SPOT NEWS

1. Personal Employment.*

One of the most urgent problems facing the Washington Representative is to explore all possibilities for employment of architects in the war effort,—in industry, in Federal agencies, and as commissioned officers in the services. It would be very helpful if every architect who has left his normal practice for such employment, of whatever kind, would apprise us of his location and functions and of any chances of similar employment for others.

As an illustration it is noted that: the Office of the Area Engineer, Camp Lee, Virginia, is in need of architectural draftsmen; rate of pay about \$3,000 or more per annum, depending on experience.

It is important that those who have not sent in forms for the "National Roster of Scientific and Specialized Personnel" should do so at once: Address—1006 U Street, N. W., Washington, D. C.

2. Critical Materials.*

There has been criticism of architects and engineers for not conforming to requirements for saving of critical materials. The Army and Navy Munitions Board and the Bureau of Yards and Docks ask us to urge architects to use their ingenuity and imagination in the use of substitutes and to conform strictly to all requirements. (See "Conservation of Critical Materials," page 16.)

3. War Production Board.

W.P.B. Directive No. 8, released September 10, covering conservation of structural steel for buildings on contracts placed after November 9, 1942 calls for mandatory allowable stress in flexure of 24,000 pounds per square inch; other savings effected through use of continuity in design and welded fabrication.

Limitation Order L-142, released September 16, stops all production of metal doors, metal door frames and metal shutters, except for fire doors meeting certain maximum specifications and for airplane hangar doors.

Priorities Directive No. 2, released September 16, provides that preference ratings will be issued by W.P.B. officials only.

After September 30, a revised Form PD-200 will be used.

4. Post-War Planning.*

In spite of the recent abolishment of the Public Work Reserve, General Fleming, F. W. A. Administrator, hopes to continue planning efforts for the post-war period on a basis which will occupy many architects and engineers.

D. K. ESTE FISHER, JR.
Washington Representative, A.I.A.

See important revised Army and Navy Contact lists on pages 4 to 6.

A fuller discussion of items 1, 2 and 4 is covered by our Bulletin No. 16 to Regional Directors, Chapters and State Association Members.

THE OCTAGON, A Journal of The American Institute of Architects. Published Monthly by The American Institute of Architects. Executive and Publication Offices, The Octagon, 1741 New York Avenus, N. W., Washington, D. C. Twenty-five Cents the Copy. 31 per year. (Foreign \$2.) Checks or Money Orders should be made payable to The American Institute of Architects. All communications should be sent to The Secretary. Entered as second-class matter, February 3, 1929, at the Post Office at Washington, D. C.

THE OCTAGON

A Journal of The American Institute of Architects

PUBLISHED MONTHLY BY

THE AMERICAN INSTITUTE OF ARCHITECTS

Executive and Publication Offices, The Octagon, 1341 New York Avenue, N. W., Washington, D. C. Official Office in the State of New York, 115 E. 40th Street, New York, N. Y.

A Statement by The President

AT the Annual Meeting of The Institute in Detroit in June of this year it was clearly indicated that delegates and members present—

(a) were convinced that the work of Edmund R. Purves as Washington Representative from November, 1941, to July 1st, 1942, had been of great value to Institute members and others, and

(b) were determined that the work of the Washington Representative should be continued, without curtailing The Institute's normal activities.

Captain Purves is now in the service of the United States and so is not available to serve.

The Institute has been fortunate in securing Mr. D. K. Este Fisher, Jr., Institute member, of Baltimore to carry on. Mr. Fisher, as this is written, is already reviewing the field of work with the intention of starting full time activity in Washington about the middle of September.

With this appointment The Institute moves definitely into its approach to the year ahead, facing the problems of the profession in the United States for the balance of 1942 and the immeasurable period beyond. 1942 has seen a great increase of strength in Institute membership and in knitting the affiliation of the State Associations with the nation-wide professional representation which is "A.I.A."

The Annual Meeting at Detroit has been hailed as an expression in meeting assembled of the intention of the architects of the nation to face together their own problems as an organized group and the problems of the nation in the future, during and following the world-wide struggle in which we are steadfastly fixed.

This purpose will call for a full expression of the support which was so forthrightly uttered at Detroit. To make this support effective we must rebuild The Institute's financial reserves to the strength they possessed before the deficits of 1939 and 1940 had encroached upon them. This we cannot accomplish from current dues in the face of the drastic reduction in the sale of Institute Standard Documents resulting from the national cessation of private building.

To this end, then, the Officers and Directors will present to the Chapters, to the corporate members, and to those of us to whom Government contracts have been awarded, a request that all, together, strengthen and renew The Institute's working capital, and back up its efforts, which, with all possible economies, will call for our united strength in the interest of our members and our fellow professionals.

Your support is counted on to make good our pledge to our members, to the profession, and to the nation's planners in the years ahead.

And to you, the members of The Institute, there goes from your Officers and Directors their assurance that they will do all that they can to administer in accordance with your wishes the trust you have placed in them.

R. H. SHREVE

Local Contacts—Army and Navy Projects

Much of the business of the Army (Corps of Engineers: Construction Contract Board) and Navy (Bureau of Yards and Docks) is decentralized and matters relating to projects should be taken up first with the local officers. See appended up-to-date lists.

D. K. ESTE FISHER, JR., Washington Representative.

Samuel A. Marx	
John Gaw Meem. West. Mnt.	

Duties

To foster and promote an ever-closer relationship between architects and sculptors, painters, and other artists practicing the arts of design allied with architecture.

The Committee on Allied Arts may make recommendations to The Board for honorary memberships to The Institute and may nominate to it persons to receive awards of the Fine Arts Medals and of the Craftsmanship Medals.

(11) COMMITTEE ON FEDERAL PUBLIC WORKS

D. K. Este Fisher, Jr., Chairman	1943
Edward D. Pierre, Vice-Chairman 1943 Gr. Lakes	1945
Livingston Smith	1945
Ernest E. Weihe S. Nevada	1945
Ross Shumaker So. Atl.	1945
John A. Holabird	1944
Perry B. Johanson West. Mnt.	1944
Charles Butler New York	1944
John Howard Stevens New Eng.	1943
John T. Rather, JrGulf Sts.	1943
Chas. W. Shaver	1943

Duties

first, to devise ways and means of promoting the usefulness of The Institute to the various federal agencies having charge of the planning and designing of public buildings and their environs, public parks, and public monuments;

second, to promote the employment of architects in private practice to plan and design such public works;

STANDING BOARD COMMITTEES, Continued

third, to discourage the planning and designing of such public works by governmental bureaus or departments.

(12) COMMITTEE ON STATE AND MUNICIPAL PUBLIC WORKS

James W. Kideney, Chairman 1943 New York 293 Summer St., Buffalo, N. Y.	1944
John Hunter, Jr., Vice-Chairman 1943 Mid. Atl.	1945
Will G. Corlett S. Nevada	1945
John O. Merrill	
Chas. F. Owsley Gr. Lakes	
Raymond J. Ashton, West. Mnt.	
Douglass V. Freret	
Franklin O. Adams So. Atl.	
Walter F. Wilson Cent. Sts.	
Douglas Wm. Orr	

Duties

first, to devise ways and means of promoting the usefulness of The Institute and its local chapters and state association members, to the various state, municipal and other governmental agencies having charge of the planning and designing of public buildings and their environs, public parks, and public monuments;

second, to promote the employment of architects in private practice to plan and design such public works:

third, to discourage the planning and designing of such public works by governmental bureaus or departments.

PART III-SPECIAL BOARD COMMITTEES

All Special Board Committees terminate at adjournment of the annual meeting, 1943.

(13) COMMITTEE ON POST WAR RECONSTRUCTION

Walter R. MacCornack, Chairman
77 Mass. Ave., Cambridge, Mass.
J. Frazer Smith, Vice-Chairman
Horace W. Peaslee, Vice-Chairman
Arthur C. Holden, Vice-Chairman
Franklin Oliver Adams
Raymond J. Ashton
William J. Bain
John E. Burchard
Miles Lanier Colean
Matthew W. Del Gaudio

Alexander C. Eschweiler, Jr. Branson V. Gamber Moise H. Goldstein Ernest A. Grunsfeld, Jr. Jean Hebrard Arthur B. Holmes James Wm. Kideney Charles W. Killam Ellis F. Lawrence Joseph D. Leland Charles Dana Loomis

Miss Marion I. Manley Frederick Mathesius C. Julian Oberwarth Wm. Stanley Parker Edward D. Pierre Sumner Spaulding Clarence S. Stein Francis P. Sullivan Ralph Walker Frederick J. Woodbridge William Wilson Wurster

Duties

As may be issued by The Board and as contained in the following resolution adopted by the 1942 annual meeting of The Institute:

Whereas, The termination of this war will leave our country in need of a great rebuilding and new-building program; and

Whereas, The building industry, to produce a successful program must be guided by wise counsel; therefore, be it

Resolved, That the seventy-fourth annual meeting of The American Institute of Architects approves the continuous cooperation of The Institute with other national groups in the initiation of a nation-wide effort implemented by local bodies to study the problems of post-war reconstruction as may be determined to best effectuate a wise national program.

(14) COMMITTEE ON NATIONAL CAPITAL

C. C. Zantzinger, Chairman
Architects Building, Philadelphia, Pa.
D. K. Este Fisher, Jr., Vice-Chairman
Charles Butler
A. C. Eschweiler, Jr.
G. Corner Fenhagen
Abram Garfield
E. J. Russell
Henry R. Shepley
Walter H. Thomas
Louis Simon, Secretary

Duties

To promote the preservation and development of the plans of Washington, D. C., and its environs that have been approved or endorsed by The Institute or by the national Commission of Fine Arts or its successor.

Matters concerning the preservation of individual buildings of historic importance in Washington, D. C., shall not be within the purview of this committee, other than as their preservation relates to the general plan of the city.

(15) COMMITTEE ON PRESERVATION OF HISTORIC BUILDINGS

Leicester B. Holland, Chairman
c/o Library of Congress, Washington, D. C.
Edward W. Donn, Jr., Vice-Chairman
Turpin C. Bannister
Frank C. Brown
John A. Bryan
J. Frazer Smith
Carleton M. Winslow

Duties

To foster the preservation of the historic buildings of the nation, particularly those having architectural significance, by encouraging the establishment of agencies to care for them, in collaboration with the appropriate chapter when that is feasible.

Matters concerning the preservation of individual buildings of historic importance in Washington D. C., shall be within the purview of this committee.

(16) COMMITTEE ON UNIFICATION

Matthew W. Del Gaudio, Chairman
545 Fifth Ave., New York City
Leigh Hunt, Vice-Chairman
Ralph Wilson Carnahan
Wiley G. Clarkson
Branson V. Gamber
Charles C. Hartmann
John Gaw Meem
Roi L. Morin
Frederick H. Reimers
Wm. John Ryan
J. Frazer Smith
Searle H. Von Storch
Rudolph Weaver
Ralph O. Yeager

Duties

first, to encourage and aid existing state associations of architects to become members of The Institute, if they are not already such;

second, if, as, and when The Board directs with respect to any particular state, to encourage and aid the organization of a state-wide chapter or a state association of architects within the state.

(17) COMMITTEE ON SUBSCRIPTIONS FOR OCTAGON—HISTORIC MONUMENT

Stephen F. Voorhees, Chairman
101 Park Ave., New York City.
R. Clipston Sturgis
William B. Faville
C. Herrick Hammond
Henry H. Kendall
Robert D. Kohn
Ernest John Russell
Charles D. Maginnis

Duties

To obtain subscriptions, contributions, gifts, and bequests amounting to not less than \$15,000.00 for repairing The Octagon building and replanting its grounds.

The committee may solicit funds for repairs and replanting from chapters and state association members of The Institute, as organizations, but shall not solicit members individually.

(18) COMMITTEE ON CIVILIAN PROTECTION

Chairman-Horace W. Peaslee, 1234 19th St., N. W., Washington, D. C.

Vice-Chairman-Frederick G. Frost, 144 East 30th St., New York, N. Y.

Region No. 1.—Wm. Emerson, 107 Mass. Ave., Boston. Territory: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island.

Region No. 2.—Matthew W. Del Gaudio, 545 5th Ave., New York.

Territory: New York, Delaware, New Jersey.

Region No. 3.-L. E. D. Gaudresu, 527 N. Charles St.,

Baltimore.
Territory: Pennsylvania, Maryland, Virginia, District of Columbia.

Region No. 4.—Harold Bush-Brown, Ga. School of Tech., Atlanta.

Territory: North Carolina, Tennessee, South Carolina, Louisiana, Florida, Alabama, Mississippi, Georgia.

Region No. 5.—Ralph C. Kempton, A.I.U. Building, Columbus, Ohio.

Territory: Ohio, West Virginia, Kentucky, Indiana. Region No. 6—Ernest A. Grunsfeld, 540 No. Mich. Ave., Chicago.

Territory: Michigan, Illinois, Wisconsin.

Region No. 7.—Prof. Linus Burr Smith, Univ. of Nebraska,

Lincoln.

Territory: Minnesota, Iowa, North Dakota, South Dakota, Nebraska, Missouri, Kansas, Arkansas, Wyoming.

Region No. 8.—Glenn C. Wilson, Smith-Young Tower, San Antonio.

Territory: Texas, Oklahoma, Colorado, New Mexico, Arizona.

Region No. 9.—Hervey P. Clark, 210 Post St., San Francisco.

Territory: Montana, Idaho, Washington, Utah, Nevada, California, Oregon.

Note: The above regions correspond with the corps areas established by the Office of Civilian Defense. Regional members have contacts with chapters and state associations.

Duties

To function in accordance with the resolution of the 1941 convention reading as follows:

"Whereas, It is the duty of the architectural profession to organize itself in collaboration with other technicians

SPECIAL BOARD COMMITTEES, Continued

so that its talents may be of immediate use to civil and military authorities in the present emergency, and

"Whereas, It is in the public interest that the profession devote its training and experience to coordinating the ramifications of planning and in applying its vision to reduce the waste and disruption that follow war, and

"Whereas, The architectural profession cannot do its greatest service if unprepared for leadership, therefore be it

"Resolved, That The President of The American Institute of Architects be requested to appoint a National Chairman for Civilian Protection with power to coordinate existing agencies of the profession and to set up a nationwide organization for immediate service to the country."

(19) COMMITTEE ON CONSERVATION OF CRITICAL MATERIALS

Harry Royden Dowswell, Chairman 11 East 44th St., New York City Charles F. Cellarius D. K. Este Fisher, Jr.

The Department of Technical Services-Notes

By THEODORE IRVING COE, TECHNICAL SECRETARY

The Conservation of Critical Materials in War Construction.

It required only a few months of war production activity to bring forcibly to the consciousness of governmental authority and the construction industry the disturbing fact that we did not, as we had somewhat complacently assumed, possess the unlimited resources necessary to meet the requirements of civilian needs and war's demands.

It has also become increasingly evident that the curtailment or even the elimination of construction for civilian use and the suspension of the production of consumer products using critical materials, while of assistance in meeting the needs of war production, is falling short of providing adequately for the everincreasing demands of production for total war.

Agencies of the Government and the Army and Navy have issued regulations and directives, referring to the conservation of critical materials, which provide authoritative guidance for those who provide the materials and equipment for construction as well as those who plan the structures to which they are intended to apply.

Notwithstanding the widespread publicity which has been given to the imperative need for the conservation of critical materials, there are still evidences of the need of a more aggressive adherence to the principles of conservation outlined in official regulations and directives, and a more wholehearted acceptance of the fact that successful results demand the maximum application of conservation to each and every project where even minor savings can be effected.

In the conservation of these critical materials those who plan the structures essential to the prosecution of our war effort, in sharing responsibility with those who determine the needs of our armed and production services, should seek to amplify the savings demanded by even a strict adherence to the requirements of official regulations and directives.

While the urgency of war's demands calls for the utmost expedition in the planning and erection of the structures required for our armed forces and production activities the time to achieve the maximum degree of conservation of critical materials lies in the period when the basic design and the details of its construction are formulated.

It is at this stage that the most careful consideration and direction should be given not only to ensure adherence to the requirements of specific regulations and directives but to the exercise of independent ingenuity in devising ways and means of still further eliminating and conserving the materials which will more directly and efficiently serve our war effort in the form of ships, tanks, planes, and equipment for the fighting forces.

As the success of our war effort may depend not upon manpower or its producing or fighting efficiency but upon the sufficiency of the critical materials without which we may fail to provide our armed forces with the equipment necessary to ensure ultimate victory, architects who prepare the plans and specifications for wartime construction must accept and faithfully discharge their share of the responsibility for the conservation of critical materials if justified criticism is to be avoided and the profession is to be credited with the most effective collaboration with the war effort.

For the architect trained in the selection, from unlimited varieties and quantities, of materials best qualified to perform their particular functions in ensuring stability, durability, acceptable appearance, and minimum maintenance cost, present conditions provide new problems involving the elimination of certain materials, heretofore deemed essential, and a limitation in the variety and quality of materials which must, with probable variations in construction techniques, serve as substitutes.

In the solution of these problems involving the conservation of critical materials the architect will aid in performing a service which may well prove vital to the successful culmination of our war effort.

A Progress Memorandum to the Construction Industry on The Conservation of Critical Materials in Construction, was issued, under date of June 23, 1942, by the Cooperating Committees of The Institute and The Producers' Council, with the desire to cooperate with the WPB, in the planning for the conservation of critical materials, and to be of assist-

ance to those interested in construction under emergency conditions.

Copies may be obtained from this Department.

ASA Committee A-62 Reports Progress.

While it was anticipated the activities of ASA Committee A-62, on the Coordination of Dimensions of Building Materials and Equipment, might have to be suspended for the duration a gratifying record of progress was reported at a meeting of the Executive Committee of the project, held in Washington, D. C., September 9th.

The Modular Service Association, which provides a permanent staff for the work of the Committee, has been operating since May 18, 1942, as consultant for the Federal Public Housing Authority on the application of coordination to war housing.

Since April 1942 the policy of FPHA has been to have all plans for war housing developed on the nominal 4" basis which is recommended by Committee A-62.

This has been applied to projects handled by private architects for FPHA and thus many architectural offices have become familiar with the methods and principles of coordination, as developed by Committee A-62.

Progress very similar to that in this country has been made in Canada in applying these methods to war emergency building.

The Modular Service Association has also used the experience of its staff to assist a number of architects and builders in the use of the coordination method in connection with local projects.

A description of Project A-62 appeared in the July 1941 issue of THE OCTAGON.

A Method of Developing Specifications.

Of particular interest to the architect is the Report of the Sub-Committee on Specifications of the Central Housing Committee on Research, Design, and Construction, as contained in Report BMS-87, issued by the National Bureau of Standards. (Noted below)

The Sub-Committee, following its study of current specifications—writing routine, advocates a directive method which, under proper supervision, it believes will not only condense specifications, but effect important economies, and increase efficiency. In adopting a method based on this principle the Sub-Committee followed the recommendations of Horace W. Peaslee, FAIA, which include, (1) a mandatory provision concentrated in a single governing clause and (2) the body of the specification in an abbreviated outlined form—with sentence structure eliminated.

To illustrate the practical application of its recommendations the Report includes the Masonry Section of a model basic form specification.

As a further illustration there is included a typical masonry specification, from the files of a governmental agency, and the re-writing of the same in accordance with the proposed streamlined model basic form.

War on Fuel Waste.

A meeting inaugurating "War on Fuel Waste" Week was held in New York City August 17th under the sponsorship of the American Society of Heating and Ventilating Engineers.

Mr. Harold R. Sleeper attended the meeting as the representative of The Department of Technical Services.

A series of addresses by representatives of the Government and New York City, and engineering and public health authorities directed attention to the necessity of fuel conservation as a war measure and patriotic duty.

Ten basic ways to save fuel, with detailed suggestions under each heading, have been formulated by the ASHVE, and copies may be obtained from the Society at 51 Madison Ave., New York.

National Bureau of Standards Research on Building Materials and Structures.

To the list of reports mentioned in previous issues of THE OCTAGON the following have been added and may be obtained from the Government Printing Office, Washington, at the price indicated:

BMS85—Dimensional Changes of Floor Coverings with Changes in Relative Humidity and Temperature. 10¢

BMS86—Structural, Heat-Transfer and Water-Permeability Properties of "Speedbrick" Wall Construction Sponsored by the General Shale Products Corporation. 156

BMS87—A Method for Developing Specifications for Building Construction. 106 BMS89—Structural Properties of "Precision-Built, Jr." (Second Construction) Prefabricated Wood-Frame Construction Sponsored by the Homasote Co. 15¢

Recent Appointments.

President Shreve announces the following appointments:

- Charles B. Meyers, as alternate for J. Andre Fouil-houx, on ASA Building Code Correlating Committee for 1942-1943 term.
- Charles C. Platt, as Institute representative on ASA Committee A51—Fire Protection and Fire Resistance.

As Institute representatives to cooperate with The Department of Technical Services:

Lewis Bowman, Westchester Chapter James Macmillan, Arizona Chapter William Mark Potter, Hawaii Chapter Freeman A. Pretzinger, Dayton Chapter Harry C. Weller, Spokane Chapter

The Producers' Council, Inc.

The Plastic Products Company has been elected to membership in The Producers' Council.

Mr. A. D. Covert, President, is Official Repretative and Mr. R. S. Collins, Vice President, Alternate.

New Books

The following comments concerning books of architectural interest are not to be construed as an endorsement by The Institute.

Town and Davis, Architects.

By Roger Hale Newton. Columbia University Press, New York—\$4.00.

The author is writing for those interested in Architecture. He rightly expects the reader to be interested in the history of Architecture in this country and believes also that he will be ardently curious as to the "modes" of its exterior habiliments, including all the accessories of an architectural toilette. The introduction will appeal to and repay the interested and the text should satisfy the curious.

The historical theme is that since 1825 America has been in the midst of a great Eclectic movement. The first phase was that of the Classic Revivals, the second an Experimental Stage and the third (still to be named) is now going on and likely to continue until 1975.

Along with this theme goes the belief that Messrs. Town and Davis were jointly and severally the cream of the Revivalists and certain illustrations make the reader rather wish they had remained so and stayed away from the Experimental Phase.

The frontispiece photo of the fine Center Church,

New Haven (there are few better of its type) strikes a note which only cuts of the architect's drawings, unfortunately gathered in the back of the book, do not repeat, at least not in the same key.

In this group of illustrations it is too bad to have the author's enthusiasm for his heroes or his Puritanical conscience, act as Othello to his critical faculties to the inclusion of much that the designers might have wished left unsaid, except perhaps the fact that they, in their day, did a great deal of extremely important work.

A. L. HARMON.

State Housing Agencies.

By Dorothy Schaffter. Columbia University Press, New York.—\$7.50.

The author, Professor of Political Science at Vassar College, has for several years concentrated on the study of State Housing Agencies and presents in detail a concrete description of the history of State Housing Agencies as a necessary preliminary to a reorganization of the present system of providing Governmental assistance to housing.

Conclusions and recommendations are presented with a view to making the State a more active participant in future programs.

An extended Bibliography is included.
