MAUTZ

America's great architects specify Mautz Paints

That's why Mautz Paints
were specified for the
Monona Terrace
Convention Center

Frank Lloyd Wright's concept of the Monona Terrace Community and Convention Center provides a creative example of awe-inspiring architectural design.

Mautz Paint is proud that it was selected to provide the paint for this prestigious structure.

For over 75 years Mautz has provided quality and reliable quality paints for many architectural monuments, as well as for homes, business and industry.

Mautz - Providing a full range of quality products to handle your most demanding specifications.

Mautz Paints

Please accept courtesy of the participating advertisers this copy of the 2000 AIA Wisconsin Construction Industry Handbook and Directory issue of *Wisconsin Architect* magazine.

Mission Statement

The purpose of *Wisconsin Architect* is to:

- Feature the work of Wisconsin architects in a creative format,
- Provide practical, informative articles that are of educational interest, and
- Present a forum for material suppliers to advertise their products in the specialized architectural market.

The Handbook edition is distributed throughout the state to 1,300 AIA Wisconsin members, 2,000 allied design and construction industry professionals government and private industry leaders as well as media representatives with an interest in design and local public and school libraries.

In addition, this special issue of *Wisconsin Architect* is provided to building owners

and others through out the year who contact AIA Wisconsin for a directory of architects and firms. It also is provided to public owners as part of AIA Wisconsin's innovative Qualifications Based Selection (QBS) Program. In total, over 4,000 copies of the special Handbook issue of *Wisconsin Architect* magazine will reach multiple readers this year.

You'll find this issue of the magazine to be a useful reference all year long. It is a unique source of information about AIA Wisconsin, its individual members and member-owned architecture firms.

Now in its 69th year of publication, *Wisconsin Architect* welcomes the new millennium with great expectations, and a renewed commitment to its mission. The strong support of AIA Wisconsin members, and advertisers is critical to the magazine's success and future growth. For information on submitting articles and advertising opportunities, please call (608) 257-8477.

Thanks for your support.

GE Profiles

"We Believe That We Have the Best Roof That the Industry Can Provide."

The roof of St. Croix County Health and Human Services was contracted for a GE Silicones Roof System by North Central Insulation.

The GE Roofing System consists of seamless polyurethane foam coated with GE Silicone and cast granules. It is applied by Qualified Applicators such as North Central Insulation and is warranted by General Electric. The system has over 25 years of performance history and is an excellent candidate for projects like St. Croix Health and Human Services.

"The county had struggled with the prospect of reroofing this building for many years, and could not justify the high costs. North Central Insulation was contracted to install a sprayed roof that was low in cost, easy to install, low in maintenance, easy to repair, leak-free, attractive, and had a well-written warranty. GE Silicones Roofing System made this package very attractive to the building owners and facility managers."

*Ralph W. Robole, Facilities Manager,
St. Croix County Health and Human Services,
New Richmond, Wisconsin*

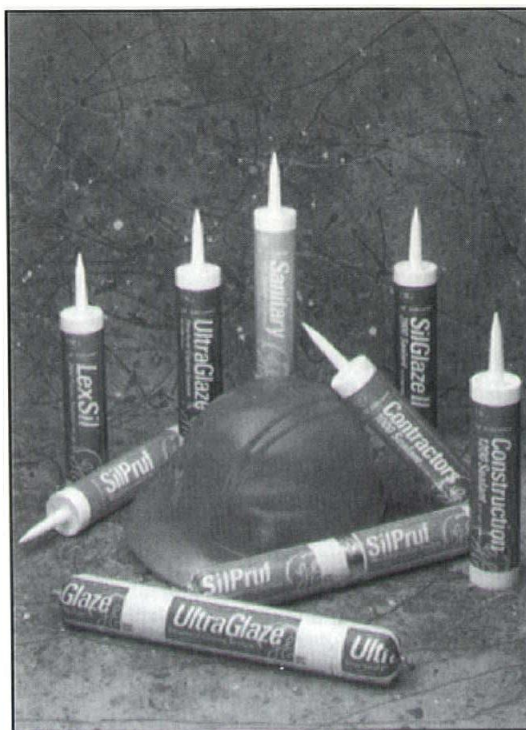

GE Silicones

The GE Silicones Roofing System™ has been serving customers like you for over 25 years.

"Our customers are interested in long term cost savings", says Walt Bilinski, National Roofing Manager for GE Silicones. "They trust that we have found the best combination of materials and applicators that you would expect from a Fortune 5 company."

The work we do today establishes what GE will be in the future. Our Qualified Applicators, like North Central Insulation, exemplify the long term performance and professionalism you would expect. We perform free roofing evaluations to help our potential customers understand the value we can bring them.

GE Silicones manufactures a full line of construction silicone sealants. The same construction sealants are used to make minor repairs to the GE Silicones Roofing System.

For more information on North Central Insulation - Qualified GE Applicator, call (715)835-4322.
For more information on GE Silicones, call 1-800-255-8886.

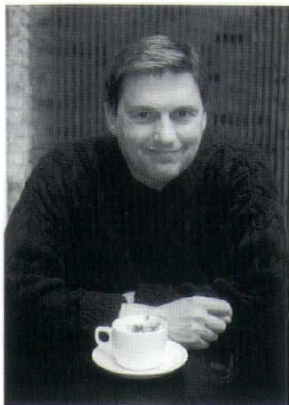

The GE Silicones Roofing System™ Benefits

PRODUCT FEATURES	POTENTIAL BENEFITS

Qualified Applicator Program	Experienced, professional application
Independent Inspection Program Engineering	Ensures GE specifications are met
Leak protection	Closed cell polyurethane foam coated with GE silicone

GE Silicones

We bring good things to life.

At a recent project meeting just before the new year, we all joked with wistful anticipation about the possibility of our computers crashing, as if Y2K could grant us a few precious moments to get off-line, slow down, catch up and even get ahead. The conversation turned to how difficult it is for firms to find people. Not just architects and other professionals, but also among the trades—skilled electricians, plumbers and carpenters who build our buildings. Deliveries are always backed up, lead times are never long enough and everyone is overworked. It's the price of prosperity. The longest in our nation's history we're told; the result of the information revolution, which in-turn has spurred the economy.

The good news, however, is that, as overworked as we are, many of us still find the time to answer the call to service on the AIA Wisconsin Board of Directors, at the Local Chapter level, on committees and in our communities. That in itself is cause for celebration for a volunteer organization such as ours. However busy as they may be, these volunteers manage to bring new energy, ideas and leadership to our Board. They give us renewed confidence to face the challenges that impact how we practice, and to capture the opportunities to better serve our members and the public at large.

Public Policy

Many issues that we confront reflect regional and national influences on the environment in which we practice, dealing with code enforcement, licensure and project delivery. Michael Corry, administrator of the Safety and Buildings Division, spoke at our Convention last year about the state's goal of adopting the International Building Code (IBC) in 2001. AIA Wisconsin has participated in the International Code Council meetings to craft the new code along with national AIA and other state AIA Chapters.

Recently, the NFPA and the International Association of Plumbing and Mechanical Officials (IAPMO) have resolved to withdraw from the single model code initiative and develop a second set of model codes. National AIA has formed a Task Force to review the strategic implication of this challenge of how best to achieve a uniform code. This issue will be addressed early this year during the AIA Grassroots leadership conference in Washington, DC.

The AIA Wisconsin Board is addressing two issues related to licensure that are both subject to national trends and reflect local traditions.

The first is whether a professional degree should be required for licensure. The State of Wisconsin has a tradition of providing an alternative path to registration through seven years of practical experience and passage of the exam. Some thirty-seven states now require a professional degree, including our immediate neighbors Illinois, Iowa, Minnesota and Michigan. Some Board members feel that, while the value of a professional degree through an accredited program should be emphasized, an alternative route to licensure should be maintained.

A second issue related to licensure is whether continuing education should be required to maintain one's license. Currently, 18 Learning Unit (LU) hours annually are required for continuing AIA membership. Again, many states are adopting this requirement for licensure. Our objective may be that the State of Wisconsin adopt AIA/CES requirements should it make continuing education mandatory.

Both of these aspects of licensure are subject to national pressures, reflect education values at their core, and ultimately a question of state policy. They are both issues for which members have differing, strongly held

positions. If there is a consensus on the Board at this time, it is that AIA Wisconsin should play a proactive role in shaping these policies, which have so much impact on our practice.

A related issue, which we have dealt with in the past and which continues to be an issue at the national level, is the registration of interior designers. AIA Wisconsin worked with a coalition of interior designer organizations in 1996 regarding the adoption of *title* registration by the State of Wisconsin. The legislation was consistent with a national accord in 1989. Last year, the interior designers decided to no longer honor this accord. Several states are under pressure to adopt *practice* acts. National AIA has adopted a two-pronged approach, incorporating education and advocacy and, at the same time, recognizing that many architectural firms employ interior designers, to create a center within the AIA to deliver information on design and construction issues. At the local level, title registration remains in place and AIA Wisconsin is working with interior designers to coordinate state Convention programs and other activities.

Project delivery is another issue impacting how we practice and an issue that the AIA Wisconsin Board has dealt with for several years. Certain local governments are seeking the authority to use design/build as a project delivery method. We have established a Design/Build Task Force to develop policy through the legislative process advocating a two-phase selection process based on qualifications with architects in a lead role. Again, it is important to be at the table to assist in shaping these policies that determine the environment in which we all practice.

Member Services

Perhaps nothing has altered the conditions of practice more in the last ten or fifteen years than the computer and the Internet. Almost all of us now design, document and communicate electronically. Both AIA national and AIA Wisconsin are online. The national television campaign closed with an invitation to visit

aiaonline.com. Anyone can access that site and in turn be linked to many AIA Wisconsin firms.

AIA Wisconsin Web site, aiaw.org, has been online since last spring, thanks to the efforts of the Electronic Media and Technology Committee. We have a web page calendar at this site and "Hotline" can be found here as well. In addition, a list of AIA contract documents available through AIA Wisconsin is listed on the site as well. The AIA Wisconsin office can be contacted via e-mail at aiaw@aiaw.org. Please contact me at bshiple@mailbag.com.

Local Chapter officers and the State Board continue to search for ways to enhance programs and services to members. Some Chapters have been particularly effective in offering a variety of office practice forums and other meetings that provide LUs to members as well as interesting insightful programs and the opportunity for fellowship. The Board is encouraging Chapters to provide programs that each year meet the AIA/CES requirement of 18 Learning Unit hours (including 8 HSW hours). Both our Fall Workshop and Convention provide additional opportunities to meet the majority of AIA/CES requirements. This year's Convention, appropriately themed *Inspire*, features Cesar Pelli, FAIA, and David Miller, FAIA. It should not be missed.

In addition to serving members better, the Chapters and Board are searching for ways to broaden our membership base. We hope to encourage UWM student participation as well as Associate and Professional Affiliate membership in all Chapters.

Public Awareness

Enhancing public awareness and recognizing the contribution of members to their communities has been a long-time AIA Wisconsin objective. This year, we are committed to re-establishing an active Public Awareness Committee, chaired by Tom Hirsch, AIA. We would like to broaden Chapter participation by developing a public awareness kit to assist Chapters in media relations. We also are enlisting the help of the EMT

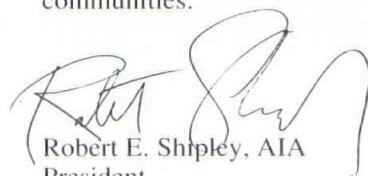

Committee to develop an electronic community service database and speakers' bureau.

The Working Homeless Shelter is an on-going program that has received considerable support and involvement from members. The focus has been on providing shelter for working homeless families in the Madison area. Chaired by Jim Gersich, AIA, the goal is to replicate this important program in other communities and Chapters throughout the state.

Commitment

Our success in shaping public policy, developing programs to serve our members and making an impact in our communities is dependant upon the commitment and engagement of our members. In a volunteer organization, it does not get done unless someone—you and I—step forward to do it. We're fortunate as an organization to be served so effectively and with such good-natured dedication as we are by our staff. However, the quality of our Conventions, Fall Workshops and Web site and the reality of a Working Homeless Shelter are all dependant on our commitment of time, energy, imagination, vision and, occasionally, dollars.

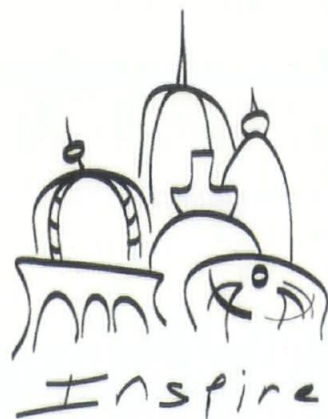

I have outlined in this message some of the issues that will challenge the Board and Chapters in the coming year. As a member of AIA Wisconsin, please send your own message, by voice, mail, e-mail or, better yet, in person, on how we can better practice our profession and strengthen our communities.

Concrete - HOW *ideas* GET built.

The Wisconsin Ready Mixed Concrete Association

9415 W. Forest Home Avenue • Hales Corners, WI 53130

(800) 242-6298

Legendary sports facilities like Green Bay's Lambeau Field, or Boston's Fenway Park are renowned for the way they bring fans into the action. "It's like having an extra player on the field," say cliché riddled sports casters. But the impact fans have on the game is

powerful indeed, and as a result fan involvement has become a key goal of savvy stadium designers. Here in Wisconsin there is no greater example of how to maximize fan fanaticism than the University of Wisconsin's new basketball/hockey venue, the Kohl Center.

Says UW Athletic Director Pat Richter, "The project, an on-campus multi-purpose facility, had been talked about for a long time. When I arrived in 1990 we were \$2 million in debt. We didn't think it would be possible to build a facility until after 2000. But we began to have success in football, and the Foundation started to get more donors. On April 1, 1994, Senator Kohl presented \$25 million for a 'basketball first' facility."

Kohl Center

by Howard Hinterthuer

David Kahler Principal-In-Charge of Venture Architects describes programming for the Kohl Center as the "hunting stage." He says, "I traveled with Senator Kohl and Pat Richter to St. Louis, Anaheim, and Phoenix. I also went with Richter to see the Venue at Michigan State. Basketball was the first priority. We wanted to find out what was the ideal seating capacity in a collegiate setting. Ab Nicholas (another key contributor - ed.) wanted to know what the cross section would be like because he loved the old gym; the close connection between the players and the floor. I had made a promise to Ab that we would put in a balcony that would bring people close to the floor. Even though people said we couldn't do that, I felt that it was possible. Ab then agreed to provide the gift (\$10 million). We delivered what we promised."

According to Lou Stippich, Architectural Project Manager, Venture Architects, "Prior to Senator Kohl's donation, we did a design study and site evaluation for the University. They had four sites they wanted to evaluate. After we did the study, the University received the donations from Senator Kohl, Ab and Nancy Nicholas, and the Kellner Family."

In December of 1995, based on the preliminary site investigation, a decision was made to relocate the building to avoid underground Madison Gas and Electric power lines running through the site. Says Stippich, "The initial study created a building that was fairly typical of H.O.K. The study called for a 'basketball first' facility. They would compromise all the other functions to basketball. It led to some different elements than were common. We were looking at 16,000 to 18,000 seats for basketball, and 12,000 for hockey. We developed a cantilevered upper deck structure which would allow us to bring the upper deck seats fifty feet closer to the floor. Also, by pulling the upper deck inward, we reduced the spans above and the overall footprint. This allowed us to avoid the existing underground power lines."

George Heinlein, Project Designer, H.O.K. strategized not only about how to create a facility with the intimacy of the old field house, but also how to incorporate the various revenue generating elements like sky boxes. "While we were the design architect responsible for design of seating bowl, concourse, and the overall design, Venture was the architect of record, and it really

helped that they were involved from the very beginning."

"I think the teamwork of everybody involved was critical," says William Heberlein, Project Manager, State of Wisconsin, Department of Administration, Division of Facilities Development. "Everyone pulled together to get the project done on a fast track basis. When we started construction we didn't have the building fully designed. The University wanted it to open by Jan. 1, 1998. Also, the program was expanded during design and construction. Initially, we planned to add hockey at a later date and start off with only twenty-four suites. However additional fundraising allowed us to put in hockey right away, upgrade the finishes, and go to thirty-six suites. We managed to pull it off within the time frame, and we were able to enhance the scope, making it even better."

Says Stippich, "We added epoxy terrazzo flooring and limestone wall finishes. The general appearance is closer to a hotel lobby space than a typical athletic arena. We also included the Chihuly art work across from the entry. It's a 1,200 piece glass sculpture called 'The Mendota Wall' - a series of clusters across 140 lineal

feet of wall. - a 'Celebration' was the program. I think Chihuly grasped the idea of celebration very well."

As to hockey, Richter explains that the University elected to adopt an ice size the same as the Dane County Coliseum and the Madison Arena, 97ft. x 200ft., which is 3 ft. narrower than the Olympic standard. "That way we would be practicing and playing on the same size surface," he says.

According to Stippich, "Because of the contacts at H.O.K. we were able to work with a European firm to develop a variable riser seating system at the end zones. It was the first installation of its type in the U.S. Now it's being installed in two more U.S. athletic facilities."

Says Heinlein, "The seating allows us to re-configure between basketball and hockey while maximizing the sightlines for each. In a typical scenario, a facility is designed for hockey, then a basketball court is inserted in the middle of that huge space. Basketball was the priority at the Kohl Center which is opposite of the typical situation. With this system we can make the end zone seating even steeper for hockey. Currently, we're doing the new arena in Miami for the Miami Heat, and we've taken a lot of those Kohl Center features and expanded on them—for example in the area of handicapped seating. Like the Kohl Center, the Heat was very interested in an intimate building."

In all, the Kohl Center had twelve separate bid packages. However, getting quickly out of the blocks required aggressive decision making. Construction began as design development was wrapping up. Stippich says, "By making decisions with Boldt in a step fashion, we were able to proceed with the structural analysis and get things moving. One assumption was corner stairs. It was a custom part of the building with special formwork at the landings. The landings had to be designed to accommodate steel pan stairs that were not designed until much later."

As a strategy to save time and money by facilitating winter construction, the

design/construction team elected to use precast plank in the concourse, a first for an arena of this type. The beams and columns are cast-in-place, while the flat connections are precast plank. Seating areas are different types of precast. In all, there were three separate precast fabricators, a process requiring a lot of coordination.

Structural system innovation allowed construction crews to keep working in spite of winter weather conditions, delivering the project on time. According to John Rodell, Oscar J. Boldt Manager of Madison Operations, "We were able to keep a steady construction force going throughout the twenty months of construction."

Additional structural challenges included cantilevering the second balcony and keeping the ground level concourse areas as unobstructed as possible. Upper level columns support the roof and balconies. Then at the top of the concourse the load is transferred outward so that there are no columns for the crowds to maneuver around. Beneath the concourse, columns are arrayed the same way as they are above. The design team was able to keep the seating area column-free.

According to Stippich, "Because of the momentum created by the design/construction process, the University's funding program kept rolling. The University was able to raise an additional \$4 million to \$5 million during the twenty months of construction."

Doors opened on Jan. 17, 1998, taking only two years for design and construction. Says Richter, "I am absolutely pleased! I see this as one of the best, if not the best, college facilities in the Country. Certainly it's great for our recruiting program. We see it as a statewide asset. It really does have multipurpose functionality, making us financially better off because it provides more flexibility in terms of concerts and other types of events."

Senator Kohl Discusses the Kohl Center

Wisconsin Architect had the privilege of speaking with U.S. Senator Herb Kohl about the Kohl Center.

WISCONSIN ARCHITECT: What were the factors driving your decision to fund a major UW campus building?

SENATOR KOHL: "I'm a graduate of the University of Wisconsin, and I feel that the University of Wisconsin represents the entire State. I have two brothers and a sister, and we all went to public schools. Many things came together that made it seem like the right thing to do."

WISCONSIN ARCHITECT: What are the roots of your love for and involvement in athletics?

SENATOR KOHL: "I've always liked sports—since I was a kid. I played all the major sports as a child; baseball, football, basketball, golf. That interest carried over into my adulthood. It has always been a big part of my life."

WISCONSIN ARCHITECT: Were you actively involved in the Kohl Center design process?

SENATOR KOHL: "I toured existing facilities with the architects, plus David Ward and Pat Richter from the University. We spent several days visiting highly regarded sports venues—to see what we liked. I was also involved in the selection of the architectural team."

WISCONSIN ARCHITECT: Were you pleased with the design/construction process and are you happy with the facility?

SENATOR KOHL: "The whole team did a great job. It's a beautiful facility. We all wanted it to be something that was special and unique, and it is."

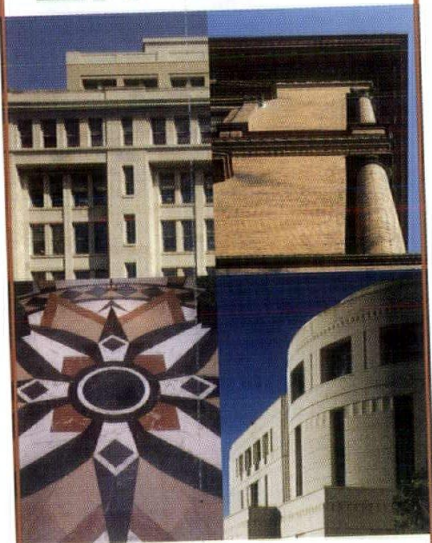

WISCONSIN ARCHITECT: What impact will the Kohl Center have on the life of the campus, the Madison community, and the State of Wisconsin?

SENATOR KOHL: "I think it's a very appropriate facility for the campus. It suits the life of the University. They are able to use it for a variety of different types of activities."

"I hope that people will enjoy it for a long time. As I travel around the State, I hear from people who say they like it, so in that way it has lived up to my hopes when I decided to help fund it. I'm also fairly certain that the facility helps recruit athletes to both the women's and men's programs; in both basketball and hockey. I believe the Kohl Center has the largest seating capacity for college hockey in the U.S. That certainly helps to draw good players."

Durability, Strength and Simplicity

WE BUILD FOR LIFE

IN-OFFICE LUNCH
BOX SEMINARS

pconway@imiweb.org

Did you know that brick is the oldest man-made building material, invented almost 10,000 years ago? Its durability, strength and simplicity led to broad application and gave it a dominant place in history alongside classic building materials such as stone.

Today, as we push ourselves (and get pushed) to design "lighter, faster, stronger, cheaper," it is our challenge to select those building products and systems that will stand for future generations. As design professionals, we owe it to our clients and ourselves to assemble the built environment with building systems that embody principles of durability, strength and simplicity to serve our communities well throughout this new millennium.

Essentially, masonry has not changed in the past century. However, the use of masonry, masonry accessories and masonry wall systems has changed dramatically! For example, masonry walls were at one time primarily constructed as barrier walls for strength and weather tightness. The Monadnock Building, 1891, home of IMI's Great Lakes Regional Offices in downtown Chicago, is the last great masonry building in the ancient tradition. Due to inexpensive material and labor costs of that time, ground floor brick walls are 72" thick – no block. Today, typical exterior masonry cavity walls are asked to be 14" thin or thinner!

Evolution of value-engineered masonry walls can be traced back to the Industrial Revolution when masonry use declined in favor of iron, concrete, steel and glass. The 1920s witnessed a mason revival due to poor economic times and unavailability of structural steel and concrete. After World War II buildings boomed and masonry met the demands.

It was not until the 1950s that recommended practices for masonry use were established. In 1966, the United States adopted the first "engineered masonry" building codes. Here in Wisconsin, the 1970s offered designers yet another level of leading-edge masonry codes. In 1994, the Division of Facilities Development, Wisconsin Department of Administration, published the most comprehensive masonry requirements and guidelines in the country for our major state building projects.

In the near future, Wisconsin will adopt the International Building Code (IBC) and Wisconsin designers will be referenced to the 1999 Masonry Standards Joint Committee (MSJC) masonry building codes and specifications. For good reason, we will retain "Wisconsinisms" to the code.

Whether you are currently specifying a major State project, a private office building or a public school for our children, masonry is still the durable, strong, and simple choice. How will the built environment we toil to create be recorded 100 years from now?

EDITOR: The author is the International Masonry Institute Wisconsin Area Director. Pat can be reached at: pconway@imiweb.org or (800) 464-0988. This article is first of a six-part masonry series devoted to the use of masonry systems to address masonry topics such as: flashing, movement joints, accessories, codes and standards, wall types, tolerances, workmanship and construction inspection.

IMI is a nonprofit trade organization representing all trowel trades: brick, block, stone, tile, marble, terrazzo, cement finishing and restoration. IMI is funded by the International Union of Bricklayers and Allied Craftworkers and the Contractors who employ them.

Your Wisconsin Concrete Masonry Association *in Action!*

A MESSAGE FROM YOUR PRESIDENT

On behalf of the Wisconsin Concrete Masonry Association, I would like to extend "*Seasons Greetings*" to everyone associated with A.I.A./Wisconsin. We value your interest in the products and services our membership offers and thank you for your continued support. Also, we

appreciate being a part of your annual Convention through our "*Excellence In Masonry*" program and look forward to its continuance in year 2000 and beyond.

At our Summer Meeting, we were fortunate to have Mark Hogan, NCMA Executive Director, in attendance. Mark covered several topics with our membership including Code Changes for concrete block. With very little difference between Type 1 and Type 2 block, he suggested changing the standard to one block. Mark also discussed Government Relations, NCMA member benefits and the national organization's long range plan.

It was interesting that a top priority of NCMA'S plan was work force development. Several of our programs in Wisconsin have that same objective. Opportunities continue to exist for young people in our industry. The Labor Day issue of *The Milwaukee Journal/Sentinel* featured a front page article on opportunities for young people in masonry.

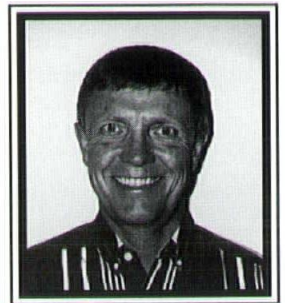

Last July, in Kansas City, Missouri, winners for the 1999 V.I.C.A. National Skills Conference were announced. Approximately 3,800 vocational students participated in the hands-on competition in different trade, technical and leadership endeavors. In the Masonry competition, **First Place** in the Post-Secondary Division went to **Mike Quinn of Cameron, Wis.** Mike was a Masonry program student at Indianhead Technical School, Rice Lake, directed by Todd Larson. *Congratulations, Mike!*

An update: Material Tests are being conducted on our concrete block and results will be published and available early next year.

In conclusion, may I remind everyone of WCMA'S Annual Convention will be held at The American Club in Kohler, February 13 - 15. Please mark your calendars and plan to actively participate. I'll see you there!

Have a great Year 2000!

Mark Tummett, President
Wisconsin Concrete Masonry Association

Don't forget!

Please join us for a complimentary breakfast at the
2000 AIA-WISCONSIN Convention to celebrate

WCMA'S 12TH ANNUAL "EXCELLENCE IN MASONRY"

DESIGN COMPETITION AWARDS BREAKFAST

Thursday, April 13, 2000 8:00 A.M. to 9:20 A.M. Monona Terrace

AIA Wisconsin

Commissions & Committees

The AIA Wisconsin Board of Directors has established numerous committees of volunteer members to assist in the development of a broad range of programs and services for the benefit of the entire membership and profession. The wide array of AIA Wisconsin committees reflects the varied interests and concerns of the membership.

Your involvement and participation on AIA Wisconsin committees is strongly encouraged. You will benefit from the opportunity to network with other architects from across the state with similar interests. AIA Wisconsin and your fellow members will benefit from the knowledge, skills and expertise you can provide these committees as they shape AIA Wisconsin programs and services.

There are also ample opportunities to get involved with local Chapter committees, task forces and special events. Your participation at the Chapter level can make a big difference. For more information, please contact local Chapter officers in your area.

At the state level, each AIA Wisconsin committee is assigned to one of five commissions: Executive & Administrative, State Programs, Education & Practice, Government Affairs and Component Affairs. Each of these has a "Director Advisor" who is a Director-At-Large on the AIA Wisconsin Board of Directors and who reports on committee activities at regularly scheduled AIA Wisconsin Board meetings.

The following is an outline of the five AIA Wisconsin commissions and their related committees. It contains the mission statement for each committee along with the name and phone number of the committee chairperson. If the work of a particular committee sounds interesting to you, please contact the chairperson for further details on how you can get

involved. If you can't find the committee you're looking for, contact one of the director advisors about establishing a new AIA Wisconsin committee.

Executive & Administrative Commission

Director Advisor: Walter Wilson, AIA, (414) 771-6222

Executive Committee

To exercise general supervision over the affairs of AIA Wisconsin; to assure that all administrative, financial and other matters assigned to officers by the Bylaws and/or delegated to the Executive Committee by the Board of Directors are carried out in an efficient and effective manner; to safeguard and maintain office and other property; to regularly evaluate the job performance of the executive director and other staff; and to serve as the Board of Directors of Wisconsin Architect magazine.

Chairperson: Bob Shipley, AIA, (608) 238-7626

Editorial Advisory Board

To provide regular advice and counsel to magazine staff and to develop recommendations for the Board of Directors to assist Wisconsin Architect magazine in achieving its established purposes of featuring the work of member architects in a creative format, providing practical informative articles of educational interest, keeping members informed of current activities and programs, and presenting a forum for material suppliers to advertise their products and services.

Chairperson: Mark Kruser, AIA, (608) 833-2321

Wisconsin Architects Foundation

To promote the science and art of planning by advancing the standards of architectural education, training and practice; to provide scholarships to Wisconsin students pursuing degrees in architecture; to provide program grants to student chapters at universities and technical colleges in

Wisconsin; and to support programs and activities that increase the public's awareness and appreciation of architecture and architects.
Chairperson: Gil Snyder, AIA (414) 229-3817

AIA Regional Directors

To represent North Central Region on the national AIA Board of Directors and to communicate with the leadership of components in the region.
Directors: Ed Kodet, Jr., FAIA, (612) 377-2737; Ward Whitwam, AIA, (605) 334-2422

State Programs Commission

Director Advisor: Mark Kruser, AIA, (608) 833-2321

Convention Committee

To work with Board of Directors, staff and other committees to plan, promote, coordinate and conduct an annual statewide conference on design, practice and technology issues that is attractive to members, allied professionals and material suppliers and that achieves or exceeds financial goals established by budget.
Chairperson: Mark Kosobucki, AIA, (262) 521-2125

Design Awards Committee

To convene an annual design awards jury for selection of the work of member architects that merits recognition for design excellence; to assist in disseminating the results of this selection to members and public through Wisconsin Architect magazine, the annual Convention and media thereby fostering public awareness of the work of member architects; to sponsor Honor Awards speaker and banquet; and to encourage dialogue by the public and among members of the purpose and direction of architectural design in Wisconsin.
Chairpersons: Katherine Schnuck, AIA, (414) 272-2000; Jim Rasche, AIA, (414) 272-2000

Fall Workshop Committee

To work with Board of Directors and staff to plan, promote and conduct an annual one-day workshop on practice issues of interest to members.
Chairperson:

QBS Committee

To create, maintain and improve a resource readily available to public owners and members for the objective, informed, responsive and professionally responsible promotion of Qualification Based Selection (QBS) procedures; to monitor QBS program and advise the Board of Directors as to its operations; to establish objectives, recommend policies, approve presentation materials, promote owner and member participation, coordinate with related professional organizations and evaluate program performance.
Chairperson: Mike Gordon, AIA, (608) 274-2741

Fellowship Committee

To identify and recommend to the Board of Directors candidates for nomination for advancement to the AIA College of Fellows; to encourage members to seek advancement and assist candidates in the preparation of nomination materials.
Chairpersons: Jim Miller, FAIA, (608) 836-7732; Gary Zimmerman, FAIA, (414) 476-9500

Golden Award Committee

To screen and rank Golden Award nominations for submission of recommendation to Board of Directors.
Chairperson: Frank Dropsho, AIA, (608) 238-3426

Firm Award Committee

The Firm Award Committee was established by the AIA Wisconsin Board of Directors in October 1996 to develop recommendations for the Architecture Firm Award program. It includes a representative from each of the four local AIA Chapters in Wisconsin. The committee is responsible for coordinating the awards program and for assisting in the selection of the jury.
Chairperson: Mary Lawson, AIA, (608) 274-2741

Education & Practice Commission

Director Advisor: John Peine, AIA, (414) 476-3377

Continuing Education Committee

To research and make recommendations to Board of Directors and Chapters regarding continuing education programs and policies to meet members' needs and expectations.
Chairperson: E. Mitchell Spencer, AIA, (715) 232-1176

Electronic & Technology Media Committee

To identify and evaluate present and future technologies and electronic media and how they relate to architecture; to educate the profession through reports, articles and seminars as to what technologies are available, the pros and cons of each and what the future holds; to proactively interact with and influence the suppliers and creators of these technologies and electronic media to address the concerns of the profession; and to serve as a conduit for sharing information between the profession and the creators of these technologies.
Chairperson: Steve Groth, AIA, (414) 271-8899

Intern Development Program

To continue to educate interns and practitioners about the Intern Development Program (IDP) and its requirement to become a registered architect in Wisconsin.
Chairpersons: Russ LaFrombois, AIA, (414) 207-7000

Historic Resources Committee

To encourage the preservation of Wisconsin historic resources; to promote within the architecture profession and the general public a greater awareness, appreciation and respect for those historic resources; to provide leadership, programs and technical support within the profession on preservation-related issues, serving as a source of information and education.
Chairperson: Ron Siggelkow, (608) 662-1364

Diversity Committee

To establish liaison with regional and national AIA committees, provide networking opportunities and develop programs of value for minority and women architects, interns and allied professionals in Wisconsin.

Chairpersons: Walter Wilson, AIA, (414) 771-6222

AIA Documents Committee

To assist the AIA Documents Committee by encouraging and compiling recommendations from Wisconsin members on possible revisions to AIA documents.

Chairperson: Steve Steen, AIA, (414) 272-2000

Dean's Advisory Group

To establish a more formal link and format for increased dialogue between the UWM School of Architecture & Urban Planning and the profession by providing for discussion with the Dean on School-related issues and programs in conjunction with regularly scheduled meetings of the AIA Wisconsin Board of Directors.

Chairperson: Bob Greenstreet, Dean, (414) 229-4016

AIA/AGC Liaison Committee

To improve working relations between AIA Wisconsin and AGC and to enhance understanding of contract documents; to develop recommended practices for use by architects and contractors.

Chairperson: Gerald Schwoch, AIA, (608) 276-9200

Government Affairs Commission

Director Advisor: Tim Wiberg, AIA, (414) 774-0895

Legislative Committee

To identify public policy issues of importance to Wisconsin's design and construction industry; to develop positions and make recommendations on legislative issues of interest and concern to the architectural profession; to lobby appropriate legislative committees and administrative agencies; to encourage the active grassroots participation of members in the legislative process; and to communicate with other professions that have similar legislative concerns.

Chairperson: Fred Zimmermann, AIA, (608) 238-7626

DFD Liaison Committee

To establish a continuing dialogue with the state Division of Facilities Development and to establish a format for discussion and resolution of problems and issues of mutual concern.

Chairperson: Richard Eschner, AIA, (414) 272-2000

Safety & Buildings Liaison Committee

To establish a format for ongoing discussion and resolution of Building Code, plan review and related issues of concern to the profession and the Safety & Buildings Division of DILHR.

Chairperson: Warren Bauer, AIA, (608) 274-2741

Component Affairs Commission

Director Advisor: Paul Grzeszczak, AIA, (608) 238-2661

Membership Committee

To develop and implement programs and materials for expanding membership and for increasing membership retention and participation; to profile and analyze membership attitudes and needs for use in planning member recruitment programs, developing methods to encourage increased member participation and recommending new programs and services to respond to member needs.

Chairperson:

Public Awareness Committee

To encourage architects to work together to develop and maintain a clear understanding of the present and future roles architects play in society so to effectively position the profession to be of greatest service; to develop materials and programs to expand the public's awareness of architecture and architects as well as architect's awareness of the public's needs and expectations.

Chairperson: Tom Hirsch, AIA, (608) 233-7797

Associates Network

To increase communication and interaction among Associate AIA members, other interns, Architect members, architecture students and faculty and to encourage increased participation in AIA programs by Associate members and interns.

Chairperson: Bill Danuser, Assoc. AIA, (608) 238-0221

Architects in Schools

To encourage and assist architects in presenting programs on architecture in local schools by developing statewide network of AIA members and teachers interested in creating and promoting these opportunities.

Chairperson: Horst Lobe, AIA, (608) 833-4641

AIA Wisconsin Membership Directory

AIA Wisconsin is the statewide component of The American Institute of Architects. With 1,300 members, AIA Wisconsin represents Wisconsin architects and allied professionals in private practice, corporations, industry, government and education.

AIA Wisconsin is composed of four local Chapters: Southeast, Southwest, Northeast and Northwest. Each AIA Wisconsin member also is a member of one of these local Chapters.

The objectives of AIA Wisconsin and its members are:

- To advance the science and art of planning and building by advancing the standards of architectural education, training and practice.
- To coordinate the building industry and the profession of architecture.
- To promote the aesthetic, scientific and practical efficiency of the profession.
- To insure the advancement of the living standards of people through their improved environment.
- To make the profession of architecture of ever-increasing service to society.
- To cooperate with and promote the objectives of The American Institute of Architects within the state of Wisconsin.

The accompanying *1999 AIA Wisconsin Membership Directory* is divided into four sections corresponding to AIA Wisconsin membership categories:

AIA Members: Registered architects who are Architect members of The American Institute of Architects (AIA). Within this membership category, Emeritus members are designated by AIA-E and Fellows of The American Institute of Architects by FAIA.

Associate Members: Associate AIA members include individuals without architectural registration from a U.S. licensing authority who either are eligible by education and experience and actively working towards licensure as an architect, employed under the supervision of an architect, have a professional degree in architecture, are university faculty involved in architectural research or teaching, or have an architectural license from outside the U.S.

Professional Affiliate Members: Individuals who are not architects but who may be registered to practice their professions where such requirements exist. The category includes professional engineers, landscape architects, interior designers and other professionals whose work is related to architecture.

Student Affiliate Members: Undergraduate and graduate students attending architectural schools and technical colleges in Wisconsin.

The *AIA Wisconsin Membership Directory* includes the following information for each member: name, firm name, mailing address, daytime telephone number and local Chapter. The *Directory* is updated annually as part of a survey of all members conducted each fall.

If you have any questions, comments or suggestions regarding this *Membership Directory*, please contact: AIA Wisconsin, 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477/1-800-ARCHITECT.

WELCOME TO THE MOST REWARDING CONFERENCE OF THE YEAR!

THE GREENING OF THE BUILT ENVIRONMENT III: "IT'S HERE, IT'S NOW AND HERE'S HOW!"

FRIDAY, APRIL 7, 2000

MOUNT MARY COLLEGE,
2900 N. MENOMONEE RIVER PARKWAY
MILWAUKEE, WISCONSIN

Conference Partners:

Also sponsored
by:

AIA Wisconsin

& the
DAYLIGHTING
collaborative

Mark your calendars for the third annual **WGBA** conference, "*The Greening of the Built Environment III: It's Here, It's Now and Here's How!*" to be held on Friday, April 7, 2000 at Mount Mary College in Milwaukee, WI.

The program features some of the most respected and internationally recognized advocates of sustainable design and business practices--those that meet our needs today without compromising the ability of future generations to meet their own needs. These innovative leaders have discovered that their companies can be more profitable by embracing environmental goals than by fighting them. This conference will provide examples of how you can create a market advantage AND at the same time make the world a healthier, more energy efficient, and better place to live. For more conference & **WGBA** information, check out our website at "www.wisgba.com"!

Join nationally known and internationally respected experts on sustainable design:

- ◆ John Norquist, Mayor of Milwaukee,
- ◆ Dr. Donald Aitken, Union of Concerned Scientists
- ◆ Dr. William Rees, "*The Global Integrity Project*"

Participate in hands-on, how-to technical breakout sessions focusing on:

- ◆ Green Building
- ◆ Eco-planning
- ◆ Finance & Marketing
- ◆ Lessons Learned

Product & Trade Expo--more than 40 vendors!

Network with like-minded people & share ideas throughout the day, while you get first hand, how-to information from local experts on sustainable design and building practices.

Here's what past conference attendees had to say:

"Wow, finally somebody gave me information I can use tomorrow back in my practice!"

"An amazing array of diverse people and information--I learned A LOT!"

"Well worth the registration fee--well organized, thoughtfully planned. Nice mix of national and local speakers."

\$125 for full-day conference, includes lunch and all conference materials.

AIA/HSW Learning Units available!

- ☐ Participating in the Trade Fair
- ☐ How To Register
- ☐ Conference Sponsorships
- ☐ Participating in a Technical Breakout

Join Us!

The **Wisconsin Green Building Alliance's (WGBA)** mission is to facilitate and promote the development and use of ecologically sustainable materials and practices within Wisconsin's built environment.

WGBA was founded in 1997 by design and construction professionals, who recognized the need to educate themselves and their colleagues about sustainability. A member-driven organization that provides access to the newest ideas in green building, **WGBA membership** enhances a profitable bottom line.

WGBA is the *leading* organization in Wisconsin for networking with green building experts in the design and construction industry, including architects, builders, contractors, developers, facility managers, interior designers, landscape architects, consultants, engineers, realtors, urban planners, educators and environmental organizations.

Wisconsin Green Building Alliance provides a variety of resources including: an annual green building conference, educational forums and site visits to green demonstration projects, a quarterly newsletter and an annual assessment survey to keep abreast of the needs of the industry.

You are cordially invited to join the **Wisconsin Green Building Alliance** at a level appropriate to your individual or organizational needs & interests. **WGBA** offers the following annual membership levels:

Individual (\$45): As an *Individual* member of **WGBA**, you will receive the **WGBA** newsletter, special mailings, invitations to peer networking and educational speaking events, in addition to our membership and resource directories.

Student (full time student at an accredited college or university) (\$25): As a *Student* member, your membership advantages are the same as an Individual member. It's a great way to build a network of professional peers while still in school.

Small Business (20 employees or less) and/or Non-Profit Organization (\$100): All of the benefits of *Individual* membership for three representatives of your organization, plus a business card advertisement in the resource directory.

Corporate (20 or more employees) or Governmental Agency (\$300): All of the benefits of *Small Business* membership for three representatives of your organization, plus discounted Website link and advertising.

Corporate Sustaining (\$750): All of the benefits of *Corporate* membership, plus a link on the **WGBA** website & a feature article in the quarterly newsletter. In addition, a discount to **WGBA** events.

Sponsor (\$1,500): All of the benefits of *Corporate Sustaining* membership plus recognition on Wisconsin Green Building Alliance letterhead and on all brochures and publications, and two free tickets to each policy conference.

Benefactor (\$5,000 and up): All of the benefits of *Sponsor* membership plus one conference co-sponsorship and five free tickets to the annual conference.

Green Champion (\$10,000 and up): All of the benefits of *Benefactor* membership plus free advertising on the **Wisconsin Green Building Alliance** website.

WGBA Programs & Events

Wisconsin Green Building Alliance membership *builds networks* through conferences, membership meetings, forums & roundtables.

WGBA membership provides opportunities for *information sharing* through our internet website, publications, and membership & resource directories.

Membership in **WGBA** offers access to *education* in green building tools, techniques and advantages.

WGBA sponsored roundtables and focus groups help *facilitate development of environmental leadership through peer discussion and support*.

AIA Contract Documents: Electronic Format - Version 2.0 Frequently Asked Questions

What is AIA Contract Documents: Electronic Format?

AIA Contract Documents: Electronic Format is a Windows only software program which provides licensed users with the ability to edit and produce AIA Contract Documents on their personal computer systems. The basis for the product is the software, which contains the AIA Documents and a host of other information to facilitate the production of construction documents. However, users are actually purchasing an annual copyright license to produce these documents on their computer with software provided by the AIA. This is a basic program. It will allow users to insert text where needed, mark text for deletion, save and print the documents. However, it is not intended to be a full fledged word processing program. With the release of *AIA Contract Documents: Electronic Format* Version 2.0 we have changed the way you interface, process, print, and manipulate the documents as well as the way the information is presented to you on the screen. The printed look of these documents has changed drastically too!

As a result of user requests, major improvements include:

- faster printing!
- elimination of dialog boxes when inserting text
- spell check with users allowed to add words to the dictionary
- TABS!!! (left, right, centered, and decimal settings allowed)
- WYSIWYG screen & print preview mode
- use of Windows File Manager to copy, move, and delete files
- formatting of user inserted text allowed (i.e., bold, italics, point size and TrueType font usage)
- Toolbar

However, to protect the integrity of the documents, the software will continue to maintain control over:

- page margins for the document
- format of original language text
- removing/deleting original language text from the document (only strike through is allowed)
- inserted text delineation (Some users expressed a preference for a different delineation for their inserted text than underlining. After consulting several users and members of the AIA Documents Committee it was decided to offer users the option of a shaded or gray scale background or underlining of all user inserted text.)

What do I need to use AIA Contract Documents: Electronic Format?

AIA Contract Documents: Electronic Format is designed to work with standard office computer equipment. The following hardware and software configurations are the minimum recommended:

- IBM-compatible 486 or faster personal computer
- 8 megabytes of RAM
- 10 megabytes of free hard drive space
- VGA monitor (800 x 800 display is recommended for some menu displays)
- Laser printer supported by a Windows printer driver
- Mouse
- Windows 3.x, Windows95/97 or WindowsNT version 4.0
- Lotus 1-2-3® version 2.3 for DOS (or higher) or Excel 4.0 for Windows™ (either one is needed for selected G-Series Documents)

Can I install it on more than one computer at a time?

The software is designed to be loaded on one hard drive at a time. It is a violation of copyright to load this program onto a hard drive and then use the disks on another computer. AIA members (at the National level) who already have one valid license at the full member price of \$ 325.00 can obtain copies 2+ at half-price or \$162.50 each plus shipping and handling. Non-members who already have 5 copies can obtain copies 6+ at \$325.00 each plus shipping and handling.

Where can I buy AIA Contract Documents: Electronic Format?

AIA Wisconsin can provide ordering information; call Mary at (608) 257-8477.

**7 out of 10
construction projects
are standing on
something stronger than
concrete or steel.**

They're standing on a concept called merit construction. This means merit and union craftspeople work side by side. They are chosen on merit, so those who offer the best skills, get the jobs. By being open to new ideas, like multi-skilled work teams, new technology and advanced construction techniques, merit

contractors are able to build high-quality buildings that are

highly cost efficient. Well over 70 percent of all construction today is merit and four out of five people in construction today are working the merit way. Call Associated Builders & Contractors, 800-236-2224, for a directory of merit contractors in Wisconsin.

MERIT CONTRACTORS. BUILDING A BETTER LIFE.

For more information, call 800-236-2224 or visit our web site: www.abcw.org.

Selecting and Working with an Architect

Whether you are building your own home or planning a commercial facility, selecting the right architect is important to a successful project. The architect is the one professional who has the education, training, experience and vision to guide you through the entire design and construction process, from helping you define what you want to build to helping you get the most for your construction dollar. Working with other design and construction professionals, architects can help you achieve a well-designed project that meets your needs and works within your budget and time frame.

Architects are trained to analyze your functional needs, long-term goals and budget. Using this analysis, the architect designs a building that helps meet your current and future needs. When designing a building, an architect seeks to balance several often conflicting elements, including function, aesthetics, economics and technology. And the architect must balance these elements within the context of building codes and zoning regulations.

Architects work with you to:

- *Help clarify and refine your building needs.* Through a process called programming, the architect examines your requirements, budget and building site and then works with you to define what is to be built and to establish the project's scope.
- *Help you look ahead.* Architects are planners who look beyond your immediate requirements to design flexible buildings that will adapt to your changing needs. For example, architects think about how to accommodate changing computer/communications technology.
- *Help manage the building project.* From conception to move-in, the architect is your project leader. As the central clearinghouse for ideas, schedules and every other facet of the project, the architect manages and coordinates the project elements.
- *Help maximize your construction dollar.* A building designed for maximum energy efficiency can cut your heating and fuel bills. The architect's efficient use of space may reduce the square footage you require. A well designed building not only can reduce initial costs, but also can increase its value.
- *Take a broad view.* Architects look at the impact the building will have on the people who use it, the surrounding area and the natural environment. The result is the creation of office spaces that make interaction between departments move more smoothly, retail areas that display your products in their best light and prompt customers to buy, and factory and administrative environments that stimulate employee productivity and satisfaction.

Wise Investment

Architects are trained to solve problems in creative ways, translating your needs into square feet and three dimensional space. With their broad knowledge of design and construction, architects can show you alternatives and options you might never think of on your own.

The architect's services are a wise investment because:

A well-designed project can be built more efficiently and economically. Architects plan your project with you. As your ideas evolve, changes can be made on paper much less expensively than later on when construction is underway. Thorough drawings also make it easier for the contractor to accurately price and build your project.

Energy efficient building design can save you money on fuel bills. An architect can design a building to maximize heating from the sun and let in natural light, thus reducing your heating, cooling and electric bills over time.

The architect can work with your budget and help you select the appropriate materials and workmanship at a fair price. Architects develop the drawings and specifications to help you get bids for construction that are based on your requirements.

An architect can help you choose materials and finishes that are durable as well as beautiful, saving on frequent maintenance and replacement costs. Their familiarity with the full range of materials enables them to suggest the appropriate materials for your project.

Good design sells. A well-designed house has a higher resale value. A well-designed store draws customers. A well-designed work environment attracts employees and increases productivity.

The architect can make your life easier. Building is a long process that is often disruptive, particularly if you are

living or working in the space under construction. The architect you hire looks out for your interests and tries to find ways to make that process go smoothly.

If your project requires engineering or other design services, the architect can coordinate this team of experts so you don't have to. The architect sorts out complex building codes and zoning laws. The architect can help you find qualified construction contractors based on your requirements. The architect visits the construction site to help verify that the project is being built according to plans and specifications.

Selection

Architecture firms come in a variety of sizes and types. Each firm brings a different combination of skills, expertise, interests and values to its projects. Some firms specialize in one or more project or facility types. Some firms include in-house engineering services (e.g. civil, structural, mechanical or electrical) or other design disciplines (e.g. planning, urban design, landscape architecture or interior design). Many other architects introduce these disciplines through appropriate consultants. The right kind of firm for your project will depend on the specific demands of your project and what you are looking for in an architect.

First-time clients, and even experienced clients facing new situations, often have many questions about architect selection. The following are some of the more common:

- *When should I bring the architect into the picture?* The best time to bring in an architect is as early as possible in the project. Long before plans and specifications are developed, there are many crucial decisions to be made. Architects can help you define the project in terms that provide meaningful guidance for design. Working with a preliminary evaluation of your needs, an architect can help you find a site that presents the best opportunity to construct the kind of building you envision. Other predesign services architects offer include economic feasibility studies, assistance in developing project budgets and schedules, and help in obtaining project financing.
- *Should I look at more than one firm?* Usually, yes. The exception, of course, arises when you already have a good relationship with an architect and it makes little sense to change.
- *How do I find potentially suitable firms to contact?* Start building a list of potential architects. Contact other owners who have developed similar facilities and ask who they interviewed and ultimately selected. Ask who designed buildings and projects that you've admired or that seem especially appropriate. Get recommendations from friends and relatives who have worked with architects. AIA Wisconsin publishes directories of AIA member architects and member-owned firms. AIA Wisconsin also assists public owners in establishing a complete Qualification Based Selection (QBS) process for their projects.
- *What information should I request?* Contact each firm on your list. Describe your project and ask if they are available to take it on. If they are, request literature outlining the firm's qualifications. If the architect is unable to handle your project, ask if s/he can suggest another firm. The materials you receive from interested firms might include a letter of interest, brochures, fact sheets, photos of past work and biographical material about key personnel. Look beyond the style of the brochure to determine which firms have the right experience and capabilities for your project. At this point, you should be able to narrow your list to the architects you will interview.
- *Why are formal interviews desirable?* An interview addresses one issue that can't be covered in brochures and printed materials: the "chemistry" between you and the architect. It also allows you to investigate how each architect will approach the project. Remember, you will be working with the architect for a long time and will want someone with whom you feel comfortable.
- *How many firms should I interview, and how should they be selected?* Most people advise that you interview between three and five firms, enough to see the range of possibilities, but not so many that an already tough decision will be further complicated. Treat each firm fairly, offering, for example, equal time and equal access to your site and existing facilities. Ask to meet the key people who will work on your project.
- *What can I realistically expect to learn from an interview? How can I structure the interview to make it as informative as possible?* During the interview, ask a lot of questions. You can learn how the team the architect has put together will approach your project. Ask how the architect will gather information, establish priorities and make decisions. Ask what the architect sees as the important issues or considerations in the project. Evaluate the firm's interest in your project. Evaluate the firm's style, personality and approach: are they compatible with yours? If, during the interview, there is something you do not understand, ask the architect for clarification.
- *How should I follow up?* Tell each firm what you intend to do next and when you plan to make your decision. If you haven't talked with past clients, do so now. Assess both the performance of the firm and the performance of the resulting architecture. You may want to visit existing buildings to see them in use. Notify the selected firm as soon as possible. Remember, conditions change; the firm may not be able to offer the same project team if you must take several weeks or months to decide.

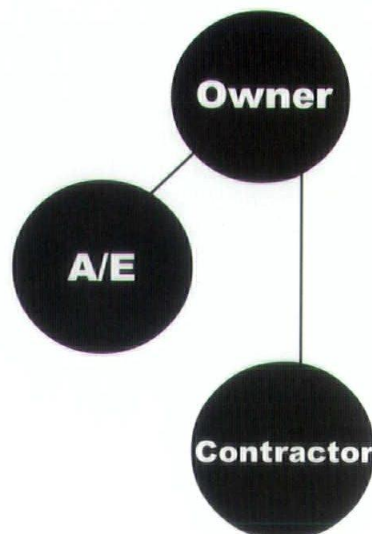

- *On what should I base my decision?* Personal confidence in the architect is paramount. Then seek an appropriate balance among these factors: technical competence, professional service, cost and design skills. Once you've selected the best firm, enter into detailed negotiations of services and compensation. If you cannot agree on contract terms, begin negotiating with your second choice.

However the architect selection process is approached, it is worth taking the time to do it well. Here's some additional guidance:

- *You are engaging the services of a professional.* You will work closely with the architect through the life of the project, and your relationship may extend to future projects. Invest at least the care it takes to select a financial or legal advisor.
- *Yours will also be a business relationship.* Find out how prospective architects do business, how they work with their clients, how responsive they are to your management and decision styles, and how well their work stacks up against their clients' expectations. The best way to find out is to talk with other owners for whom the firm has provided professional services.
- *Ask questions.* Respect the architect as a professional who will bring experience and specialized knowledge to your project. At the same time, don't be afraid to ask the same questions you've asked yourself:

What does the architect expect from the project? How much information does the architect need? How does the architect set priorities and make decisions? Who in the firm will work directly with the client? How will engineering or other design services be provided? How does the firm provide quality control during design? What is the firm's construction-cost experience?

- *Be frank.* Tell the architect what you know and what you expect. Ask for an explanation of anything you don't understand. The more on the table at the beginning, the better the chances for a successful project.
- *Get it in writing.* Once you have found the architect, you are ready to put in writing the terms of your agreement regarding the scope of work, services, schedule, construction budget and architect's compensation. This written agreement can take many forms. The American Institute of Architects has developed a variety of standard contract forms which are used industry-wide. The AIA Wisconsin office maintains a complete inventory of these AIA contract documents.

Project Delivery Methods

There are a variety of project delivery methods. The choice depends in large measure on the nature of the project and time and budget constraints. An architect can advise you on the method most appropriate to the needs of your project. The two most common project delivery approaches are separate contracts for design and construction (design/bid/build) and one contract for both design and construction (design/build).

With the traditional design/bid/build method, you hire the architect and contractor, signing separate contracts with each. The architect is usually hired first to prepare construction documents, which include drawings and specifications. When these documents are completed, they become the basis for soliciting contractor bids and negotiating and awarding a construction contract. During construction, the architect serves as your representative, administering the contract and helping check that the contractor's work is in accordance with the drawings and specifications.

This separate contracts system is the most widely used in the United States. The advantages of utilizing this type of approach are that it gives you greater control over and involvement in project decisions, provides a firm cost figure before construction begins, and provides a system of checks and balances which helps to ensure that your interests are looked after by a professional who has no financial stake in the outcome of the construction contract. A disadvantage of the design/bid/build approach is that it may require more of your time.

Under a design/build arrangement, you hire a single firm to both design

and construct the project. The architect does not work for you, but for the design/build firm. You may not deal directly with the architect but with a representative of the design/build firm.

An advantage of the design/build approach is that it provides you with a single point of project responsibility. Potential disadvantages of this project delivery method are that it allows you less control over the design process, gives the design/build firm the authority for decisions affecting its ability to remain within the budget and on time, and eliminates the traditional checks and balances of the design/bid/build approach.

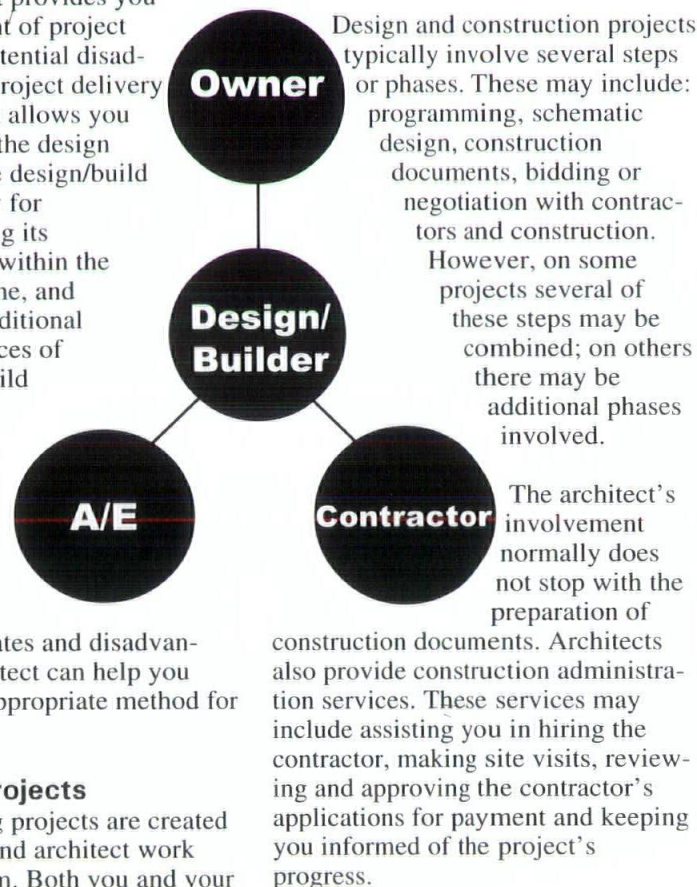

There are, of course, many variations to these project delivery methods, with different advantages and disadvantages. Your architect can help you select the most appropriate method for your project.

Successful Projects

The best building projects are created when the client and architect work together as a team. Both you and your architect can take specific steps to help meet your quality, time and budget goals.

Design and building are group activities. Many people and firms come together to do a project. They may not have worked together before; and they may not work together again. They collaborate to produce a unique

building on a specific site. As the project unfolds, hundreds of individual design decisions and commitments are made. Needs and conditions change; and work is modified. A strong and healthy relationship between owner and architect is essential to keep the project on track.

The path to a successful building project is paved with lots of challenges and uncertainty. There are literally hundreds of decisions to be made, decisions which have a strong impact on how the project looks and functions over time.

Designing a building is exciting and creative. Both the architect and building owner bring something to the relationship that the other needs. As the owner, you have a building goal and the financial resources to realize that goal. The architect brings extensive professional training and experience, creativity and project management skills.

Be open to new ideas. Be candid about how you want the end result to feel and look. It is important that you or someone from your company be very involved with the project, asking questions and providing information to the architect.

Experience tells us that successful projects — those that respond to owner needs and aspirations, that are accomplished within schedule and budget and that contribute to the quality of our communities and our lives — result from clients and architects who form solid professional and business relationships. These relationships are formed early on and are nourished by clear expectations and a willingness of both you and your architect to accept your responsibilities for achieving a successful project. **WA**

This brief introduction to selecting and working with an architect was adapted from three publications by The American Institute of Architects: A Beginner's Guide to Architectural Services, You and Your Architect, and Building Relationships. For directories of AIA Wisconsin members and further assistance, please contact: AIA Wisconsin, 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477 or 1-800-ARCHITECT.

AIA Wisconsin Firm Directory

Design and building are inherently exciting; and there is nothing more satisfying than a successful project. The secret to success lies in the professional relationship between building owner and architect. Whether you are building or remodeling your home or planning a commercial, industrial or public facility, selecting the right architect is important to achieving a successful project.

Members of AIA Wisconsin have been selected for major projects across the country and have received many important awards. AIA Wisconsin member architects have assisted thousands of clients with creative solutions to their building needs.

Investing in the professional services of an architect is a wise use of often very limited building resources. A well-conceived project can be built more efficiently and economically. An architect can design a building to maximize natural light, thus reducing heating, cooling and electric costs. Your architect can help you select materials and finishes that are durable as well as beautiful, saving on maintenance and replacement costs. Good design pays dividends . . . a well-designed store draws customers and a well-designed work environment attracts good employees and increases productivity.

If you need the professional services of a qualified architect, you will find a suitable firm in this *2000 AIA Wisconsin Firm Directory*. The firms listed will welcome the opportunity to discuss your project with you.

The *AIA Wisconsin Firm Directory* includes the following information on each firm: firm name, address, county and telephone and fax numbers; names of the principals or partners of the firm; number of registered architects and total employees; and a description of the firm's practice.

The information contained in the *Directory* was provided by the firms as part of an annual survey of AIA Wisconsin members. It is a roster of firms owned by AIA Wisconsin member architects. To be listed, at least one of the firm's principals or partners must be a registered architect and an AIA Wisconsin member.

You are encouraged to keep the *2000 AIA Wisconsin Firm Directory* handy for reference throughout the year. Contact the firms listed for further information about their practice and the professional services they can provide for your project. If you have any questions or suggestions regarding the *Directory*, please contact: AIA Wisconsin 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477/1-800-ARCHITECT.

Architecture Madison, LLP, is a design firm offering comprehensive architectural design services with the collaboration of two seasoned professionals in a truly integrated format. Our areas of expertise include custom home design and additions, distinctive restaurant renovation, medical and dental offices and adaptive reuse of historic properties. Architecture Madison, LLP, will provide project solutions that not only look good, but function well, are soundly put together, meet budget requirements, provide the proper environment for their occupants and fit well within their surroundings. Design standards will be stressed for each project, regardless of cost or scope. Good design will assure that our clients get the most out of their investment as well as improve our built environment.

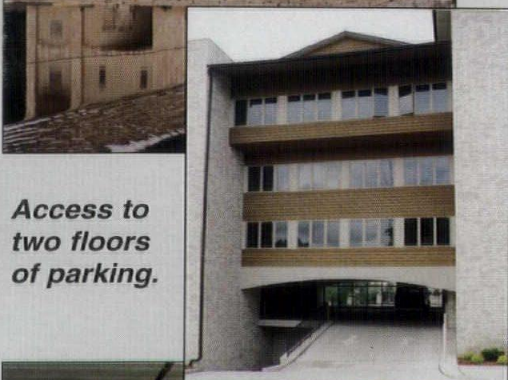

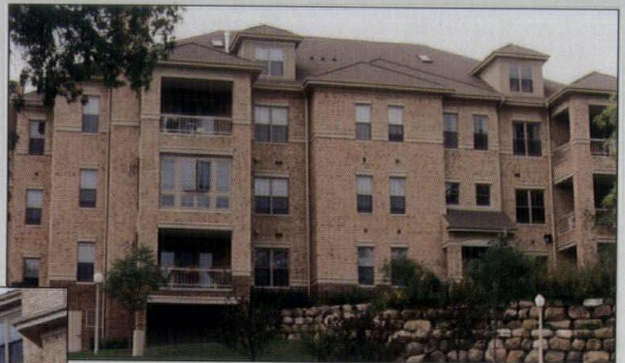

Basement parking makes **Condominiums More Saleable...**

with Flexicore/Flexicast Structural Systems

This Menomonee Falls condominium features two levels of inside parking.

(Excellent planning when land space is minimal).

Access to two floors of parking.

A view of basement parking - all-weather protection for vehicles, with plenty of room for entry/departure.

Customer benefits for you...

- Basement parking saves land space where high land values exist and where space is limited.
- Flexicore/Flexicast structural systems are more cost effective than other types of construction.
- State approved, fire resistive units.
- Basement parking provides security for residents and their vehicles. (Also protection from inclement weather for vehicles.)

Two door access to lower level parking in this project offers more indoor parking.

Flexicore/Flexicast structural systems offer you

- On-time delivery...guaranteed.
- Strength for building a solid floor with sound separation and vibration control.
- More "cost effective" than "poured in place" concrete. Flexicore construction does not require the labor intensive shoring, job cluttering of poured in place concrete.
- Mid-States offers factory controlled quality with Flexicore/Flexicast structural systems.
- Our experienced sales and design staff will assist you, your architect and builder get the most economical package possible.
- Early cost estimates are reliable and helpful in tying down financing.

Engineered solutions...for ceilings, floors & mezzanines.

MID-STATES CONCRETE PRODUCTS CO.

Box 58 Beloit, Wisconsin 53512-0058

PLANT/OFFICES - 500 South Park Avenue, South Beloit, Illinois 61080

Phone 1-800-236-1072 • Fax 1-815-389-2339

email: Midstate@Inwave.com

Basement parking makes

Apartments More Rentable

with Flexicore/Flexicast Structural Systems

Here are the benefits...

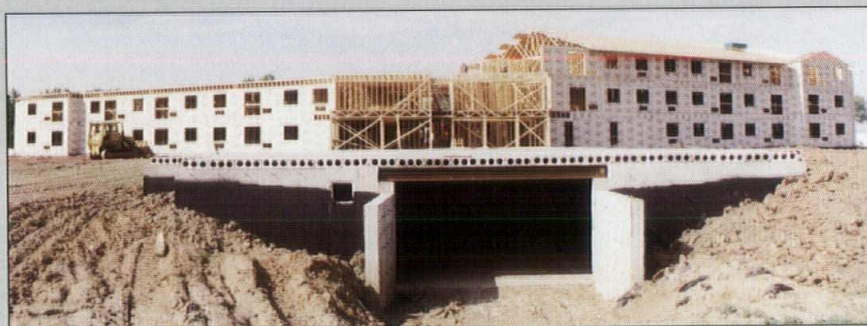

- Basement parking saves land space where high land values exist and where space is limited.
- Flexicore/Flexicast structural systems are more cost effective than other types of construction.
- Security for residents and their vehicles. (Also protection from inclement weather for vehicles.)
- Flexicore meets all state and local codes.
- Indoor parking allows for a nicer exterior building appearance.

Job quotations include delivery and erection by Mid-States personnel

Basement parking ranges in capacity from 8-60 vehicles depending on the building size.

Indoor parking is so popular with residents...they often ask for two spaces.

Flexicore/Flexicast structural systems offer you

- On-time delivery...guaranteed.
- Strength for building support, a solid floor with sound separation and vibration control.
- State approved, fire safe units.
- More "cost effective" than "poured in place" concrete. Flexicore construction does not require the labor intensive shoring, job cluttering of poured in place concrete.
- Mid-States offers factory controlled quality with Flexicore/Flexicast structural systems.
- Our experienced sales and design staff will assist you, your architect and builder get the most economical package possible.
- Early cost estimates are reliable and helpful in tying down financing.

For more information on all the Flexicore features, call or write -

Genesis Architecture provides a full range of architectural services for residential, religious and commercial building types and has received national recognition for its award-winning designs. With a special emphasis on Prairie and organic design, we design projects that have a close relationship to the

site, express the beauty of natural materials and achieve an inner harmony of parts that gives evidence of integrated, holistic design. The design of furniture, light fixtures and stained glass is often done to enhance the unity of the architecture with interior furnishings. 2D and 3D computer modeling is used along with hand rendered drawings to best convey design and construction information.

As a collaborative of architects and historians, Isthmus Architecture, Inc is committed to preserve the architectural and cultural landscape in a manner that respects original context and design intent. Our practice focuses primarily on rehabilitation, restoration and adaptive reuse projects for residential, commercial, institutional and government clients. Striving to secure the ongoing viability of the existing built environment as it functions in a modern world, we create design solutions that not only foster the preservation of older buildings, but also effectively address the client's intended use of the structure. Our solutions are predicated on an understanding of the technologies and methodologies that facilitate the restoration and rehabilitation of historic buildings and settings. We offer pre-design services including facility assessment, research and documentation, master planning, programming and historic structure reports. Design services include restoration, rehabilitation, renovation, adaptive reuse, additions, new construction and interior design.

Kloiber & Associates has been providing architectural and design services in Wisconsin and Michigan since 1977. Our experienced professionals offer CADD computer graphics and specification systems, provide feasibility studies, evaluations of existing buildings, ADA compliance surveys and implementation programs. Our smaller staff is focused on individual projects for a closer understanding of the owner's needs. We have developed award-winning designs for educational, religious, governmental, medical, nursing home and CBRF, industrial, sports, theatrical, commercial and residential facilities. We have gained widespread recognition for cost control and innovative planning systems. Additional services such as functional designs and feasible time schedules make Kloiber & Associates, Inc., a distinctly advantageous choice.

McCormack + Etten/Architects' philosophy is to serve clients by listening to their needs. Talent and creativity are combined with the knowledge and experience of the M+E staff to produce fresh, innovative design solutions appropriate to the client's program. The latest version of "Autocad" is utilized to efficiently generate a wide range of projects. McCormack + Etten/Architects' areas of expertise include high end custom residential and remodeling, light commercial and retail, schools and churches and public institutional projects. The firm's personal brand of service and attention to detail reflect our primary concept: that good design is the product of hard work, good taste and appropriateness to the client's needs.

Facilities and their grounds have a direct and significant impact on the success of an organization. How a facility is designed, constructed, operated and cared for can affect the health and well-being of the facility users, provide a visual public image and can affect the ability of an organization to survive. With over 25 years of experience to commercial, industrial, institutional and residential clients throughout Wisconsin, ONE Plus is ready to assist clients in addressing their facility needs and expectations. Services include: architecture, sustainable design, business continuity planning, facility risk management and assessments, forensic investigations and contract administration support. ONE Plus also maintains professional relationships with other consultants to expand our ability to address our client's facility and operational needs.

Southwest Design Associates, Inc. (SDAI), is a multi-faceted organization of professionals registered in four states which places an emphasis on personalized service and quality. Our major focus is in the housing field with multi-family and elderly apartment projects from 4 to 120 units as well as comprehensive experience in schools, offices, commercial, industrial, health care, religious and recreational facilities design. The firm also engages in facility evaluation, historic restoration and rehabilitation, adaptive reuse and reconstruction projects. The firm utilizes CADD drawings and will work with the owner to provide the project delivery options most suitable to their project.

Venture Architects was established in 1983 specifically for the design of criminal justice projects and large-scale athletic facilities. Our project portfolio consists of state prisons, pre-sentence county jails, court facilities, work release facilities as well as a major state master plan for existing and future correctional facilities. Our completed projects have been repeatedly recognized for their design excellence by the AIA Architecture for Justice Awards Program. We have also designed two major sports facilities. We offer services in all phases of design: long range planning, program development and needs analysis, master/site planning, architectural/interior design, security design, code analysis and ADA review.

At Vetter Denk Architects, every project is a unique vision. We create buildings that enhance the user's lifestyle and complement the natural landscape. The particular attributes of the environmental, historical and contemporary context also enrich our creative process. Our work includes residential, commercial and urban design projects. Specialists in residential work; we have been building homes with the highest degree of design and material integrity since 1985. As general contractor for many of our projects, we are able to maintain design quality throughout the building process by employing skilled trades-people and artisans as part of our team. Vetter Denk Architects received an AIA Wisconsin Design Award for a residential project in both 1996 and 1998.

AIA Document List

The following is a list of the AIA Documents available from AIA Wisconsin, the state's only authorized full-service distributor of AIA Documents. AIA Wisconsin members benefit from 25% discount.

A Series/Owner-Contractor Documents

A101	Standard Form of Agreement Between Owner and Contractor — Stipulated Sum with instructions (1997)	4.50
A101/CMA	Standard Form of Agreement Between Owner and Contractor — Stipulated Sum — Construction Manager-Adviser Edition with instructions (1992)	3.50
A105/A205	Standard Form of Agreement Between Owner and Contractor for a Small Project and General Conditions of the Contract for Construction of a Small Project with instructions (1993) 2 document set	7.50
A107	Abbreviated Owner-Contractor Agreement Form for Construction Projects of Limited Scope — Stipulated Sum with instructions (1997)	5.00
A111	Standard Form of Agreement Between Owner and Contractor — Cost Plus a Fee with GMP with instructions (1997)	4.50
A121/CMc	Standard Form of Agreement Between Owner and Construction Manager Where the Construction Manager is also the Constructor with instructions (1991)	5.00
A131/CMc	Standard Form of Agreement Between Owner and Construction Manager Where the Construction Manager is Also the Constructor and Where the Basis of Payment is Cost of Work Plus a Fee and There is No Guarantee of Cost with instructions (1994)	5.00
A171	Standard Form of Agreement Between Owner and Contractor for Furniture, Furnishings and Equipment with instructions (1990)	3.50
A177	Abbreviated Owner-Contractor Agreement for Furniture, Furnishings and Equipment with instructions (1990)	3.50
A191	Standard Form of Agreement Between Owner and Design/Builder (1996)	5.00
A201	General Conditions of the Contract for Construction with instructions (1997)	9.00
A201/CMA	General Conditions of the Contract for Construction—Construction Manager-Adviser Edition with instructions (1992)	7.50
A201/SC	Federal Supplementary Conditions of the Contract for Construction (1999)	2.50
A271	General Conditions of the Contract for Furniture, Furnishings and Equipment with instructions (1990)	7.50
A305	Contractor's Qualification Statement (1986)	3.50
A310	Bid Bond (1970)	1.50
A311WI	WI Private Improvement/Performance Bond (1981)	1.50

A312	Performance Bond and Payment Bond (1984)	3.50
A312WI	Performance Bond & Payment Bond (WI Public)	1.50
A401	Standard Form of Agreement Between Contractor and Subcontractor with instructions (1997)	6.00
A491	Standard Form of Agreement Between Design/Builder and Contractor with instructions (1996)	5.00
A501	Recommended Guide for Bidding Procedures and Contract Awards (1995)	5.00
A511	Guide for Supplementary Conditions (for use with A201) (1987)	9.00
A511/CMA	Guide for Supplementary Conditions—Construction Manager-Adviser Edition (For use with A201/CMA) (1993)	9.00
A512	Additions to Guide for Supplementary Conditions (1989)	1.50
A521	Uniform Location Subject Matter (1995)	5.00
A571	Guide for Interiors Supplementary Conditions (for use with A271) (1991)	9.00
A701	Instruction to Bidders with instructions (1997)	5.00
A771	Instruction to Interiors Bidders with instructions (1990)	3.50

B Series/Owner-Architect Documents

B141	Standard Form of Agreement Between Owner and Architect with Standard Form of Architect's Services with instructions (1997)	8.00
B141/CMA	Standard Form of Agreement Between Owner and Architect—Construction Manager-Adviser Edition with instructions (1992)	3.50
B144/Arch-CM	Standard Form of Amendment to the Agreement Between Owner and Architect Where the Architect Provides Construction Management Services as an Adviser to the Owner with instructions (1993)	3.50
B151	Abbreviated Standard Form of Agreement Between Owner and Architect with instructions (1997)	5.00
B155	Standard Form of Agreement Between Owner and Architect for a Small Project with instructions (1993)	3.50
B163	Standard Form of Agreement Between Owner and Architect for Designated Services with instructions (1993)	9.00
B171	Standard Form of Agreement for Interior Design Services with instructions (1990)	3.50
B177	Abbreviated Interior Design Services Agreement with instructions (1990)	3.50
B181	Standard Form of Agreement Between Owner and Architect for Housing Services with instructions (1994)	3.50
B188	Standard Form of Agreement Between Owner and Architect for Limited Architectural Services for Housing Projects (1996)	9.00
B352	Duties, Responsibilities, and Limitations of Authority of the Architect's Project Representative with instructions (1993)	1.50

B431	Architect's Qualification Statement with instructions (1993)	3.50
B511	Guide for Amendments to AIA Owner-Architect Agreements (1996)	9.00
B727	Standard Form of Agreement Between Owner and Architect for Special Services with instructions (1988)	3.50
B801/CMa	Standard Form of Agreement Between Owner and Construction Manager Where the Construction Manager is Not a Constructor with instructions (1992)	3.50
B901	Standard Form of Agreement Between Design/Builder and Architect with instructions (1996)	5.00

C Series/Architect-Consultant Documents

C141	Standard Form of Agreement Between Architect and Consultant with instructions (1997)	5.00
C142	Abbreviated Form of Agreement Between Architect and Consultant with instructions (1997)	5.00
C727	Standard Form of Agreement Between Architect and Consultant for Special Services with instructions (1992)	3.50
C801	Joint Venture Agreement with instructions (1993)	3.50

D Series/Architect-Industry Documents

D101	Architectural Area and Volume of Buildings (1995)	1.50
D200	Project Checklist (1995)	9.00

F Series/Forms and Worksheets

F800	F810 through F860 Compensation Guidelines Complete Set 2 each of 24 Forms (1978)	7.00
F5002	Invoice for Architectural Services (1978) (50 sheets per unit)	7.00

G Series/Architect's Office and Project Forms

Sold Individually

G601	Request for Proposal — Land Survey with instructions (1994)	5.00
G602	Request for Proposal—Geotechnical Services with instructions (1993)	5.00
G612	Owner's Instructions Regarding the Construction Contract, Insurance and Bonds, and Bidding Procedures with instructions (1987)	5.00

50 Sheets per unit:

G604	Professional Services Supplement with instructions (1993)	15.00
G701	Change Order with instructions (1987)	15.00
G701/CMa	Change Order—Construction Manager-Adviser Edition with instructions (1992)	15.00
G702	Application and Certificate for Payment with instructions (1992)	15.00

Interview with the Dean

Over the past year, the School of Architecture and Urban Planning at the University of Wisconsin-Milwaukee has been celebrating its thirtieth year of existence. *Wisconsin Architect* congratulates Dean Robert Greenstreet, as well as the school's faculty, staff, students and alumni on this milestone. During this celebration, the school has focused on many past successes, some of which were outlined last year as the Dean provided our readers a "top ten" list of reasons why the school is indeed a great program. So, how does this success continue? What lies ahead? We thought we'd ask....

WISCONSIN ARCHITECT:
Dean Greenstreet, last year SARUP was once again reviewed by the NAAB for accreditation. How did the school do?

DEAN GREENSTREET: Funny you should ask that question! The school went through rigorous evaluation lasting for days and came through with flying colors, meeting 36 of the 37 criteria (the remaining one has now been met by a couple of minor changes in the curriculum). This was one of the best evaluations we've had, and very perceptive and providing advice on ways in which we could improve even further. We've taken a lot of the advice (24-hour access to the computer laboratory, a new intern advisor position and a new Resource Room) and will keep returning to the report for further direction.

WISCONSIN ARCHITECT:
Congratulations! So, you could say, SARUP is ready for the next millennium. Do you foresee anything new or different for SARUP in 2000 and beyond?

DEAN GREENSTREET: The next big change for us is the recruitment of probably six new faculty members over the next three years due to

retirements. Some of us, myself included, have been here long time and we look forward to some new perspectives on the teaching process. Not that we're getting old, you understand...

WISCONSIN ARCHITECT: Do you see any end to the familiar practice versus theory debate and the role of Architecture schools in the preparation of students?

DEAN GREENSTREET: Nah. There is always going to be discussion about the relationship between academic preparation and technical training. In a sense, it's that debate which defines the relationship between the profession and universities. As long as a discussion remains collegial and productive—and Wisconsin is exemplar in demonstrating a strong partnership between education and practice—it's a healthy exchange of views and can lead to remarkable bridges, developing internships, practitioner teaching and Mentarch, the SARUP mentoring program, for example. As long as we keep talking, were in great shape, even if we don't always agree.

WISCONSIN ARCHITECT:
One obvious sign of the school's success is student enrollment, which is up. In fact, you are now beyond capacity for which the new building was designed. How does the school accommodate continued enrollment growth with facilities already over capacity and stay successful?

DEAN GREENSTREET: Given that we are the only state architectural program, we have a responsibility to provide education to appropriately qualified Wisconsin students who want to be architects—and that's a huge group. We're presently about 85 students (more than 10 percent) over our target in enrollment because of the influx of freshman, which we can't

really control. It's always a balancing act between available resources—space, computers, faculty and teaching assistants—and demand for education, and we try and stay mindful of the needs of the profession in absorbing new graduates.

WISCONSIN ARCHITECT: Have students continued their success in the Chicago Awards Program this past year?

DEAN GREENSTREET: For the last thirteen years we have been very successful, winning about 70 percent of all the awards. In the last couple of years, we have pretty much shut out the other Schools and took the majority of awards in the Interiors category, which we were excluded from previously (primarily because we don't have in interiors program). This year, we dutifully submitted our nominees to AIA Chicago in June, but they have not judged them yet.

WISCONSIN ARCHITECT: What highlights have the faculty had in the past year?

DEAN GREENSTREET: As usual, they have been remarkably active both in the studios and other scholarly and creative activities. Last year, for example, we collectively wrote five books, 90 papers and reports, and 48 articles, worked on 39 projects, 22 research grants and served on dozens of committees and task forces. Oh, and most importantly, we tied the faculty/student soccer game! Usually, we get annihilated—each year we get older but the students seem to stay the same age.

WISCONSIN ARCHITECT: Since we can assume that the future membership of AIA Wisconsin will largely be SARUP alumni, how can SARUP and AIA Wisconsin improve upon their relationship?

DEAN GREENSTREET: I'd like to see greater AIA presence in the school. I think that offering AIAS members free AIA Wisconsin membership is a great idea, and resurrecting architecture awareness week with the school and the Southeast chapter working together, really was a good start. I am always interested in new ideas though—just email if you've got 'em (bobg@uwm.edu).

WISCONSIN ARCHITECT: Where our graduates being placed? Are they staying in the state? How can firms better market themselves to new recruits as potential employers? How is SARUP working with Wisconsin firms to place the students?

DEAN GREENSTREET: About 75 percent of our graduates stay close to home—Wisconsin and northern Illinois—and we often find that, of those leaving the state upon graduation (we have alumni in all states and about 35 countries), some return after a few years when families come along. Obviously, a strong relationship between the profession and school is vital to insure that we are meeting the needs of Wisconsin practices and to enable a smooth transition of our graduates into the workforce. In the past few years, we have developed a healthy scholarship/summer internship program that has created some strong pre-graduation

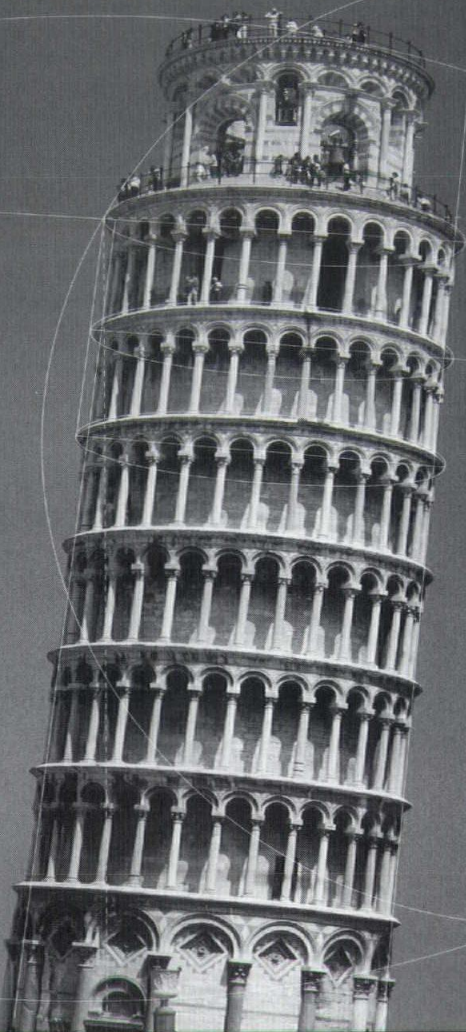

relationships between our students and regional practices. The mentoring program also creates some good relationships. To ease the recruitment process, we offer interview days, when we invite practitioners to take over the school to meet graduating students—over 50 firms expressed interest in participating last year. In addition to these direct relationships, we also offer over 80 continuing education courses and created the Architect/Contractor Roundtable as links between the school in the profession.

WISCONSIN ARCHITECT: Any closing comments?

DEAN GREENSTREET: Just best wishes for the New Year to all our practitioner friends in Wisconsin and that I hope you'll come by during the week of April 23-30, 2000, and help us celebrate our 30th Anniversary.

EDITOR: The interviewer is Chair of the Wisconsin Architect Editorial Advisory Board and an architect with The Renschler Company in Madison.

AIA Public Policy Agenda

Architects influence our lives every day. They help create the buildings and plan the communities where we live, work, learn, and play. From skyscrapers to schools to housing for the elderly, architects serve society by designing functional, efficient, attractive, and safe environments. The American Institute of Architects is the world's largest national organization representing members of the architectural profession. With approximately 64,000 members and 300 local chapters nationwide, the AIA unites the profession behind principles and policies aimed at creating the best possible quality of life for all Americans.

The following is a summary of the AIA's position on a number of issues that are of importance to the profession:

Urban Design and Livable Communities

The AIA believes that the design of the physical environment directly affects the quality of our daily lives. Through careful planning and design, architects contribute to making safe, attractive, economically viable, and environmentally sustainable communities. The AIA also believes that livable communities offer:

- Choices in housing, shopping, recreation, and job opportunities;
- Transportation alternatives;
- A variety of open spaces and places for active recreation, walking, and public gatherings; and
- A shared identity and sense of pride that results from the visual character and vitality of the community.

To achieve these goals, local and regional plans must be coordinated and should promote first the revitalization of existing communities, and then, where appropriate, the development of new communities.

Government Procurement

The AIA believes that selecting architects for federal, state, and local government building projects on the basis of professional qualifications and competence is in the best interest of the taxpayers. The federal government and approximately forty states currently require selection of architects based on qualifications.

Historic Preservation/Takings

The AIA believes that preservation of historic resources and their environments should be a priority in national policy. To that end, the Institute supports: landmark designation of appropriate buildings, sites, and districts; preservation of existing neighborhoods and historic districts; continued development of federal, state, and local programs, grants, and tax incentives that support preservation; and adoption and creative application of codes, standards and land use regulations supportive of historic preservation.

Licensing

The AIA believes that it is in the best public interest for architects to design all structures intended for human habitation or use, and that extensive exemptions made to architectural licensing laws serve only to erode the public protection provided by professional licensure. In addition, the AIA supports vigorous enforcement of architectural licensing laws by the states and recommends that penalties be assessed for unlicensed practice as well as for incompetent or improper practice by licensees.

Housing

The AIA supports a national commitment to the goals of a decent home and a suitable living environment for every American. The AIA seeks cooperation between all levels of

government, the private sector, and individual citizens in developing and implementing a national housing policy. The AIA favors continuation of the Low-Income Housing Tax Credit program, along with maintenance of the framework of federal housing assistance, including HOME and Community Development Block Grants, and reforms of the public housing programs.

Liability

The AIA supports legislative and regulatory reforms that curtail the cost and risks of professional liability for architects without jeopardizing the interest of the public. The AIA, through its state chapters, lobbies for appropriate liability protection measures including: statutes of repose; certificates of merit and other means of reducing frivolous law suits, and workers' compensation amendments to protect architects from third-party suits from injured construction workers. The AIA also supports Good Samaritan legislation to protect architects from being held liable for volunteer services provided in disaster situations.

Professional Service Taxes

The AIA is strongly opposed to the concept of taxing professional services. Such taxation is regressive, inhibits competition, and is inherently difficult and burdensome to administer. Service taxes are generally applied at a uniform rate for all service

providers within the taxing jurisdiction. Smaller or less profitable firms suffer under such an arrangement, particularly for gross receipts taxes. Additionally, large firms often have the capability to provide comprehensive services in-house, while the small firm must rely on consultants, thus adding to their tax burden.

Disaster Assistance

The AIA encourages its chapters to provide technical assistance to their communities and surrounding areas in the event of natural disasters that cause widespread structural damage such as earthquakes, floods and hurricanes. Such technical assistance may include emergency damage assessment, disaster mitigation planning, and review of building codes.

Energy

The AIA supports a balanced national energy policy that reduces waste of non-renewable energy resources while promoting environmentally sound production of energy sources. Further, the AIA encourages continued public and private research and development in all areas of energy-conscious design and technology, with emphasis on the performance of the total building.

Environment

The AIA believes that environmental considerations must form the foundation of any planning and design process and encourages government at all levels to be responsible for managing and protecting environmentally sensitive areas. The AIA also recognizes that the cost of prudent management of the land development process is a necessary investment in the country's future environmental resources and the health and welfare of its people. The AIA supports reform of the Superfund program, strong clean air laws, and attention to indoor air quality.

Design Excellence

The AIA believes that government has a responsibility to be concerned with the image, functional effectiveness, and lasting architectural value of the buildings it constructs. The AIA, therefore, supports laws and regulations encouraging distinguished architectural design that serves the public well and expresses the dignity of our government.

Golden Award

George A.D. Schuett, FAIA, Glendale, has been selected by the AIA Wisconsin Board of Directors to receive the 2000 Golden Award.

The Golden Award is the highest honor AIA Wisconsin can bestow on one of its members. Its purpose is to recognize individual architects who have performed most distinguished leadership and service on behalf of the state component of The American Institute of Architects over an extended period of time and who have advanced the cause of the profession of architecture by providing inspiration to their fellow practitioners.

The Golden Award will be formally presented to Schuett during a special Awards Luncheon on April 12 at the 2000 AIA Wisconsin Convention at the Monona Terrace Community & Convention Center in Madison.

This year's Golden Award was approved by the AIA Wisconsin Board of Directors at its December meeting in Milwaukee. Daniel J. Roarty, AIA, 1999 AIA Wisconsin President, commented that the nomination materials submitted on Schuett's behalf highlight his many contributions to the profession and professional organization. Schuett's dedicated service and innovative leadership exemplify the purpose for which the Golden Award was established, according to Roarty.

During a distinguished career that has spanned over 50 years, George Schuett has been a leader of the profession and an inspiration for generations of architects. He was the 1972 President of the Wisconsin Society of Architects and served on the national AIA Board of Directors from 1973-76. In recognition of his

contributions to the profession and the public it serves, he was advanced to the College of Fellows of The American Institute of Architects in 1977. Schuett currently is a principal of Plunkett Raysich Architects, having founded and led his own firm, Architects III, for 36 years. He also is an extremely talented artist and is teaching watercolor techniques to the PRA staff.

George Schuett is the thirteenth recipient of the AIA Wisconsin Golden Award. Previous Golden Award recipients include: David E. Lawson, FAIA; Paul H. Graven, FAIA; Mark A. Pfaller, FAIA; Wayne E. Spangler, FAIA; Leonard H. Reinke, FAIA; Nathaniel W. Sample, FAIA; Harry A. Schroeder, AIA; John P. Jacoby, FAIA; Noble E. Rose, AIA; Douglas H. Smith, AIA; Gary V. Zimmerman, FAIA; and James W. Miller, FAIA.

Parti'00: Inspire

The 2000 AIA Wisconsin Convention & Building Products Expo, **Parti'00: Inspire**, will be held on April 12 & 13 at the Monona Terrace Community & Convention Center in Madison. You'll want to reserve the dates for this year's schedule of exceptional speakers, seminars, exhibits and other special events.

Inspire is the theme for the 69th annual AIA Wisconsin Convention & Expo. In developing the theme and identifying speakers, this year's Convention Committee, chaired by Mark B. Kosobucki, AIA, Cedarburg, recognized that the AIA Wisconsin Convention provides an important opportunity for architects to come together and rekindle their enthusiasm and excitement about the profession. "The Convention program was designed to offer an insight into what has inspired many of our esteemed colleagues and to allow us to explore our personal inspiration," according to Kosobucki. "We're excited because

this year's program offers a variety of speakers and events that will enlighten, educate and inspire AIA Wisconsin members."

The featured keynote address each day and the special presentation that will conclude the Convention program all are being presented by architects selected to receive national AIA Honor Awards for their projects this year. **Cesar Pelli, FAIA**, of Cesar Pelli & Associates, New Haven, will present the keynote on April 12. Award-winning architect **David E. Miller, FAIA**, with The Miller/Hull Partnership, Seattle, will be the featured keynoter on April 13. **James Cutler, FAIA**, of James Cutler Architects, Bainbridge Isle, Washington, will offer an inspirational conclusion to the Convention in his special presentation on April 13.

Professional development **seminars** will focus on emerging design, practice, technology and environmental issues. Seminar presenters on April 12 include: David Salmela, AIA, Duluth, on his award-winning architecture; Curtis Moody, FAIA, Columbus, on the evolution of his successful practice; Tim Bradburne, Chicago, on the redevelopment of brownfields; and Ray Anderson, Atlanta, on achieving a sustainable future. Seminar presenters on April 13 include: Richard Haag, Hon. AIA, Seattle, on removing the boundaries between architecture and landscape architecture; John Cunningham, FAIA, Minneapolis, on the ethics of architectural practice in the new era; Steven Strong, Harvard, on solar electric architecture; Rand Elliott, FAIA, Oklahoma City, on his award-winning architecture; Ronald Ramsey, Fargo, on the history and future of practice in the Midwest; and Kevin Dong, San Francisco, and Tom Leslie, AIA, London, on the integration of architecture and structure.

If this line-up of featured speakers and seminars is not enough to inspire you to register for the AIA Wisconsin Convention, this year's **Building Products Expo** and other special events should be enough to push you over the top. The Expo is open both days and will feature an exhibit hall full of displays on the latest products

and services available to Wisconsin's design and construction industry. Other **special events** include the presentation of the AIA Wisconsin Golden Award, Architecture Firm Award and 2000 Design Awards, an IDP workshop, IIDA seminars and the annual WCMA Awards breakfast.

For more information on **Parti'00: Inspire**, contact the AIA Wisconsin office.

Legislative Report

During the current 1999-00 session of the Wisconsin Legislature, state legislators have introduced nearly 1,000 separate bills. Of these, only 25 bills have been approved by both the Assembly and Senate and signed into law by the Governor.

As is typical, the state budget received most of the attention during the first year of the biennial legislative session. The budget bill was finally approved as 1999 Act 9 in October. AIA Wisconsin focused its attention on budget provisions having to do with design/build for local governments, state aid for school construction, funding for art in state buildings and a surcharge on state licensing exam fees.

The AIA Wisconsin Legislative Committee, chaired by Fred Zimmermann, AIA, Madison, currently is tracking and monitoring about 20 legislative proposals that address a variety of issues of interest to architects. Examples of Assembly Bills (AB) and Senate Bills (SB) on AIA Wisconsin's legislative radar screen include the following:

SB 179: Increase state bonding authority by \$59.5 million for restoration of State Capitol. (This legislation has been approved and signed into law as 1999 Act 4.)

SB 198: Authorizes use of "design-build construction process" by local governments for projects exceeding \$1 million.

SB 18: Prohibits erection of new highway billboards and provides grants for acquiring and eliminating existing billboards.

SB 262: Authorizes lease and operation of correctional facilities in state.

AB 105: Requires local government referenda to be scheduled in conjunction with regular primary or general elections.

AB 177: Permits faster state historical society authorization for razing of a historic building.

AB 207: Requires automatic fine sprinkler systems in UW residence halls.

AB 299: Requires school districts that construct a school to provide information to DPI on plans, costs and materials.

AB 390: Clarifies transfers of tangible personal property subject to sales tax, including intellectual property.

AB 519: Provides for licensing of private prison construction and operation.

AB 523: Authorizes property owners to establish "unnecessary hardship" for municipal and county zoning variances.

If you have questions about these or other legislative proposals, contact the AIA Wisconsin office. In recent sessions, AIA Wisconsin has supported proposed legislation that would provide pre-construction lien rights for architects and that would simplify the procedure for exempting from the sales tax materials used in the construction of projects by public and tax-exempt owners. This legislation has not yet been introduced in the current session.

This is an election year, so every seat in the Assembly and half of the seats in the Senate are up for grabs this November. There will be many new faces on the campaign trail. AIA Wisconsin members are encouraged to make legislative candidates in their communities aware of issues of interest to the profession.

WSA/PAC

You can help encourage the election of state legislative candidates who support the goals of the profession of architecture by contributing generously to the Wisconsin Society of Architects/Political Action Committee. The WSA/PAC, established in 1978, is an independent, voluntary and bipartisan group of individual architects interested in improving government by encouraging the active participation and involvement of architects in the political process.

Please support the WSA/PAC by sending your personal contribution to: WSA/PAC, 321 S. Hamilton St., Madison, WI 53703. Checks should be made payable to "WSA/PAC." Corporate contributions are not allowed.

Amicus Briefs

As reported previously, AIA Wisconsin is participating in amicus curiae (friend of the court) briefs in two court cases with potentially adverse liability exposure implications for architects.

In one case, currently before the Wisconsin Court of Appeals, the plaintiff is challenging the constitutionality of Wisconsin's statute of repose for the design and construction industry. The statute of repose, section 893.89 of the Wisconsin Statutes, in effect, bars lawsuits against architects and others involved in improvements to real property after ten years from the date of substantial completion. As a result, it limits the "long tail" of liability faced by architects.

Nine design and construction industry organizations have joined AIA Wisconsin in helping to underwrite the legal expense of filing the brief in support of the current statute of repose. These organizations include: Allied Construction Employers Association, American Society of Interior Designers, Associated Builders & Contractors of Wisconsin, Associated General Contractors of Greater Milwaukee, Associated General Contractors of Wisconsin, International Interior Design Association, Wisconsin Association of

Consulting Engineers, Wisconsin Builders Association and Wisconsin Society of Professional Engineers.

The Court of Appeals recently asked the Wisconsin Supreme Court to take the case. However, the Supreme Court may decline to do so.

The other court case involves the governmental contractor immunity defense, which offers some protection for architects and engineers providing professional services to public owners. The defense is being challenged in a case now before the Wisconsin Supreme Court. AIA Wisconsin and the Wisconsin Association of Consulting Engineers submitted a friend of the court brief in this case.

The AIA Government Affairs Advisory Committee has approved grants to help support AIA Wisconsin's involvement in these two court cases that could have serious ramifications for the profession.

Working Homeless Shelter

Construction is progressing on the Working Homeless Shelter project at 1903 Sherman Avenue in Madison. This three-unit facility is owned and managed by Transitional Housing, Inc., and will provide affordable shelter for working homeless families and individuals.

AIA Wisconsin began this important initiative to demonstrate the leadership role of the profession in addressing critical community issues and the ability of members to transform a blighted property into a valuable community asset. These goals are being achieved thanks to the dedicated efforts of many volunteers and the support received from members as well as allied design and construction industry organizations and companies.

AIA Wisconsin members coordinated the preparation of plans for the renovation and remodeling of the dilapidated three-unit and worked on lining up volunteers as well as donated products and services for the project. Members also assisted THI in obtaining zoning variances and in

successfully applying for grants from WHEDA and the Federal Home Loan Bank of Chicago.

Working in cooperation with the Wisconsin Architects Foundation, over \$20,000 has been contributed to a special Working Homeless Shelter Fund. These contributions have been used to reduce the mortgage on the facility in order to keep the rent as affordable as possible.

Your tax-deductible contribution in support of the Working Homeless Shelter initiative would be welcomed. Please make your check payable to "WAF-WHS Fund" and mail it to: Wisconsin Architects Foundation, 321 S. Hamilton St., Madison, WI 53703.

Fellowship

Advancement to the College of Fellows of The American Institute of Architects is a high honor awarded to less than 5% of the AIA membership. AIA Wisconsin is proud to have 14 Fellows as members.

Over the past several years, the AIA Wisconsin Board of Directors and the Fellowship Committee have discussed ways to encourage more Wisconsin members to pursue Fellowship. While advancement to Fellowship primarily benefits the individual member, it also reflects positively on the health and vitality of AIA Wisconsin.

One way to pursue Fellowship is to be nominated by the AIA Wisconsin Board of Directors. These nominations are a result of recommendations by Board members and the Fellowship Committee.

Nomination by AIA Wisconsin is only the first step in the process, however. If you are interested in pursuing Fellowship, a great deal of work remains to be done. Information on Fellowship submittal requirements, including the rules and instructions for preparing and submitting a Fellowship nomination, is available from the AIA.

Traditionally, interested candidates work with a member of the

Fellowship Committee, who serve as their sponsor and assist with the preparation of the nomination submittal. For further information, please contact national AIA staff at (202) 626-7586 or one of the co-chairs of the AIA Wisconsin Fellowship Committee: James W. Miller, FAIA, (608) 836-7732; Gary V. Zimmerman, FAIA, (414) 476-9500.

AIA Grassroots

State and local AIA leaders in Wisconsin are off to Washington, DC, for the annual AIA Grassroots leadership conference on January 26-29. As part of Government Affairs Day, AIA Wisconsin representatives will be visiting Capitol Hill to meet with Senators Kohl and Feingold and other members of Wisconsin's Congressional delegation.

Issues to be discussed during these Capitol Hill visits include the American with Disabilities Act, brownfields, livable communities and school construction and modernization. AIA members from around the country will be lobbying in support of initiatives to clarify ADA requirements, improve revitalization tools for brownfields, enhance the quality of life in our communities and provide federal support for school modernization and renovation projects.

AIA Convention

The national AIA Convention will be held May 4-6 in Philadelphia. This year's theme is *New Century – New Vision: Livable Communities for America's Future*. For information, call the Convention Hotline at (202) 626-7395.

If you are planning on going to Philadelphia, this is your chance to be an official delegate. As a delegate of your local AIA Chapter, you will be able to vote for national AIA officers and on other matters of business coming before the membership at the Annual Meeting on Saturday, May 6. Contact the AIA Wisconsin office to add your name to the delegates roster.

Continuing Education

The national AIA Board of Directors has approved new streamlined continuing education system (AIA/CES) requirements for 2000. Starting as of the first of this year, AIA Architect members must earn 18 learning unit (LU) hours per year, including 8 hours related to health, safety and welfare (HSW) issues.

Under the new AIA/CES requirements, LU hours and HSW hours are based on the length of the program or "seat time." Previously, AIA members were required to earn 36 LUs, which were computed based on the "quality level" of the continuing education activity as well as its length. Most members reported participating in quality level 2 programs for which they earned 2 LUs per contact hour. As a result, for the majority of continuing education activities, the new 18 LU *hour* requirement is equivalent to the former 36 LU requirement. The requirement that 8 hours of these learning activities relate to health, safety and welfare remains unchanged.

This year's AIA Wisconsin Convention will provide the opportunity for AIA Members to earn up to 14 LU hours, including 13 HWS hours.

AIA Codes Task Force

The national AIA Codes Task Force recommendations were approved unanimously by the AIA Board of Directors in December. The AIA believes that the fundamental reason for the development of building codes is to protect the public. The development of multiple building codes, fire codes, electrical codes and gas codes fosters a negative atmosphere and continuing regulatory conflict. With this in mind, the AIA will continue to push for a single set of comprehensive, coordinated and contemporary codes.

In addition to a renewed emphasis to foster cooperation between the NFPA and the ICC, the AIA Board approved the following measures:

- Adopt specific changes to AIA policies to reaffirm support for a single set of comprehensive, coordinated and contemporary codes for the nation.
- Develop and aggressively implement a multifaceted strategy for code development and adoption, and assertively advance the AIA policies on regulatory reform and codes. The plan outlines specific elements for this recommendation. First, institute a comprehensive communication plan. Second, identify and develop strategic partnerships among the contributors to the built environment. Third, reaffirm and expand the role of the Center for Building Performance and Regulation. Finally, enhance and strengthen the advocacy program to ensure that the AIA and its members have an active role in the development and adoption process of model codes and standards throughout the nation.

The Codes Task Force's findings and recommendation are available on the AIA Web site: www.aiaonline.com.

AIA Wisconsin representatives are serving on code councils established by the Safety and Buildings Division, Department of Commerce, to assist in reviewing the family of building codes developed by the International Code Council. Following positive recommendations of the code councils, Safety & Buildings is pointing to the adoption of the 2000 International Building Code as the "foundation" for Wisconsin's Commercial Building Code. Adoption of the IBC could be in July 2001, with a delay in the effective date until July 2002.

If you are interested in energy code issues, there is an opening on the Energy Code Specialty Council for an AIA Wisconsin representative. Please contact the AIA Wisconsin office for further information.

Awards Program

Business Week and *Architectural Record* magazines invite entrants for their fourth annual award program. The BW/AR Award recognizes the very best examples of creative management practice coupled with

architectural design. The program is sponsored by the AIA. The entry registration deadline is March 16, 2000. For information, call 888-242-4240 or visit the following Web sites: www.aiaonline.com or www.archrecord.com.

People & Places

Joseph W. Albert III, AIA, Milwaukee, **Courtney W. Nystuen**, AIA, Menomonie, and **Thomas M. Slater**, AIA, Milwaukee, have been approved for Emeritus membership in The American Institute of Architects. Congratulations.

William P. Wenzler, FAIA, Milwaukee, reports that former AIA Wisconsin member Richard Blake is tackling a serious health challenge. Dick and his wife Bev are staying with their daughter and son-in-law in Houston while he receives medical treatment. He may be reached c/o Richard & Christine Russler, 319 Wildchester, Houston, TX 77079.

Roger D. Roslansky, AIA, La Crosse, and **Karen E. Sathoff**, AIA, Green Bay, have been elected as chair and vice chair, respectively, of the Architects Section of the Examining Board of Architects, Landscape Architects, Professional Engineers, Designers and Land Surveyors in the Wisconsin Department of Regulation and Licensing. Governor Thompson has appointed Pewaukee architect Dennis M. Cerreta to a three-year term on the Architects Section, replacing **Lisa L. Kennedy**, AIA, Whitefish Bay.

Brett Luecke, AIA, Fox Point, has been named vice president of operations and partner in Kevin J. Connolly Architects, Inc.

The Madison office of Plunkett Raysich has added **Richard W. Luce**, AIA, West Bend, **Edward Haydin III**, AIA, **Jon D. Sandeman**, Assoc. AIA, Mazomanie and **Michael Lynch**, Associate AIA, Janesville, to its staff.

Potter Lawson, Inc., Has added **Mark M. Smith**, Associate AIA, Oregon, as an intern to its staff.

Plunkett Raysich Architects recently received a 1999 Public Buildings Heritage Award for its work on Milwaukee's federal courthouse restoration from the General Services Administration.

Masonry Insights

Please check your latest issue of *Wisconsin Architect* (70:6) and the "Masonry Insights" newsletter from the Wisconsin Concrete Masonry Association. During collation of the last issue, some readers received issue number two instead of issue three of this valuable newsletter. If you received issue two, please call the AIA Wisconsin office at (608) 257-8477 or email your address to wiaichitect@aiaaw.org to receive a copy of issue three.

Correction

The 1999 Consultant Directory listing for Resource Staffing Consultants should read as follows:

E-mail: tward@netnet.net
Contact: Tom Ward

Resource Staffing Consultants is a staffing firm specializing in providing services to A/E/C firms. The company offers 16 years of experience providing professional staffing services. Services offered include contingency and retained searches, hourly recruiting/research services and staffing consulting. Professionals commonly placed with its customers include Architects and related positions, Electrical Engineers, Mechanical Engineers (HVAC/Plumbing/Process), Civil Engineers (Structural, Site), Environmental Engineers and Construction/Project Managers. Fees for contingency and retained searches are a percentage of the placed candidates first year estimated earnings. For more information call or visit our website at www.rscqp.com.
