This Drexel designer has a split personality.

So has his unique Pan-World Collection for Hotels and Motels. Four different furniture styles, all in one group.

You'll like that.

Diversify! Offer your guests a Spanish room. And an Oriental. A French. And an Italian. And decorate each around one of the styles in Drexel's fabulous Pan-World Collection! Dimensions of any given piece are the same in all four groups so room planning is simple. And you can choose from a wide selection of pieces, all in elegant pecan veneers-furniture created with the famous Drexel quality at really practical prices. You can even add accent pieces from our popular household lines, if you like. For a free catalog showing full-color room settings of all four styles, write: Dept. L, Contract Department, Drexel Enterprises, Inc., Drexel, North Carolina

People walk all over Barwick

A hurricane drenched Barwick Acrilan® carpet that had not yet been walked on and it weathered the storm beautifully.

High winds and heavy rains pounded in through open areas of the nearly completed student residence at Old Dominion College, Norfolk, Va. The new Barwick carpet was saturated. Almost every square foot felt the battering effects of the storm. The next day mud was tracked in and ground into the carpet. Rust and furniture stains were apparent. An urgent call went out to Service-Master, a commercial cleaning company, to "save the carpeting!"

Over 3,000 yards of Barwick carpet were cleaned back to beauty on the spot. The rest was completely restored in the plant. Because of prompt action and the quick-drying, low moisture absorbency advantages of Barwick's Acrilan pile, all 5,000 yards came through the storm with flying colors.

Any time you are in the market for carpet, depend on Barwick carpet with heavy-duty pile of Acrilan acrylic, Chemstrand nylon, Du Pont nylon or Herculon olefin ... luxurious man-made fibers that are a lasting investment.

Available in scores of styles, textures, colors and exciting Colorset patterns, Barwick carpet is designed to meet the traffic, spillage, appearance and wearability demands of all types of commercial installations.

For information, case studies and Barwick carpet installations near you, write:

What'd he say?

They didn't hear the punch line of what was a great joke. Too bad. It could have been avoided so easily. A Howe round folding table instead of the oblong being used would have done it.

In contrast with the "mess hall" atmosphere created when oblong tables are used, Howe rounds make everyone feel in the midst of things. A set-up of Howe rounds creates the sort of warm, attractive atmosphere that enables banquet managers to turn prospects into customers.

Another important point: Contrary to popular opinion, a room equipped with Howe rounds usually accommodates as many diners as that same room equipped with oblong tables.

Howe rounds come in 7 sizes to accommodate 4 to 12 diners comfortably. Learn how to use these tables to create the kind of place that people think of first when it comes to making reservations for get-togethers. For the details write

Howe Folding Furniture, Inc., Dept. 25 360 Lexington Ave., New York, N.Y. 10017

How can a carpet cushion make a carpet feel like twice the price and increase its life?

B.F.Goodrich cushion does it with sponge rubber—the best there is. BFG carpet cushion not only makes any carpet feel like twice the price, it makes carpet last longer, too. That's because the completely uniform cell structure of its high-grade rubber ingredients gives it a unique plus in absorbing shock and resisting compression. All BFG cushion is guaranteed without time limit against defects in workmanship and material. It has the exclusive

Duraseal® finish that locks out dirt. And all BFG cushion is non-allergenic and vermin-proof. Cost can be reduced because you will not have to replace the cushion when new carpeting is installed. You'll find a BFG cushion for every client demand and price range. Several are shown below. For more information and samples, write: The B.F.Goodrich Company, Consumer Products Marketing Division, 277 Park Avenue, New York, N.Y. 10017. Or phone New York—922-5100.

when contract customers ask, "What's the BEST carpet fiber?"

THE ANSWER IS WOOL ... by

HARDWICK CARPETS

Because wool is the standard of excellence in carpet fibers, it's always used as a comparison. There are carpet fibers that feel like wool...look like wool...wear like wool. Like wool? Yes. But as they say — imitation is the sincerest form of flattery.

But imitations are just that. Second best. The Bedford Springs Hotel in Bedford, Pennsylvania wouldn't settle for second best. They selected all wool carpeting by Hardwick, the carpet manufacturer that backs up its all wool carpet-

ing with over a century of carpet-making experience. And because Hardwick is a compact mill, they have the flexibility to give you all wool carpeting in whatever construction in whatever pattern you need . . . whenever you need it. Hardwick's compactness means you get a bette edge on price, too.

On your next contract installation, do what H. Ross Wee of Bedford Springs did — put the first team to work for your all wool carpeting by Hardwick.

Send \$1.00 for Hardwick's new "Carpet Selector" . . In Hardwick's "Selector" are ACTUAL CARPET SWATCHES showing today's newest and most popular contract qualities to help you demonstrate carpeting dramatically, professionally and effectively;

In 1963 B.P.* restretching costs exceeded \$11,000,000

(*Before Poly-Bac)

A devastating statistic!

Poly-Bac expects to change all that. How? By its natural resistance to the major cause of restretching—humidity! (It is the affect of humidity upon the backing that can produce wrinkle or buckle.)

Because Poly-Bac is woven of polypropylene, it is impervious to humidity changes. Unlike conventional backing, Poly-Bac is not affected by natural moisture, nor by lingering dampness caused by "on location" shampooing or accidental wetting. Therefore Poly-Bac will not shrink or buckle. The result—more stable carpet!

The next time you talk with potential customers, tell them about Poly-Bac's stability.

And while you're at it, you might tell them about Poly-Bac's shampooing advantages. Since Poly-Bac has no oils or lignins (as found in conventional backing) there is no danger of oils bleeding through to stain the surface (browning). And Poly-Bac will not soak up water, so thorough rinsing (that expels all the dirt) and faster drying is possible.

Just a few more reasons why Poly-Bac is called the revolutionary tufting back.

Why don't you put the revolution to work for you?

"ROOMS OF TOMORROW" 1966

Designer-Architect team of Henry End, A.I.D., and Morris Lapidus, A.I.A., conceives "Room of Tomorrow" in a blend of comfort and advanced styling. The studio-size guest room is converted into one of drawing room proportions with Simmons Wall-A-Beds. No wonder: the retracted Beautyrest® mattress and Naugahyde covered box spring take up 75 per cent less floor space than the standard twin bed. "Room of Tomorrow" motif is accented by deeply tufted Naugahyde over Simmons-designed chair.

Washable, durable Naugahyde is shaped to the Simmons-designed sofa and chair. Latex foam cushioning. Deeply tufted. Sofa is russet. Chair is vermillion. Travelers approve with, "Plush comfort!" Innkeepers say, "Easy-to-care-for."

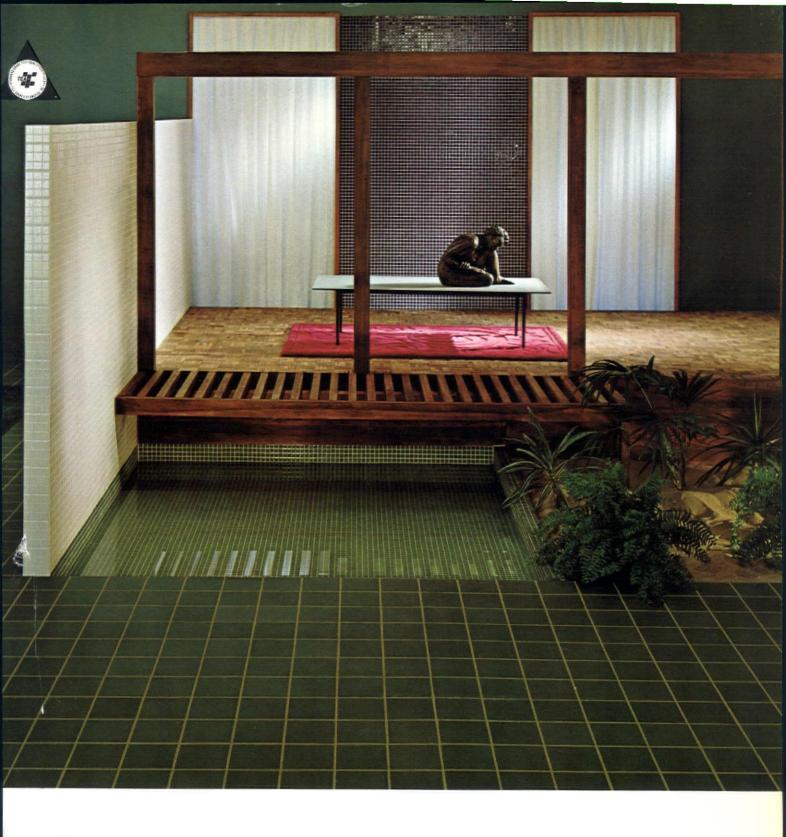

UNIROYAL

U.S. RUBBER

Coated Fabrics and Koylon Seating Department Mishawaka, Indiana. In Canada: Dominion Rubber Company, Ltd. Versatility. That's the word designers use to describe R Naugahyde. And it has never been more apparent than it is the "Rooms of Tomorrow." Designer Henry End, A.I.D., chose the hundreds of colors, patterns and textures of Naugahyde furniture, box springs and wall covering.

But, innkeepers like the practicality of Naugahyde best of It's so easy to keep clean with just the wipe of a damp cloth. A Naugahyde's durability makes it ideal to withstand the hard constant wear of motel and hotel living.

See U. S. Rubber at the National Hotel Exposition in the "Ro of Tomorrow" and Booth 2190.

No matter what kind of a mood your design is in, our tile will go along quietly.

It always does. Mosaic tile is the color-compatible tile. Any one Mosaic goes with every other Mosaic. The harmony is built right in.

Take the picture, for example.

Notice how the Bluegrass Green quarry tile floor

complements our pool of Faientex 1291 Green. And how the accent wall of Staccato 16 Royal Purple keeps its composure in the presence of our side wall of Champagne Glaze 1823 White (see inset).

Yet the big thing is that Mosaic tile colors go right along

with the most domineering (or delicate) accessories and materials. And willingly.

Even when you put Mosaic tile in the foreground, it stays in the background.

Check your Mosaic Representative, Service Center or Tile Contractor for price ranges of tiles shown, alternate colors, samples and availability.

See Yellow Pages, "Tile Contractors-Ceramic". Or you can write: The Mosaic Tile Company, 55 Public Square, Cleveland, Ohio 44113. In the western states for compatible colors: 909 Railroad Street, Corona, California 91720.

"Mosaic" is the trademark of The Mosaic Tile Company

Today's designer selects Alma for his finest offices.

He gets more than he bargains for.

And why not? A world leader in the manufacture of wood office desks can afford to give you more.

More in design, for one thing. Like our new 8000 Series, brilliantly executed in walnut, teak or rosewood, dramatically accented with mirror chrome or brass.

And remarkably priced.

You get more in quality, too. Big little differences, such as Oil Suede plastic tops that look and feel astonishingly like wood.

Or desks that turn into work stations at the drop of a stationery rack, hanging file, sliding tray or typewriter lift.

And you get more—much more—in service.

Alma's wider distribution means we maintain not one, but seven warehouses linked from New York to Seattle.

Plus a unique inventory system

that allows us to store the furniture for your installation until you need it. You never have storage problems, delays or incomplete deliveries.

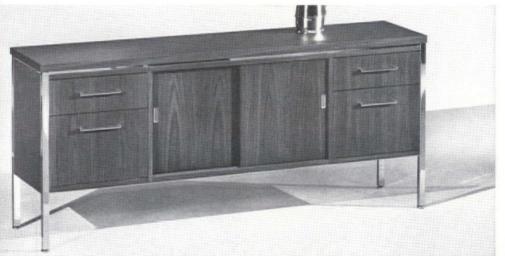

With a leader like Alma, you always get what you want, when you want it.

That's why you'll want Alma for your next office project.

But only if you want to get more than you bargain for.

WASHINGTON REPORT:

- Urban programs will aid hotels
- Roadside motels, restaurants still going strong
- Sampling of recent IB's

F you're interested in furnishing hotels and kindred space, you'll be benefiting from the many Federal plans and programs that will be affecting the work you hope to do in the next year, decade, and generation. Never before has the Federal government been so active in so many different areas that mean business to you. And, even more important in figuring your future, its participation will grow from now on,

View from the hotel-motel picture window: Federal for a variety of reasons. aid in many places and spaces. Downtown, urban renewal is uprooting the old and installing the new. This program is moving up in intensity, as more cleared land becomes available. Indeed, the biggest worry at the moment is not Federal aid but the presence of enough redevelopers to utilize the acreage. A prominent feature of many renewal plans has been new hotel and motor hotel facilities. With this stir, older hostelries find a need to polish more than their silverware—outright auctions of older furniture are

For areas that have been languishing laggardly in becoming rather common. this country's economic boom, there's now a permanent redevelopment agency, newly confirmed by the Congress. Tourism, which means rest, restaurant, and recreation facilities, is a key prop in plans for making poor, picturesque areas progress.

The new Economic Development Administration succeeds to the former Area Redevelopment Administration, which now and then stumbled in approving a hotel loan where other operations were less than busy; but the principle of aiding tourism remains.

Meanwhile, out on the road, as more byways become interstate highways, nobody who knows that wheeling makes dealing expects the ambitious Federal 90 percent-aid program to crash to a halt early next decade. More roads will be found to be essential, in need of enlargement. Where there are roads, there are cloverleafs; and where there are exits and entrees, there will be more motels and restaurants. And present ones in good locations will be doing more business. The Bureau of Public Roads expects that motor vehicle registrations will advance from about 90 million

CONTRACT

OUR WASHINGTON REPORT

CONTINUED FROM P. 32

the end of this year to 116 million by 1975, an expansion of three-tenths.

In addition, the new Department of Housing and Urban Development will show a pronounced bias for concentrated living arrangements. Its effect on housing will be to push for more multifamily structures. The trend to suburban apartments will step up. Aid to institutional housing will increase—for the elderly, for the college student. With this, the new Medicare program will spur nursing homes, and make the path easier for retirement communities.

U.S. reports savings from embargo

In January, President Johnson selected office equipment as the first line of defense in the war against waste in the Federal government. He ordered an embargo on non-essential purchases of filing cabinets, typewriters, and office furnitures. This has been made "permanent" in General Services Administration regulations. Now, the Government estimates that it has saved \$5.7 million in the first half of the year, better than the original target of \$5 million for the first year. These reported savings include \$2.1 million for filing cabinets, \$3.6 million for typewriters and furniture.

Furniture finishes forum

"Furniture and Interior Finish for Institutional Buildings" will be discussed at a regional meeting of the Forest Products Research Society Nov. 9-10 at Kalamazoo, Mich. This includes pre-finished wood based panels; motel, school, and hospital furniture.

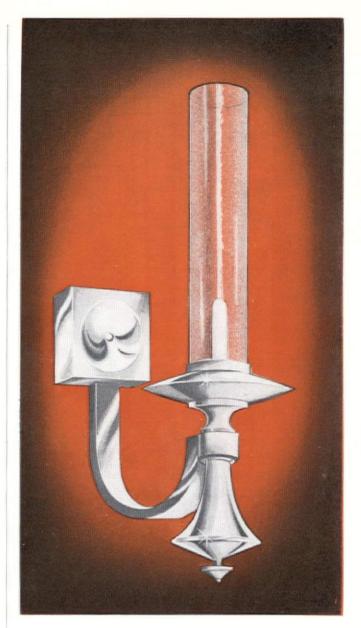

Federal procurement equals plus volume

You may find that getting a Federal contract award can help you smooth out dips in your own regular volume, or aid you in achieving new peaks in business. To get this, however, you have to go through the government routines—not the least of which is getting on the proper lists for notification of invitations to bid on items you are interested in. For an indication of the variety of procurement offices and their recent needs, here is a sampling of invitations, now closed:

General Services Administration, Seattle — Upholstered lounge chairs, 100 each; upholstered sectional davenports, 200 each. Walnut bunk beds, 200 each. Breakfast china cabinets, 103 each. Draperies furnished and installed at Madigan General Hospital, Tacoma, Wash.

GSA, Washington, D.C.—Wood living room and bedroom furniture, ranch style, 271 each. Wood and metal office furniture, Jan. 1 through Dec. 31, 1966, indefinite quantity. Wood and metal executive office furniture, Dec. 1, 1965 through Nov. 30, 1966, indefinite quantity. Rugs, 880 each. Steel folding chairs, Jan. 1, 1966 through March 31, 1967, indefinite quantity. Nonslip carpet, 297 each. Living room and bedroom wood furniture, ranch style, 2,575 each. Unitized walnut wood furniture, 796 each. Metal reception room

You can make any building look bette

38

vith PPG Feneshield fabrics

es that scene on the left look familiar? hould. It's typical of a building where dow treatment has gotten out of d. Result: an unfortunate mixture of ding devices, loss of clean architected lines, compromise of building deta, a generally unattractive impression. The exterior appearance of any buildown new or old . . . can be improved nensely through the specification of neshield fabrics, made of PPG eshield® fiber glass yarns, such as se shown above.

eneshield fabrics can be obtained in vide variety of weaves, colors, and erns to complement any building de-.. These fabrics present a pleasing earance at every window, permit a I flow of line from street level to top r, eliminate random vertical settings, and enhance the total architectural concept of any building.

But that's just one of Feneshield fabrics' advantages. These same fabrics can also control interior environment. Through PPG research, all Feneshield fabrics are performance-rated according to fabric characteristics. Through this Feneshield system, drapery fabrics can be chosen to subdue radiant heat, control glare, improve sound control, enhance a good view or modify a bad one.

What about costs? Over a five year period, total initial and maintenance costs for Feneshield fabrics are less than those for mechanical shading devices.

Get more facts. Participating drapery converters have authorized Feneshield presentations showing the wide range of beautiful fabrics now available.

It happened at the New York World's Fair-

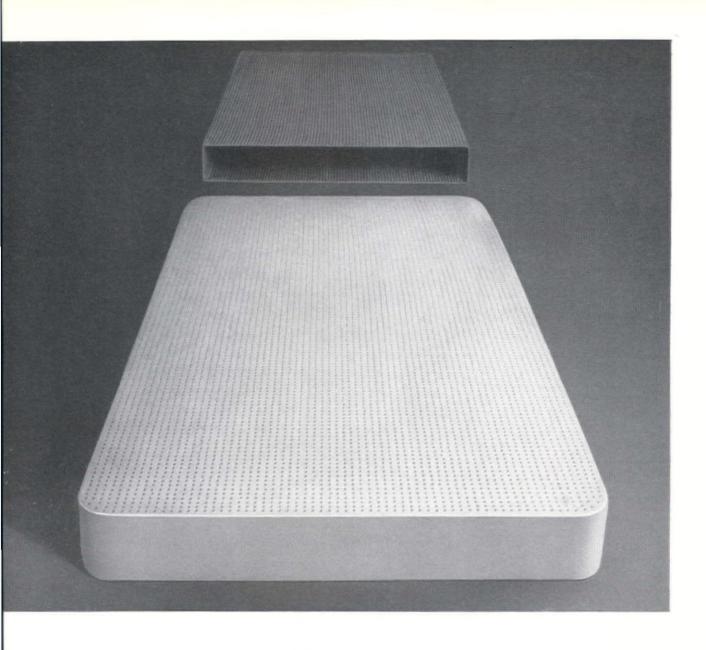

carpeting of Creslan® proved it can take heavy traffic and come up smiling.

To quote the manager, "More than a million people walked through our Formica World's Fair House—on carpeting of Creslan acrylic fiber. It would be hard to estimate how many chunks of candy, wads of gum, or bottles of soda landed on that carpet during that period. Workmen tracked in grease and tar. Spiked heels ground in the dirt. Naturally we were interested in what would happen to this carpet under these unprecedented conditions."

"Here's just what happened—with nothing more than ordinary maintenance, carpeting of Creslan kept its luxury pile and rich color day after day, month after month. It was always a handsome showpiece and a credit to the 'World's Fair House'." "...more than a million people" plus thousands of spills. That would be the end of most carpeting. But not carpeting of Creslan. Small wonder that even is the fine fiber family of acrylics, fastest growing it contract carpet, Creslan is a stand-out. For your next carpeting installation take a long, hard look at a acrylics. Check their traffic records. And you'll agree the choice is obvious. Creslan acrylic fiber is a product of AMERICAN CYANAMID COMPANY, NEW YORK.

CONTRACT BUSINESS: NOTES & COMMENTS

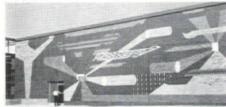

Century City complex

The rise of Century City in Los Angeles is opening up not only new building facilities to the region, but also a huge new business potential to the large number of suppliers and services that will be required to bring the multi-faceted project to a successful completion. A case in point is Western Service & Supply Co., which has just placed initial contracts for 52,750 square vards of carpeting to be installed in the Century Plaza Hotel prior to its opening in mid-1966, according to Charles Comstock, project unit manager. Still to be purchased for the 800-room hotel (designed by architect Minoru Yamasaki), are 362 square yards of carpeting, bringing the total yardage for the building to 53,112. Under the direction of Donald Robbins, AID, senior interior designer for Western International Hotels, 32 carpets were developed by Western Service & Supply. Four carpet manufacturers currently represented are Stephen Leedom Carpet Co., Mohawk Carpet Mills, E. T. Barwick Mills, and Sallee Carpet Looms.

Century City complex, because of its size, its diversified facilities, including business, industrial, and residential, and its significance to the contract industry not only on the West Coast but nationally as well, will be the subject of our Landmark Series #3, in a Spring, 1966 issue.

New World Carpet wing opened

Maker of moderately priced tufted carpeting, World Carpets, Inc., Dalton, Ga., has added a new 110,000 square

foot wing to its facilities. The wing, designed by architect Bianculli & Tyler, is on one level, providing continuous uninterrupted flow from raw materials to finished product and shipping room, and is 100 percent automated. Dominating the facade of the wing is a huge brick mural (see cut)—86 feet long by 26 feet high—designed by Mario Bianculli of the architectural firm.

Motelrama, 1966

Robert O. Burton, president of Robert O. Burton, Inc., interior and architectural design firm of Chicago, has been chosen to design the 1966 Motelrama Idea Room. The display has been a major feature of the National Restaurant Show for the past four years. The 1966 event will be held May 23-26 at McCormick Place, Chicago.

TV-phones at Englander

Two Picturephones have been installed at Englander Co.'s headquarters in Chicago, linking it to a network of 35 Picturephones in Union Carbide's Chicago and New York offices. Englander.

RESTAURANTS

Available in a wide range of decorator colors.

Ozite "Town 'N' Terrace" Carpet made with Vectra polypropylene olefin fiber is not just another floor covering in competition with those you already know. It's in a class by itselfan entirely new kind of floor covering with features other carpets just don't have. The result? It opens up scores of new decorating ideas never before possible with conventional carpeting. Check the assignments you're working on now. You'll be surprised how many ways you can find to add dramatic creative touches with this new carpet. Note that because carpet is unaffected by water or moisture, it's practical to install below grade directly on cement floors. Turn this page for details on the remarkable technical advantages of Ozite "Town 'N' Terrace" Carpet, the remarkable new outdoor-indoor carpet made with new Vectra polypropylene olefin fiber.

The Vectra Company · A division of National Plastic Products Company, Inc., Odenton, Md. · *Vectra is the exclusive trademark of the National Plastic Products Company, Inc. for its olefin fiber. Vectra makes fiber only, not fabrics or carpets. @ Ozite is the exclusive trademark of the Ozite Corporation, 7-120 Merchandise Mart, Chicago, Illinois, manufacturers of famous Ozite products for over 100 years. Ozite makes Town 'N' Terrace Carpet, not fiber.

Tests prove the superiority of Ozite Outdoor-Indoor Carpet made with Vectra* fiber over floor covering costing twice as much!

3.000 revolutions of abrasion test have \$11.95 retail acrylic carpet down to the backing!

But, the abrasion wheel (Standard Taber Abraser), which can quickly spin off years of hard wear, barely makes a dent in new Ozite Outdoor-Indoor Carpet made with remarkable new Vectra polypropylene olefin fiber. Ozite's unique manufacturing method permits the use of staple fiber of higher tensile strength than normally used in regular carpeting.

Fadeometer Test

100 hours

Acrylic 160 hours

100 hours

Polypropylene without stabilizers 216 hours

with stabilizers Over 2,000 hours

Most manufacturers of piece-dyed carpets try for 40 to 60 hours fade resistance. Even stock-dyed carpets strain to reach 200 hours. The special stabilizing chemicals used in the solution-dyed Vectra fiber enables it to resist ultra-violet rays -and permits Ozite to guarantee its carpet to withstand 500 hours of Fadeometer test without discoloration!

Stain Resistance

Polypropylene

Vectra polypropylene fiber is resistant to most harmful chemicals that tend to bleach and stain competitive products, including most acids, alkalies, salts, solvents, and oxidizing agents. Ozite Outdoor-Indoor Carpet resists spotting and bleaching from ammonia, chlorine, coffee, tea, soft drinks, shoe polish, merthiolate, mustard, catsup-practically everything, including the accidents of dogs and children. Insects and mildew do not attack polypropylene. Fungus growth is not supported by the fiber itself. It does not absorb moisture-can't shrink, rot, or mildew. And it's non-static and nonallergenic, too.

Competitive carpet fibers absorb moisture to varying degrees, up to 27%.

A filament of Vectra reacts to water much like a solid glass rod. The water rolls right off. Vectra olefin fiber has zero (0%) moisture regain.

Easy to install. Cuts with scissors or knife. Lies flat. Doesn't curl. No binding of exposed edges necessary. Does not need carpet cushion, tacking, or professional installation. And no adhesive is required. If desired, waterproof cement may be used outdoors. Indoors, doublefaced tape may be used, or cement if you prefer.

And it's a breeze to maintain! Can actually be hosed clean. Simple to patch. Because Vectra fiber is impervious to moisture it can either be scrubbed clean or vacuumed. It dries fast. And patching for cigarette burns (can happen to any carpet, you know) is easily done in minutes with a razor blade and leftover pieces-and it won't show!

Every claim guaranteed by the Ozite Corporation.

Write today for full information.

CONTRACT BUSINESS: NOTES & COMMENTS

a subsidiary of Union Carbide, reports that this is the first commercial use of the TV-phones other than those located at the telephone company's own Picturephone centers.

Footnote to Holiday Inns story

The article on Holiday Inns and its contract furnishing arm, Inn Keepers Supply Co., which appeared in our August issue, understated the yearly sales volume of both the parent firm and its subsidiary. Holiday Inns has been moving ahead so fast that its gross for fiscal 1965 is \$14 million ahead of 1964; the figure for 1965 is \$71,200,000 overall, and \$14 million for Inn Keepers.

New assignments . . .

Thalhimers Industrial Sales Corp., Richmond, Va., contract division of which Mr. H. E. Glave is vice president, has been awarded the contract for the interior design and furnishings at the first America House Motor Inn to be built by Richmond Hotels, Inc. Thalhimers contract division recently opened its new showroom building in Westmoreland Center, Richmond. . . . Henry End has received the design commission for the interiors of a new addition to Mt. Sinai Hospital, Miami Beach, that include public spaces, corridors, and patient rooms. Mr. End, who is also engaged in redesign of the Roval Poinciana Ballroom and the Keyboard Lounge of the Palm Beach Towers, will work closely with Morris Lapidus, architect for the hospital's new addition. . . . Maxwell Co. is currently at work on the design and installation of two collegiate housing projects; Farwell Hall at Northern Ilinois University at De Kalb, Illinois, is a group of privately financed dormitories that will ultimately add more than 300 rooms to the college facilities, and Master Halls at the University of Wisconsin in Madison. . . . Contract Interiors of Cleveland will design all room interiors, lobby, dining room, and cocktail lounge for the Hotel St. Regis in Detroit. Decor for the hotel is planned to be authentically French design, adapted by Fletcher Williams. . . . Morton Textiles & Furniture has the urnishing and design contract for a complex of seven dormitories to provide housing for 900 students now unler construction at Southern Illinois University. The facilities will include swimming pool, tennis courts, public areas, and a commissary. . . . Design/ Planning announced the following projects on their current San Francisco design slate: Hiram Walker Inc., new executive offices on the 28th floor of the Hartford Building; Batton, Barton, Durstine & Osborn offices also in the Hartford Building; and the new three story combined office and warehouse building of the H. R. Basford Co. . . . Richard Plumer Business Interiors has been commissioned to design and furnish the offices of the Canadian Gulf Lines Shipping Co. in the new Port of Miami office building on Dodge Island, Florida. . . . Dorhmann Co. will

provide complete interior design and furnishing of Tod's Restaurant in Redlands, Southern California, to be completed in the fall of this year. Jack Grotweil is the designer of the structure that will include an outdoor, heated patio, and feature a volcanic rock and colored glass panes exterior at the ends of a soaring, slate roofed "A" frame. Dohrmann's San Bernardino contract department is handling all phases of the planning of the food facilities. (**C**)

CONTRACT NEWS

DESIGN CENTER BUILDING in Los Angeles marked its first anniversary in June. MARTIN LOWITZ is owner of the building which houses the International Design Center on its first two floors.

SHELBY WILLIAMS INDUSTRIES, INC., Chicago, has purchased substantially all of the outstanding stock of Duo-Bed Corp., Wichita, Kansas, for an undisclosed price. The announcement was made last month by Manfred Steinfeld, president of Shelby Williams. Duo-Bed, a leading maker of convertible bedding units and casegoods for contract and residential use, recorded sales in excess of \$2 million for the year ended May 31, 1965. Its modern plant in Wichita has approximately 200,000 square feet of manufacturing space. Shelby Williams is a major producer of seating of all types for restaurants, hotels, and other commercial installations, whose sales are expected to exceed \$10 million for the current year. The Duo-Bed operation will be expanded and a substantial increase in the new division's sales is expected.

AIRCO PLASTICS PRODUCTS has appointed MacPherson Brothers, San Francisco, Calif., as west coast distributors for the complete line of Federan vinyl-coated upholstery fabrics and wallcoverings.

GENERAL LIGHTING Co., INC. and EMERALITE Co., INC., both of Brooklyn, N. Y., have merged with the NL Corp. of Cleveland, Ohio, producers of custom designed, stock commercial, and ecclesiastical lighting fixtures.

MAXWELL Co. has taken over the management of Straus-Duparquet, Inc. The arrangement will not involve Albert Pick, Inc., an S-D subsidiary.

BERKSHIRE-HATHAWAY INC., will be the sole distributor of Eastman's Chrometta, the acetate lining of chromspun yarns used as a drapery and fabric liner, through its Home Fabrics Division.

DESIGNCRAFT, manufacturer of wood and metal office furniture, has opened a New York showroom in the Decoration & Design Bldg., 979 Third Avenue.

LOUMA FABRICS, INC., of San Francisco, has been renamed FRANCISCAN FABRICS and will produce quality hand-screened prints for the trade. Kneedler-Fauchere will represent the company in the thirteen Western states.

ROBERT JOHN Co., contemporary furniture makers, has acquired a 42,000 square foot factory to produce the Pennwood Group.

Howe Folding Furniture, Inc. has completed a major addition to its So. Norwalk, Conn., plant which is expected to represent a 60 percent increase in production areas.

LASKEY CARPET Co. has been named exclusive distributor for Deltox, Inc. for New England.

Creative ideas in glass:

New line of glass doors shows versatility and trim good looks

ASG's economical Series 1000 Securit® Interior Doors enhance two commercial interiors with widely different functions. Designs by The Maxwell Company, Inc., Miami, Florida.

Restaurant waiting lounge effects a tasteful interplay between contrasting styles. Delicately curved French provincial furnishings are staged against the crisp simplicity of Securit doors and wall panels of Beadex® patterned glass. Wood-framed glass panels above doors are inscribed to indicate dining room and bar area. Translucent Securit doors carry through the expansive effect created by the glass wall and transmit a hint of image that visually relates each room to its neighbor.

Corporation interview area firmly states the company's businesslike image to prospective employees. To smooth the flow of incoming and outgoing traffic, the double Securit door (center) is hung so that one door opens in only, the other out only. Walls and partitions of Randex®, a patterned glass with random spaced ribs on one side, allow for the economical sharing of light from recessed ceiling fixtures. Satin chrome door hardware matches finish of aluminum framing system.

Series 1000 Securit Doors are %-inch fully tempered glass. A light-diffusing, image-obscuring Muralex® pattern on both sides gives the doors a surface texture that complements a variety of materials and color schemes. Series 1000 Doors are available with dull bronze or satin chrome hinge and lock housing, and in three standard sizes for wood and metal frames. For detailed information about Securit Doors, and the complete line of ASG interior glasses, write: Dept. X-10, American Saint Gobain Corporation, Box 929, Kingsport, Tennessee 37662.

The complete glass line for contract interiors!

sometimes.

Good old natural sunlight is all right in its place. Outdoors. But there's no switch on the sun. So in a motel or hotel where airline pilots have to nap at high noon and sleepy guests like to slumber late... or in a school or conference room where audio-visual equipment may dictate instant darkness ... unwanted natural light can be a problem. The daylight dilemma was never satisfactorily resolved until Hathaway Fabrics came up with Opaqueen®. Opaqueen provides effective insulation and total light control. It is available in a flameproof finish. It is dry-cleanable by any method. It comes with white or silver backing. It's so unique we've registered and patented it. And now Opaqueen has a new exclusive. Print patterns are available for the first time. The only print blackout draperies on the market. Write us at the address below and we'll send you swatches of Opaqueen. When you get them, do us a favor. Hold one in front of your eyes and look up at the sun. We think you'll see the light. Because you won't see the light.

CONFIDENCE

BRAND,

Whee...the answer is Risom...again!

Once upon a time there was an executive who wanted to be hard-working.

But he couldn't. He was always tired and morose.

"I don't blame you for being tired and morose," said Hilda, the office maid. "Your office is dull and depressing and your chair makes my back ache."

Then one day an interior designer came into his life and brought Risom furniture. "It looks good," said Hilda. "Let me give it the test," she added, putting her tuna

and coffee on the desk and settling into the chair.

"Wheee!"

As for the executive, he's hardworking, happy and successful.

Nuts and bolts note: The strong handsome "Risom look" is born of a simple uncluttered form that follows function. The chair (1343) is one smooth wrap-around shell that's molded and cushioned to follow the natural shape of the body and upholstered in the finest leather. The desk (from group nine E) doubles as a conference table. Hand sanded and hand rubbed in linseed oil or lacquer... again and again...the magnificent natural walnut makes for a wonderful working surface.

See the "Risom look" in furniture at our showrooms nationally.

Until today there were only two ways to cover an office floor.

The hard way.

The soft way.

Now there's the right way. Densylon.

And the designer*, executives, secretaries and maintenance people of the Jewel Tea Company love it

The secretaries love it because it makes the "pool" such an attractive, quiet, warm place to work in. It has the feel, the look, the hush of beautiful carpet. Not hard and skiddy and noisy like those high polished floors yet chairs roll over it easily (because Densylon has a tough, dense, smooth Caprolan® nylon pile bonded to a cushiony " slab of B. F. Goodrich sponge rubber).

The executives love it because it's a godsend not to hear high heels clickity-clacking down the halls.

The maintenance people love it because it costs only about half as much to maintain as hard floors **. One man, one vacuum, once a day. For 50,000 square feet! Spills-even permanent ink, carbon paper -sponge right off. Washes easy as tile too, but only needs it about once a year.

The comptroller loves it because it holds down insurance costs. Heating costs too. There's far less danger of lawsuits from people skidding, like on hard waxed floors.

The designer loves it because it performs as promised. Doesn't get that drab, tired, worn look. Doesn't show traffic lanes. Or crush marks-from chairs, tables, high heels. Aesthetic and utilitarian. Eliminates the frustrating restrictions of the "practical" vs. "luxurious" areas-an unprecedented opportunity for more freedom of design...more unity of expression. What's more, Densylon maintains a staff of specialists to supervise installations from start to finish.

The management loves it because it costs nothing. Pays for itself with savings in maintenance alone. Creates a fine image too. Less institutional. Good business.

Bruce Posey, Jewel Tea's Office Service Manager must love it or he wouldn't have approved it. For the entire building,

Densylon doesn't do things the soft way. like carpet. Or the hard way, like tile. It does things the right way like Densylon.

Densylon won't crush, pill, fuzz, lint, buckle, ripple or shrink like carpet .. never needs restretching, and doesn't need constant washing, waxing, stripping, like tile. Allied Chemical's high density continuous filament Caprolan® nylon yarn is the toughest, strongest, dirt and stain resistant known to man!

That's why you'll find Densylon in thousands of offices, department stores, restaurants, hotels, motels, apartments, houses, churches, temples, theaters, banks,

And thousands of unexpected places such as drugstores, cafeterias, supermar-

Caprolan nylon by Alled

kets, automobile showrooms, restaurant kitchens (Densylon's creating a revolution in residential kitchens too), hospitals, nursing homes, schools-even airport outdoor passenger loading ramps!

To get the whole exciting story, send for our Fact Book-"DENSYLON-Breakthrough in Flooring Technology!"

You'll love Densylon too.

Cape Cod, that windswept fishhook of sand dunes and salt marshes jutting out into the Atlantic, is vacationland for countless Americans. Every year, thousands flock to its magnificent beaches and quaint villages, looking for the true flavor of seafaring New England. Everywhere on the Cape, in hotels, motels,

in restaurants that specialize in wonderful seafood, you find Astra Solid Hard Rock Maple Furniture. For what could be more truly New England than this sturdy Vermont-crafted furniture. Even Astra names smack of the sea — the sturdy Captain's Chair, the versatile Mate's Chair, the handsome Admiral's Chair, and a whole fleet of genuine Early American chairs, tables, and bar stools. Every one is built taut as a Yankee clipper, of northern hard rock maple. Deeply saddled seats with hand-pegged and wedged

legs and armposts, steamcurved backs, steel-pinned joints — these are the cabinetmaking details that keep Astra chairs shipshape season after season. Chart your course to Astra. Send for our brochure.

Lytespan. The one track for the best connections.

Lytespan track has the smallest cross-section: $1'' \times 1\frac{1}{9}''$. Comes in 4' and 8' modules. Turns corners with a 90° connector—no bulky junction box; no change in cross-section.

Clip Lytespot to track anywhere. Thumbscrew engages mechanically—simply loosen to slide along track to new position. Lever engages electrically—just turn to disconnect for on-track storage. Flexibility. With the cleanest look possible. That's Lytespan. Run it straight. As far as needed. Curve it. Turn corners. Run Lytespan on a surface. On stems. Recessed. Run Lytespan on walls (vertically or horizontally). Extruded anodized aluminum looks clean any way you mount it. Anywhere...because all fastenings are concealed. Lytespan accepts these 3 and 25 other Lytespots... for flexible focal lighting, vertical surface illumination, and general lighting. Interchangeable color filters, spread lenses and heat filters fit most fixtures. Wattage ranges from 25-watt pencil spots to 500-watt floods including Cool-Beam lamps. Accessories, such as a built-in dimmer control for Lytespots and a pendant adapter for Lytespan, add practical versatility. That's the long and short of Lightolier's Lytespan. Literally. See Yellow Pages for nearest Lightolier distributor, or write to Lightolier, Jersey City, N. J. 07305 for brochure 40-A.

The !! 9x !! dirt and the !! 9x !! static.

Lees didn't use a new kind of witchcraft.

Just a new kind of nylon. Antron*

It's why our new Design III carpet doesn't pick up the cursed dirt as fast or show it as much as regular nylon.

So you don't get a carpet that looks like a dirty shame, after a day on the floor.

You don't get as much static to swear at either. Ever.

Design III gives you less than any nylon carpet before, because it's the first with a permanent anti-stat. Not just a chemical coating, but an actual part of the fiber. It won't wear out or walk off.

In fact, Design III won't act like any other nylon carpet ever has before. Except.

Except for the way it wears.

Lees wouldn't change that for anything.

If anything, we improved on it.

We gave Design III an extra tough double jute backing. And 63 inspections to make sure there were no skips and misweaves. No weak spots that could fall apart in a year. Nothing that could turn into a curse later on.

Not a ¹'®∗!! thing.

If you'd like to learn some new words to use about nylon, write Commercial Carpet Department, James Lees & Sons, Bridgeport, Pennsylvania.

LEON GORDON MILLER ASSOCIATES: FROM

INDUSTRIAL DESIGN TO THE PLANNING OF OFFICES, RESTAURANTS, LABORATORIES, AND HOUSING COMPLEXES

Prescott & Co.: reception lobby of the brokerage firm has a quiet dignity befitting the firm's line of business.

T is difficult to pin a label on Cleveland-based industrial designer Leon Gordon Miller. His activities range from restaurant interiors to the development of new laboratories for the teaching of medicine and the planning of entire city blocks.

As president of the Industrial Designers' Institute in 1961, Miller explained to young school children that his is a profession of problem-solvers. "Business, industry, institutions and public services of all types feel the pressure of new demands in order to meet the needs of our fast changing world," he reported. "The industrial designer's job is to solve the problems of the growing pains of our society on almost every level."

The main requirement of the job is to have the ability to absorb and understand what is normally everybody else's business. This may mean an understanding of the technology of an entire industry, from the raw materials through the fabrication process to distribution and sales. In finding a realistic solution to the problems that face his client, the industrial designer may use all the paraphernalia of the graphic arts including drawings, photographs, and models, but these are simply the tools of communication.

"Industrial design is chiefly a thought process, not a drawing process," warns Leon Gordon Miller. "The designer is employed to find solutions to basic problems; his use of graphic materials is only a means to an end, not that end in itself. No other field is oriented in quite the same way."

The industrial designer's abilities are so unique, says Miller, that he sometimes lands a job by default, because no other profession can offer so complete a problem-solving package. "Just as important is the fact that we can step into the picture in almost every area of operation and at any level," he continues. "For example, we can design a product, design a machine to make that product, or lay out the space where the machines are to be installed to make this same product."

A partial list of clients served by the Leon Gordon Miller Associates staff offers many ex-

Director Leon Gordon Miller (standing) reviews a design project with senior associates, William Neuman, Roger Van Dyke, Jack Dooley, and Robert Shaw (left to right).

amples of just this point. Included are a wide range of design and problem solving activities from simple interiors to the development of whole new concepts to help the physical world serve man's needs better than it has in the past. For example:

The interior design of the fabulous Theatrical Restaurant in downtown Cleveland and the remodeling of the suburban Golden Bowl restaurant. Remodeling the main offices of the Third Federal Savings Loan Association, the interior design of dining areas in the Central National Bank of Cleveland, and the creation of a new store front for B. R. Baker Co., a downtown retailer.

Leon Gordon Miller Associates, Inc. does not design the apparel manufactured for young adult women by Bobbie Brooks, but it does design the firm's offices and showrooms, its three-dimensional marketing displays, and its packaging. Further, the Miller organization is involved at one or more levels with the companies that produce such nationally known products as Formica laminates, Mosaic panel walls, Taylor chairs, and St. Charles laboratory furniture. Other well-known clients are General Electric, General Plastics, Campus Sportswear, Marathon Oil, and World Publishing Co.

Where the industrial designer really shines, however, is when he is handed a truly complex problem involving a wide variety of variables and asked to come up with an over-all solution. When he is brought in at the inception of the project, the industrial designer is usually faced with his most demanding challenge as a problem-solver.

The development of new teaching methods at Western Reserve University's School of Medicine is a case in point. Here Leon Gordon Miller was brought in to assist in the design and planning of the laboratory equipment. When Miller walked in, the normal practice had been to assign different laboratories for each department in the school, with the student moving from lab to lab

Bobbie Brooks Inc.: graceful arcs serve as the unifying design element for the firm's regional show-room in Atlanta. The arches define the area of the sales alcoves, form the structural support of the reception desk, and are repeated in the panel dividers. Floor to ceiling drapery in the sales alcoves close the areas for privacy during special presentations and showings.

as he takes the various courses. When he walked out, Leon Gordon Miller had changed the basic concept of this system right down to the plumbing, creating a new name for the world of medical education, the "multi-discipline laboratory." Instead of students moving from one lab to another during their years at the medical school, each is assigned to one lab place for his permanent use all through his education on a 24 hour a day basis, seven days a week, regardless of what course he happens to be taking at the time.

A publication of the School of Medicine reports that visiting delegations from all over the world have come to Cleveland to tour the laboratories at an average of two groups a week. The new "multi-discipline laboratory," which did not exist before, has now become a standard unit of teaching equipment virtually everywhere. Medical institutions throughout the world are patterning their own laboratories on the Western Reserve model.

In the wake of the success at Western Reserve, Leon Gordon Miller was then asked to tackle a planning survey for the Vanderbilt University School of Medicine at Nashville, Tennessee. Basic to this type of development, of course,

Central Cadillac Co.: this executive office is planned as a subtle display background for the president's growing art collection.

is the element of space planning. In the midst of a good many misunderstandings over exactly what the industrial designer does for a living, space planning has emerged almost as a specialty field in itself.

Miller feels that space planning as such may be the spinal column to the nerve center of our fast growing economy. With at least 65 percent of his firm's activities wrapped up in interior planning of one sort or another, it is the sense of "space value" that must be communicated to the client wherever machines or people or furniture are involved.

To the general public, however, Miller feels that the industrial designer still has not lost much of the lustre of the impractical visionary in a Buck Rogers world. Too often a prospective client may think of the designer as a dealer in the gimmicks and gimcracks of the comic strip of the mid-thirties suddenly come to life.

Obviously Miller wants to see some tarnish on the glitter of this image—a few nicks and scratches from hard use of the profession itself. Toward this end, for example, he will take himself out on a cold night to lecture a Kiwanis gathering as readily as to a group of colleagues. He drags with him an assortment of diagrams and photographs mounted on sticks as if to picket the loopholes in worn-out concepts.

In a sense the concept of space value in planning illustrates the interchangeability of space into other values. Square feet, for example, can be converted into the minutes it takes to get people or product from one area to another, and by the same token these minutes can be converted into man-hours and dollars-per-man-hour.

Leon Gordon Miller points out that some 50 percent of his firm's activities are involved in these engineering aspects of space planning. There is, however, a certain broadening of scope for the industrial designer as he is brought further and further into the planning picture. At the earliest stages of a project, for example, the planning of space as such broadens from laying out the form of the space to laying out the form of the project itself.

For the commercial client this may simply involve a feasibility study to determine if such a project is practical, and if so, what form the project should take.

"Actually the size of a project—it could be a planned move to a new location or simply remodeling the old plant—has little to do with the need for such a study," says Miller. "The over-all costs could run as much as \$5 million or more or as little as \$5,000 for the entire project. In

Tremco Mfg. Co.: spacious lobby of this manufacturer of industrial finishes in Ohio incorporates buff brick walls, clear glass and framed translucent panels with clean lined, contemporary furniture.

Marathon Oil Co.: Personnel cafeteria is planned with bold colors and teak panel dividers to provide visual interest and give a suggestion of privacy. A double lane cafeteria facility expedites food service for the company's 400 employees.

WHERE DOES THE CONTRACT DESIGNER FIT IN?

Is the contract designer, with his own design department, a direct competitor of the industrial designer? Leon Gordon Miller says he needn't be. "When the industrial designer steps in, the contract firm need not step out," says Miller. For example, his office has often been brought in as consultant by offices that earn their income from the profits of sales in furniture and equipment. The client pays the fee, but the main fear of the dealer is that he will not be able to supply the exact lines that may be specified. Miller points out that this may happen more and more in the future as contract furnishings for larger institutions, business, and industrial customers become more involved. "In such cases where specific lines are not available to the contract designer on the job, we obtain the furnishings through our own sources and see to it that the contract firm receives its full, fair profit," Miller concludes.

OCTOBER 1965 75

fact, in many cases our fee is the most expensive part of the job."

The feasibility study is aimed at justifying the expense by taking the guesswork out of planning. There are instances, of course, where the study would indicate the project inadvisable. But the fact that the industrial designer becomes a part of the project so early in the planning brings to his task a new, broader dimension. With the feasibility study for an institution, for example, the study itself becomes the plan.

The Urban Renewal Program calls for planning at a rather high level. The lack of good planning can kill off a project or create costly delays that accomplish the same end. An example of such a failure was a six block area obtained for development under the Urban Renewal Act in New York City, with completion scheduled in five years. Six years later construction had not yet begun and the promoters were so heavily in debt to the city that the entire project had to be abandoned.

The point, of course, is that the success of anything is implicit in its design or in its planning, and to the industrial designer the two words mean the same thing. Designing a chair, for example, is much the same sort of job as designing a building project. Certainly it cannot be denied that the success of either depends a good deal less on such details as brick, mortar or steel and plastics than it does on the over-all thought behind the over-all job.

In reality, then, the industrial designer's job is to approach his client's problems from ground zero, from the very inception of the plan, if this is at all possible. Once he works out a desirable plan, his next task is to communicate it to his client. Quite often the best way to do this is with a model or with scale drawings.

"In my own office we use all the tools of the graphic arts, but simplicity always takes top priority," Miller explains. "We do not write a solution if we can tell our client the answer. We do not draw a solution if we can write the answer.

Mosaic Tile Co.: a colorful mosaic tryptich and rug from Edward Fields provide the focal point for the reception area Club chairs, also custom designed by Leon Gordon Miller, were made by S. J. Campbell.

We do not make a model of the solution if we can sketch or draw the answer."

The method of communication is not as important as the idea itself. An idea, of course, is not a thought alone, or even a concept. Perhaps it can best be explained as a thought in action. Planning is putting a thought to work. The wrong plan can doom a project; the right plan can make a success of it.

The industrial designer plans his project by taking all factors into consideration. This is quite different from the architect or the interior decorator. The architect may be given the task of designing a building, but he is not asked to decide if such a building should or should not be built.

A case in point is the Cleveland Health Museum Development Program. The museum was the first of its kind in the United States and the forerunner of all the health museums in the country today, but it is housed in an ancient structure with replacement of the building long overdue. As consultant, Leon Gordon Miller was brought into the picture. Ostensibly all that was involved was a new museum building, but Miller saw that the project would stand a better chance at survival, including the gathering of funds, if it could be worked into the over-all urban renewal picture.

Since the urban renewal agency had no extensive plans for the area as yet, Miller felt free to enlarge on the needs of the museum for a new building and think more in terms of the community as a whole. The result is Health Square, a grouping of health agencies and institutions, including the museum, into a geographical complex of small buildings placed harmoniously about the landscaped area.

A major factor in the new project, of course, will be that it will be quite a bit easier to collect funds for Health Square than to collect funds for the museum alone. To an institution, in fact, the very existence of the project depends on the ability to obtain funds. In a sense this ability becomes an aspect of form and, as such, the influstrial designer as planner is concerned with this important, basic dimension.

This same dimension exists in the commercial and industrial design world as well. A product has this extra dimension in its ultimate sales uppeal. A restaurant or department store has to own related values in these terms. The influstrial designer, then, becomes an engineer in verything, and Cleveland's Leon Gordon Miller its the role admirably. (C)

Cleveland Institute of Music: the student lounge of the Institute is arranged in spacious groupings of contemporary seating in a gold and marine blue color scheme. An abstract expressionist painting relieves the austerity of the walnut paneled wall.

Custom designed furniture by Leon Gordon Miller runs the gamut in contract furnishings, from many varieties of chairs, to tables, desks, rugs, and custom cabinetry. Practically every project designed by the firm presents an opportunity for special pieces that eventually find their way into a manufacturer's standard lines.

NATIONAL HOTEL & MOTEL EXPOSITION

CELEBRATING ITS GOLDEN JUBILEE NOVEMBER 8-11 AT THE NEW YORK COLISEUM WITH Hundreds of Displays, the annual show is previewed in this issue with program of Events, exhibitor list, new products, rooms of tomorrow, and designs for dining

PROGRAM OF EVENTS

Monday, November 8

8:30-10:30 A.M. 1966 Room of Tomorrow, Press Preview: fourth floor meeting room,

Coliseum.

10:00 A.M. Official Opening of Golden Jubilee National Hotel & Motel Exposition:

Grand Foyer, Coliseum.

10:00 P.M. Exposition closes.

Tuesday, November 9

10:00 A.M. Exposition opens.

10:30 A.M.-Noon "Public Spaces in Public Places" Forum, sponsored by Interior Design

Magazine: fourth floor meeting room, Coliseum. Moderator: Harry V. Anderson, editor-publisher, *Interior Design* Magazine. Panelists: Henry End, Henry End Associates, Miami. Lee Jaffe, Restaurant Associates, Inc., New York. Richard Kramer, Integrated Design Associates, Beverly Hills. Morris Lapidus, New York. Carleton B. Varney Jr., Dorothy Draper & Co., New York. Tom Wells, Holiday Inn, Design

& Decor Dept., Memphis, Tenn.

10:45 A.M. "Impact . . . Cycle of Replacements" Seminar, sponsored by Hotel

Management Review and Innkeeping, Clissold Publishing Co.: United

Nations Room 324, Coliseum.

2:00 P.M. "Motor Hotels During the Next Fifty Years," first session of Motel,

Motor-Hotel Conference: fourth floor meeting room, Coliseum. Chairman: Stephen W. Brener, vice president, Helmsley-Spear Inc., New York. Co-chairman: Alice L. Patterson, president, Patterson Publishing Co., Chicago. Panelists: Morris Lapidus, Morris Lapidus Associates. Henry End, Henry End Associates. Ernest Henderson, III, president

dent, Sheraton Corp. of America.

6:00 P.M. Exposition closes.

Wednesday, November 10

10:00 A.M. Exposition opens.

2:00 P.M. "Motor Hotels During the Next Fifty Years," second session of Motel,

Motor-Hotel Conference: fourth floor meeting room, Coliseum. Chairman: Stephen W. Brener. Co-chairman: Alice L. Patterson. Panelists: William B. Ward, Jr., executive vice president, Wilbur Clark's Crest Hotels. Wallace Johnson, president, Holiday Inns of America. Kemmons Wilson, chairman of the board, Holiday Inns of America.

6:00 P.M. Exposition closes.

Thursday, November 11

10:00 A.M. Exposition opens.

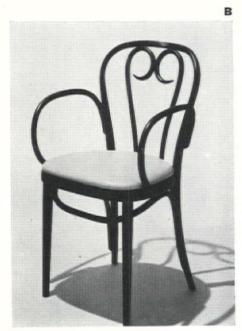

6:00 P.M. Exposition closes.

PRODUCT PREVIEW: A QUICK LOOK AT A NUMBER OF FURNITURE AND FURNISHINGS LINES TO BE SHOWN AT NEXT MONTH'S NATIONAL HOTEL & MOTEL EXPOSITION IN NEW YORK

B Thonet has modified its classic Vienna bentwood chair by varying its back support with a scroll design, replacing the looped one-piece of the original. Both side chair and armchair versions combine light weight with strength. Circle No. 141.

A Kroehler's fully upholstered space-saver

chair, specifically designed with the small

hotel-motel guestroom in mind, occupies a

floor area of only 24 by 26 inches. Con-

structed on a kiln-dried hardwood frame,

the chair is double-doweled. Circle No. 140.

D Another Brody design features a new sculptured cast aluminum base, which can be specified on a number of swivel chairs in place of the regular welded steel base. Circle No. 143.

. F Two wall sconces in Finesse Orignals' extensive collection of Fiberglas acessories are durable, lightweight, and dapt to either indoor or outdoor use. Ithough most items are offered in several nishes, custom finishes are provided at no xtra charge. Circle No. 144.

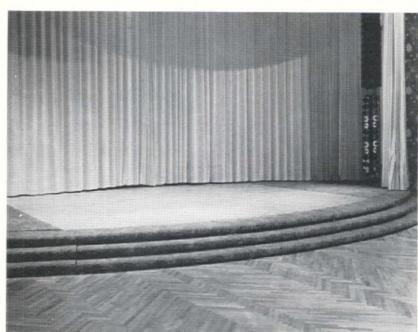

Sturdily constructed of beech hardwood, ing Arthur's captain's chair can be rdered in any finish desired, with a wide hoice of vinyl upholstery. The same chair also available with a swivel base. Circle o. 145.

Spacemaker, Englander's convertible eep-sit unit, fits compactly in a guestom corner and converts to a pair of 80nch-length beds. For daytime use, a free anding bolster covered by four back ushions runs the length of one wall. Gaily pholstered Valencia is one of six in the ew Encompass Collection. Circle No. 146.

A versatile addition to function rooms, ico's portable stage fits together like uilding blocks, yet is strong enough to old a car. It is constructed with a structral steel frame and vinyl asbestos tile eck with steel edging. A special proscentm for lights and draperies will fit any ombination of Sico stage or choral riser nits. Circle No. 147.

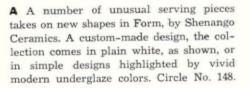

G

- **B** When closed, Acme's Debonaire unit is an attractive piece of furniture that encloses a 5-cubic foot porcelain-lined refrigerator, 25 pound freezer, two-burner slide-out electric range, stainless steel sink, and storage cabinet—all within compact measurements: 39 inches wide, 36 inches high, 25 inches deep. Circle No. 149.
- C Mariner's Chair by Astra is crafted entirely of solid northern hard-rock

maple, hand rubbed and waxed in a deep rich spice finish. The scrolled backrest is pierced with an ornamental hand grip; knurled armrests are trimmed with antiqued metal rosettes. Circle No. 150.

- **D** Companion to a dining chair, L&B's barstool includes a return-swivel mechanism in its frame of tapered heavy-gage steel. For added durability, all points are welded. A choice of elastic-backed vinyl covers thickly foam padded seat and back. Circle No. 151.
- **E** Cast aluminum forms a trim pedestal base for Rachlin's new barstool, topped with an upholstered seat in a wide color choice of Delta vinyl. Circle No. 152.

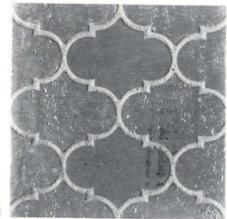

There are numerous variations to Philnar's standard twin-arm lamps, including ne three shown here. Combinations of eramic, metals, and woods produce an xtensive line in wide color ranges, from oft hues to vivid tones. Shades are ither opaque parchment of textured fabc, with a choice of trim. Circle No 153.

Featured in Room of Tomorrow exibit, Nessen lamp sits solidly on a square, ighly polished brass base, topped with a hite linen shade. Circle No. 154.

hateau (H), a new edition of old French ience tiles in 12-inch squares, is paterned with deep-gouged grout beds. Lajorca (I) simulates cork bark in ranom striations, in shades from light cork rough natural, nutria, and espresso. ircle No. 155.

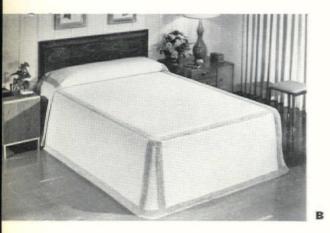

La Via, American of Martinsville's rench-Italian Classic, will be showcased a special setting by Richard Kent. Anher room setting will debut an 18th Cenry English group, aimed specifically at e refurbishing market with a number versatile pieces, including a 114-inchiplex wall unit. Its elegant, formal look distinguished by highly figured magany veneers in a hand-padded and stressed brown-toned mahogany finish, ase tops and edge bandings are in matchg plastic laminate. Circle No. 156.

HOTEL-MOTEL SHOW PRODUCT PREVIEW

C

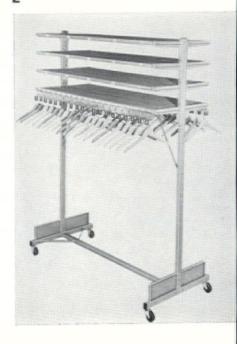

A With the installation of specially designed toilet partitions, this ladies' powder room takes on a new look and a utilitarian aspect inherent in the permanent qualities of laminated plastic. The complete product package by Formica offers unlimited colors and numerous designs, such as Wildflower, repeated in wall and cabinet surfacing. Circle No. 157.

B For the maintenance-minded executive housekeeper, Morgan Jones' flat-woven bedspread of cotton and rayon is machine-washable and tumble-dried, comes preshunk and lint-free. Mosaic Tailored, with a small geometric design, fits standard and oversized beds. Circle No. 158.

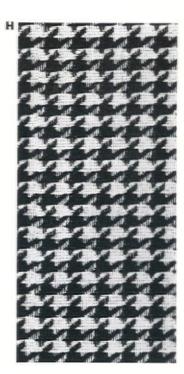

C, D Commercial Carpet Co.'s Starlite (C) finds a new thematic application in Boston's Hayden Planetarium, where its resilient sponge-bonded backing and dense woven construction contributes greatly to acoustical properties of the room. Zenith (D), in a mobile classroom for the Chicago Board of Education, cushions youngsters during informal reading session. Circle No. 159.

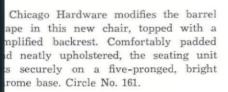

E Vogel-Peterson's Checker double-faced hat/coat rack accommodates 40 coats and hats, with hangers spaced 4 to the foot. Model DF4-4OCK is 5 feet 1 3/8 inches long, 79 inches high. Mobility is provided by 3-inch casters. Circle No. 160.

Classic styling distinguishes Authen-'s Master Host chair, finely crafted with nooth lines. Continuous wood of the arms ws upward, forming part of the back pport. Circle No. 162.

Glenda is a multi-colored houndstooth ttern, newly added to Masland Duraather's vinyl upholstery fabric line. ve dramatic color combinations are ofred in two elastic fabric-backed qualis, Circle No. 163.

Fast-food service shops will find Bela's ambridge a versatile chair, with such opens as an underseat rack and the exusive Miracle-Fold tablet arm. Sculpred seat and back are formed with one-ece molded Fiberglas, reinforced and ntoured for comfort. Circle No. 164.

Two-toned yarn-dyed cotton damask ble covering repeats its Oak Leaf pattern matching napkins, both part of James Hardy's Festivity line. White on blue, hite on gold, and white on pink are andard colors. Circle No. 165.

SurfLine patio furniture, by Wall Tube Metal Products, has nickel stainless steel ame. As shown in Room of Tomorrow hibit, seating is of open weave vinyl rd in coral. Circle No. 166.

ROOM OF TOMORROW

PAST, PRESENT, AND FUTURE ARE PRESENTED IN THIS PRACTICAL GROUP OF IDEA ROOMS DESIGNE By Henry end in Collaboration with architect morris lapidus at hotel-motel show

W HEN Henry End approached the design of the 1966 Rooms of Tomorrow, a feature exhibit at the National Hotel-Motel Exposition, he borrowed a bit of stagecraft to put his design concept across. In choosing the theme for the 8th annual exhibit, "Yesterday, Today, and Tomorrow," the designer was given free rein to illustrate what can be done in guestroom design with professional know-how. In a series of three rooms, End contrasts a typical hotel room of Yesterday (still in service in ²/₃ of the existing hotels today, End estimates), updates it for Today, and tops it off with an imaginative Room of Tomorrow.

The Today rooms were planned, End hastens to add, not as an extravagant showcase, but in a practical, down-to-earth manner. Comprising a bedroom/bath and studio/bath, they utilize the same dimension and plan as the Room of Yester-

day. Yet by the use of brilliantly colored, boldl scaled prints at windows and on beds, and softl traditional furnishings, the Today bedroom is a example of how an obsolete guestroom can b transformed into fresh, hospitable surroundings

The Today studio room is another remodele version of the Room of Yesterday. Here, unusual patterns and colors predominate to convert the dull room into inviting quarters tailored to the traveling executive or entertaining family. Designer End chose random flagstone flooring, furniture faced with a new laminate pattern, and bright accent rug for visual excitement. The patterns are relieved by cool white walls and royal blue Naugahyde upholstery on the sofa beds. In plus utility feature is a built-in valet that hold ironing board and iron.

The highlight of the display is the Room of Tomorrow, a combination studio/bedroom and

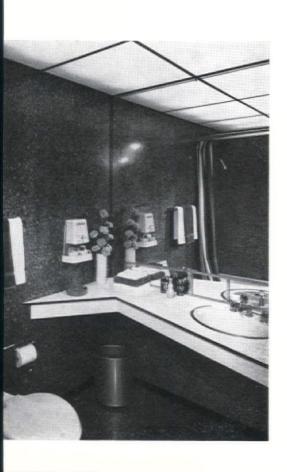

Room of Today Bedroom: Henry End approached the design of this room not as a idea extravaganza but with a practice view toward revitalizing outdated guest rooms. Though the typical floor plan of most hotel rooms was employed for the Today exhibits, fresh colors, bold pattern and traditionally inspired furnishings result in a new outlook. A highboy, face with a durable white laminate, holds television, desk, and drawer space. The Toda Bathroom (opposite) is given a feeling of spaciousness with the continuous us of olive and gold vinyl on floors and wall

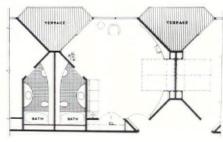

Room of Today Studio: for the traveling executive or entertaining family, the studio room affords a pleasant home away from home. There is room for entertaining, room to do office chores, and room to relax in pleasing surroundings. Interplay of lively patterns reflected in random flagstone floor, marbelized blue and white laminate surfacing on the furniture, and bright accent rug is contrasted against cool white walls and marine blue Naugahyde upholstery on the studio beds. An ironing board valet flips up and is concealed behind an ample mirror for last-minute grooming.

Room of Tomorrow

88

bath, using the combined services of designer Henry End and architect Morris Lapidus. A modified hexagon in plan, the room concentrates on exploiting usable areas, according to architect Lapidus. By this design concept he has sought to create a sense of dimension concerned not with width and length, but with the amount of space to be used for the four important areas of transient accommodation, namely, bedroom, living room, office, and entertainment. The hexagonal system, moreover, changes the typical tunnel effect of the long hotel corridor into a pleasant pattern with natural foyers at each room entrance. With a slight modification, the hexagonal plan will fit into many kinds of construction; it adapts to hotel and motel construction, garden apartment complexes, tower-type high-rise apartment buildings, and tract-built residences. Another innovation is the ceiling constructed of folded planes, adding height and incorporating acoustical properties.

To further the funtional space theory, designer End revitalized an idea seen once before in the 1963 Rooms, hideaway beds that disappear into the wall at a touch of a push-button. Furniture chosen by End for the Room of Tomorrow has round and friendly lines, much of it upholstered in durable Naugahyde.

Doing away with the many individual controls and systems necessary in a guestroom and usually peppering the various walls, End has custom de signed a compact communication console. The single unit incorporates all the hotel services and telephones, the control of lighting, room tem perature, a clock, even to a message receiver that televises the message directly from the clerk's desk onto a small projection screen on the con sole. What might also develop into a hotel trend is the unique door lock that works like a telephone dial. The door opens to a pre-set number dialect by the guest. By means of a special system, how ever, service personnel need dial only the las number to enter the room. And better still, with the Dialoc system there are no keys to lose or to be carried off unaware by the guests.

Feature exhibit is a guestroom and spacious bath that follows a modified hexagon in floor plan. Devised by Architect Morris Lapidus, the plan adapts to a number of construction methods, in-

cluding hotels, motels, and high-rise units. Designer Henry End then incorporates hideaway beds that fold into the wall and add more floor space for living and entertaining. Built-in features do not stop there but continue to a communication console (left), custom designed by End to contain all the hotel and room services in one compact unit, and a bar equipped with glassware and a hot coffee service. Opposite wall of the room (below) has a comfortable sofa located strategically to the service bar.

Amtico Flooring Div.: floor coverings. Angelica Uniforms: service personnel uniforms. E. T. Barwick Mills, Inc.: carpeting (nylon ibers by Chemstrand Co.), area rug.

Spaeth Displays, Inc.: plants. Harris G. Strong, Inc.: wall accessories. United States Gypsum Co.: acoustical tile ceil-

ings. United States Rubber Co.: Naugawall wallcoverings, Naugahyde upholstery.

Wall Tube & Metal Products Co.: stainless steel

patio turniture. Zenith Sales Corp.: television sets.

The Rugby Bar. Adding a new twist to cocktail lounge seating, Carleton Varney of Dorothy Draper & Co. draws upon specially designed tete-atete chairs linked with brass-topped cocktail trays. This setting is one of five created for next month's National Hotel & Motel Exposition in New York. Emerald green Naugahyde upholstery on the walnut-finished chairs and bar stools strikes the dominant color theme, complementing citrus green panels applied to driftwood smoke Pionite Walls. The entire room is underscored with bold, Scottish tartan carpeting.

Au Bon Chef (right). Elegance is the word for this French dining room, furnished with crystal chandeliers, white-on-white wallcoverings, Louis XV chairs, carved mirrors, and silver-plated wine stands and buckets. The very French color scheme of blue white and vibrant red is used in the damask draperies, table linen, china and carpeting, as well as for the Naugahyde upholstery of the banquettes and chairs.

The Rugby. The warm, rustic atmosphere pervading this dining room is punctuated with brilliant red, rich walnut, and matte black. Wing banquettes, brick patterned walls, and carriage lanterns complete the old country inn look—its total effect heightened by special lighting. A practical aspect to yesteryear's motif is achieved by use of today's vinyl products—random-width plank flooring and simulated brick wallcovering.

Discotheque Patio (right). Separating the Rugby bar from the Rugby dining room, this area is utilized for dancing a concession to today's tastes, as the name implies. It's designed to resemble a patio or terrace, with plantings garden wall, and a canopy tent.

Drummer's Inn. Quick-service coffee shop is whimsically transformed into a story-book setting by means of sentry boxes, checkerboard shades and canopy, apothecary styled glassware and china, drummer uniforms and majorette costumes—all in candy-cane colors of lemon yellow and emerald green, with bright red accents. But though the motif stems from a fairy tale, down-to-earth furnishings include new matching chairs and settees, specially designed by Chairmasters, which are being shown for the first time.

SETTINGS TITLED "FIFTY YEARS AGO TODAY" BY DESIGNER CARLETON BATES VARNEY

SPONSORS

Amtico Flooring Div.: all vinyl floor coverings; vinyl wallcoverings in The Rugby and Discotheque Patio. E. T. Barwick Mills, Inc.: carpeting in Au Bon Chef and Rugby Bar.

CHATEAU FLEUR DE LIS: A SOPHISTICATED APPROACH TO

CUISINE, ARCHITECTURE, INTERIOR DESIGN CHARACTERIZES THIS NEW ATLANTA RESTAURANT

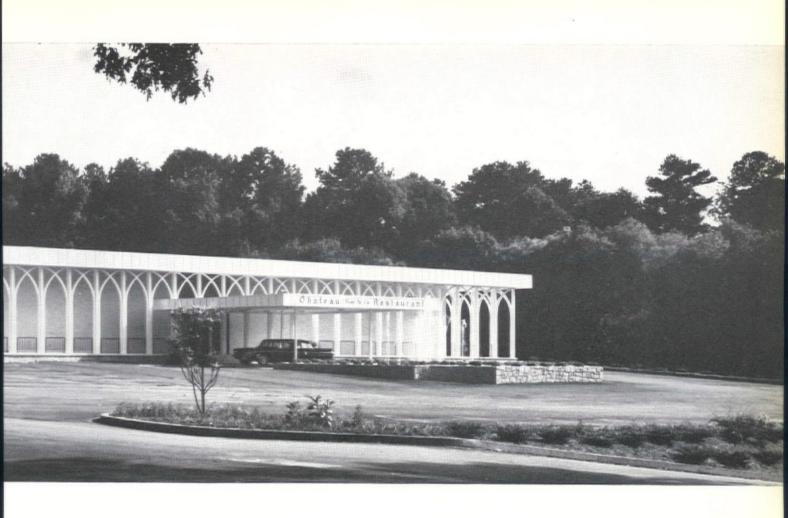

W HEN the Chateau Fleur de Lis Restaurant opened this spring, Atlanta acquired a superb blend of architecture, interior design, and cuisine. Today, the restaurant's reputation for food and service ranks high—it has been favorably compared to Le Pavillon of New York, Maxim's of Chicago, and Perrino's of Los Angeles.

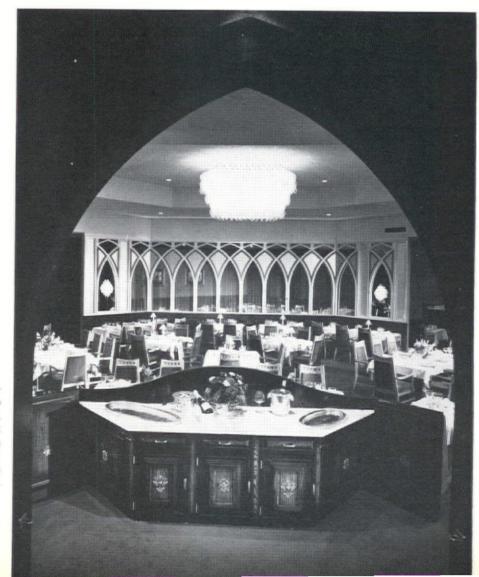

The building's architectural attraction derives from a series of slender, simplified arches that frame the building and create a walkway around its periphery. At night, the lighted arches dominate the landscaped site. The long, low structure was designed by the Atlanta architectural firm of Cooper, Salzman & Carry.

Echoing the exterior, the Gothic arch is an integral part of the interior architecture—in space dividers, doorways, and other structural elements—serving as a graceful background for the interior design, whose major theme is taken from a set of 16 handsome Burgkmair prints hanging in the dining room. The interiors were designed by Alan L. Ferry and Hugh Latta, of Alan L. Ferry Designers, Inc., a young and highly successful contract design firm of Atlanta.

The octagonal-shaped lobby of the Chatea Fleur de Lis contains eight archways radiatin to the dining room, bar and cocktail lounge, win cellar, and other facilities that service the restaurant. Brightly colored heraldic banners, reproductions of those in the Burgkmair prints hang festively above each arch. The custom can peting is centered with an octagonal design i deep purple, crimson, and golds, surrounded be a solid crimson field. Rough plaster walls ar accented with black-stained oak trim and a crim son ceiling.

The softly lighted cocktail lounge, large enough to accommodate a huge gathering without losing its intimate flavor, is opulently furnished with deeply cushioned, low-based chairs and booths upholstered in heavy gold velvet. Tables are topped with a custom-designed plastic laminates simply decorated with a single fleur declis. Rather than the customary barstools, the bar is encircled with upholstered chairs set upon sleighbases. Thus, the chairs tip forward ever so slightly, so that patrons can comfortably lean upon the padded armrest of the bar. The same wall

Chateau Fleur de Lis' simple rectangular shape serves as a backdrop for the modified Gothic arch motif, dominating not only the exterior, but the interior architecture as well. In the main dining salon, wall divider in background is hung with mesh screen by Kenbury Glass Works. All cabinetry is by Nelson-Smith.

CHATEAU FLEUR DE LIS

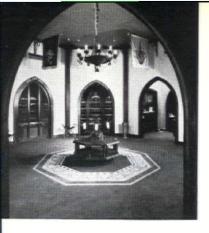

to-wall tapestry-like carpeting covers the walls in two of the alcoves, further adding to the room's excellent acoustical qualities. Decorative accents include shadow boxes containing pieces of armor; the ceiling well over the bar is filled with gold and silver leafed heraldic crosses, kept in motion by air currents.

The main dining salon focuses on a large octagonally shaped Venini chandelier that repeats the lines of the tiered ceiling. The setting is backed by the tracery of a permanent divider of gold leaf with deep red and gray trim bordering a mesh screening. Wall booths of extra-plush crimson velvet are designed to seat four persons on three sides of the table, leaving the fourth side free for service from the garadon, where

finishing touches to dinner courses are added in the French style. Dining chairs, in a distressed gold finish and plush velvet upholstery, are extra wide, further enhancing the aura of luxuriousness. Table tops are also over-sized. A special wallcovering was created by the designer in deep gold-on-gold nylon flock strip on vinyl; carpeting is deep pile crimson nylon.

Opened for dinner only, the restaurant covers 33,000 square feet, with seating for 225 guests in the dining salon and an additional 110 guests in the adjacent cocktail lounge. All elements of the Chateau Fleur de Lis were carefully articulated to appeal to sophisticated tastes in a manner that is relatively new for the traditionally minded south. (C)

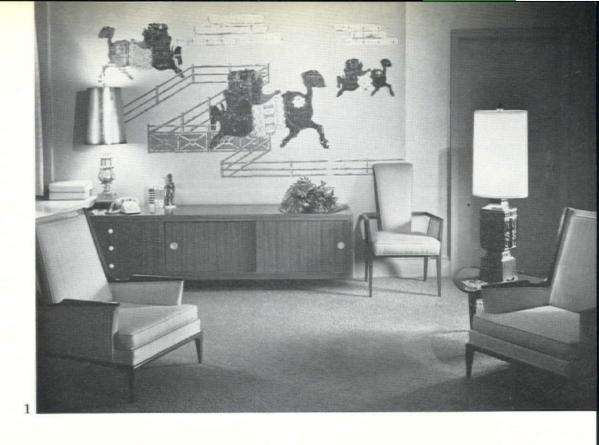

One of the arched doorways in the octagonal foyer (above), simply furnished with chandelier and brazier table from Artes de Mexico, leads to main dining salon (right), color themed in deep plush crimson velvet upholstery, by Schumacher, on chairs, banquettes, and booths by Robertson Furniture. Over-sized tables are by Chicago Hardware; chandelier and sconces by Venini; wallcovering by Dwoskin; carpeting in both foyer and dining salon by Cabin Craft.

hotos: Alexandre Georges

Unusual furnishing feature of the cocktail lounge (opposite page and left photos) are the deeply upholstered bar chairs, set upon sleigh bases that tilt forward as patrons lean against the armrest of the octagonal bar. Beelner & Thomas chairs are upholstered in heavy gold velvet by Schumacher. Bar chair sleigh bases by Costa Mesa; lounge chair bases and table bases by Chicago Hardware. Formica table tops were custom-designed with black fleur de lis inset. Wallcovering by Dwoskin; carpet by Masland; stage curtain by Jack Lenor Larsen; ceiling sculpture by John Brooks; lighting by Montrose.

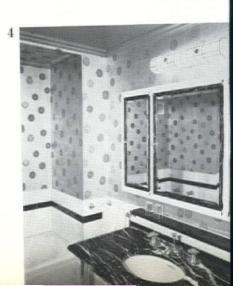

SHERRY-NETHERLAND RENOVATION

In its handling of a recent renovation at the Sherry-Netherland Hotel, a pos New York City establishment many of whose suites are contracted for by th year, Albert Van Luit & Co. provides sprightly demonstration of how mura wallcoverings can pick up droopin guestrooms. Working with the hotel manager, Philip Landau, Van Luit New York showroom rejuvenated th Sherry-Netherland suites with Balines (1) in burnt orange, Maple Bower (2 in tones of deep blue, olive green, an yellow gold on a Thai-tex ground, Hibis cus (3) kelly green and cobalt blue o white silk vinyl, and a bathroom Tisuba (4) on a silver ground with me dallions in shades of blue and green Van Luit's wallcoverings are available on vinyl-protected paper, solid scrul bable vinyl, as well as on special silk grasscloths, burlaps, etc. Other furnish ings shown here are by Hibriten (furn ture), Paul Hanson and Warren Kessle (lamps), upholstered pieces by Charle W. Beckerman, lighting fixture (bath room) by Metropolitan Lighting, an bathroom fittings by Crane. (C)

Even the greatest restauranteur envies what Burke can do for fine food. Burke's timeless design, virtually indestructible materials, and dramatic colors combine to add flair to any fare. Burke furniture gets into all the right places. You will too when you contract for Burke.

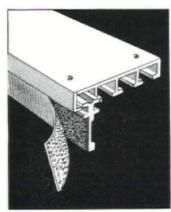

The Athena chair, as designed by Stylianos Gianakos and Andrew Morrison. This new molded fiber glass chair combines the flowing lines of Grecian sculpture with recent advances in fiber glass construction. In all white, or with base painted to match your decor. Upholstered pads in colorful designer's fabrics also available. Write for details.

Home Furnishings Daily calls it "a pacesetter for a window revolution."

We call it simply "Paneltrac."

Paneltrac is window decorating panels on tracks. Extruded aluminum tracks with sliding strips in them with Velcro® nylon tape fastened to the strips. And almost any fabric fastened to the tape to form flat-hanging panels. Now customers can display prints without pleats. Or make shoji screens, tapestries, sun shades, wood and expanded metal screens. (A 6-channel installation with 45" panels can cover 21'6" as a oneway draw; twice that as a centeropen draw. Yet width is less than a French-pleated drapery.) Paneltrac sets come assembled and with Velcro tape and hem weights. Custom-order sizes available and priced by the foot. Call or write Kirsch Company, 809 Prospect, Sturgis, Michigan 49091.

Paneltrac comes in single, double and triple channels. Combine them and you can decorate any window.

Paneltrac is ideal for unique, multicolored paneled window treatments. And when you draw one panel (with an unobtrusive nylon baton), all the others follow.

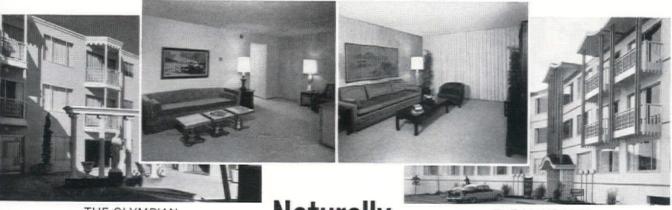

You can use Paneltrac with an material that won't sag or stretch And because Paneltrac eliminates the need for fullness, you need use only about half as much yardage

and prolongs the durability, comfort and beauty of upholstered furniture like BURKAIRE

Upholstered furniture cushioned with Burkaire retains its smart new appearance and luxurious comfort far longer than normal expectancy. Padded areas won't break down or lose their shape; covering materials won't become loose, nor wear excessively or prematurely.

The secret of Burkaire superiority is the exclusive process by which it is made from new cotton fibres and impregnated with plastic binder. Permanently, softly resilient, Burkaire yields firmly but gently under weight. It will not take a set and quickly returns to its original thickness. It won't break down or deteriorate. It is both dust-free and vermin-proof.

Specify, insist on Burkaire cushioning. Sharply competitive with other padding materials, it is feasibly used in the lowest cost metal chairs as well as the industry's highest priced custom merchandise.

The inability of men to develop sympathetic understanding of other men of ifferent cultural and political heritage is surely a major obstacle to coexistnce. Ideology gives purpose, motive, and meaning to the life of a nation. But is a source of strength only so long as it is the instrument and not the master f national policy. It is constructive only so long as it is open to criticism nd adjustment in response to changing human needs and aspirations."

ese words were spoken by Senator Fulght, Chairman of the Foreign Relations mmittee of the U.S. Senate, one of 67 tinguished scholars and statesmen from countries who came together in New rk City before an equally representative dience of 2500. They convened to talk but the requirements for peace—"peace re, simple, and durable." Their words re beamed around the world by 350 members of the press, radio, and television.

Thus, the Center for the Study of Democratic Institutions, sponsor of this unique Convocation, initiated a new international conversation on the most pressing problem of our time.

The Center organized the Convocation on Peace on the inspiration of Pope John's famous encyclical, *Pacem in Terris*, and in pursuit of its major purpose: to sort out the issues involved in maintaining a free and just society and get them understood and discussed. The Center, a nonprofit educational organization, depends on public contributions for its support.

For information on memberships in the Center and on its many publications and tapes (including those of the Convocation), write to the Center, Box 4068f, Santa Barbara, California 93103.

New Fiberglas chair by Krueger

Krueger Metal Products Co. has added a tablet arm model to its 6000 Series Fiberglas stack chair line,

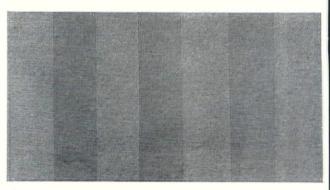

as well as side and pedestal models, with Fiberglas or upholstered shells, and optional book rack attachments. Featuring a large writing area surfaced with light maple woodgrain plastic laminate, the new chair has square tubular steel mounting frames finished in chrome or black enamel to match leg finishes. Tablet arms come separately for later installation.

Dura-Bond offers burn protection

A new foil underlay that protects fine wood veneers and surfaces from burns has been developed by Wellington Electronics, Inc. Called Dura-Bond, the material protects through a high thermal conductivity that diffuses and rapidly dissipates heat before it can cause scarring or charring. Laminated directly under the veneer by conventional processing techniques, Dura-Bond's surface allows standard adhesives to bond as positively to the foil as to any wood surface.

We started with a simple philosophy which we never had reason to abandon. Our aim remains to offer the architect and designer the very finest in original furniture design.

We feature classic furniture of bentwood, the Bauhaus and pre-Art Nouveau eras; made to the original specifications, often in the original factories where they were first produced.

Also a wide range of carefully selected furniture by contemporary designers, tried and tested for commercial use.

If you are one who bemoans the commonplace and the lookalike quality of most furniture on the market today ... then our furniture is for you.

New system covers old resilient flooring

A new flooring system from Armstrong Cork Co. makes it possible to install sheet vinyl materials over an old resilient floor. Developed for use with Armstrong's Montina and Tessera vinyl corlon, the application involves a perimeter bonding technique with a new two-part adhesive. The adhesive is applied in a 4-inch band around the perimeter of the room and in a 2-inch strip on each side of a new seam. The Perimiflor Installation System can offer a definite savings

in time and labor costs incurred by ripping up the old resilient flooring. Armstrong considers its Perimiflor system particularly well suited to commercial remodeling projects and other commercial and institutional uses where the subfloor is structurally sound.

Heavy duty floor matting

R. C. Musson Co. has introduced a 100% nylon matting permanently bonded to a ¼ inch thick vinyl backing that can withstand heavy traffic in recreation areas such as country clubs. The matting

comes in 34, 46, and 70 inch widths in rolls 10 yards long in a variety of colors. Since it has flush-finished edges with no borders, it is easily applicable to recessed floor installations in entrances, lobbies, as well as surface applications.

Circle No. 204 on product information card

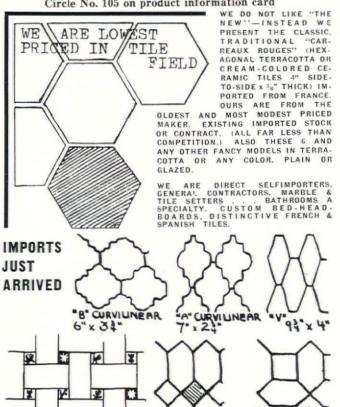

Seamless resilient flooring

A seamless floor for interiors and exteriors has been developed by Carboline Co. Called Sancoura, the resilient floor is poured on as a liquid and hardens to a high-gloss, non-slip surface that needs no waxing or polishing. Sancoura can be applied over any surface, wood, metal or concrete. The floor is custom designed from 24 basic colors and is said to be stain-proof, non fading and extremely durable. Since it is unaffected by weather conditions it can also be used for pool decks and patios in addition to a wide range of commercial and institutional uses.

buy two dimensions Richter gives you a third one Free!

Full color painting, or exciting sculpture?

IT'S BOTH!

A new medium for the contract furnisher.

Richter Artcraft brings you a totally different type of wall accessory. We call it "sculptured painting", because the entire surface is deep-sculptured and painted with an authentic pallet knife technique. It's easy to blend into any atmosphere and color scheme—provides a noticeably creative

touch. Twelve variations are now available, including those shown here.

Fade-proof, washable, virtually indestructible.

Each Richter sculptured painting is made of tough reinforced plastic material in a hardwood frame. The finish has the appearance of an expensive hand-painting, but it can't chip, flake, or become dull and dingy looking. From every point of view, here is the decorating innovation destined to add a

new dimension to your profession.

Available custom-designed on quantity orders.

wood surface

It just wipes off!

New DURA-BOND Foil Underlay protects scarring and charring of real wood.

Dura-Bond combined with a suitable finish will protect the beauty of real wood surfaces against damage from lighted cigars, cigarettes, hot soup plates, coffee pots - even spilled boiling foods. It can be laminated directly underneath the veneer by conventional processing techniques. Dura-Bond makes wood more warp-resistant, split-resistant, and buckle-resistant.

Dura-Bond really works! It has passed extensive tests made by the Hardwood Plywood Manufacturers Association and is approved by the Fine Hardwoods Association.

Write today for specific details on how Dura-Bond can give your products an exciting plus in sales appeal.

DURA-BOND FOIL UNDERLAY

A product of WELLINGTON ELECTRONICS INC. 55 Honeck Street, Englewood, N.J. (201) 567-2620

LITERATURE

"Sound Advice" is the title and offering of a manual from Georgia-Pacific Corp.'s Bestwall Gypsum Div. on advanced structural systems to meet noise control problems in residential, commercial, and institutional buildings.

Circle No. 225 on product information card

Demountable partition systems, detailed in E. F. Hauserman Co.'s 36-page booklet, include a functional movable interior wall, a companion product that allows use of wood, glass, vinyl, and other materials, and a practical metal movable wall at low initial cost. Specs, technical data, and illustrations are included.

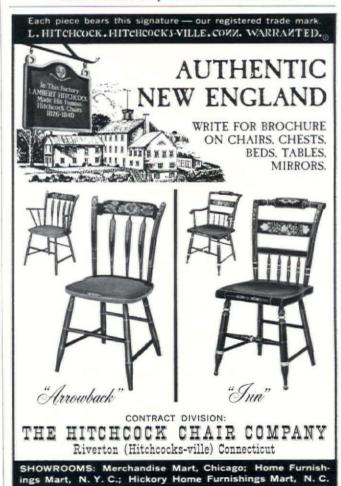

Circle No. 226 on product information card

A folder with individual sheets describes Norman Perry's traditional and continental-style lamps, chairs, and decorative accessories.

Circle No. 227 on product information card

A catalog from Luxo Lamp Corp. describes the company's line of functional lighting for industrial, commercial, residential applications. Specs and accessory information are also given. The Luxo lamp moves easily yet retains its angle of shade position regardless of arm movement.

Circle No. 228 on product information card

Circle No. 125 on product information card

Lightolier offers solutions to a wide range of lighting problems in a booklet that considers light control, flexibilty, durability, and adaptability to tailor the lamp to the environment. Illustrating lighting in many combinations of finishes, colors, and materials, it also features a section on authentic stoneware table lamps produced exclusively by the firm.

Circle No. 229 on product information card

Durhair carpeting, made of 98 percent goat's hair, is available from Durkan Carpet Corp. who offers a swatch book showing 20 decorator colors. The carpeting is said to withstand dirt, wear and tear, and is soil-, water-, and moth-resistant. It cements directly to the floor without rippling and needs no professional cleaning. Available in 6-foot 6-½ inch and 3-foot 10-inch widths.

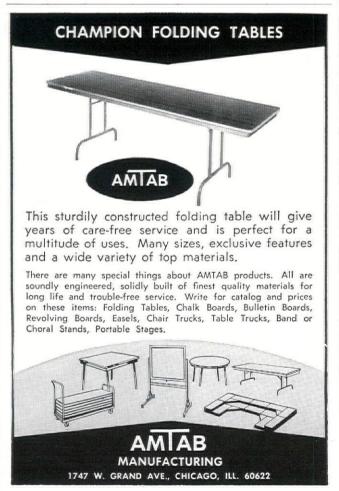

Circle No. 230 on product information card

Two illustrated flyers from Arts for Architecture, Inc. describe designs from award-winning sculptured wall module collection by Erwin Hauer. One features elliptical capsule-shaped openings between the modules that gives a screened-off effect yet permits light to come through. The other is strongly sculptural and well suited to exterior applications.

we love heavyweights

The bigger they are, the harder they fall for Fibermold chairs... they're durable, solid—comfortable, too. Good styling makes them equally "at home" in the factory, cafeteria or the most fashionable shop. Good construction makes them practically indestructible. To see them, write, wire or phone:

FIBERMOLD CORPORATION
