# LIGHTEN UP!

When the concrete BLOCK you specify contains lightweight aggregate from MINERGY LWA, you receive these advantages...

- **FASTER PROJECT COMPLETION**
- **ENHANCED FIRE RESISTANCE**
- **INCREASED THERMAL RESISTANCE**

**LIGHTER IS BETTER!** Block made with MINERGY LWA lightweight aggregate is easier to handle. Jobs go up quicker. You receive all the advantages of standard block *plus* better overall performance... and our award winning, recycled product addresses 'green building' design!

**CALL KEVIN CAVANAUGH OR TOM JANSEN, MINERGY LWA'S SALES ENGINEERS,  
FOR INFORMATION ON ALL THE ADVANTAGES OF LIGHTENING UP!**

FINALIST AWARDS

WISCONSIN CONCRETE MASONRY ASSOCIATION

## FROM THE PRESIDENT

On behalf of the WCMA, I would like to take this opportunity to wish all our friends a Happy and Prosperous 1999. Before I go further, I would like to say, "Thank You" to all those individuals and companies who made 1998 such an exciting and successful year. Without your help, we would not have accomplished what we did. I would especially like to recognize those who assisted WCMA at the AIA-Wisconsin Convention and to those who directed the Vocational Training program.

Looking ahead for 1999, I want to compliment those individuals working on the **'Pre-Engineered Masonry Building' Presentation Committee**. They have scheduled a presentation for the Fox Valley on March 3rd. We seek to share the advantages of designing with masonry and convey the ease of working with a pre-engineered plan to design professionals.

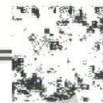

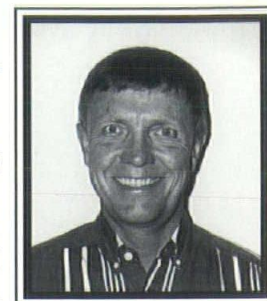

I am very excited about the membership recruitment brochure being designed and produced under Kevin Cavanaugh's direction. This piece will help all of us better share the benefits of being a member of WCMA.

Stated in the brochure is our mission statement which reads, ***"The WCMA seeks to maintain a legislative, professional and community awareness that will, in return, reward our members, our industry and our nation."*** I urge all members to continue in their efforts to recruit new members.

In closing, I would like to extend an invitation to everyone to attend the ***"Excellence In Masonry" Awards Breakfast, 8:00 A.M., April 22, 1999***. We will hold this event at the **Monona Terrace** in Madison. Who will win the **Maynard W. Meyer "Best Of Show"** and **"Excellence" Awards**? Be there to find out.

Thank you for your continued support. I look forward to greeting you on April 22nd.

Mark Tummett  
WCMA President

## EDITORIAL RESPONSE

After reviewing *Masonry Insights* Volume 3, I am amazed by the two building features - Paragon Development Systems and St. Raphael's Catholic Church and the titled Award Winning Details. The amazing thing is that the W.C.M.A. is calling these award winning details and yet neither building details call for flashing or weeps. The church shows a projected unit at a window head unflashed.

With the W.C.M.A. calling these award winning details is the industry at large being led to believe the W.C.M.A. no longer recommends or promotes masonry flashing and weeps. I sure hope not.

I feel the W.C.M.A. should respond to my letter and the industry at large in the next issue of *Masonry Insights*. Is the W.C.M.A. promoting inadequate details or are they still recommending masonry flashing and weeps. The articles really are not award winning details.

Thank you for your response.

Very truly yours,

Clarence Huettentrauch  
AIA/FCSI/CCS  
Consultant

Dear Mr. Huettentrauch,

Thank you for your letter addressing the correct utilization and proper detailing of our products. The WCMA continues to highly recommend flashing and weeps in all masonry construction (see *Masonry Insights* 1998 Volume 2 - 'Designing Dry Single Wythe Concrete Masonry Walls').

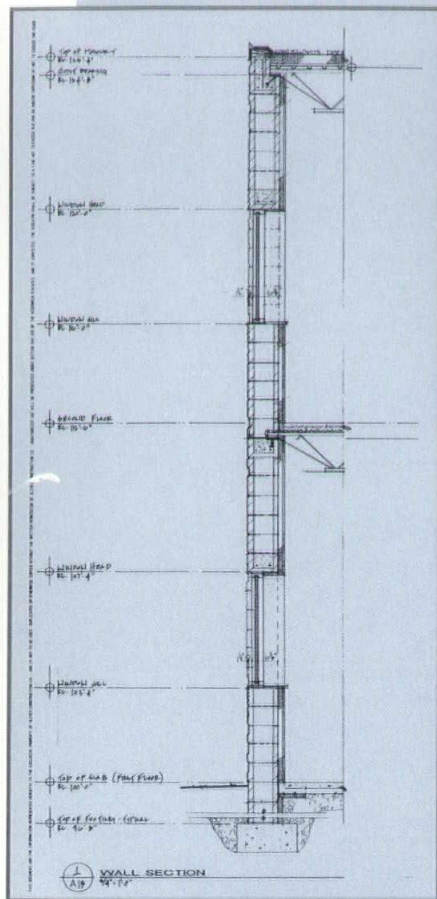

The Paragon Development Systems' wall section does not include flashing or weeps. We did not publish the window or the floor-intersection, construction details where, as you are correct, these integral requirements should occur. Our

intent of publishing the wall section was to express the economy of single wythe construction, the strength of materials as utilized in a two story structure, and the coursing of the novel, half-smooth, half-split C.M.U. as it relates to the finished wall pictures. The plan 'detail' was chosen to convey the flexibility of a rigid material as utilized in a circular wall application. In hindsight, it would have been wise for us to include a foot note regarding flashing and weepholes on the wall section.

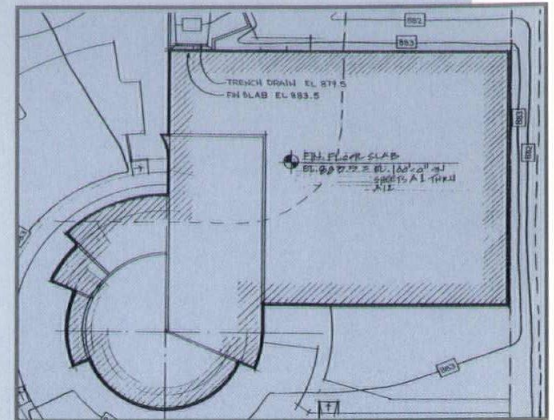

Examining St. Raphael's building details, a continuous flashing at the bottom of the stone sills was correctly specified. The head detail, however, does not call for flashing (in order to direct water that may enter the wall above the window to the exterior). There are only eight inches of exposed masonry above the windows until a metal soffit and roof overhang begins. If there is no means for water to ingress the cavity wall above the window, and there is sufficient roof overhang to protect the balance of exposed masonry, then flashing may not be required. Another factor which may have influenced the decision not to utilize flashing here is the gothic, cast-in-place bond beam over the window would not support standing water, but shed it within the cavity space to the side.

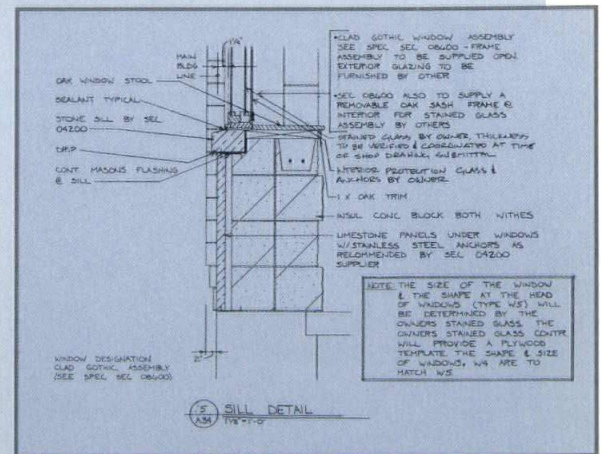

Paragon Development Systems

development Systems

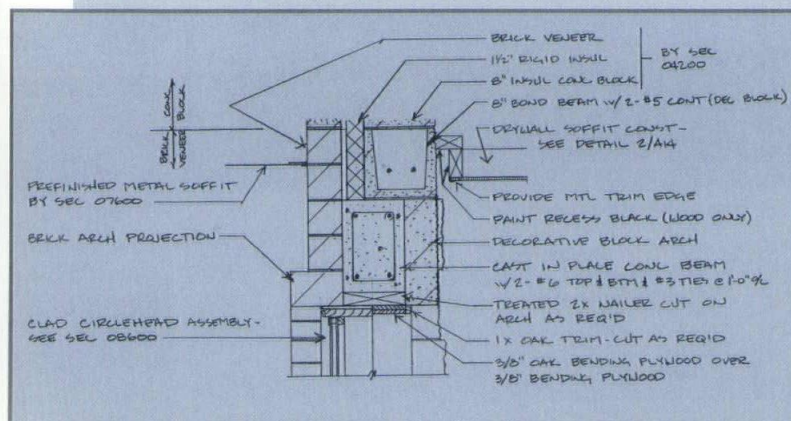

Mr. Huettenrauch, we wish that all designers were as concerned as you are with the proficient utilization of masonry. We would like to invite the architectural design community to call a local WCMA member and have them lend a critical eye to assist in reviewing plans and specifications for proper flashings, water stops, weepholes and vents; correct control joint spacing; accurate wire reinforcing; etc. We are here to help, and would be pleased to hear from you.

# COUNSELOR'S CORNER

## *Recent Changes to Standard Architect Engineering Agreements*

Most agreements between owners and their architect/engineers (A/Es) for building and construction projects are based on standard form documents, especially those published by the American Institute of Architects (AIA), such as its form B-141. In 1997, the AIA released new editions of many of its forms, including B-141. They are designed to replace the 1987 edition forms, with which many construction industry people have become familiar. However, at least in Wisconsin, there has not so far been a rush to use the 1997 forms. This update will review some of the changes.

One reason for the credibility of AIA documents is that they are not "party line" contracts that are slanted heavily to the benefit of one side. Rather, they are prepared with the participation of others in the construction industry (such as the Associated General Contractors) and make a genuine effort to balance the interests of owners, A/Es, general contractors, subcontractors, and others.

That tradition continues in the 1997 forms. The writer of this update has identified and classified some 29 substantive changes, which are about equally balanced between those more likely to benefit the A/E, and those more likely to benefit the owner. (A copy of this summary can be obtained by calling 800-377-0667.)

Some of the most beneficial changes for A/Es include a mutual waiver of consequential damages, a requirement that the owner provide information needed to assist the architect in enforcing its lien rights, a provision that the owner's right to use the architect's "instruments of service" depend upon timely payment, and somewhat enhanced provisions for extra payments for excessive contract administration expenses.

Owners may benefit from new provisions requiring the architect not to disclose confidential information, to avoid conflicts of interest, to specially review applicable "laws, codes and regulations", to compile and retain certain job records, to collect lien waivers and "final payment" documents, and to conduct a post-construction "facility operation" meeting to address building performance.

Another marked change in the 1997 AIA documents is that the long-standing AIA policy requiring arbitration of disputes has been expanded to require compulsory mediation before arbitration.

Beyond the substantive changes, there is a major change in emphasis. The description of the architect/engineer's duties in the 1987 forms was, except for the contract administration phase, quite cryptic. They treated the A/E as a professional person like a physician or lawyer, who must exercise ordinary care in identifying needed work as well as in performing it.

By contrast, the 1997 forms describe the A/E's duties in much greater detail, and also provide check lists identifying project parameters and potential extra services. Much less room is left for the exercise of professional judgement.

If the parties carefully review the forms, with all of their options, at the outset of a project, the resulting contract may provide the parties a much better understanding of the details of their relationship. But if that review is not thorough, or if circumstances changes, the forms may not fit the specific job and use of the 1997 edition could be counter-productive.

# STANDARD PRACTICE FOR BRACING MASONRY WALLS DURING CONSTRUCTION

The Masonry Wall Bracing Council, consisting of representatives from NCMA, MCAA, BIA, IMI and OSHA, completed work on a Standard for bracing masonry walls in late October of 1998. The Standard provides specific guidelines for bracing masonry walls during construction, replacing vague requirements calling for "adequate bracing".

The purpose of the Standard is to provide an acceptable level of safety for all persons working on the construction site and to provide requirements for temporary bracing of masonry walls subjected to wind loads during construction of no more than 35 mph. The Standard includes the following and should be available in early 1999.

- Maximum wall heights before bracing is required
- Assumed strength of masonry at various stages of construction
- Minimum loads that walls under construction must withstand

- Safety factors for masonry walls at various stages of construction
- Established site zones and wind speeds when the zones must be evacuated
- Design methodology for walls and bracing at the various stages of construction; and
- Required life safety monitoring programs

When to brace masonry walls, the type, height and spacing of bracing and the life safety of persons in the work zones has long been a subject with minimum available information. This Standard will finally address these subjects and hopefully reduce wall failures and loss of life. The Standard will be published shortly. We will inform you in a future issue of *Masonry Insights* how to get a copy of the published Standard.

*Dick Walter*

# Sustainable Integrity

Perhaps one of the greatest challenges facing the profession as we look toward the next century and the next millenium is "sustainability."

Certainly there are other issues impacting the profession. Technology is changing rapidly in both the practice of architecture and the construction of architecture. New demographics are redefining building programs. Alternate project delivery systems are challenging tradition. The quality of the workforce is depleted at a time when the need for a quality workforce is high. Combine these pressures with the pressures of business in general – workforce diversity, global competition, increasing liability and shrinking profits – and "challenge" is easy to find.

But of all of these issues, sustainability is perhaps one of the greatest. It will impact all aspects of our profession. New designs will be "green." Old buildings will be more diligently reviewed for reuse, existing facilities will continue to be expanded and renovation will take more of the center stage. Not only will projects meet the program, code requirements and community expectations, but the project also will be sustainable. Architects will be charged to create facilities that are not only inspiring and innovative, but also environmentally sound. And all of this will be held to the toughest test of all, the test of time.

Through these challenges and tests, the profession will be continually placed in a position of compromise. Our reaction will determine our fate. The integrity of the profession will be shaped by our ability to meet the challenges and tests the profession faces. Individually, we will define this integrity. Collectively, we can sustain this integrity.

As a professional society, AIA Wisconsin is our "collective." The 1998 "Report Card" found integrity as

the most important issue. As a member-driven organization, we are in the best possible position to "sustain" the integrity of the profession. Our strength starts with what has been built in the past and continues with the potential we have for the future.

## Our Foundation

The history of AIA Wisconsin has created strength through the diligent efforts of the members. Consider:

- AIA Wisconsin is fiscally sound. The organization operates a balanced budget and manages an appropriate reserve.
- AIA Wisconsin provides demanded programs. The 1998 Convention and Fall Workshop both set all-time attendance records. The awards program was expanded to include a Firm Award.
- Local AIA Chapters work to meet member needs. Most of our local Chapters provide enough programming for members to meet annual CES requirements in combination with the state programs. Other programs at the local level provide opportunity for fellowship.
- *Wisconsin Architect* magazine provides a forum for communication. The magazine sustains itself without member dues. Your support will enable us to improve this award-winning publication.

These strengths form the foundation of our organization. From these strengths we are able to sustain the integrity of the profession by lobbying important legislative issues, delivering important professional programs at the state and local level and communicating with members.

But, to truly sustain the integrity that has been established for the profession, we must be continually vigilant of the changes in our world. Again, as a member-driven organization,

sustaining the integrity of the profession becomes a critical focus. We cannot rest with what has been done, rather we need to tap the potential of our future.

### Our Goals

AIA Wisconsin must continue to move forward as the society representing the architects of Wisconsin. We must reaffirm our commitment to the profession and the organization. Sustaining the integrity of architecture will require that AIA Wisconsin reach four goals:

- First, maintain and improve what we have established. Excellent programs, solid financial foundation and a top-notch staff. These have been our strength and all must be kept strong.
- Second, improve communication. The magazine has been a useful tool in providing membership information. The new Web site must complement the magazine. And, our local Chapters must continue to keep members up-to-date.
- Third, expand participation. Though membership has been steady, rising over 3% in the past year, participation has increased more rapidly. We must remain active in our businesses, our communities and our profession. AIA Wisconsin provides a vehicle to expand current participation. Local Chapters can provide more programming. A design retreat and/or owner/client oriented workshops could be offered. More members can get involved with

special projects, both AIA projects and others important to individual communities. AIA members and firms must continue to lead the profession and work to lead business.

- Fourth, increase membership. With changes in membership requirements during busy economic times, steady membership is good. Members embracing continuing education are replacing members who do not find continuing education important. Greater membership enhances the "collective" available to sustain integrity. With improved communication and expanded participation, increased membership should follow. But, a gentle nudge certainly wouldn't hurt.

### Our Commitment

Over the years, the primary concerns of AIA Wisconsin have been to improve the public's awareness of architecture, to contribute quality architecture to the built environment, to take responsibility for our profession and to provide leadership to our communities and state. Our long-range planning efforts have interpreted these concerns in four issues to be addressed over the next year: *Environment & Global Resources*, *Computer Information & Technology*, *Diversity*, and *Community Service*. Developing these issues will happen only with your participation. Being involved in this member-driven organization will make all the difference.

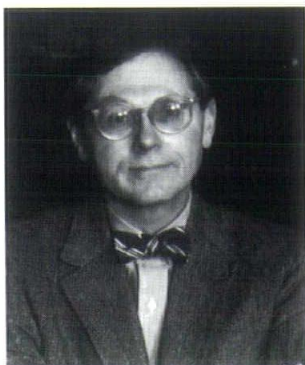

1999 is not in and of itself a pivotal year. It is simply a point in time, one that closes both a century and a millenium. Events of the year will determine its true importance.

For AIA Wisconsin, recommitting ourselves to sustaining the integrity of the profession can be one small step to a better future. Get involved now, make a difference. Dedicate two hours each month to your AIA Wisconsin. The integrity of the profession is ours to direct.

Daniel J. Roarty, AIA  
President  
AIA Wisconsin

There are three items I'd like to review with you: an overview of AIA issues and actions, a report on the CES activity at the national level, and some thoughts on the effectiveness of our state organization.

#### AIA Issues

As the economy goes, so goes our profession; and, as the profession goes, so goes the AIA, which is rather good right now. Most firms in most parts of the country are busy to very busy.

The national 1998 AIA Convention in San Francisco was a great success. About 19,000 architects attended. The 1999 Convention is in Dallas on May 6-9.

The TV advertising campaign is being given final form. A major change has been suggested and accepted by the Board. The ads were originally planned for airing on cable-carried programs, such as CNN. The goal is to reach a high percentage of households with an annual income of over \$75,000. The recommendation is to use network broadcasts, such as NBC Nightly News, 20/20, etc. This will cost more per spot, so there will be fewer spots. But, we will reach much more of our targeted audience.

The McGraw-Hill alliance is working well. *Architectural Record* is an improved magazine. The *Business Week* design awards are a great plus. Mayor Norquist served on this year's jury.

The Institute has begun a major long-range planning effort. Gray Plosser, FAIA, is chairing this task force, which gives me hope for a thoughtful and effective planning effort. At our most recent Board meeting, Directors were asked to rank issues of the Institute in order of importance; and I am pleased to report that support of components ranked number one. I will not be on the Board for the majority of this planning work and the resulting policy decisions. AIA Wisconsin should follow this effort and relay concerns and suggestions to AIA via our Regional Directors.

#### AIA/CES

Second, I would like to address continuing education and the requirement for CES "learning units" to retain membership. This has been a concern to many of us. In 1992, the CES requirement was approved by the members at the Convention in Boston.

After a two-year pilot program, the CES requirement for membership began in 1995 and the University of Oklahoma was retained on a five-year contract to keep records. A CES Audit/Review Committee was formed in 1996 to address and review quality issues.

Currently, there are eleven states with mandatory continuing education for licensure, and fifteen others with enabling legislation in place. Although the AIA is not promoting mandatory continuing education (MCE) for licensure, the AIA strongly supports that a state with MCE accept the AIA Continuing Education System as fulfilling a state's requirements. Both Michigan and Minnesota have enabling legislation, and Iowa has had it in place for several years. This will have an increasing impact on Wisconsin architects, even without a requirement here, since many Wisconsin architects are licensed and practice in our neighboring states. We need to make continuing education an advantage for AIA members, not a burden.

As of the end of August, 91% of members have reported some activity, 67% have completed 1997 requirements, and 37% have completed 1998 requirements. The deadline for 1997 CES requirements has been extended to September 30, 1999.

The AIA is working with components, other providers, firms and members to make everyone aware of the requirements and the opportunities for meeting them. A rescue team is now calling at-risk members to assist them.

The goals of the CES program are to provide quality programs, coordinate requirements with state licensing requirements, collaborate with industry and enrich the skills of architects. I think we are going to achieve success.

#### AIA Wisconsin

Third, I have been thinking about what we can do to make our own state professional organization a more effective instrument in supporting architecture and members.

Like a lot of similar organizations, we have many arms, many committees, many issues and many points of view. Not all of these pull in the same direction. I suggest we work on aligning the efforts of our various activities, so those involved know and commit to our common interest.

For example, why don't we add a question to the QBS criteria that asks if the firm principals and project architects participate in a formal annual continuing education program. This is information that is appropriate for prospective clients to know and would reinforce the importance and value of AIA membership.

It has been my great pleasure to represent you at the AIA; and I thank you for giving me the opportunity.

*EDITOR: The author completed his three-year term as our AIA Regional Director in December. Current AIA Directors for the North Central Region are Ward Whitwam, AIA, (605) 334-2422, and Edward Kodet, FAIA, (612) 377-2737.*

## A Concrete Example of Our Work

Wells Concrete Products offers an extensive variety of design options: special finishes, textures, and colors for precast and prestressed concrete.

Since 1957, our engineers, technicians, and craftsmen have designed, manufactured and assembled buildings that keep customers coming back. You can count on Wells Concrete Products for total satisfaction.

# IN SEARCH OF A

## From Rendering to Reality

Considering that renderings produced early in the design phase are generally accepted as "an approximation of a concept," the Midwest Express Center stands out among similarly large and complex projects with its uncanny match between 1994 renderings and the 1998 built reality. Examples are given throughout.

**W**alking into the Midwest Express Center for the first time, one can hear the tinny strains of music from a circus-themed food fair in one of the exhibition halls and glasses clinking as tables are set for a banquet in one of the ballrooms. Yet even with all of the activity, a reverent calm and peacefulness permeate the atmosphere. While the building is large—the largest architectural design/build project in the history of the State of Wisconsin—it manages to remain intimate. Though it is built of concrete and steel, it is not cold. It emanates warmth. Even on a cloudy day, the cathedral-like windows capture and radiate light. How does a mere building evolve into a "place?"

It began in 1994 when the state legislature approved the formation of the quasi-public Wisconsin Center District and a funding

stream based on hospitality taxes to build and operate a long-needed new convention center for Milwaukee.

The existing 378,000 sf MECCA Convention Hall had outlived its usefulness. A new center would attract meeting planners to the "gateway" of Wisconsin and all it offered visitors. A four-square block site was selected and a call was sent out for a design/build competition to meet the following criteria:

- State-of-the-art convention facility
- Exhibition hall with minimum 200,000 sf
- Meeting rooms with minimum 40,000 aggregate sf
- Ballroom with minimum 30,000 sf
- Ability to accommodate future expansion for up to 150,000 sf
- Appropriate image for its location
- Total project budget of \$170.3 million must not be exceeded
- Project completion by end of 1999
- Utilize 25% minority and 5% women owned businesses in all phases of project
- Incorporate a percent for art in the building
- Provide a partnering plan

### Teamwork

D•4 Associates, LLC is the design arm of the design/build team Cream City Associates, LLC which includes the joint venture of Clark Construction of Bethesda Maryland and Hunzinger Construction of Milwaukee, Wisconsin as project builders. Upon selection for the complex and highly visible project, CCA initiated the partnering process they had outlined in their proposal.

Jean Campana of Campana Consulting in Orlando, Florida was brought in by the team. "Partnering," says Campana, "is a way for everyone who has a stake in a project to express their objectives, concerns and values upfront. It's a team approach to solving problems."

### Senior

Project Manager

for engineering firm Graef

Anhalt Schloemer and

Associates, John Kissinger had never

before participated in a partnering session but now enthusiastically supports the initiative. "I learned something about the other people," he said. "When you know people, it's a lot easier to pick up the phone and communicate."

Geoffrey Hurtado, President of MECCA when the project began, said, "I went into this with the idea that we had a really important opportunity to decide whether we were going to be a team or a bunch of independent operatives."

During the first session, which lasted more than eight hours, each participant completed a personal "style survey," intended to enable others to know with whom they are dealing. The group also wrote an action plan and a list of goals and objectives. By the time the first session was over, 29 individuals diverse in gender and ethnic backgrounds representing more than 20 different companies, the owner and users had signed off on both a mission statement and a list of 10 specific project goals.

CCA had proposed the project be completed in two phases to allow the owner to continue uninterrupted operation. The design/build team also fast-tracked the project, which added complexity, thus elevating the importance of genuine "teamwork!" Drawings were produced concurrently with construction. Each design decision impacted the direction of construction. At the beginning of construction, due to the high cost of steel, the decision was made to substitute pre-cast concrete framing in some places. The concrete beams and columns took up more space than the steel would have, requiring the design team to make modifications to the project. 125 people from 20 different firms produced 10 volumes of drawings totaling 950 sheets and two volumes of specifications.

### Design

The Exposition Building flourished until 1905, when it burned down. The building, designed by Milwaukee architect Edward Townsend Mix, was by today's standards not large: 400 by 290 feet, with a 150-foot cupola in the center. Mayor John Norquist asked that the Exposition Building be considered, "as a reference point for discussing the design" of the new convention center.

# SENSE OF PLACE...

While the new structure echoes some elements of buildings from the past, for example, the gables, or the blue/green fritted glass which refers to the patina of old copper roofs; this remains a contemporary building. Modern urban issues such as the "fit" of the building into the context of the neighborhood were addressed by borrowing on details of surrounding buildings. The decision was made to keep Wells Street open to traffic. To accomplish this, the exhibition floor was elevated, which allowed the truck docks to be removed from public view.

Feedback to the design team from user groups and neighborhood focus groups was crucial in presenting what could have been a huge, imposing box. "The building [design] has improved immeasurably because of the input from city and neighborhood leaders," says Charles M. Engberg, AIA, Founding Partner of Engberg Anderson Design Partnership. "It's not just a big long wall," he said. "It has a lot of articulation. It is largely transparent. It has different levels. And the fact that it is broken up by Wells Street is important."

Though the design reflects the past, it is a modern structure. The main rotunda not only serves as the entryway but also acts as an urban lantern. The sloped glazing admits copious amounts of light in pre-function spaces, and fritted glass along the top of the building softens harsh sunlight during the day and emits a warm, inviting glow at night. The use of glass assists wayfinding and provides immediate visual access to the city. Clear circulation and daytime/nighttime connection with the community were enhanced by placing concourse areas along the outside perimeter of the building. Landscape design, including some public art elements, enhances the building and provides a buffer zone between pedestrians and motorists. Entrances are defined, seating and gathering places provided and "extensive perennial plantings provide relief and visual interest in this highly urban environment," says landscape architect Ken Saiki of Ken Saiki Design.

Colors and shapes from the building's exterior and the shapes of the interior portals were repeated throughout the design of the interior. The curve of ballroom and meeting room portals, designed collaboratively by D•4 architects and artist Jill Sebastian, provided a recurring theme to be produced in a variety of materials and elements for a holistic design with interesting detail. The distinctive custom carpet design was created by Lisa Kennedy, AIA of I. I. Kennedy, Inc., who worked

closely with the design team to create a continuity throughout the building. "We took different elements of the architecture and incorporated them into the design of the carpet, so the entire facility would be integrated, inside and out," said Kennedy. "The ballroom carpet is the most intricate, [with] a woven design [and] each yarn dyed individually. We took the diamond pattern of the exterior precast panels and the color palette of the brick and wove it into the carpet." The lighting, designed by Carol Chaffee/Associates of Minneapolis, reinforces the character of the building in a manner that reflects the unique and historic qualities of the city. Each chandelier is composed of four free-blown hand-painted faux alabaster diffusers mounted to curved metal arms. Additional lighting in the ballroom includes tungsten and metal halide down-lights built into wood columns in the walls, which creates a further sense of intimacy.

The clear signage throughout the facility repeats the curved shape and includes a special logo designed for Midwest Express Airlines, who retained naming rights for the new facility.

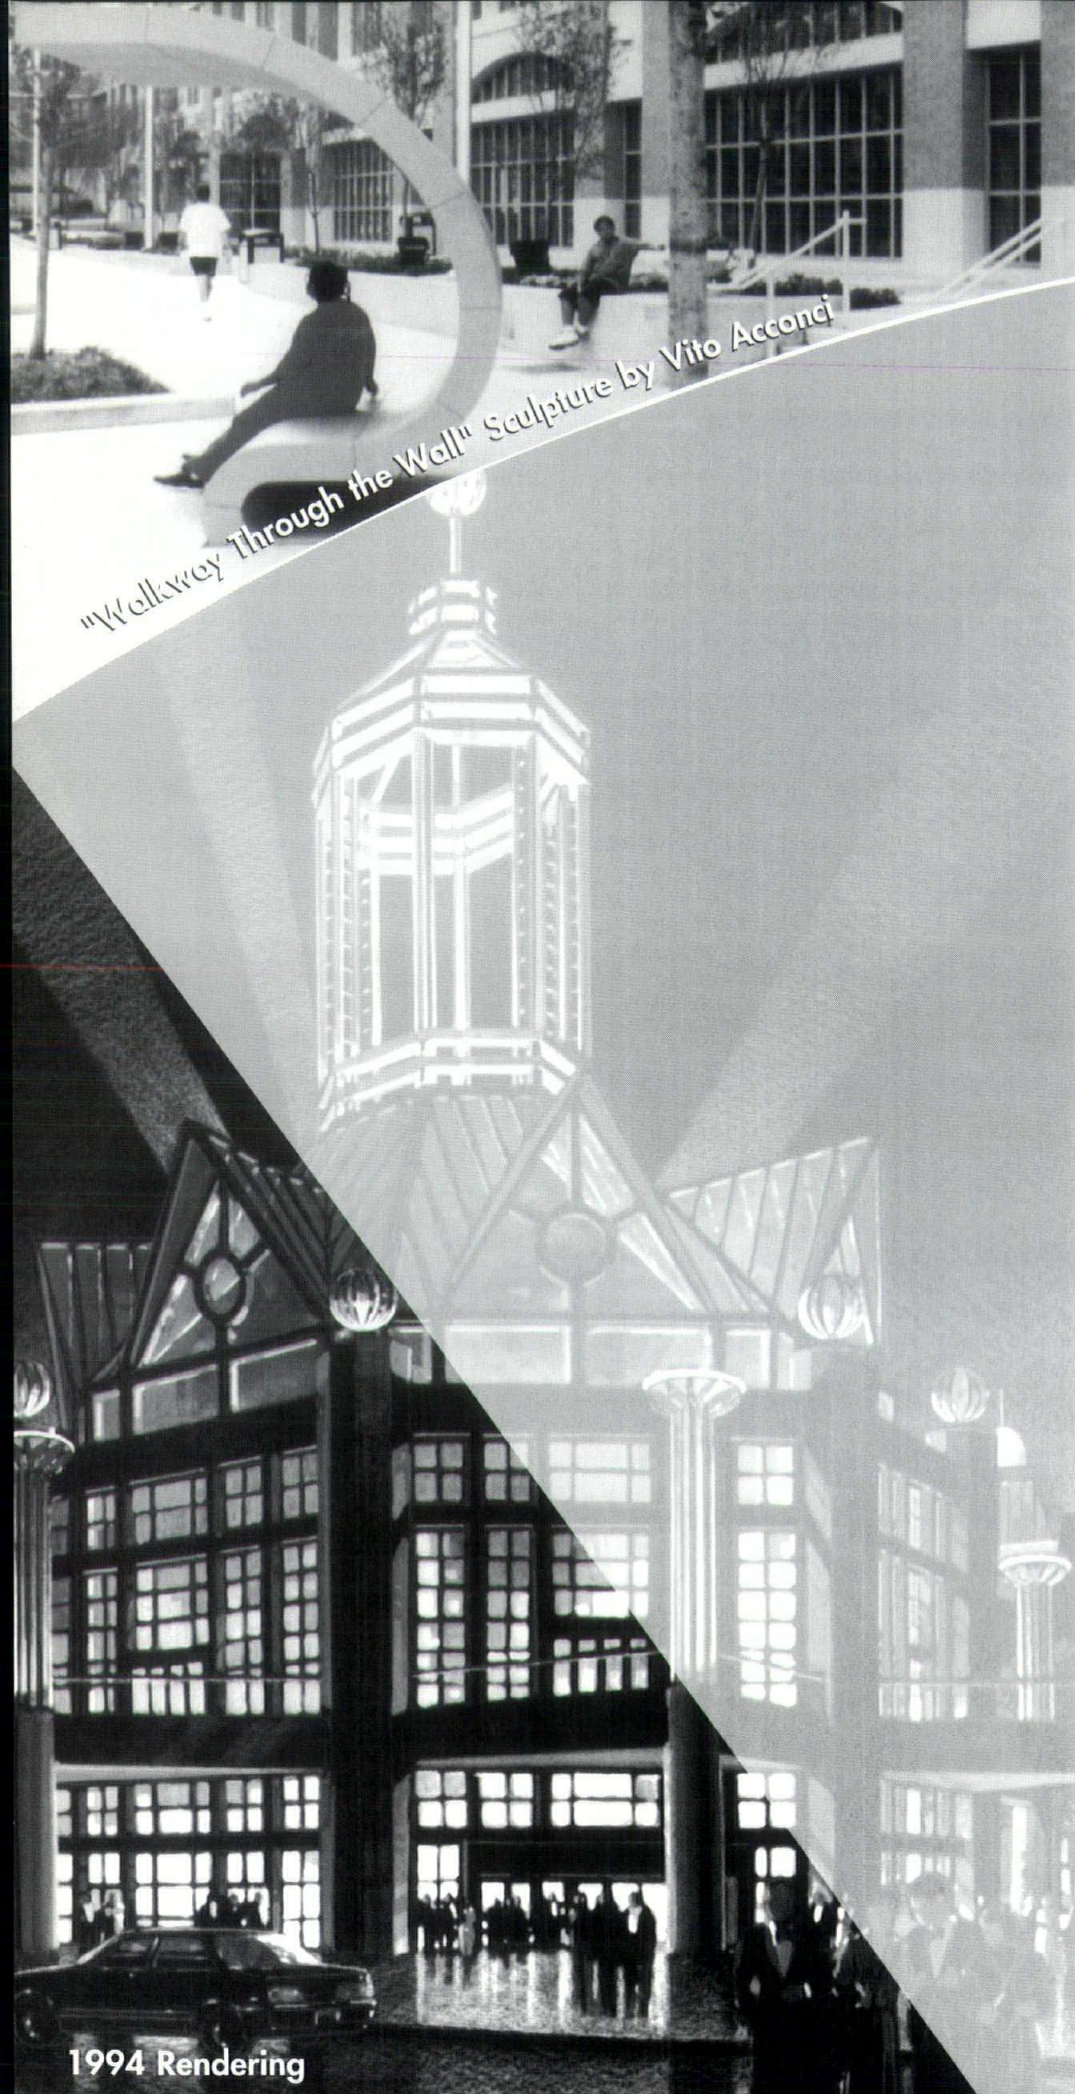

A voice and data communications system is included which provides services and connections for exhibitors. The 185,444 sf exhibit hall is served by eight telecommunication closets where both virtual and real cross connections can be made. Flush floor boxes on a 30' grid include water; drains; compressed air; 20 amp, 30 amp and 60 amp power; and voice and data communications receptacles including fiber optic connections.

A communications backbone of both single-mode and multi-mode fiber optic cable is installed

throughout the facility. The backbone is utilized by several building systems including central monitoring and control, security, fire alarm, local area network and telephone.

The system also allows access to multimedia telecommunication service providers, which are available from all parts of the building. Information kiosks are located throughout the facility and are tied into both the building's information network and the city-wide communication infrastructure.

### Integrated Art

In 1993, the Milwaukee Arts Board approached the newly formed Wisconsin Center District to ask them to consider requiring 1% of construction costs of the new center be used for integrated art in the design/build proposals it was seeking. The State of Wisconsin already had a Percent for Art requirement for their capital projects, and the City of Milwaukee had an ordinance that suggested "up to 1%" of a project's construction cost be used for public art. This quasi-public project did not qualify for either requirement. The Board agreed to the concept of including artists' work for the new facility that would serve as a reflection of Wisconsin's history, culture, natural beauty, and diversity. It was up to the design/build team to propose how this would be accomplished.

Cream City Associates retained The Freeman/Whitehurst Group as consultants to lead the public art process as they had done successfully for a number of similar projects throughout the U.S. An Arts Advisory Committee, comprised of local arts and community representatives, was formed to assist with the process. Two separate juries were convened and selected 17 artists to be included in the project from over 400 who submitted their work for review.

Two artists, Jill Sebastian and Anne Kingsbury of Woodland Pattern, were asked by the selection panel if they would collaborate with imagery and words of Wisconsin writers for the project. They agreed, and along with Vito Acconci began working with the design team to determine where their art could be integrated and where other commissioned pieces would be placed throughout the building. Making structural and lighting decisions for the art before construction allowed cost for installing public art to be 35% of what would be necessary after completion of the facility.

Due to the fact that the art was part of the design from the beginning, it does not look or feel like a separate entity tacked on as an afterthought. The curved design of Vito Acconci's sculpture "Walkways Through the Wall" flows from exterior to interior and reflects the curved pattern in the carpet. The curved cherrywood portals are adorned with a sampling of writing by some of the state's many published writers. The art quietly extends its hand and gently pulls you in. The art is the design. The design is the art. A sense of place begins to emerge.

The Burke Family generously donated an additional \$500,000 to allow all the selected work to be purchased and to provide written materials, curatorial leadership and maintenance of the collection in the future. This is believed to be the first privately named

## "Portal" Interiors

public art collection in the country. James Auer, Milwaukee Journal Sentinel art critic says, "In the highly competitive world of convention centers, art means prestige. Art means attention. Art means an aura of vitality and originality that can set a city apart from a more affluent rival 100 miles down the interstate."

### Economic Impact

Prior to this project, the blocks west of the Milwaukee River were fast becoming a dreary and blighted area. The convention center, covering four square blocks, has already lived up to its mission of revitalizing the neighborhood by its presence alone. The jobs that the center has created and the influx of conventioners has given the area renewed vitality and is attracting new hotel, restaurant and retail business.

Phase I of the project opened on time and on budget with an official dedication and confetti explosions on July 24, 1998. Governor Tommy Thompson said at the event that the Midwest Express Center was "a world-class facility," an "investment in greatness," and "the fuel in the economic development engine of the entire area...It is built also with the boundless optimism that has inspired Wisconsin to do so many great things in our history."

Grand opening festivities included a black tie gala to benefit the United Performing Arts Fund and the United Way, a special breakfast which honored the workers who built the project, and a community open house which attracted 50,000 visitors. The National Governors' Association (August 1-4, 1998) was the first in a string of major conventions that the city has snagged with the new facility. Meeting planners have given the center rave reviews. "This is a very well-thought-out design," said Nasser Pazirandeh, eastern regional director for Conferon Inc., a company that handles meeting planning for about 400 associations and corporations.

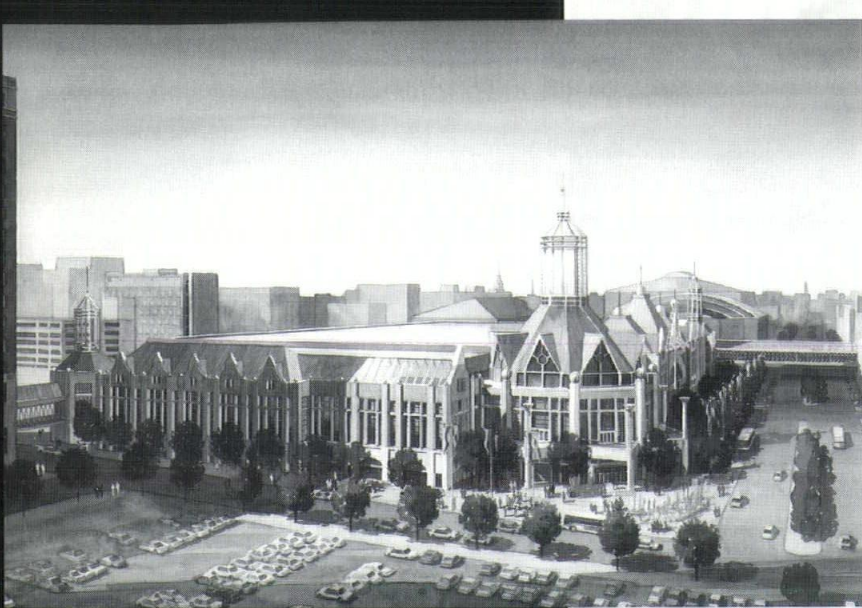

Phase II, which began in September 1998, included taking down the old convention center (MECCA). Due to careful planning, Wisconsin Center District offices have been transferred to the new facility. Their work and use of the convention facilities has been uninterrupted. Total project completion is expected by New Year's Eve 1999.

The Midwest Express Center is a testament to the fact that activity does not necessitate noise, big is not hollow, concrete and steel are not inherently cold and that light will always find a way through the darkness (and well-placed windows). Planning, communication, teamwork, vision and good design are how a

## The Team

D•4 Associates, LLC, a design team led by managing architect Engberg Anderson Design Partnership of Milwaukee, was formed to meet the challenge of the design/build criteria. The national team consisted of 24 architectural, engineering and specialty consultant firms. Given the tight schedule, strong teamwork was crucial. Communication was very important in that people from many disciplines made collaborative decisions which retained consistency of design elements throughout the building.

## FUNDAMENTALS OF BUILDING CONSTRUCTION, Third Edition

Edward Allen, AIA

*Fundamentals of Building Construction: Materials and Methods*, a textbook used by over 10,000 architecture, engineering and construction technology students each year, has been significantly revised to reflect recent developments in the construction industry. Concerned primarily with the technologies of construction materials—what the materials are, how they are produced, what their properties are and how they are crafted into buildings—the new third edition covers newly introduced building products, as well as older products that have assumed new and more important roles. In addition, author Edward Allen, AIA, has reorganized the text for clarity. However, the fundamental organization of the text, with materials and construction systems being considered simultaneously, has been preserved.

With new information on everything from wood products and roofing and glass technologies, to the role of light-gauge steel framing in small-scale construction, the third edition of this classic work has been thoroughly revised and is also accompanied by a web site specifically geared to helping instructors use the book with ancillary materials. Readers can go to [www.wiley.com/constructioneducation](http://www.wiley.com/constructioneducation) to download slides and CAD images, link to related sites, read the Construction Education newsletter and participate in discussion groups.

### ABOUT THE AUTHOR

Edward Allen, AIA, is a member of the faculty at the School of Architecture at Yale University and has taught design studio and classroom courses for over 25 years.

## CRACKING THE CODES: An Architect's Guide to Building Regulations

Barry D. Yatt, AIA

Long viewed as necessary evils in the design process, codes and regulations are often blamed for holding back creative freedom in a building project. Barry D. Yatt's *Cracking the Codes: An Architect's Guide to Building Regulations* presents the radical notion that regulations can strengthen a design when understood and used properly. This new book will teach professionals how to develop and design better projects, training them to recognize issues calling for regulatory research, suggest strategic directions that are compatible with regulatory requirements and work effectively with hired consultants.

*Cracking the Codes* takes individual regulations and binds them into unified, understandable packages that reflect the thinking of owners, builders and designers. If codes are viewed as lessons learned through centuries of skilled craftsmanship and tragic building failures, they become too valuable to be ignored or misunderstood. By laying a groundwork that firmly adheres to the rules, architects are free to pursue creativity.

Features of this book include:

- Both an interpretation of the codes as well as code-inspired design solutions
- Lists and explanations of rules related to zoning, building codes, accessibility statutes and historic preservation standards
- Numerous sketches, diagrams and photographs are used to clarify and stress new ideas in building
- Coverage of the forthcoming unified building code scheduled for release in the year 2000.

### ABOUT THE AUTHOR

Barry D. Yatt, AIA, is an associate professor of construction and practice management in the School of Architecture and Planning at The Catholic University of America.

# Mid-States..its people..it

**Frank Heidt**

**Gary Garman**

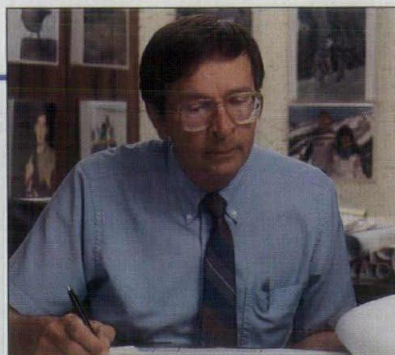

## PLANNING

A veteran team of sales/customer service people will work with you from start to finish on your construction project.

From quotation, technical assistance, construction details...they thoroughly know Flexicore/Flexicast construction.

For the sales representative in your area phone

**1-800-236-1072**

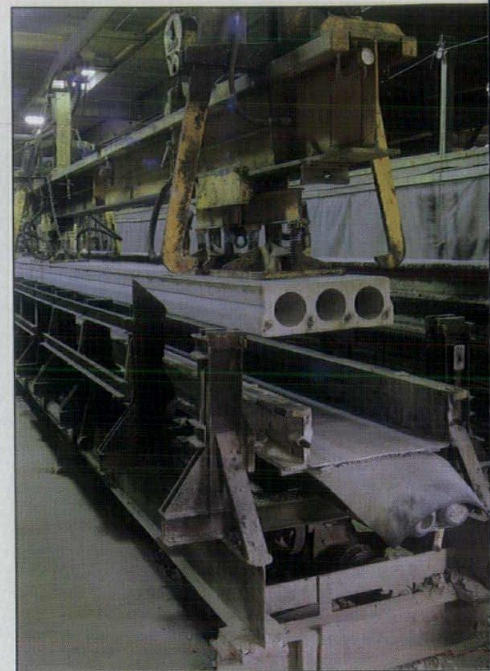

**Al Bautz**

## DESIGN

After the information is secured by the sales/customer service people...Cindy Linnabary, Manager of Engineering Services, and staff prepare shop drawings for customer information and approval. This department is also available to answer questions regarding details, estimates and final price quotes.

## PRODUCTION

From approved shop drawings, your order is custom produced to your exact specifications.

Mid-States is a PCI Certified plant. Strict compliance with detailed standards is necessary to retain certification.

Production and management personnel actively participate in seminars and conferences of the Precast/Prestressed Concrete Institute. This ensures delivery of a quality product to our customers.

## INVENTORY

Whatever your load bearing and span requirements, Mid-States will custom cast to your specs. Flexicore is produced in 24" widths, lengths 50' and depths of - 6", 8", 10" & 12".

## FLEXICAST BEAMS & COLUMNS

The fire resistive load bearing beams/columns are competitive with other fire resistive structural system.

Flexicast offers faster delivery than steel and is a popular choice for basement parking and school construction.

# products..its services..

## PROMPT DELIVERY

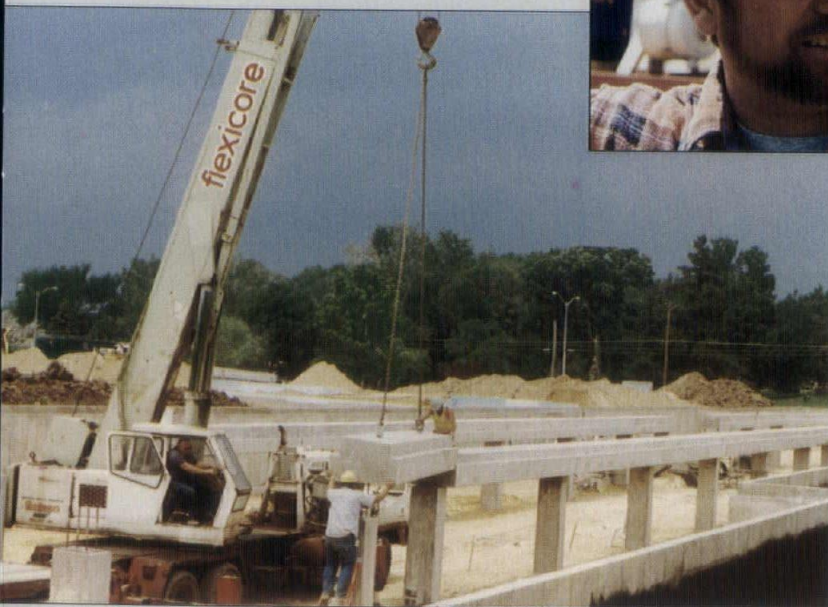

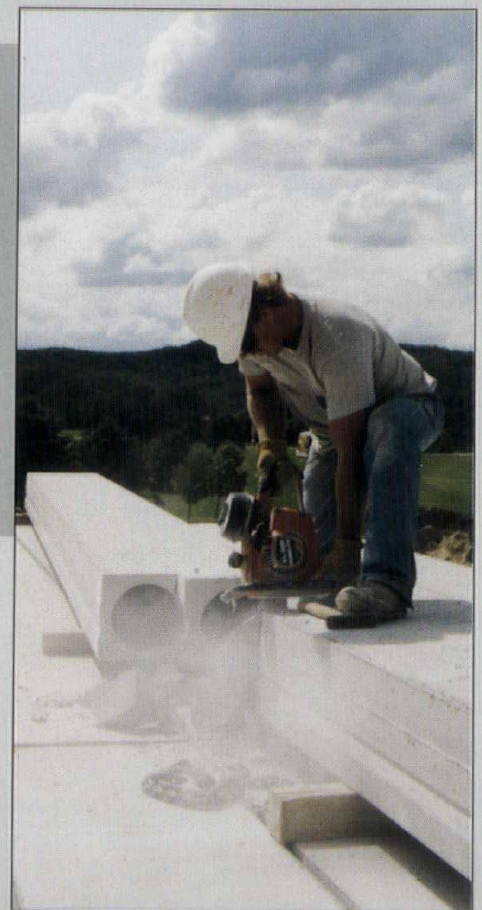

Mid-States is firmly committed to on-time delivery...working with a transportation firm experienced in delivering Flexicore and Flexicast beams/columns. They are familiar with job site conditions and proper unloading/placement of your order.

## INSTALLATION

Experienced Mid-States crews provide prompt and correct installation of Flexicore floors, ceilings and beams/columns.

They also cut openings for access or openings for mechanicals when specified with the order. Again, the field crews are teamwork people... working with you.

## JOB SITE SERVICE

Fieldmen visit job sites prior to installation, checking for access, coordinating with the job superintendent, and scheduling installation / erection.

Other services available include caulking, and preparing Flexicore surfaces for a finished ceiling appearance.

# ...the results -

# AIA Wisconsin

## Commissions & Committees

The AIA Wisconsin Board of Directors has established numerous committees of volunteer members to assist in the development of a broad range of programs and services for the benefit of the entire membership and profession. The wide array of AIA Wisconsin committees reflects the varied interests and concerns of the membership.

Your involvement and participation on AIA Wisconsin committees is strongly encouraged. You will benefit from the opportunity to network with other architects from across the state with similar interests. AIA Wisconsin and your fellow members will benefit from the knowledge, skills and expertise you can provide these committees as they shape AIA Wisconsin programs and services.

There are also ample opportunities to get involved with local Chapter committees, task forces and special events. Your participation at the Chapter level can make a big difference. For more information, please contact local Chapter officers in your area.

At the state level, each AIA Wisconsin committee is assigned to one of five commissions: Executive & Administrative, State Programs, Education & Practice, Government Affairs and Component Affairs. Each of these has a "Director Advisor" who is a Director-At-Large on the AIA Wisconsin Board of Directors and who reports on committee activities at regularly scheduled AIA Wisconsin Board meetings.

The following is an outline of the five AIA Wisconsin commissions and their related committees. It contains the mission statement for each committee along with the name and phone

number of the committee chairperson. If the work of a particular committee sounds interesting to you, please contact the chairperson for further details on how you can get involved. If you can't find the committee you're looking for, contact one of the director advisors about establishing a new AIA Wisconsin committee.

### **Executive & Administrative Commission**

*Director Advisor:* Walter Wilson, AIA, (414) 771-6222

#### ***Executive Committee***

To exercise general supervision over the affairs of AIA Wisconsin; to assure that all administrative, financial and other matters assigned to officers by the Bylaws and/or delegated to the Executive Committee by the Board of Directors are carried out in an efficient and effective manner; to safeguard and maintain office and other property; to regularly evaluate the job performance of the executive director and other staff; and to serve as the Board of Directors of *Wisconsin Architect* magazine.

*Chairperson:* Dan Roarty, AIA, (920) 713-3464

#### ***Editorial Advisory Board***

To provide regular advice and counsel to magazine staff and to develop recommendations for the Board of Directors to assist *Wisconsin Architect* magazine in achieving its established purposes of featuring the work of member architects in a creative format, providing practical informative articles of educational interest, keeping members informed of current activities and programs, and presenting a forum for material suppliers to advertise their products and services.

*Chairperson:* Mark Kruser, AIA, (608) 833-2321

### **Wisconsin Architects Foundation**

To promote the science and art of planning by advancing the standards of architectural education, training and practice; to provide scholarships to Wisconsin students pursuing degrees in architecture; to provide program grants to student chapters at universities and technical colleges in Wisconsin; and to support programs and activities that increase the public's awareness and appreciation of architecture and architects.

*Chairperson:* Kerry VonDross, (414) 781-7200

### **AIA Regional Directors**

To represent North Central Region on the national AIA Board of Directors and to communicate with the leadership of components in the region.

*Directors:* Ed Kodet, Jr., FAIA, (612) 377-2737; Ward Whitwam, AIA, (605) 334-2422

### **State Programs Commission**

*Director Advisor:* Mark Kruser, AIA, (608) 833-2321

### **Convention Committee**

To work with Board of Directors, staff and other committees to plan, promote, coordinate and conduct an annual statewide conference on design, practice and technology issues that is attractive to members, allied professionals and material suppliers and that achieves or exceeds financial goals established by budget.

*Chairperson:* Mike Clark, AIA, (608) 274-2741

### **Design Awards Committee**

To convene an annual design awards jury for selection of the work of member architects that merits recognition for design excellence; to assist in disseminating the results of this selection to members and public through *Wisconsin Architect* magazine, the annual Convention and media thereby fostering public awareness of the work of member architects; and to encourage dialogue by the public and among members of the purpose and direction of architectural design in Wisconsin.

*Chairpersons:* Katherine Schnuck, AIA, (414) 272-2000; Jim Rasche, AIA, (414) 272-2000

### **Fall Workshop Committee**

To work with Board of Directors and staff to plan, promote and conduct an annual one-day workshop on practice issues of interest to members.

*Chairperson:*

### **QBS Committee**

To create, maintain and improve a resource readily available to public owners and members for the objective, informed, responsive and professionally responsible promotion of Qualification Based Selection (QBS) procedures; to monitor QBS program and advise the Board of Directors as to its operations; to establish objectives, recommend policies, approve presentation materials, promote owner and member participation, coordinate with related professional organizations and evaluate program performance.

*Chairperson:* Mike Gordon, AIA, (608) 274-2741

### **Fellowship Committee**

To identify and recommend to the Board of Directors candidates for nomination for advancement to the AIA College of Fellows; to encourage members to seek advancement and assist candidates in the preparation of nomination materials.

*Chairpersons:* Jim Miller, FAIA, (608) 836-7732; Gary Zimmerman, FAIA, (414) 476-9500

### **Golden Award Committee**

To screen and rank Golden Award nominations for submission of recommendation to Board of Directors.

*Chairperson:* Frank Dropsho, AIA, (608) 238-3426

### **Firm Award Committee**

To develop recommendations for and coordinate the Architecture Firm Award program including the selection of the jury.

*Chairperson:* Mary Lawson, AIA, (608) 274-2741

### **Education & Practice Commission**

*Director Advisor:* John Peine, AIA, (414) 476-3377

### **Continuing Education Committee**

To research and make recommendations to Board of Directors and Chapters regarding continuing education programs and policies to meet members' needs and expectations.

*Chairperson:* E. Mitchell Spencer, AIA, (715) 232-2416

### **Electronic Media & Technology Committee**

To provide leadership to the membership of AIA Wisconsin in the effective use of technology for the performance of architectural services through the education of members on effective applications of technology, by representing the interests of the membership to influence the development of technology tools, and by reporting to the membership developments and trends in technology.

*Chairperson:* Steve Groth, AIA, (414) 271-8899

### **Intern Development Program**

To continue to educate interns and practitioners about the Intern Development Program (IDP) and its requirement to become a registered architect in Wisconsin.

*Chairpersons:* George Owen, AIA, (414) 784-7690; Arlan Kay, AIA, (608) 251-7515

### **Historic Resources Committee**

To encourage the preservation of Wisconsin historic resources; to promote within the architecture profession and the general public a greater awareness, appreciation and respect for those historic resources; to provide leadership, programs and technical support within the profession on preservation-related issues, serving as a source of information and education.

*Chairperson:* Ron Siggelkow, (608) 244-1341

### ***Diversity Committee***

To establish liaison with regional and national AIA committees, provide networking opportunities and develop programs of value for minority and women architects, interns and allied professionals in Wisconsin.

*Chairperson:* Walter Wilson, AIA, (414)771-6222

### ***AIA Documents Committee***

To assist the AIA Documents Committee by encouraging and compiling recommendations from Wisconsin members on possible revisions to AIA documents.

*Chairperson:* Steve Steen, AIA, (414) 272-2000

### ***Dean's Advisory Group***

To establish a more formal link and format for increased dialogue between the UWM School of Architecture & Urban Planning and the profession by providing for discussion with the Dean on School-related issues and programs in conjunction with regularly scheduled meetings of the AIA Wisconsin Board of Directors.

*Chairperson:* Bob Greenstreet, Dean, (414)229-4016

### ***AIA/AGC Liaison Committee***

To improve working relations between AIA Wisconsin and AGC and to enhance understanding of contract documents; to develop recommended practices for use by architects and contractors.

*Chairperson:* Gerald Schwoch, AIA, (608)276-9200

### ***Government Affairs Commission***

*Director Advisor:* Jack Fleig, AIA, (608)784-1830

### ***Legislative Committee***

To identify public policy issues of importance to Wisconsin's design and construction industry; to develop positions and make recommendations on legislative issues of interest and concern to the architectural profession; to lobby appropriate legislative committees and administrative agencies; to encourage the active grassroots participation of members in the legislative process; and to

communicate with other professions that have similar legislative concerns.

*Chairperson:* Fred Zimmermann, AIA, (608)238-7626

### ***DFD Liaison Committee***

To establish a continuing dialogue with the state Division of Facilities Development and to establish a format for discussion and resolution of problems and issues of mutual concern.

*Chairperson:* Richard Eschner, AIA, (414)272-2000

### ***Safety & Buildings Liaison Committee***

To establish a format for ongoing discussion and resolution of building Code, plan review and related issues of concern to the profession and the Safety & Buildings Division, Department of Commerce.

*Chairperson:* Warren Bauer, AIA, (608)274-2741

### ***Component Affairs Commission***

*Director Advisor:* Greg Karn, AIA, (608)238-0211

### ***Membership Committee***

To develop and implement programs and materials for expanding membership and for increasing membership retention and participation; to profile and analyze membership attitudes and needs for use in planning member recruitment programs, developing methods to encourage increased member participation and recommending new programs and services to respond to member needs.

*Chairperson:* Kevin Shumann, AIA, (920)731-2322

### ***Public Awareness Committee***

To encourage architects to work together to develop and maintain a clear understanding of the present and future roles architects play in society so to effectively position the profession to be of greatest service; to develop materials and programs to expand the public's awareness of architecture and architects as well as architect's awareness of the public's needs and expectations.

*Chairperson:* Tom Hirsch, AIA, (608) 252-0516

### ***Associates Network***

To increase communication and interaction among Associate AIA members, other interns, Architect members, architecture students and faculty and to encourage increased participation in AIA programs by Associate members and interns.

*Chairperson:* Bill Danuser, Assoc. AIA, (608)238-0221

### ***Architects in Schools***

To encourage and assist architects in presenting programs on architecture in local schools by developing statewide network of AIA members and teachers interested in creating and promoting these opportunities.

*Chairperson:* Horst Lobe, AIA, (608) 833-4641

### ***Community Service Committee:***

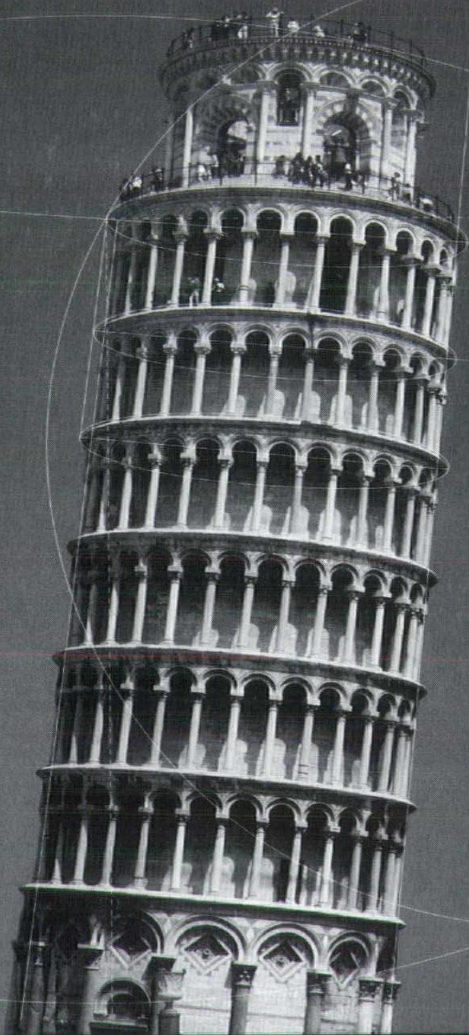

To encourage, support and recognize member involvement and leadership in community affairs.

*Chairperson:*

# AIA Wisconsin Membership Directory

AIA Wisconsin is the statewide component of The American Institute of Architects. With 1,300 members, AIA Wisconsin represents Wisconsin architects and allied professionals in private practice, corporations, industry, government and education.

AIA Wisconsin is composed of four local Chapters: Southeast, Southwest, Northeast and Northwest. Each AIA Wisconsin member also is a member of one of these local Chapters.

The objectives of AIA Wisconsin and its members are:

- To advance the science and art of planning and building by advancing the standards of architectural education, training and practice.
- To coordinate the building industry and the profession of architecture.
- To promote the aesthetic, scientific and practical efficiency of the profession.
- To insure the advancement of the living standards of people through their improved environment.
- To make the profession of architecture of ever-increasing service to society.
- To cooperate with and promote the objectives of The American Institute of Architects within the state of Wisconsin.

The accompanying 1999 *AIA Wisconsin Membership Directory* is divided into four sections corresponding to AIA Wisconsin membership categories:

**AIA Members:** Registered architects who are Architect members of The American Institute of Architects (AIA). Within this membership category, Emeritus members are designated by AIA-E and Fellows of The American Institute of Architects by FAIA.

**Associate Members:** Associate AIA members include individuals without architectural registration from a U.S. licensing authority who either are eligible by education and experience and actively working towards licensure as an architect, employed under the supervision of an architect, have a professional degree in architecture, are university faculty involved in architectural research or teaching, or have an architectural license from outside the U.S.

**Professional Affiliate Members:** Individuals who are not architects but who may be registered to practice their professions where such requirements exist. The category includes professional engineers, landscape architects, interior designers and other professionals whose work is related to architecture.

**Student Affiliate Members:** Undergraduate and graduate students attending architectural schools and technical colleges in Wisconsin.

The *AIA Wisconsin Membership Directory* includes the following information for each member: name, firm name, mailing address, daytime telephone number and local Chapter. The *Directory* is updated annually as part of a survey of all members conducted each fall.

If you have any questions, comments or suggestions regarding this *Membership Directory*, please contact: AIA Wisconsin, 321 S. Hamilton Street, Madison, Wisconsin 53703; (608)257-8477/1-800-ARCHITECT.

**7 out of 10  
construction projects  
are standing on  
something stronger than  
concrete or steel.**

They're standing on a concept called merit construction.

This means merit and union craftspeople work side by side. They are chosen on merit, so those who offer the best skills, get the jobs. By being open to new ideas, like multi-skilled work teams, new technology and advanced construction

techniques, merit contractors are able to build

high-quality buildings that are highly cost efficient. Four out of five people in construction today are working on merit projects. For a free directory of merit contractors in Wisconsin. Call Associated Builders & Contractors, 800-236-2224.

**MERIT CONTRACTORS. BUILDING A BETTER LIFE.**

For more information, call 800-236-2224 or visit our web site: [www.abcbwi.org](http://www.abcbwi.org).

# Selecting and Working with an Architect

**W**hether you are building your own home or planning a commercial facility, selecting the right architect is important to a successful project. The architect is the one professional who has the education, training, experience and vision to guide you through the entire design and construction process, from helping you define what you want to build to helping you get the most for your construction dollar. Working with other design and construction professionals, architects can help you achieve a well-designed project that meets your needs and works within your budget and time frame.

Architects are trained to analyze your functional needs, long-term goals and budget. Using this analysis, the architect designs a building that helps meet your current and future needs. When designing a building, an architect seeks to balance several often conflicting elements, including function, aesthetics, economics and technology. And the architect must balance these elements within the context of building codes and zoning regulations.

## Architects work with you to:

- *Help clarify and refine your building needs.* Through a process called programming, the architect examines your requirements, budget and building site and then works with you to define what is to be built and to establish the project's scope.
- *Help you look ahead.* Architects are planners who look beyond your immediate requirements to design flexible buildings that will adapt to your changing needs. For example, architects think about how to accommodate changing computer/communications technology.
- *Help manage the building project.* From conception to move-in, the architect is your project leader. As the central clearinghouse for ideas, schedules and every other facet of the project, the architect manages and coordinates the project elements.
- *Help maximize your construction dollar.* A building designed for maximum energy efficiency can cut your heating and fuel bills. The architect's efficient use of space may reduce the square footage you require. A well designed building not only can reduce initial costs, but also can increase its value.
- *Take a broad view.* Architects look at the impact the building will have on the people who use it, the surrounding area and the natural environment. The result is the creation of office spaces that make interaction between departments move more smoothly, retail areas that display your products in their best light and prompt customers to buy, and factory and administrative environments that stimulate employee productivity and satisfaction.

## Wise Investment

Architects are trained to solve problems in creative ways, translating your needs into square feet and three dimensional space. With their broad knowledge of design and construction, architects can show you alternatives and options you might never think of on your own.

The architect's services are a wise investment because:

**A well-designed project can be built more efficiently and economically.** Architects plan your project with you. As your ideas evolve, changes can be made on paper much less expensively than later on when construction is underway. Thorough drawings also make it easier for the contractor to accurately price and build your project.

**Energy efficient building design can save you money on fuel bills.** An architect can design a building to maximize heating from the sun and let in natural light, thus reducing your heating, cooling and electric bills over time.

**The architect can work with your budget and help you select the appropriate materials and workmanship at a fair price.** Architects develop the drawings and specifications to help you get bids for construction that are based on your requirements.

**An architect can help you choose materials and finishes that are durable as well as beautiful, saving on frequent maintenance and replacement costs.** Their familiarity with the full range of materials enables them to suggest the appropriate materials for your project.

**Good design sells.** A well-designed house has a higher resale value. A well-designed store draws customers. A well-designed work environment attracts employees and increases productivity.

**The architect can make your life easier.** Building is a long process that is often disruptive, particularly if you are

living or working in the space under construction. The architect you hire looks out for your interests and tries to find ways to make that process go smoothly.

**If your project requires engineering or other design services, the architect can coordinate this team of experts so you don't have to.** The architect sorts out complex building codes and zoning laws. The architect can help you find qualified construction contractors based on your requirements. The architect visits the construction site to help verify that the project is being built according to plans and specifications.

## Selection

Architecture firms come in a variety of sizes and types. Each firm brings a different combination of skills, expertise, interests and values to its projects. Some firms specialize in one or more project or facility types. Some firms include in-house engineering services (e.g. civil, structural, mechanical or electrical) or other design disciplines (e.g. planning, urban design, landscape architecture or interior design). Many other architects introduce these disciplines through appropriate consultants. The right kind of firm for your project will depend on the specific demands of your project and what you are looking for in an architect.

First-time clients, and even experienced clients facing new situations, often have many questions about architect selection. The following are some of the more common:

- *When should I bring the architect into the picture?* The best time to bring in an architect is as early as possible in the project. Long before plans and specifications are developed, there are many crucial decisions to be made. Architects can help you define the project in terms that provide meaningful guidance for design. Working with a preliminary evaluation of your needs, an architect can help you find a site that presents the best opportunity to construct the kind of building you envision. Other predesign services architects offer include economic feasibility studies, assistance in developing project budgets and schedules, and help in obtaining project financing.
- *Should I look at more than one firm?* Usually, yes. The exception, of course, arises when you already have a good relationship with an architect and it makes little sense to change.
- *How do I find potentially suitable firms to contact?* Start building a list of potential architects. Contact other owners who have developed similar facilities and ask who they interviewed and ultimately selected. Ask who designed buildings and projects that you've admired or that seem especially appropriate. Get recommendations from friends and relatives who have worked with architects. AIA Wisconsin publishes directories of AIA member architects and member-owned firms. AIA Wisconsin also assists public owners in establishing a complete Qualification Based Selection (QBS) process for their projects.
- *What information should I request?* Contact each firm on your list. Describe your project and ask if they are available to take it on. If they are, request literature outlining the firm's qualifications. If the architect is unable to handle your project, ask if s/he can suggest another firm. The materials you receive from interested firms might include a letter of interest, brochures, fact sheets, photos of past work and biographical material about key personnel. Look beyond the style of the brochure to determine which firms have the right experience and capabilities for your project. At this point, you should be able to narrow your list to the architects you will interview.
- *Why are formal interviews desirable?* An interview addresses one issue that can't be covered in brochures and printed materials: the "chemistry" between you and the architect. It also allows you to investigate how each architect will approach the project. Remember, you will be working with the architect for a long time and will want someone with whom you feel comfortable.
- *How many firms should I interview, and how should they be selected?* Most people advise that you interview between three and five firms, enough to see the range of possibilities, but not so many that an already tough decision will be further complicated. Treat each firm fairly, offering, for example, equal time and equal access to your site and existing facilities. Ask to meet the key people who will work on your project.
- *What can I realistically expect to learn from an interview? How can I structure the interview to make it as informative as possible?* During the interview, ask a lot of questions. You can learn how the team the architect has put together will approach your project. Ask how the architect will gather information, establish priorities and make decisions. Ask what the architect sees as the important issues or considerations in the project. Evaluate the firm's interest in your project. Evaluate the firm's style, personality and approach: are they compatible with yours? If, during the interview, there is something you do not understand, ask the architect for clarification.
- *How should I follow up?* Tell each firm what you intend to do next and when you plan to make your decision. If you haven't talked with past clients, do so now. Assess both the performance of the firm and the performance of the resulting architecture. You may want to visit existing buildings to see them in use. Notify the selected firm as soon as possible. Remember, conditions change; the firm may not be able to offer the same project team if you must take several weeks or months to decide.

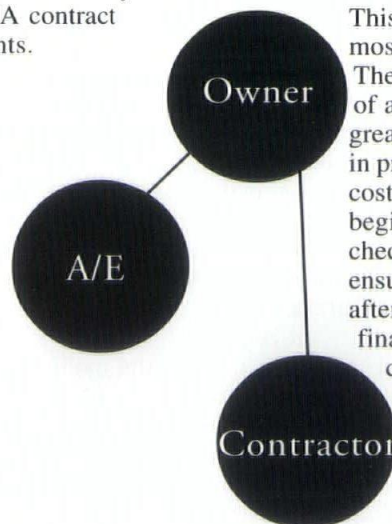

- *On what should I base my decision?* Personal confidence in the architect is paramount. Then seek an appropriate balance among these factors: technical competence, professional service, cost and design skills. Once you've selected the best firm, enter into detailed negotiations of services and compensation. If you cannot agree on contract terms, begin negotiating with your second choice.

However the architect selection process is approached, it is worth taking the time to do it well. Here's some additional guidance:

- *You are engaging the services of a professional.* You will work closely with the architect through the life of the project, and your relationship may extend to future projects. Invest at least the care it takes to select a financial or legal advisor.
- *Yours will also be a business relationship.* Find out how prospective architects do business, how they work with their clients, how responsive they are to your management and decision styles, and how well their work stacks up against their clients' expectations. The best way to find out is to talk with other owners for whom the firm has provided professional services.
- *Ask questions.* Respect the architect as a professional who will bring experience and specialized knowledge to your project. At the same time, don't be afraid to ask the same questions you've asked yourself:

What does the architect expect from the project? How much information does the architect need? How does the architect set priorities and make decisions? Who in the firm will work directly with the client? How will engineering or other design services be provided? How does the firm provide quality control during design? What is the firm's construction-cost experience?

- *Be frank.* Tell the architect what you know and what you expect. Ask for an explanation of anything you don't understand. The more on the table at the beginning, the better the chances for a successful project.
- *Get it in writing.* Once you have found the architect, you are ready to put in writing the terms of your agreement regarding the scope of work, services, schedule, construction budget and architect's compensation. This written agreement can take many forms. The American Institute of Architects has developed a variety of standard contract forms which are used industry-wide. The AIA Wisconsin office maintains a complete inventory of these AIA contract documents.

## Project Delivery Methods

There are a variety of project delivery methods. The choice depends in large measure on the nature of the project and time and budget constraints. An architect can advise you on the method most appropriate to the needs of your project. The two most common project delivery approaches are separate contracts for design and construction (design/bid/build) and one contract for both design and construction (design/build).

With the traditional design/bid/build method, you hire the architect and contractor, signing separate contracts with each. The architect is usually hired first to prepare construction documents, which include drawings and specifications. When these documents are completed, they become the basis for soliciting contractor bids and negotiating and awarding a construction contract. During construction, the architect serves as your representative, administering the contract and helping check that the contractor's work is in accordance with the drawings and specifications.

This separate contracts system is the most widely used in the United States. The advantages of utilizing this type of approach are that it gives you greater control over and involvement in project decisions, provides a firm cost figure before construction begins, and provides a system of checks and balances which helps to ensure that your interests are looked after by a professional who has no financial stake in the outcome of the construction contract. A disadvantage of the design/bid/build approach is that it may require more of your time.

Under a design/build arrangement, you hire a single firm to both design and construct the project. The architect does not work for you, but for the design/build firm. You may not deal directly with the architect but with a representative of the design/build firm.

An advantage of the design/build approach is that it provides you with a single point of project responsibility. Potential disadvantages of this project delivery method are that it allows you less control over the design process, gives the design/build firm the authority for decisions affecting its ability to remain within the budget and on time, and eliminates the traditional checks and balances of the design/bid/build approach.

There are, of course, many variations to these project delivery methods, with different advantages and disadvantages. Your architect can help you select the most appropriate method for your project.

### Successful Projects

The best building projects are created when the client and architect work together as a team. Both you and your architect can take specific steps to help meet your quality, time and budget goals.

Design and building are group activities. Many people and firms come together to do a project. They may not have worked together before; and they may not work together again. They collaborate to produce a unique building on a specific site. As the project unfolds, hundreds of individual design decisions and commitments are made. Needs and conditions change; and work is modified. A strong and healthy relationship between owner and architect is essential to keep the project on track.

Design and construction projects typically involve several steps or phases. These may include: programming, schematic design, construction documents, bidding or negotiation with contractors and construction. However, on some projects several of these steps may be combined; on others there may be additional phases involved.

The architect's involvement normally does not stop with the preparation of construction documents. Architects also provide construction administration services. These services may include assisting you in hiring the contractor, making site visits, reviewing and approving the contractor's applications for payment and keeping you informed of the project's progress.

The path to a successful building project is paved with lots of challenges and uncertainty. There are literally hundreds of decisions to be made, decisions which have a strong impact on how the project looks and functions over time.

Designing a building is exciting and creative. Both the architect and building owner bring something to the relationship that the other needs. As the owner, you have a building goal and the financial resources to realize that goal. The architect brings extensive professional training and experience, creativity and project management skills.

Be open to new ideas. Be candid about how you want the end result to feel and look. It is important that you or someone from your company be very involved with the project, asking questions and providing information to the architect.

Experience tells us that successful projects — those that respond to owner needs and aspirations, that are accomplished within schedule and budget and that contribute to the quality of our communities and our lives — result from clients and architects who form solid professional and business relationships. These relationships are formed early on and are nourished by clear expectations and a willingness of both you and your architect to accept your responsibilities for achieving a successful project. **WA**

*This brief introduction to selecting and working with an architect was adapted from three publications by The American Institute of Architects: A Beginner's Guide to Architectural Services, You and Your Architect, and Building Relationships. For directories of AIA Wisconsin members and further assistance, please contact: AIA Wisconsin, 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477 or 1-800-ARCHITECT.*

# AIA Wisconsin Firm Directory

Design and building are inherently exciting; and there is nothing more satisfying than a successful project. The secret to success lies in the professional relationship between building owner and architect. Whether you are building or remodeling your home or planning a commercial, industrial or public facility, selecting the right architect is important to achieving a successful project.

Members of AIA Wisconsin have been selected for major projects across the country and have received many important awards. AIA Wisconsin member architects have assisted thousands of clients with creative solutions to their building needs.

Investing in the professional services of an architect is a wise use of often very limited building resources. A well-conceived project can be built more efficiently and economically. An architect can design a building to maximize natural light, thus reducing heating, cooling and electric costs. Your architect can help you select materials and finishes that are durable as well as beautiful, saving on maintenance and replacement costs. Good design pays dividends...a well-designed store draws customers and a well-designed work environment attracts good employees and increases productivity.

If you need the professional services of a qualified architect, you will find a suitable firm in this *1999 AIA Wisconsin Firm Directory*. The firms listed will welcome the opportunity to discuss your project with you.

The *AIA Wisconsin Firm Directory* includes the following information on each firm: firm name, address, county and telephone and fax numbers; names of the principals or partners of the firm; number of registered architects and total employees; and a description of the firm's practice.

The information contained in the *Directory* was provided by the firms as part of an annual survey of AIA Wisconsin members. It is a roster of firms owned by AIA Wisconsin member architects. To be listed, at least one of the firm's principals or partners must be a registered architect and an AIA Wisconsin member.

You are encouraged to keep the *1999 AIA Wisconsin Firm Directory* handy for reference throughout the year. Contact the firms listed for further information about their practice and the professional services they can provide for your project. If you have any questions or suggestions regarding the *Directory*, please contact: AIA Wisconsin 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477/1-800-ARCHITECT.

Architects Group Limited, celebrating over twenty years, offers complete architectural services, including programming, buildings, interior design and space planning, site selection and evaluation, feasibility studies and master planning, construction documents and administration. Projects include new/remodeling/retrofit in educational facilities, housing, offices, health care, recreational, correctional, churches, car washes and retail. Special services include comprehensive building studies and ADA remodeling. AGL is completely computerized including specifications and AutoCAD for production drawings.

## ARCHITECTS STUDIO, INC.

9430 W NATIONAL AVE  
WEST ALLIS, WI 53227  
County: Milwaukee  
Phone: (414) 545-4654  
FAX: (414) 545-6033

Ross J. Bente, AIA

Registered Architects: 1  
Total Employees: 2

ARCHITECTS STUDIO, INC. has designed homes, apartments, condos, offices, business additions and welcomes other challenges. The design philosophy is to have aesthetics, orientation, function, circulation, structure, plumbing, heating, electrical and budget work

together appropriately. One of these areas, or perhaps another need, is emphasized to make the building special. For example, efficient use of energy, with passive solar energy for heating in winter and the right overhang for shading of windows to lessen air conditioning needs in summer, is a way the parts of a building work together appropriately. ARCHITECTS STUDIO, INC. uses computer assisted drafting to complete the drawings and has three dimensional capabilities to efficiently show clients interior and exterior perspective views during design so that everyone involved can better visualize what is being planned and adjust plans as necessary to make the building exactly right.

## ARCHITECTURAL DESIGN GROUP

393 RED CEDAR ST STE 3  
MENOMONIE, WI 54751-2267  
County: Dunn  
Phone: (715) 235-4848

LTD. Design II, Ltd., has numerous areas of concentration due to being awarded a high number of church projects, motels and housing facilities. The firm remains popular with church communities and motel franchises due to their manageability of budgets and their accompanying restrictions. Design II, Ltd., has met the challenge of matching original architecture for church facilities which displays quality appreciation for historic preservation. In conclusion, Design II, Ltd., is an attractive choice because of abilities concerning functional design, feasible time schedules and budget guidelines.

Genesis Architecture provides a full range of architectural services for residential, religious and commercial building types and has received national recognition for its award-winning designs. With a special emphasis on Prairie and organic design, we design projects that have a close relationship to the site, express the beauty of natural materials and achieve an inner harmony of parts that gives evidence of integrated, holistic design. The design of furniture, light fixtures and stained glass is often done to enhance the unity of the architecture with interior furnishings. 2D and 3D computer modeling is used along with hand rendered drawings to best convey design and construction information.

As a certified liturgical design consultant, church facilities are the only work of my firm. Ecclesiastical design requires architectural training, group facilitating skills and liturgical consultation credentials. After 25 years of commercial, industrial and institutional design and management experience, service to religious communities is my focus. In order to be of greater service to my clients, I collaborate with national experts in liturgy, acoustics and fine arts through The Liturgical Design Guild, Inc., and participate as a member of ACLS. Collaboration provides my clients with more effective and valuable information on which to base their decisions.

Isthmus Architecture, Inc., is committed, as a collaborative of architects and historians, to preserve the architectural and cultural landscape in a manner that respects original context and design intent. Our practice focuses primarily on rehabilitation, renovation, restoration and adaptive reuse projects for residential, commercial, institutional and government clients. Striving to secure the ongoing viability of the existing built environment as it functions in a modern world, we create design solutions that not only foster the preservation of older buildings, but also effectively address the client's expressed and intended use of the structure. Our solutions are predicated on an understanding of the technologies and methodologies that facilitate the restoration and rehabilitation of historic buildings and settings. We are committed to teamwork on each project, integrating the owner, contractor and multiple disciplines into our process. We offer: programming and space planning; preservation planning and design; new construction planning and design; building survey, research, documentation and analysis; community survey and planning; and facility assessment and historic structure reports.

Kenneth L. Etten, AIA

Registered Architects: 2  
Total Employees: 5

McCormack + Etten/Architects' philosophy is to serve clients by listening to their needs. Talent and creativity are combined with the knowledge and experience of the M+E staff to produce fresh, innovative design solutions appropriate to the client's program. The latest version of "Autocad" is utilized to efficiently generate a wide range of projects. McCormack + Etten/Architects' areas of expertise include high end custom residential and remodeling, light commercial and retail, schools and churches and public institutional projects. The firm's personal brand of service and attention to detail reflect our primary concept: that good design is the product of hard work, good taste and appropriateness to the client's needs.

Paul A. Meier, AIA  
Thomas C. Hoffman, Assoc. AIA

Registered Architects: 1  
Total Employees: 3

Meier and Hoffman provide creative and fully coordinated architectural and interior design services for custom residential, vacation home and corporate office clients. With a diversified background of projects including residential, municipal, commercial and historic renovation, each of our projects expresses the individual style of our clients. After a thoughtful analysis of the site and environmental factors, we then integrate the interiors, furnishings, art and lighting with the architecture. Many of our projects are custom, remote vacation homes

and cottages in northern Wisconsin and Minnesota. For these we utilize renewable energy systems, on-site sewage treatment, passive solar heating, super-insulation and daylighting technologies.

Miller Architectural Group is a small, young firm, striving to blend inherent youthful idealism with a strong business orientation. Our practice is centered on our core competencies of creativity and practicality in the reuse, renovation and preservation of existing buildings and environments. Our desire is primarily to 'strive to repair the damage of the past.' Through a number of means: reuse and renovate existing buildings, strategic urban infill of sites where buildings have been demolished, or where there is no other choice; creation of new buildings and spaces that speak not to a style, but rather are informed and inspired by the successful aspects of past architecture of all types.

PSI Design, Inc. was founded in 1982 to offer architectural design and planning services to public and private sector clients in southeast Wisconsin. Since that time, PSI Design has expanded its client base and range of services, and now practices throughout the Midwest and across the United States. As an independent entity within Peter Schwabe, Inc., Design/Build, PSI Design has developed an enhanced approach to design based on constructability and cost effectiveness. Servicing a diverse clientele with focus on educational, religious, corporate, industrial and commercial projects, PSI Design has developed a flexible and responsive approach to design, with each client viewed as a unique opportunity to create lasting solutions and enduring relationships.

## Ways to achieve your annual 36 LUs

- Learning how to computerize your operations? Take a computer course? Learn about the latest CAD software? Record it!\*
- Attend an AIA or CSI educational chapter or regional meeting. Contact your local chapter for a schedule of their educational programs.
- Read a special, preselected article from *Architectural Record*. These learning activities model the medical profession's continuing education format.
- Attend "Brown Bag" or "Lunch-n-Learn" activities at your office. (E.g., an educational presentation on roofing materials.)
- Teaching? Record time you'll spend researching new knowledge (E.g., codes, designs, structures, etc.) to prepare for a presentation.\*
- On the road traveling? Planning a tour of a city? Identify in advance what you want to learn and then report your architectural learning opportunities. (e.g., a tour and description of the historic preservation of old plantation houses while visiting historic Charleston.)\*
- Serving on a committee or are you politically involved in your community? Spending time researching the latest codes or specifications for a new project? What new knowledge do you hope to gain that you can apply toward your profession? Record time spent researching this new knowledge.\*
- Attend a PIA conference. The 22 different PIAs sponsor over 40 continuing education programs a year, all over the country. Call the PIA Information Line at 800-242-3837.
- *The Architects Learning Source*. Use these AIA self-study educational products and materials in your office or on your own. You can now even take a course over the Internet. Either look on AIAOnline or call (202) 626-7347 for a catalogue.
- Attend the AIA national, state, or regional conventions. AIA Wisconsin Convention is on April 21 & 22, 1999, in Madison and the 1999 AIA National Convention will be May 5-9, 1999, in Dallas.
- Complete an NCARB monograph and test. Contact them at (202) 783-6500.
- Refer to [www.e-architect.com](http://www.e-architect.com) <continuing ed> for AIA Continuing Education System (AIA/CES) programs, online programs and educational products, and reporting forms. Listed are conferences, seminars, workshops, and ongoing appointment programs you can attend or bring into your office. New ones are added every day!

\* = activities you should record on an AIA/CES Self-Report form (now available to complete and automatically file via [www.aiaonline.com](http://www.aiaonline.com))

Code references for:

Plumbing Contractors - HVACAR Contractors - Architects - Engineers and Suppliers

Why fumble through dozens of code books to find the answers that you need?

When, we can solve your problem!

You will receive the following chapters in one easy to handle binder with easy reference tabs.

		State Code Books (If purchased separately from State)
♦ COMM 13	Compressed Natural Gas - Entire Code	9.00
♦ COMM 18	Elevator - Part Code	9.00
♦ COMM 41-42	Boiler & Pressure Vessel - Entire Code	10.00
♦ COMM 50-64	Building-Heating-Ventilating & Air Conditioning - Entire Code	32.00
♦ COMM 66	Uniform Multi Family Dwellings - Entire Code	10.00
♦ COMM 69	Barrier Free Design (ADA) - Entire Code	12.00
♦ COMM 85	Subdivisions Not Served by Public Sewers - Entire Code	32.00
♦ COMM 86	Boat and On Shore Facilities - Entire Code	
♦ COMM 87	Private Sewage Systems Replacement or Rehabilitation Grant Grant Program - Entire Code	
♦ COMM 90	Public Swimming Pools - Entire Code	9.00
♦ HSS 110	Health & Social Services - Part Code	25.00
♦ Statute 106.025	Plumbing Apprenticeship - Entire Statute	5.20
♦	Excavating Sheets	not available
♦	Engineering Data	not available
♦	Comm Phone Book	upon request
♦	Three - Ring Binder	at additional cost
♦	Color - Coded Section Tabs	not available
<b>TOTAL</b>		<b>\$153.20</b>

**TO QUALIFY FOR THIS PRE PRODUCTION SALE PRICE,  
ORDERS MUST BE RECEIVED AND PAID BY MARCH 1, 1999  
BOOKS WILL BE AVAILABLE FOR SHIPMENT ON OR AROUND MAY 1999**

Remember the sixties? Flower Power, Watergate, the Beatles and, of course, the establishment of a new architectural program in the state of Wisconsin. Not earth shattering news at the time, perhaps, but welcome news for the many Wisconsinites looking for a professional program close to home.

Now, nearly thirty years later, the School of Architecture and Urban Planning has matured and grown. It occupies a remarkable new building and has more than 3,000 alumni throughout the state and the country. Rather than belabor the accomplishments of the School in lengthy prose, I have encapsulated them for your convenience.

## THE DEAN'S TOP TEN

### Reasons Why the School of Architecture and Urban Planning, University of Wisconsin-Milwaukee, is a Great Program:

1. *U.S. News and World Report* recently ranked the program in the top twenty schools in the United States. This confirms the prediction of a recent accreditation report that stated that the School "was just steps from being among the best schools in the country."
2. The School has an extensive array of degree programs – BSAS, MArch., PhD, MUP and Joint MArch/MUP – that is matched only by Princeton, University of Michigan, Georgia Tech and Texas. In addition to an excellent faculty, the School hires outstanding professionals to add their experience to the studio and classroom. Many nationally known architects and planners are employed, and courses have been taught by the Mayor and other city officials.
3. The faculty have collectively written over fifty books, which are distributed internationally and used by schools and practices around the world. In addition, the faculty have received national recognition for their work in research and practice, as demonstrated by seventeen of them being honored by *Progressive Architecture* Awards.
4. Students of the School have won numerous awards for their work. In the Chicago Awards Program, SARUP has won over 70% of all the awards since the inception of the event twelve years ago. Similarly, SARUP students are regular winners in national competitions such as the AIA/AA Awards, where seven students have received awards in only ten years.
5. The School has one of the 15 PhD programs in Architecture in the United States and attracts highly qualified students from across the world. The international dimension is also evident in the School's overseas programs in France, England and Mexico.
6. The School is housed in a new award-winning building that provides 145,000 square feet of state-of-the-art facilities, including computer laboratories, woodworking shop, media center, reading room, display gallery and bookstore. Students in all levels of the program are housed in high quality, spacious design studios.
7. The School is part of the University of Wisconsin System, which has one of the lowest fees for state residents in the country. In addition, there are over 50 scholarship opportunities, as well as teaching assistantships and summer internships with regional practices.
8. Students graduating with a professional degree are aided in their efforts to find employment, and the School regularly anticipates full employment of its graduates within two to three months of graduation. Alumni are located throughout all states and in 35 countries. Major practices in Wisconsin and northern Illinois regularly recruit in the School.
9. The School is fortunate to have very active student and alumni organizations that create excellent extra-mural programs and activities, including a Mentoring Program, Lecture Series, Habitat for Humanity group, alumni newsletter and student journal.
10. The School has focused its expertise in a number of research institutes that pool the faculty expertise, attract external funding and provide opportunities for students and services to the community. Institutes include the Institute for Environmental Quality, Historic Preservation Institute, Institute for Aging and the Environment, and the Frank Lloyd Wright Initiative.

As we move towards our thirtieth year, we will be planning all kinds of events to celebrate the School's anniversary. Many of these will encompass the architectural profession of Wisconsin with which we believe we have forged a strong partnership in improving the physical environment. We look forward to a lasting and harmonious relationship long into the next century.

# AIA Public Policy Agenda

Architects influence our lives every day. They help create the buildings and plan the communities where we live, work, learn, and play. From skyscrapers to schools to housing for the elderly, architects serve society by designing functional, efficient, attractive and safe environments.

The American Institute of Architects is the world's largest national organization representing members of the architectural profession. With approximately 62,000 members and 300 local chapters nationwide, the AIA unites the profession behind principles and policies aimed at creating the best possible quality of life for all Americans.

The policy concerns of the AIA extend not only to the laws and regulations governing design, construction, procurement of architectural services and the practice of architecture, but also to a wide range of issues that affect our nation's way of life, the economic climate, the natural environment, and the health and safety of its citizens. The AIA policies reflect the goal of enhancing the quality of life by improving the condition of the built and natural environments.

The following is a summary of the AIA's position on a number of issues that are of importance to the profession. For further information about AIA positions on these and other issues, please contact the AIA State and Local Government Affairs office at (202)626-7403.

## **Urban Design and Livable Communities**

The AIA believes that the design of the physical environment directly affects the quality of our daily lives. Through careful planning and design, architects contribute to making safe,

attractive, economically viable and environmentally sustainable communities. The AIA also believes that livable communities offer:

- Choices in housing, shopping, recreation and job opportunities;
- Transportation alternatives;
- A variety of open spaces and places for active recreation, walking and public gatherings; and
- A shared identity and sense of pride that results from the visual character and vitality of the community.

To achieve these goals, local and regional plans must be coordinated and should promote first the revitalization of existing communities, and then, where appropriate, the development of new communities.

## **Government Procurement**

The AIA believes that selecting architects for federal, state and local government building projects on the basis of professional qualifications and competence is in the best interest of the taxpayers. The federal government and approximately forty states currently require selection of architects based on qualifications.

## **Historic Preservation**

The AIA believes that preservation of historic resources and their environments should be a priority in national policy. To that end, the Institute supports: landmark designation of appropriate buildings, sites and districts; preservation of existing neighborhoods and historic districts; continued development of federal, state and local programs, grants and tax incentives that support preservation; and adoption and creative application of codes, standards and land use regulations supportive of historic preservation.

### **Licensing**

The AIA believes that it is in the best public interest for architects to design all structures intended for human habitation or use and that extensive exemptions made to architectural licensing laws serve only to erode the public protection provided by professional licensure. In addition, the AIA supports vigorous enforcement of architectural licensing laws by the states and recommends that penalties be assessed for unlicensed practice as well as for incompetent or improper practice by licensees.

### **Housing**

The AIA supports a national commitment to the goals of a decent home and a suitable living environment for every American. The AIA seeks cooperation between all levels of government, the private sector and individual citizens in developing and implementing a national housing policy. The AIA favors continuation of the Low-Income Housing Tax Credit program, along with maintenance of the framework of federal housing assistance, including HOME and Community Development Block Grants, and reforms of the public housing programs.

### **Liability**

The AIA supports legislative and regulatory reforms that curtail the cost and risks of professional liability for architects without jeopardizing the interest of the public. The AIA, through its state chapters, lobbies for appropriate liability protection measures including: statutes of repose; certificates of merit and other means of reducing frivolous law suits, and workers' compensation amendments to protect architects from third-party suits from injured construction

workers. The AIA also supports Good Samaritan legislation to protect architects from being held liable for volunteer services provided in disaster situations.

### **Professional Service Taxes**

The AIA is strongly opposed to the concept of taxing professional services. Such taxation is regressive, inhibits competition and is inherently difficult and burdensome to administer. Service taxes are generally applied at a uniform rate for all service providers within the taxing jurisdiction. Smaller or less profitable firms suffer under such an arrangement, particularly for gross receipts taxes. Additionally, large firms often have the capability to provide comprehensive services in-house, while the small firm must rely on consultants, thus adding to their tax burden.

### **Disaster Assistance**

The AIA encourages its chapters to provide technical assistance to their communities and surrounding areas in the event of natural disasters that cause widespread structural damage such as earthquakes, floods and hurricanes. Such technical assistance may include emergency damage assessment, disaster mitigation planning and review of building codes.

### **Energy**

The AIA supports a balanced national energy policy that reduces waste of non-renewable energy resources while promoting environmentally sound production of energy sources. Further, the AIA encourages continued public and private research and development in all areas of energy-conscious design and technology, with emphasis on the performance of the total building.

### **Environment**

The AIA believes that environmental considerations must form the foundation of any planning and design process and encourages government at all levels to be responsible for managing and protecting environmentally sensitive areas. The AIA also recognizes that the cost of prudent management of the land development process is a necessary investment in the country's future environmental resources and the health and welfare of its people. The AIA supports reform of the Superfund program, strong clean air laws and attention to indoor air quality.

### **Design Excellence**

The AIA believes that government has a responsibility to be concerned with the image, functional effectiveness and lasting architectural value of the buildings it constructs. The AIA, therefore, supports laws and regulations encouraging distinguished architectural design that serves the public well and expresses the dignity of our government.

### Golden Award

The Golden Award, established in 1986, is the highest award that AIA Wisconsin can bestow on one of its members. Unfortunately, there will be no Golden Award presented in 1999 since no nominations were submitted by the November 15 deadline.

The AIA Wisconsin Board of Directors plans to discuss the Golden Award program and suggestions for encouraging greater participation at its upcoming meetings.

The purpose of the Golden Award is "to recognize an individual architect who has performed most distinguished leadership and service to AIA Wisconsin over an extended period of time, such services exceeding those expected in any official capacity, and by leadership has advanced the cause of our profession and provided an inspiration to his/her fellow practitioners."

The criteria established for the award are as follows:

- The AIA Wisconsin Golden Award winner shall be a past or present member of The American Institute of Architects and AIA Wisconsin. Recipient of the award may be living or dead.
- The Award is to be considered an *Architecture Award* and shall be given to an architect for distinguished service to the profession of architecture and AIA Wisconsin over an extended period of time.
- Candidates should not be on the AIA Wisconsin Board of Directors at the time of their nomination.
- Nominations may be made by an Architect member of AIA Wisconsin. A nomination form is available from the AIA Wisconsin office.

The Golden Award Committee consists of four active AIA Wisconsin members – one member from each local Chapter in Wisconsin. Committee members must be past presidents of

AIA Wisconsin or their local Chapter and are appointed by the Board of Directors to two-year terms.

Golden Award Committee members are: Frank Dropsho, AIA, Madison, Chair; Dennis Olson, AIA, Appleton; Wayne Spangler, FAIA, Rice Lake; and Richard Eschner, AIA, Shorewood.

The following AIA Wisconsin Golden Award recipients have been recognized for their most distinguished service and leadership:

1986 – David E. Lawson, FAIA  
1987 – Paul H. Graven, FAIA  
1988 – Mark A. Pfaller, FAIA  
1989 – Wayne E. Spangler, FAIA  
1991 – Leonard H. Reinke, FAIA  
1992 – Nathaniel W. Sample, FAIA  
1993 – Harry A. Schroeder, AIA  
1994 – John P. Jacoby, FAIA  
1995 – Noble E. Rose, AIA  
1996 – Douglas H. Smith, AIA  
1997 – Gary V. Zimmerman, FAIA  
1998 – James W. Miller, FAIA

Members are encouraged to contact the AIA Wisconsin office for nomination materials and other information on the Golden Award. The deadline for nominations for the 2000 Golden Award is November 15, 1999.

### Parti'99

The 1999 AIA Wisconsin Convention & Building Products Expo, *Parti'99*, returns to the Monona Terrace Community & Convention Center on April 21 & 22. Block off the dates on your calendar now because you won't want to miss this year's line-up of speakers, seminars, special events and displays.

*Cross Sections* is the theme for the 68<sup>th</sup> annual AIA Wisconsin Convention & Expo. "This year's Convention Committee set as its goal to create a program that provides opportunities to explore our profession from different perspectives," according to Michael Clark, AIA, Mount Horeb,

who is chairing the 1999 Convention. "We're confident the program offers a variety of experiences that will enlighten, educate and inspire AIA Wisconsin members and allied professionals."

*Parti'99* will feature keynote addresses by award-winning Canadian architect Douglas Cardinal, AIA, on April 21 and long-time sustainable architecture advocate Elizabeth Wright Ingraham, FAIA, on April 22.

The professional development seminars, nine in all, will focus on emerging design, practice, technology and environmental issues. Seminar presentations include: Eva Maddox, Assoc. AIA, on future design frontiers; Karen Greenstreet on keeping clients; Steve Ternoey, AIA, on daylighting; Michael Strogoff, AIA, on negotiating higher fees; Thomas Porterfield on risk management; Patrick Sharpe on project Web sites; and Jenifer Uncapher from the Rocky Mountain Institute on green development.

If this isn't enough to get you to Monona Terrace on April 21 & 22, the exhibit hall will be full of displays on the latest products and services available to Wisconsin's design and construction industry. The Expo is free and open both days.

Other special events include the presentation of the AIA Wisconsin Firm Award and Design Awards, the WCMA Awards breakfast, mini-seminars in the Expo, and tour of the State Capitol.

For more information on *Parti'99: Cross Sections*, call AIA Wisconsin at 1-800-ARCHITECT.

### Distinguished Service

The AIA Wisconsin Board of Directors has awarded a *Citation for Distinguished Service* to the following members and organizations to recognize their significant contributions to the profession of architecture:

- **Richard R. Johnson, AIA**, Stevens Point, was recognized posthumously for his service to AIA Wisconsin, AIA Northwest

Wisconsin, his community and the profession. His wife Mimi and son Nathan accepted the *Citation* on his behalf.

- **Brian F. Larson, AIA**, Eau Claire, was honored for his service and leadership representing the North Central Region on the AIA Board of Directors. Brian completed his three-year term as AIA Regional Director in December.
- **Peter J. Schuyler, AIA**, River Hills, was recognized for his distinguished tenure as Chair of the Editorial Advisory Board for *Wisconsin Architect* magazine. Peter has helped guide AIA Wisconsin's official publication since 1979.
- The **Wisconsin Concrete Masonry Association** was awarded a *Citation* for its consistent support of AIA Wisconsin programs, services and publications. Richard Walter, executive technical director, accepted the award on behalf of the WCMA.

The *Citations for Distinguished Service* to the profession of architecture were announced and presented at the December Board of Directors meeting in Milwaukee.

### International Code

After over a year of review and deliberations, the Safety and Buildings Division, Wisconsin Department of Commerce, advisory Commercial Building Code Council has voted to recommend the adoption in Wisconsin of the International Building Code.

The IBC is a model code being developed at the national level. Public hearings will be held by the International Code Council in March 1999, with a final version expected in March 2000.

In recommending adoption of the IBC in Wisconsin, the Commercial Building Code Council requested that Safety & Buildings staff draft any modifications needed to make the IBC consistent with Wisconsin statutes, limit the number of modifications and include in any interim code packages the transitional features needed to be consistent with the IBC.

There are three AIA Wisconsin members serving on the Commercial Building Code Council. Warren Bauer, AIA, Madison, is AIA Wisconsin's representative on the Council. Bill King, AIA, Madison, represents the Division of Facilities Development, Wisconsin Department of Administration. Lee Jensen, AIA, Milwaukee, represents the city of Milwaukee. For more information, contact Jim Smith of Safety & Buildings at (608) 266-0251 or [jsmith@commerce.state.wi.us](mailto:jsmith@commerce.state.wi.us).

### Consumer Web Site

On March 1, the AIA will launch its new consumer Web site to complement its national advertising campaign. Among other things, the Web site will explain what an architect does, how to work with an architect, provide easy links to AIA Chapter Web sites and identify the interests of the site visitors.

A key feature of the site will be a searchable database where consumers can find lists of member-owned firms. Consumers will be able to search for firms according to building type and geographic area. The *Profile* database will be used as the source for architecture firms that will appear on the AIA consumer Web site.

### People & Places

The following AIA Wisconsin members have been approved for Emeritus membership in The American Institute of Architects: **Marvin V. Christianson, AIA**, West Allis; **George W. Ehrich, AIA**, Green Bay; **Charles H. Harper, AIA**, Bayside; **Clarence Huettenrauch, AIA**, Mequon; and **George A. Schuett, FAIA**, Glendale.

It is sad to report that architect Paul C. Jacoby, Greendale, died in November at the age of 78. He worked for many years with his brother **John P. Jacoby, FAIA**, Menomonee Falls, at the firm of Herbst, Jacoby and Jacoby. Paul will be missed by his many friends in the profession.

Plunkett Raysich Architects has recently acquired the Milwaukee architectural firm of Architects III (Schuett Design Associates). As a result of the merger, the following members are now on the professional staff of Plunkett Raysich Architects: **George A. Schuett, FAIA**, Glendale; **Elizabeth P. Collier, AIA**, Waukesha; **Rolf Irgens, AIA**, Hartland and **Rick Nelson, Assoc. AIA**, Delafield.

Vierbicher Associates has acquired Architects-Engineers, Inc., and **Mark A. Kraft, AIA**, Madison, has joined the firm.

**Robert A. Ornst, Jr.**, Wauwatosa, a professional affiliate member of AIA Wisconsin, has been appointed as chief executive officer of Selzer-Ornst Co.

**Eric Oxendorf**, Milwaukee, a professional affiliate member of AIA Wisconsin, was recognized by the Advertising Photographers of America. A collection of his work was featured in the Fall 98 issue of its magazine.

**Mark J.R. Mattes, AIA**, Madison, has joined DLR Group in its Milwaukee office.

**Artis Hutchins, AIA**, Madison, has joined University of Wisconsin Hospital and Clinics as an interior architect.

Kahler Slater Architects has announced the addition of the following to its staff: **Barbara T. Armstrong, Assoc. AIA**, Shorewood, director of operations; **Kevin Wetrich, AIA**, architect; **Jennifer L. Schlimgen, AIA**, Waunakee, senior architect; and **Gene A. Wells, AIA**, Madison, senior architect.

Hammel Green and Abrahamson, Inc. has made the following promotions: **Gary R. Kinzer, AIA**, Whitefish Bay, associate; **Michael D. Torine, AIA**, Racine, senior associate, and **Raymond F. Sachs, AIA**, Wauwatosa, associate vice president.

**Charlie K. Simons, AIA**, Shorewood, has joined The Kubala Washatko Architects, Inc.

**Paul Brummond, AIA**, Watertown, received the "Durrant Circle Award" for his role in the firm's effort to market, secure and deliver significant prison work.

**Barry Chen-Jui Yang, Assoc. AIA**, Whitefish Bay, won second place in the *Housing a Community* design competition. The competition was part of the challenge to strengthen revitalization in the West Garfield Park/North Lawndale community in Illinois. Women in Planning & Development and Westside Habitat for Humanity sponsored the competition. **Engberg Anderson Design Partnership** is providing detailed design drawings.

**James F. Brown, Assoc. AIA**, Madison, has joined Planning Associates.

The Historic Preservation Institute at the UW-Milwaukee School of Architecture and Urban Planning has created a postcard series featuring eight landmark buildings in Milwaukee. For information on ordering the postcards, contact Robert Greenstreet, Dean, at (414) 229-4016 or [bobg@csgd.uwm.edu](mailto:bobg@csgd.uwm.edu).

For a free copy of Harper and Shuman's annual "Operating Statistics Survey," covering the 1997 fiscal year, contact Bettianne Eldridge at (617) 492-4410, ext. 321, or [beldridge@harpshu.com](mailto:beldridge@harpshu.com).

# The paint behind the paintings

Most art benefits from a carefully chosen setting. That's why galleries and artists choose Mautz paints to showcase their works. It might be because of our broad palette and custom mixing; our great coverage and consistent, reliable quality; our unbeatable service when it comes to custom projects, delivery, and help with specifications.

And it will involve a certain pleasure to the eye.

Make the artist's choice — specify the paint that will enhance your architectural endeavors. Call 608-255-1661.

What we do for Matisse, we can do for you.

Mautz Paint Company-Corporate Office  
P.O. Box 7068, Madison, WI 53707-7068

The Porter Butts Gallery pictured above is one of many that has used Mautz Paint. Others include the Chicago Art Institute and the Elvehjem Art Museum at the University of Wisconsin-Madison.

## *Hong Kong International Airport*

### **SPI**

Lightweight steel trusses, tensioned fabric structures and formed panel systems all present unique challenges for lighting. SPI has provided indirect lighting solutions for transportation facilities worldwide.

Combining form and function for greater design flexibility. Providing superior service, outstanding product performance and technical innovation.

Dedicated to making the best fully-integrated lighting systems in the world. SPI
