, GTCO, Hewlett-Packard, Hitachi, Houston Instrument, Nicolet Zeta, Roland, Summagraphics and Watanabe.

On most computers, AutoCAD can be run using either a monochrome or a color display, with screen resolution and size options in some cases. Whether drawings are created on a monochrome or color screen, a multi-pen plotter always allows multi-color plots, using AutoCAD's layer facility.

All displays, plotters and pointing devices for which AutoCAD software drivers have been written are rapidly and easily installed using AutoCAD's menu-driven configurator. This makes it easy to change or add devices at any time. As with computers, new peripherals are constantly being interfaced to AutoCAD. Please check the separate list for the most current information.

AUTOCAD WORLDWIDE

With more than 10,000 systems in use as of October 1984, AutoCAD is rapidly becoming a worldwide standard for computer-aided drawing. Foreign language versions are currently available in French, German, Italian and Swedish.

A large user base has prompted a growing number of software companies and other organizations to provide application-specific add-on programs, ready-made component libraries and menus, and other services for AutoCAD users. Existing AutoCAD Users Groups in North America, and a start-up group in the UK, provide an important means of exchanging information about additional programs, libraries and services.

AutoCAD is in a process of continuing development, with new and improved facilities being added in response to suggestions from existing users. Future versions will be available to existing users as chargeable updates — and of course it will always be possible to use existing drawings with later versions of the program.

WHY WAIT ANY LONGER

AutoCAD is a professional drawing tool which will pay for itself in a matter of months, whether you are a one-person surveying firm or a billion-dollar multinational. What's more, it will become even more valuable with time, as you learn to exploit all its power and use it for many more tasks than originally envisioned.

Although the system is easily self-taught, formal training is available, if required, through Authorized AutoCAD Training Centers throughout the US and Canada. Most users are producing useful drawings within a week, and making considerable gains in drawing speed within a month.

AutoCAD will enable you to considerably reduce design and drafting lead times and improve drawing productivity. It will also free the drawing office from such laborious and detailed work as cross-hatching, dimensioning and text annotation, while ensuring a consistently high quality of finished drawings, and a compact, convenient solution to the problems of storing and retrieving large numbers of drawings.

At ConCad Technologies we have the best of both worlds, you might say, being a CAD service bureau (contract drafting) and a CAD equipment/software sales group. We have a not-so-slight edge on the competition in that we use what we sell. Have you tried to purchase any technical software at your local "computer store" lately?

During the course of our normal work, we frequently encounter firms contemplating the purchase of a CAD system; more often than not, they haven't the slightest idea of how to go about it. Often the chore is delegated to a junior architect or engineer who's had moderate success in implementing a small pc-based job costing system for the firm. Soon, he is gallantly cutting out articles from trade journals as well as categorizing those circled articles sent down by the senior partners. As he perseveres, he reads about his bits and bytes, codes and cabling, DOS, modems and multiplexers, ad infinitum. This is as it should be and if he presses on he will, by the end of a year or two, have narrowed down the choices of systems to maybe five and he won't have

been very productive for the firm either; this is how selecting a CAD solution is usually done (properly).

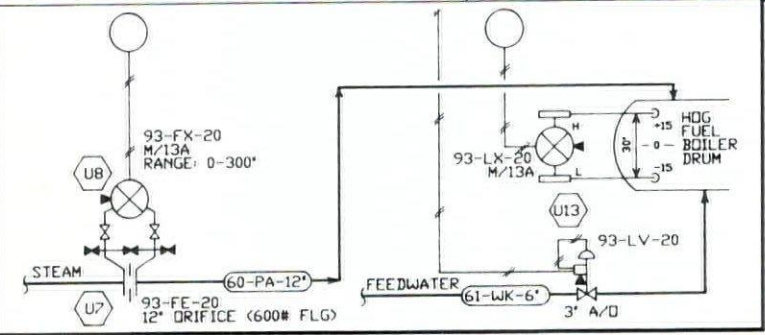

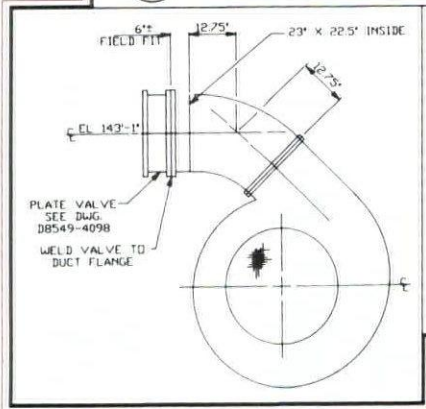

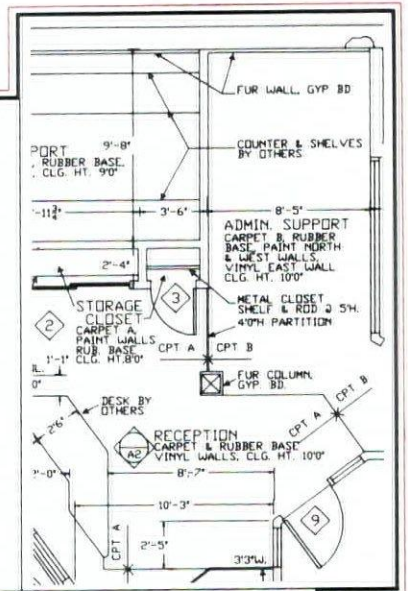

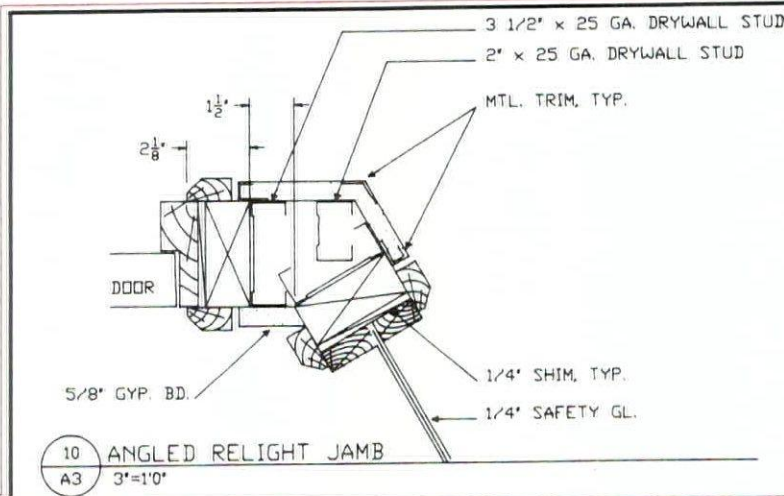

We can help if you wish. Let the junior man do what his profession has trained him and you are paying him to do and let us do what we do best. We will provide you with a complete system based on AutoCAD version 2 with ADE + 2 (that's computerese for the best). We will demonstrate the system for you, configure (choose) precisely the system you needs dictate, test it ourselves and then install it in your facility. We can also train your personnel or arrange for AutoCAD's training centers to train them for you; regardless, we will be right here when you need us to answer all your questions on a day-to-day basis. As the new enhancements come along from AutoCAD we will see that your personnel fully understand them and are able to utilize them. We will always keep you apprised of the latest software which will compliment your use of AutoCAD.

What you have been reading about AutoCAD is true. They will soon have more installations than any other single company in the world. Many firms lost money the last couple years; many of those who didn't were using CAD. Don't you think its about time you took the plunge, it isn't as difficult (or costly) as you may believe. Call us now.

WSA-AIA State Organization

The Wisconsin Society of Architects of the American Institute of Architects (WSA) with over 725 members is the state component of the national organization representing architects and related professionals in the state of Wisconsin. Members from private firms, corporations, industry, government, and education join together to maintain and represent excellence in architecture, the profession and to the public. This is accomplished through the many programs the WSA offers its members.

WSA membership offers many different opportunities for education and career development. The WSA is striving to help in advancing each individual's architectural skills, professional understanding and career opportunities.

With offices located in Madison, WSA is directed by Board of Directors which sets priorities of the organization and initiates new programs. The Board of Directors consists of 20 representatives from the state's four local chapters. The president and vice-president of each chapter automatically are members of the Board. Five Directors-At-Large are elected by the state membership from the local chapters through an at-large elec-

tion. An Associate member and two students also serve on the Board. The four primary officers compose an Executive Committee which is selected by the Board of Directors itself — from the membership roster of the WSA.

There are in excess of 45 standing commissions, committees, and short-term task force which recommend and execute policies, plans and produce programs. Membership on these state groups is drawn from the WSA membership.

When professional architectural expertise is needed by national, state, or local government bodies, members are nominated from the WSA to serve on such committees.

A full time staff headed by an Executive Director, located in Madison, handles day to day operations and is available to all Wisconsin members as a liaison to the AIA and as an information center.

The WSA is composed of four chapters, each having its own Executive Committee and accompanying committees and programs pertinent to its part of Wisconsin and its communities. Emphasis of the chapters is on participation and special events tailored to their needs through local meetings and seminars. All members have the opportunity to affect the direction of their profession and produce progress in many areas.

Thank You

Nobody says "thank you" anymore. Maybe because no one expects you to. Some of us still do, though. We want to express our thanks to the advertisers in the Wisconsin Architect and those individuals who submitted materials for publication.

THE MASTER ARCHITECT

Conversations with Frank Lloyd Wright

Patrick J. Meehan

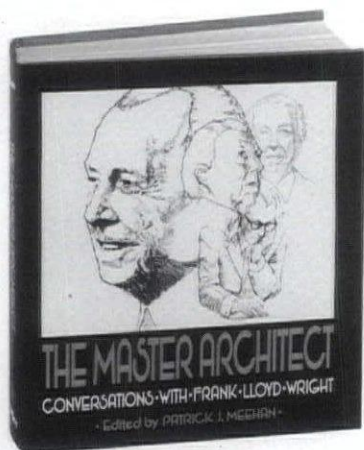

Frank Lloyd Wright — the man who gave architecture a soul — possessed one of the most fertile, restless imaginations the world of architecture has ever known. At the same time his work was revolutionizing the field, his private life was the raw material for spectacular, sometimes shocking headlines.

The Master Architect: Conversations with Frank Lloyd Wright is a fascinating glimpse into one of the greatest minds of the twentieth century. Now, for the first time, a series of conversations between Wright and notable writers, press personalities, other architects, and close friends is available in this magnificently illustrated book. The "father of modern architecture" had strong views about art, literature, and society — views he freely shared. Here, for example, is a memorable two-part interview with Mike Wallace, who succeeds in painting a penetrating portrait of the architect, exposing his humor, charm, and guiding philosophy — an intense faith in the individual, the independent mind, and the free spirit. In talks with Carl Sandburg, Alistair Cooke, and others, Wright ranged over everything from poetry to science, minimalism to Jefferson. Photographs of Wright's greatest achievements accompany these provocative conversations. Most of these conversations are published here for the first time. Many of the rare audio and audio-visual tapes from which they were taken have deteriorated beyond use or have been lost. In preserving these unique contributions, *The Master Architect* serves as an enduring tribute to America's most popular architect.

PATRICK J. MEEHAN is a registered architect in Milwaukee, Wisconsin.

Executive Office Operations

1. **Eric England.** Executive Director. Manages Headquarters office. Implements policies of the Board of Directors. Responsible for maintaining operations within budget set by the Board. Coordinates committee activities. Lobbyist. Edits all publications of the Society, including Wisconsin Architect, Hotline and other materials. Coordinates convention activities. Acts as liaison with State Government, and the legislature, all groups in the Construction Industry, the AIA, and the news media.

2. **Karen Linley.** Executive Secretary. Assistant to the Executive Director. Manages all financial records and accounts of WSA. Dues collection. Assists as needed with convention planning and implementation, fall workshop, other special events. Membership secretary. In charge of master information records. Schedules all mailings.

3. **Sandra Swatek.** Secretary to the Executive Director and Girl Friday. In charge of inventorying, purchasing, selling, billing and mailing of all AIA documents and codes. Processes Newsletters, Addenda and all Executive Director's Correspondence. Handles employment service, library and multiple miscellaneous problems.

4. **Nancy Baxter.** Advertising Director for the WISCONSIN ARCHITECT. Coordinates all advertising sales, subscription sales, and other matters pertaining to the income for the WISCONSIN ARCHITECT. Educates WSA members and advertisers regarding the value of advertising in the WISCONSIN ARCHITECT.

Architects usually call the WSA office with questions on ethics, documents, application for license in another state, renewal of license, supplemental dues, questions on insurance, etc. And we're always on the phone helping someone to locate a job in an architectural office, or assisting an architect in finding someone to fill a vacancy.

A great many calls come in from all segments of the construction industry and legal profession inquiring about codes, documents and legislation.

Innumerable calls are received from the general public — prospective clients in need of architectural services seeking guidelines as to how to go about retaining an architect. What do they do? and

What do they charge? are the most frequent questions asked by the unsophisticated callers.

While the great majority of calls formerly came from individuals seeking architectural services on a very small scale (a residence, an addition to an existing building), more and more calls are now being received from prospective clients with considerably larger projects in mind, i.e., a library, an educational building, a municipal complex. We use all of these instances as opportunities to educate the public on the true nature and value of architectural services, advising them on the best method of selection, etc.

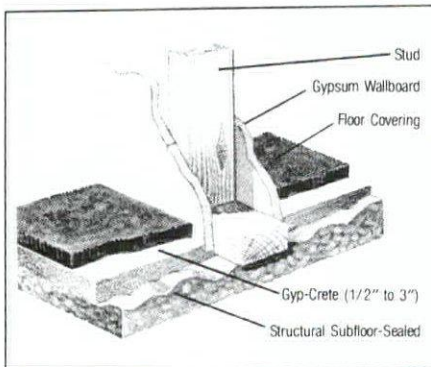

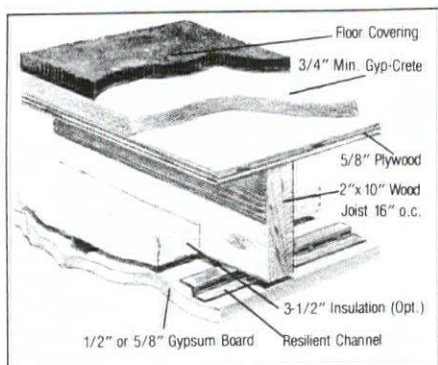

No matter what the need — call us. We'll do our best to fill it.

Benefits of Membership in WSA

1. **Work.** Whether you are an employee or an employer, WSA helps you get work by means of job listing, referral, "how to" seminars and cassettes, etc.
2. **Marketing Information.** You get no place without this today. WSA organizes seminars, makes available printed material, cassettes, inserts information in the Wisconsin Architect.
3. **First Hand News** affecting the practice of architecture by means of committee reports, Hotline, Wisconsin Architect, etc.
4. **State Agencies' Contracts** are updated with the help of WSA representation. Some past inequities have been corrected.
5. **AE Selection** by means of bids is an invitation to disaster. You know it. Does your prospective client know it? Get the background and current information on this development.
6. **Insurance Rates.** Maybe your premium or your exposure can be reduced. WSA has committees working on this, information and advice to give you.
7. **An Eye On Legislation** affecting zoning, planning, professional registration, taxes, procurement of services and other matters of interest to the profession and the construction industry.
8. **Legislative Relief.** WSA has an active legislative committee and minuteman program.
9. **An Eye On Building Codes.** Committees have been working at state and national levels to improve regulations affecting buildings.
10. **Continuing Education** programs on all of the timely subjects, like marketing, energy conservation, production efficiency, etc.
11. **Library** of architectural books is available on loan at no charge. Cassettes and slides on a wide range of important subjects are available at no charge.
12. **Exchange Of Ideas, Exploration** of mutual technical and professional problems at local and state meetings.
13. **Learning By Association** with other architects and distinguished non-architect guests. Every person you talk to at local or state meetings is an expert on something.
14. **You Become Part Of** effort to maintain and improve high ethical and technical standards. For instance, a lot of discussion is taking place now on the new revision of the AIA Standards of Professional Practice (the "Code of Ethics"). Why don't you get in on this?
15. **A Forum** for presentation of viewpoints. You play a part in establishing the standards of the profession by expressing your opinion at local and state meetings.
16. **Participation On Committees.** You can be on a local, state or national committee almost for the asking. This could be very broadening and very instructive.
17. **Common Front** presented on issues important to the profession. Witness WSA activity against competitive bidding.
18. **Contract Forms** and other documents. These are sold by WSA to members — with same-day service. WSA members pay a discounted price for documents.
19. **Hotline** and other communications which keep members up to date on numerous important matters. For instance, a synopsis of senate and assembly bills which are of interest to us are included after a review by a committee and attorney.
20. **The Wisconsin Society of Architects, Construction Industry Handbook**, issued yearly, is a reference for valuable information not found elsewhere. Look through the latest issue and discover its great value.
21. **Public Relations** program in Wisconsin newspapers and our own magazine, The WISCONSIN ARCHITECT, distributed to important people outside the profession. This educates the public, upholds the image of the architect.
22. **Status And Prestige** enhanced by membership in local chapter, WSA and AIA. This translates into personal satisfaction and better respect by the community.
23. **Information Service** on such professional matters as state laws (proposed and enacted), document forms, state administrative structure, licensing, sources for other needed information.
24. **Job Bank**, for employees searching for employers and vice versa.
25. **Honor Awards** program at both the State and Chapter levels which provide peer recognition, as well as local, state and national publicity to winners.
26. **WATS Line** - A toll free phone number to be used in contacting the WSA office.
27. **DILHR Plan Delivery** - The WSA staff will hand carry your plans to DILHR, pick them up, and return them to you for a nominal fee.
28. **Workmans Compensation Insurance** - WSA members can participate in a group plan which will return a dividend.
29. **Agenda's** of the Division of State Facilities Management are available in order that members can keep track of developing state jobs.
30. **Video Cassettes** are available for use in your office on a variety of topics including fees, project management, project scheduling, and the legal system.
31. **Intern Development Program** is a methodology for individuals pursuing architectural registration to obtain experience in all areas required for registration. WSA members are active in this program . . . both employers and employees.
32. **Young Practitioners Seminars** are a chance for young practitioners to come together to discuss a variety of topics of particular interest to them.
33. **Professional Competence** is mandated by state laws and the Department of Regulation and Licensing. The WSA office actively pursues cases where there have been allegations of actions which are not in compliance with those rules and regulations.
34. **An Office Away From Home** is available at the WSA office. Parking, library, phone, walking access to state agencies and the state capitol is all available.
35. **Group Health Insurance** is available to WSA members through a very competitively priced national policy.

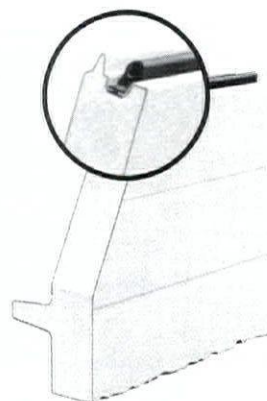

Ventilated Epoxy-Coated Steel Rod Shelving *by Schulte*

The epoxy-hard, non-porous, durable surface is non-absorbent, will not yellow or become sticky.

The Little Shop has special skills in antique restoration: furniture refinishing: furniture finishing. The Little Shop does museum quality work. . . has for more than 50 years.

You would use The Little Shop where the quality of work must be assured to satisfy a demanding client or to insure that special furniture be completed predictably and perfectly — however demanding or sophisticated the look might have to be.

NEW KARDEX KOMPAKT

cuts office
filing space
by as much
as **80%**

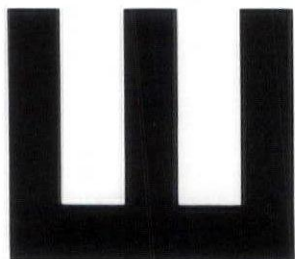

Kardex Kompakt — the movable shelving system that lets you recover 46% of the space occupied by standard shelf filing — a staggering 80% of the space eaten up by conventional filing cabinets.

Only Kompakt offers you a multiple aisle feature for simultaneous access by more than one operator — quick, safe access at the touch of a button.

And Kompakt lets you protect sensitive or valuable materials in a secure "restricted access" area.

You'll save space, time *and* money with versatile, modular Kardex Kompakt. For complete details — including a free analysis of your savings potential — call us today.

Read why Wisconsin architects specify Dover[®] 10 to 1 over any other elevator make.

The reasons are simple:

- Expert planning assistance
- The best computerized traffic control available
- Superior custom design capabilities
- Responsive round-the-clock service your clients can count on
- Quality you can stake your reputation on

More for the money with Dover

There's more to comparing elevator systems than comparing prices. It's important to be concerned with design, performance and dependability as well. To do a thorough job means you have to analyze all the systems on the market and choose the one that best meets your requirements. At Northwestern Elevator we welcome close scrutiny. We know that whenever a careful price/value comparison is made, Dover wins every time.

Dover, no equal

Why do Dover elevators last so long? Simple. Every major part of a Dover elevator is designed with reliability in mind. Each is engineered to go together, work together smoothly and reliably, now and for the long haul. With all you've got riding on it,

why settle for less than Dover elevator performance?

Service you can count on

Specify Dover and your client will be assured of skilled manufacturer maintenance as well as preventative maintenance programs designed to eliminate downtime.

Dover-trained service technicians and Dover-designed replacement parts stand behind our systems 24 hours a day, every day of the year to keep them operating smoothly and continuously.

Dover renovations win awards

If remodeling is the answer, we offer several choices. Sometimes you can make an old system act like new by installing solid-state computerized controls. But you may also want to rebuild a cab or put in custom-designed parts. Whatever your needs, we can meet them completely regardless of who manufactured the original equipment.

Dover's comprehensive engineering database, wiring diagrams, detailed service

records and computer programs enable us to make an accurate assessment of your project's needs.

We'll give you all the help you need...Free

Northwestern offers you complete elevator planning service.

- We'll analyze your needs
- Write your specifications
- Lay out your elevators

You'll find that Northwestern offers everything you need, including the one thing you need most: the assurance that your elevator job is done right.

Phone or write for 1985 Dover Planning Guide

For a free copy of the 1985 Dover Planning Guide for Wisconsin, a complete and comprehensive guide containing localized requirements, phone (414) 228-1424 or write Northwestern Elevator Co., Inc., 6070 N. Flint Road, Milwaukee, Wisconsin 53209-0976.

Sixteen offices throughout Wisconsin and upper Michigan.

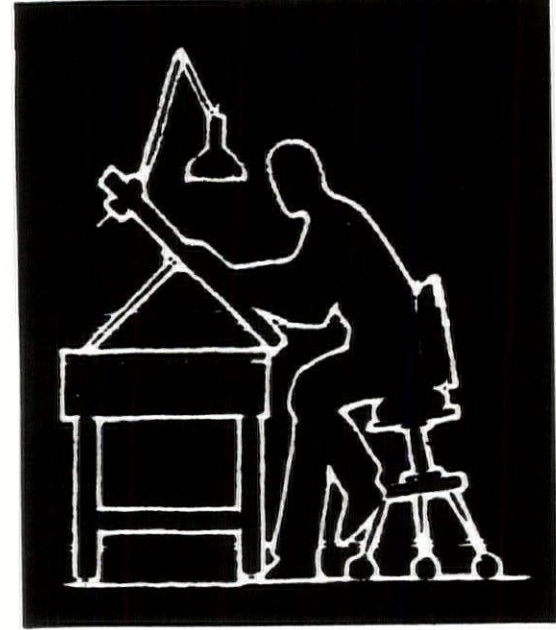

Northwestern Elevator is Dover[®] in Wisconsin

The Wisconsin Architect

A Look at 1985

Magazine Themes for the Coming Year

Wisconsin Architect

1985 will be an exciting year for the *Wisconsin Architect*.

The Editorial Board has selected magazine themes for the coming year (listed below), and once again invites you to enhance the quality and scope of the magazine by submitting your projects and articles. This is an opportunity to share your work and ideas with other professionals in the field. In addition, your published article can be purchased in quantity, separately from the magazine, to use as a marketing tool. Additional copies of the *Wisconsin Architect* are also available.

To have your article considered for publication in the *Wisconsin Architect*, mail copy, and photos or drawings if available to: Editor, The *Wisconsin Architect*, 321 S. Hamilton St., Madison, WI 53703. Photos are encouraged, provided they are black and white glossy, and clear. Photos should be accompanied by a brief description of the project, and the design goals. The deadline for receipt of articles is two months prior to the month of publication, i.e., February 1 for April issue, etc.

APRIL

INTERIOR DESIGN AND LANDSCAPE ARCHITECTURE

Stories, articles and pictures pertaining to interior design, space planning, and landscape architecture.

JUNE

RESIDENTIAL

Stories, articles and pictures of residential projects designed by Wisconsin architects.

OCTOBER

HEALTH CARE

Featuring health care projects designed by Wisconsin architects.

MAY

COMMERCIAL

Stories, articles and pictures of commercial projects designed by Wisconsin architects.

SEPTEMBER

CORRECTIONAL INSTITUTIONS

Stories, articles and pictures of correctional work done by Wisconsin architects.

DECEMBER

RESTORATION, ADAPTIVE REUSE, AND PRESERVATION

Featuring projects, materials, and concepts demonstrating creative techniques to restore, preserve, and adapt well-designed older buildings . . . both interior and exterior.

We have a strong argument for Oxboard®.

Oxboard delivers the one thing you want most: maximum performance.

The proof?

Ordinary waferboard deflects 50% more than Oxboard when measured at 200 pounds by using the standard American Plywood Association test for deflection.

Oxboard's also more than one-third stronger than ordinary waferboard. And fully two and a half times stronger after 100 hours of accelerated weathering.

What's more, with a rugged 5-layer construction held tight by liquid exterior resins, it won't delaminate. And its uniform construction means never a knothole, never a void.

That means it minimizes waste, hassle and costly callbacks.

And that leaves you with a simple choice.

You can have your designs backed by a product that's second best at best.

Or be backed by the Ox.

COMPARATIVE SPANS¹

	Sheathing Thickness	Oxboard, Plywood	Waferboard ³
3/8"	Sheathing-span index	24/0	N/A
	Max. roof span/no clips	20	N/A
7/16"	Sheathing-span index	24/16	24/0
	Max. roof span/no clips	24	16
1/2"	Sheathing-span index	32/16	24/16
	Max. roof span/no clips	28	24
5/8" ²	Sheathing-span index	40/20	N/A
3/4" ²	Sheathing-span index	48/24	N/A

1—Left-hand number is maximum recommended spacing of roof framing in inches. Right-hand number is maximum span between floor joists.

2—5/8" and 3/4" Oxboard panels are APA certified for Sturd-I-Floor applications with the same span ratings as plywood.

3—Values are representative of typical waferboards as taken from literature of selected waferboard manufacturers. Span capabilities vary by manufacturer.

BruningCAD: Your Partner In Design Solutions

Why are there MORE EasyDraf² CAD systems IN USE than any other comparable CAD system?

... because BruningCAD has the easiest-to-use, most innovative system, and the best follow through with *total* support!

Even before your EasyDraf² system is installed, our specialists are with you, providing on-site training and preparation. When your system arrives, we are there, helping you set it up ... providing one-on-one instruction. Once in use, the BruningCAD follow-through "800" hotline provides one source help for all hardware or software problems.

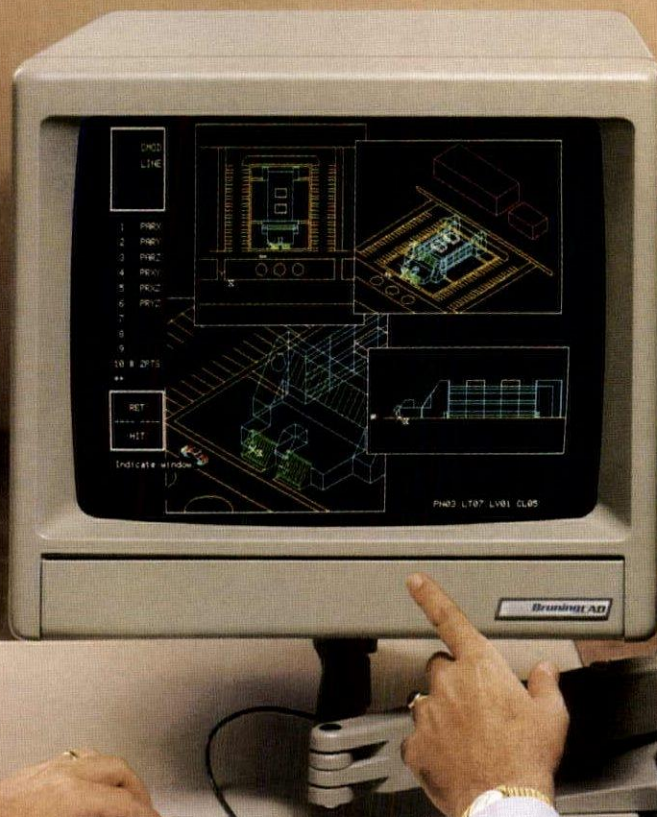

Check Our Credentials:

- Most background experience – over 86 years of Bruning customer involvement.

- Most application experience – more than 1,000 installations worldwide.
- Total on-screen system – both menu selection and command input, in conventional design terminology.
- Stand-alone workstations that will also support multi-station networks.
- All standard construction features plus mass editing, automatic dimension calculations, file and data management.
- 19-inch color monitor with mouse and keyboard input.
- AttriBase interactive "spreadsheet" system.
- Three-dimensional interactive multi-view modeling system.
- Semi-annual software updates.

Citations For Distinguished Service To Architecture

In 1980 the WSA Board of Directors endorsed the awarding of Citations for Distinguished Service in conjunction with the Annual Honor Awards Program. These citations are issued to individuals or groups in recognition of their contributions to architecture, architecture awareness, and related subjects. Any WSA member may recommend an individual or group for receipt of this Citation. Such a recommendation will be presented to the Board of Directors for consideration and action.

If you would like to nominate an individual, company or organization to receive a Citation for Distinguished Service, please contact any member of the Board of Directors; Doug Kozel, AIA, 1985 Honor Awards Program Chairman; or the WSA Office.

NOMINATION FORM

(Name)	(Title - If Any)
(Address)	
(Reason For Nomination)	
(Name of Person Nominating)	
(Address of Nominating Person)	

“Why hire an architect if all I need is four walls and a roof?”

“It’s not a big project,” the argument goes. “So let’s not make it any more complicated than it has to be . . .”

With these words, architects are shut out from the job they do best.

Architects are trained un-complicators.

Architects are simplifiers, trained to help you separate what you truly need from what you think you need.

Together, you and your architect make discoveries you might never make by yourself.

You may discover (as a North Carolina bank did) that 4 walls are one wall too many.

You may discover (as a Kentucky company did) that those two buildings you’re assuming you need should really be one building.

Or you might find that that steep (and cheap) site is actually better suited to your building’s function than that flat (and costly) one.

Architects are assumption-busters.

Walls, sites, materials, “inevitable” costs and delays — all of your assumptions about traditional construction come under attack.

And as you collaborate, you may find your assumptions about architects (that they’re slow, or spendthrifts, or impractical dreamers) being shattered, too.

Talk to an architect about your next project.

Send this coupon for a free brochure, “You and Your Architect,” for details on architectural firms in your area, or for information on how to hire an architect.

Wisconsin Architects Foundation

BUILDING A BETTER WISCONSIN THROUGH ARCHITECTURAL EDUCATION

The Wisconsin Architects Foundation (WAF) was created in 1954 for the purpose of supporting Architectural Education in Wisconsin, principally through scholarships and grants. To date, almost \$95,000 has been distributed to 150 students.

In recent years, the WAF contributions to Scholarships have been exclusively to UW - Milwaukee students. With greater financial resources, the WAF would be able to support Wisconsin students at other institutions as well as offering grants and prizes for programs that relate to the improvement of the practice and profession of Architecture in Wisconsin.

The advertisement pictured on this page will be appearing monthly in the Wisconsin Architect. The members of the WAF encourage your contributions, either by way of annual membership or donation to the endowment fund. Tax deductible con-

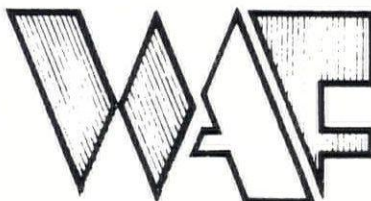

tributions and membership are an act of participation in support of the strength and vitality of the Architectural Profession in Wisconsin.

Within the next several months the WAF will contact all Wisconsin Architects, along with numerous other individuals and corporations who support and appreciate architecture. You can help by undertaking your annual membership and endowment donation to the WAF. You can additionally help by impressing upon those in related professions and industry of the vitality and benefits of the WAF.

For further information, contact current members of the WAF or our Executive Director, Eric Englund.

In Institutional Cabinetry There's One Choice **TRU-BILT**

For the finest in institutional cabinetry the choice is TRU-BILT. But, best of all TRU-BILT gives you two choices. System One and System Two. They both have the quality and functional good looks that TRU-BILT is famous for. They both are good choices when it comes to specifying architecturally acceptable cabinetry for any institutional project. They both are right for the job.

The difference is price. System Two can save you up to 15% of your cabinetry costs. The differences aren't readily apparent but the quality is there. We would like to show you why.
