160

(Bar

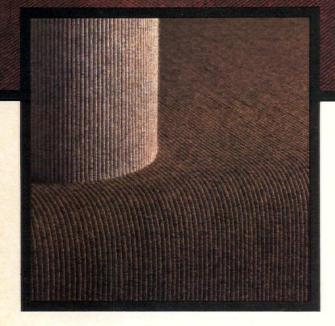

Baker Furniture and Textiles has dedicated the development of an entire fabric collection to natural materials; cotton, wool, mohair and leather. Now the luxury of silk is available in a contract-strength tested fabric exclusively Baker Furniture and Textiles. These textile collections are shown and may be sampled through all fourteen Baker, Knapp and Tubbs' showrooms and our Contract Showroom, 917 The Merchandise Mart, Chicago, Illinois 60654.

per Surniture A North American Philips Company

Showrooms in: Atlanta, Chicago, Cleveland, Dallas, High Point, Houston, Los Angeles, Miami, New York, Philadelphia, San Francisco, Troy, Washington D.C. and London.

### More versatility from the Tretford Surface System:

Changeable. Movable. Rotatable. They're Tretford Carpet Modules. They lay free but won't slip, shrink or stretch. Ideal for open plan areas, they allow easy access to sub-surface computer, phone and power lines. They measure 50 cm (19¾") and come in more than 30 distinctive colors. Fusionbonded corduroy-like ribbing of 100% wool/mohair coordinates with Tretford Broadloom and Acousticord (both available on cutorder basis from Eurotex in-stock program). For samples, contact Home Office: Eurotex, The Marketplace,

2400 Market Street, Philadelphia, PA 19103. 800-523-0731. In PA 215-568-4300.

In Chicago: Eurotex, Space 11-121, The Merchandise Mart, Chicago, IL 60654. Telephone 312-644-4443. In New York: Eurotex, Fifth Floor, 919 Third Avenue, New York, NY 10022. Telephone 212-308-1497. Showrooms and/or sales offices also in Boston, Atlanta, Miami, Charlotte, Richmond, Rochester, Cleveland, Detroit, Milwaukee, Minneapolis, St. Louis, Dallas, Houston, Denver, Los Angeles, San Diego, San Francisco, Seattle.

## SILENCER I<sup>™</sup>

#### Solves the Dilemma of the Systems Furniture Price Tag

Using conventional furniture, Silencer I helps create attractive workstations at a fraction of the cost of systems furniture. Panel-to-panel joints and concealed posts give Silencer I a clean design. And for a truly elegant installation, Silencer I offers curved and glazed panels, with hand-rubbed oak trim.

For the contract designer or the do-it-yourselfer, Silencer I is impressively simple to install and surprisingly affordable.

### EVENTS CLEARING-HOUSE LOCATED

The flood of replies to CONTRACT's August editorial commentary, "Clear The Date, But With Whom?" included announcement of a new service through which design professionals can learn of industry-wide conventions and conferences. Just as we published a plea to establish an events clearing-house for the design profession, FYI Systems, Irvine, Calif.,

let our editors know about its new FYI Events Directory, scheduled for publication next month.

The semi-annual 40-page directory will contain a minimum of 40 event listings per month for a six-month period. Chronological listings, and indices to events-by-type/by-category, and sponsorsby-type are among the publication's features. Deadline for submission of material to the publisher is March 1, '85 for FYI's second edition in July, '85.

A subject of many events listed in FYI's first design directory is CAD/CAM; another popular conference topic is office automation. In addition, interior design competitions are included in such quantity they may eventually form a spin-off directory of their own.

Also during next month, FYI will make available an on-line computerized data base for industry events. This will form the basis for a phone-in service for planners who may want to "clear the date" and for participants who would like to have more control over their travel schedules.

CONTRACT congratulates FYI for pioneering the first comprehensive directory of design-industry and allied professional events and encourages readers to contact FYI Systems, POB 19654, Irvine, CA 92713, for further information.

### THE FIRST NAME TO LOOK FOR IN MAILROOM FURNITURE WHEN YOU WANT IT TO LAST.

### HAMILTON SORTER CO., INC. FAIRFIELD, OHIO

Most companies will furnish a mailroom only one or two times. So if you're thinking about a new mailroom today, make sure it's something you can live with tomorrow. Make sure it's Hamilton Sorter.

At Hamilton Sorter, we build the kind of furniture that works hard and long. Our sturdy modular furniture comes in more sizes, shapes and configurations than you'll find anywhere. You get a mailroom system specifically designed for your operation and space requirements: with attractive wood grains and colors to match your decor. You also get a system constructed from thick high-

The strength and durability of a Hamilton Sorter mailroom system lies in our quality construction and materials. The legs are constructed from heavy custom designed alunimum extrusions and surface areas feature high-pressure laminates.

density laminated wood and custom designed aluminum extrusions. Quite simply, a Hamilton Sorter mailroom system is built to last a lifetime, like good furniture ought to be.

When you build furniture that stays

LIMITED DEALERSHIPS AVAILABLE FOR QUALIFIED SYSTEMS PROFESSIONALS

.

around so long, you also have to

build in flexibility for growth. All our units are completely freestanding, so when you rearrange or relocate, you don't have to search for those extra bits and pieces. Compare the

functional features of Hamilton Sorter mailroom

furniture and you'll notice a big difference there, too. For example, we know the sorting module is the heart of the mailroom operation, so instead of giving you just one shelf size, we offer you four sizes. Our standard 10<sup>3</sup>/<sub>4</sub>" x 11<sup>3</sup>/<sub>4</sub>" shelves for regular mail. Legal-sized shelves with extra depth. Over-sized shelves for materials as large as computer print-outs. Zip code modules for standard #10 envelopes. What's more, each shelf of our modules includes color-coded indexing and is available with access from front and back.

You see, at Hamilton Sorter it's our job to think of everything when it comes

For color-coded indexing that stays put, we give you aluminum index channels on both the front and back of module "shelves". The dual index channels also provide additional strength. Combine that with our unbreakable linear polyethylene, and you get a sorting module that lasts a lifetime. Our dumping consoles are built with rims on three sides. The surface is standing height to make the work day easier on your personnel. Undertable shelving or sliding door cabinets are available on all consoles.

This wrapping table features a special surface built to take daily abuse. The paper roll is located under the table and it feeds through the table side into the cutter. With this design you have full use of your table lop work area and there's plenty of room for storage underneath.

The L-shaped sorting station offers you modular design with unlimited flexibility for future growth. Sorting bins are elevated by a platform for maximum work space on the table. Dumping rims edge three sides of the station to prevent material loss.

Hamilton Sorter meter tables are built in a variety of sizes to accommodate even the largest mailing machines

### CONTRACT **NEWS**

#### 'InfoWorks' presentation, new time slot mark reprogramming of CONDES '85, Jan. 23-25

Dallas-CONDES '85, contract design show of the Dallas Market Center, has been rescheduled for January 23-25, and its program will be based around a theme of "information that works."

The annual show, traditionally held in March, was pushed up to January to allow it to coincide with the opening week of INFOMART, a new information processing mart. The change also puts the event in a prime position on the national design calendar.

#### Technology addressed

In keeping with the show's theme, major speakers will address attendees on topics of design, technology, and productivity.

Participating showrooms will also hold daily "Info-Worksessions' from 10 a.m.-' 4 p.m., offering educational presentations, special exhibits, and business information for designers, architects, facilities managers, and corporate endusers.

Three evening events mark further departure from а past CONDES shows. Kicking off the market on Tuesday, January 22, from 5:30-7:30 p.m. will be a series of presentations on Dallas development.

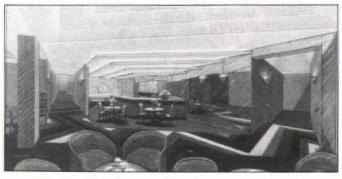

#### Showroom receptions

Held in conjunction with a "Progressive Dine-A-Round," which will be hosted by participating showrooms, this event will be followed by an Infomart tour.

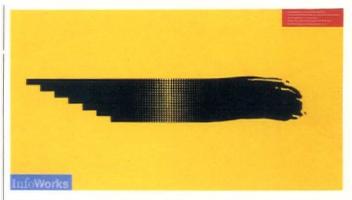

A gala reception on Wednesday, January 23, from 7-9 p.m. is planned for attendees at the Dallas Museum of Art. The museum is also celebrating its first birthday.

Author Tom Wolfe speaks on developing productivity of structures and interior environments through the century's end during his keynote address on Thursday, January 24, from 6-8 p.m.; architect Hugh Stubbins, The Stubbins Associates Inc., Boston, speaks on directions in office structure

#### A/V for N.Y. design center in \$1-million lounge facility

New York-The \$1-million New York Design Center lounge, designed by Sydelle Hird, IBD, ASID, features a variety of amenities including audiovisual room, espresso bar, seating for nearly 70 people, conference areas, and coat check room. The lounge is glass-enclosed.

Graphic designer Woody Pirtle, Pirtle Design, Dallas, created this logo which is being used on promotional materials associated with CON-DES '85, Dallas Market Center InfoWorks program.

design during a luncheon on | DMC Co. selects Friday, January 25.

Eye-opener sessions have also been planned for each market day. Anne Fallucchi, editor, Facilities Design & Management magazine, moderates a panel of facilities managers on Wednesday, a day designated as Technology Day.

#### **Diverse product displays**

Author Paul Hawken speaks on the movement from mass consumption to the "information age" on Thursday, Productivity Day; Friday, Design Day, features Mike Vance. former creative director of Disneyworld, leading a workshop on creative thinking for show participants.

A diverse display of nearly 1,000 lines featured at the three-day event includes furniture, office systems, floorcoverings, lighting, wall and window coverings, fabrics, and accessories.

For more information on CONDES '85 and the Info-Works program, contact the center at 214/655-6258.

### Boston, 3rd site

Dallas-A south Boston site has been chosen for the Dallas Market Center (DMC) Co.'s third trade mart, the Boston Design Center (BDC). Other developments of DMC are the Dallas Decorative Center and the Decorative Center of Houston (DCH).

The 550,000-sq.-ft. BDC is being co-developed by Richard A. Flier Interests of Boston; architectural design and renovation services are being provided by local firm Schwartz/ Silver Architects.

The structure, designated for renovation by its codevelopers, offers showroom space for manufacturers of furnishings, fabrics, and accessories. Already 28 percent leased, it is located at 660 Summer St., a site which is part of the Boston Marine Industrial Park, less than five minutes from downtown Boston and 10 minutes from Logan International Airport.

"Co-development of the (Continued on p. 21)

### **Knoll Textiles**

#### Knoll on Walls

After more than a year of design, development, and testing, Knoll Textiles has created a comprehensive fabric collection specifically and exclusively for walls.

Knoll Wall. An array of six textures from smooth to silky, available in 39 sophisticated colorways.

Knoll Wall. Solves all the problems walls present with a width suitable for one-person installation, a class "A" rating for wall coverings, and a special wall backing for easier vertical application—all proven in performance.

The next time you want a fine Knoll Textile as a wall covering, you won't have to use upholstery fabric.

Call your Knoll Textile representative to see this important new collection

Knoll Textiles Division of Knoll-International 655 Madison Avenue New York, NY 10021

#### CONTRACT NEWS

#### DMC

(Continued from p. 17)

BDC offers DMC the opportunity to further its commitment to the design industry," says Lucy Billingsley, president, DMC and "The project offers an ideal alliance. Flier provides a sound understanding of local interests and DMC provides a broad experience with furniture and design."

Billingsley also noted that the Boston project is indicative of DMC's developing national direction in the design field.

#### Local support voiced

Support for the new center has also been coming from members of the design community. Says Tom Keeney, president, New England Chapter, American Society of Interior Designers (ASID), "Our membership needs this facility to further our professional efforts. ASID has already been offered an office space in the center as has the Institute of Business Designers (IBD). It will be ideal for both organizations to operate under one roof."

"Boston is a center of a very vibrant design community that includes all of New England," adds Michael H. Bourque, president, New England Chapter, IBD. "A design center will make available the resources necessary for our designers to practice at the leading edge of their profession. The bond between IBD, ASID, and the National Home Furnishings League will be strengthened tremendously by the opportunity to locate our offices together in a design center and have a location to establish regular meeting quarters."

#### Classics party caps ADAC '84

Atlanta—Executives of Southeast Wholesale Furniture Co. were on hand to greet guests at their firm's Classics showroom party during recent Design ADAC '84 activities. Shown (I. to r.) are Dogan Bora, president; Dr. Arnold Ducoffe, chairman of the board; vice presidents Pete Butler and Jim Fitz-gerald who were part of the Atlanta market event.

#### Intrex & ICF enter joint sales venture

New York—Intrex Inc. and Architectural Supplements Inc., divisions of Habitat International Ltd., together with ICF Inc. have formed a coordinated sales and marketing program in Florida.

The firms, including ICF subsidiaries ICF Systems and Unika Vaev, are displaying their products in a 10,000-sq.ft. showroom in the Triangle Square design center, Miami. Mary Felker was appointed director of showroom sales and is responsible for showroom operations as well as the sales of both firms in the Miami area.

Other members of the Florida sales team are: Sheree Porter, showroom manager, and Shana Dominiquez, showroom sales, and Mickey McKay, state sales representative for Intrex.

# olor it with confidence

Douglass presents an industry breakthrough— contract fabrics with the permanent soil & stain protection of ANSO IV® nylon

COLOR IT WITH DOUGLASS

Douglass fabrics of Anso IV nylon offer the most advanced soil & stain protection you can get in a fabric. It's the same proven protection of Anso IV carpet fiber, now adapted specially for contract fabrics.

Protection you can depend on Permanent soil & stain resistance is chemically integrated into every fiber of Anso IV, so spills and soil particles are kept "suspended" on the surface for quick and easy removal. And, unlike many surface treatments, Anso IV protection lasts for the entire life of the fabric.

Performance you can depend on Though their soft, natural textures may suggest delicacy, Douglass fabrics of Anso IV nylon are truly iron-tough. In laboratory abrasion tests, they resisted wear many times longer than industry standards require. And, they pass the strictest contract use and safety tests. So you can specify Douglass fabrics with confidence even in the most demanding applications.

Beauty you can depend on The real breakthrough of Douglass Anso IV fabrics is that they don't *look* tough. Their range of tactile textures, original patterns and refreshing colors permit design freedom never before possible with a "workhorse" fabric. And, the deepdyed colors of Anso IV nylon won't fade as time goes by.

If your reputation depends on providing the finest design and performance features available...

### Three Probber-quality solutions to fill your desk needs.

The new Basix desk combines the natural richness of mahogany or oak, the practical good looks of textured lacquer, and an elegantly styled edge to offer a unique value in a wood desk group.

Prow Edge features a handsome solid hardwood edge, finely finished in walnut or oak. This group is now available with cost-saving attached pedestals as well as full-height moveable pedestals.

The Banker's Series represents a transitional design richly executed in mahogany, with top inserts framed in solid brass. The series includes an executive station and a choice of machine accommodations, making it as functional as it is beautiful.

#### CONTRACT NEWS

#### Merchandise Mart re-names Boston design mart, chooses site

Boston-The Merchandise Mart Properties Inc. of Chicago has chosen this city's Navy Yard, Building 149, as the site of its newest trade mart, the New England Design Center. The facility was formerly called the Boston Design Center, the name of the Dallas Market Center Company's newest design facility also located in Boston.

Building 149 includes 700,000 sq. ft. of space and is connected to a 1,200-car garage. It will serve as a design

center with both contract and residential furnishings showrooms while also offering office and retail space. The design center portion will be managed by The Mart; the project is being developed under a partnership formed between The Mart and The Congress Group, Boston.

Leasing efforts for the center have already begun, with the commitment of Baker, Knapp & Tubbs, manufacturers of high-end furniture, to 30,000 sq. ft. of space.

#### EOC opens Calif. showroom

San Francisco-Executive Office Concepts (EOC) has opened a showroom in Contract Center, Showplace Square. Richard Sinclair (center), EOC president, signs the lease as John Denoncourt (left), the firm's director of design, and Timothy Treadway (right), Bay West partner, look on.

#### Change in code permits use of glass block in 1-hr. corridors

San Diego, Calif .--- Following a | one-hour corridor areas. two-week lobbying effort by local design firm Inter-Arch, the city's building department instituted a policy change to allow use of glass block walls in corridors with one-hour fire ratings. This represents a major change in building code standards from previous practice

The code previously specified use of wire glass in these

"I'm very pleased about the new interpretation," says Penne Horn, director of design and principal, Inter-Arch. "Glass block adds an exciting element to office design as well as providing energy conservation and environmental advantages."

The new standard will give designers more flexibility in interiors specification.

From a field of more than 200 product displays, Wilsonart received top honors in the operational excellence category at the 1984 ASID Int'l. Exposition of Designer Sources. St. Charles was another top winner.

#### Wilsonart, St. Charles win top '84 ASID design awards

Chicago-St. Charles Mfg. and Wilsonart were recipients of top design awards at the American Society of Interior Designers (ASID) International of Designer Exposition Sources, held in conjunction with ASID's National Conference.

In the display excellence category, in which exhibits were judged for esthetic appeal of product presentation, St. Charles won first prize. The team of nine judges cited the exhibit for its "superlative and comprehensive attention to detail, its overall excellence in the selection of architectural materials and extremely effec-

#### Houston move set for IFMA

Ann Arbor, Mich .-- Citing the proximity of Houston's Greenway Plaza to the Houston Design Center (HDC) and The Integrated Facilities Institute (TIFI), a new research and education organization, George Trayer, president, International Facility Management Association (IFMA), explained IFMA's plans to relocate its headquarters from Facility Management Institute to the plaza in January, 1985.

"Not only is Houston a major metropolitan hub, but it's also the location of HDC and TIFI," says Trayer. "The

tive lighting, as well as for the designer's ability to integrate the product with the space."

In the operational excellence category, exhibits were judged on effective integration between designer and product, and Wilsonart was the top winner.

The jury cited the firm for its 'technical success in achieving good traffic flow into its inviting exhibit space."

It was further noted that Wilsonart used its laminates as an art medium within the exhibit, and the jury also remarked on the incorporation of the firm's advertising format into exhibit space.

proximity of these resources will improve IFMA's access to product and services information, allowing us to devote more of our attention to increasing management-focused services."

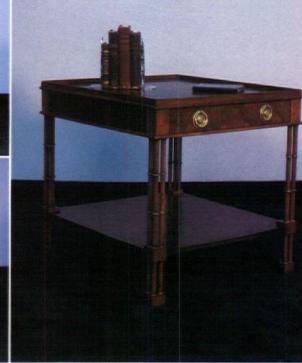

According to Roger Hayes, HDC president, IFMA's move will be a critical factor in creating a focal point for facilities and their management.

Since its inception in 1980, IFMA has been located at the institute. The move, resulting from last year's Board vote to seek an alternate headquarters site, will involve relocation of executive director Mel Schlitt as well as all IFMA records and materials.

# Contract projects take \$3,000 purse in Diller contest

Chicago—Two prizes totalling \$3,000 were awarded to planners of contract projects in the second annual Diller Corp. National Laminate Design Competition. Awards were presented to designers incorporating Diller's Homapal metal laminate in innovative projects. Diller Corp. is a subsidiary of Formica.

A \$2,000 prize was presented to Bertram Laudenslager and Arthur L'Esperance, Whitemarsh Interiors, Flourtown, Penn., for their design of a food service center for local executive offices. According to contest judges, Homapel brushed aluminum in a copper color coordinates with copper-colored wallpaper to create an air of contemporary elegance in this project.

Toby Kath, T.K. Design, Rochester, won \$1,000 for her renovation of a local foundry as an office/manufacturing facility. Here, Homapal brass-toned brushed aluminum adds the high-tech look that is appropriate to surroundings, commented judges.

Awarded \$3,000 for their design of a Florida residence were James Merrick Smith, FASID, and Hal F.B. Birchfield, ASID, Coconut Grove, Fla. Honorable mention went to Monique Viator, Beaumont, Tex., for a hotel lobby project.

## New showrooms: Kinetics displays line in 4,000-sq.-ft. space

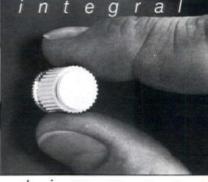

Kinetics is displaying its line of hightechnology contract furniture in the 4,000-sq.-ft. showroom of Snipp-Bowen Inc., Piedmont Center, Atlanta. The showroom is located on the second floor of the center's newly opened addition, 3945 Piedmont Road . . . The contract textile firm of Design Tex Fabrics has leased 2,297 sq. ft. of space on the fifth floor of The Decorative Center of Houston's new tower. The firm is also expanding its product line to include residential-look designs ... Tetra has moved into The New York Design Center's Suite 1111, 200 Lexington Ave. ... Scandiline Industries has signed a lease for more than 8,600 sq. ft. of showroom space at the International Design Center, New York.

# New assignments: 410,000-sq.-ft. project for Davis & Carter

Deanto Development & Construction Corp. has been contracted by The New Center for Holistic Health, Education, and Research, Manhasset, N.Y., for architectural design and construction services. The project calls for 12,000 sq. ft. of space for classrooms, offices, library, media center, and research facility ... Davis & Carter, P.C., and Interior Design Dimensions have begun construction of a 410,000-sq.-ft. office park, Tysons Corner, Va. First-phase construction includes a 9-story tower and a 3-story interior lobby featuring balconies and atrium. Second-phase construction plans include a 9-story tower as well as restaurant and retail space ... Architect Charles W. Moore has been commissioned by Lucy Billingsley, president, Dallas Market Center Company, to design the public entry

space of **The Decorative Center of Houston.** The Designer's Gallery, the area to be planned by Moore, is a 9,000-sq.-ft. space incorporating dining and conference facilities for designers ... **Contract Interiors** was selected by law firm **Kohl**, **Secrest**, **Wardle**, **Lynch**, **Clark**, **and Hampton**, to coordinate interior design of the firm's new office facility, Farmington Hills, Mich.

# FIDER accredits three programs

**New York**—The Foundation for Interior Design Education Research (FIDER) has accredited three interior design programs, raising the total number of accredited programs in North America to 60.

Under the leadership of newly elected chairman Boyd L. Loendorf, ASID, the board of trustees granted initial provisional accreditation to two, 4-year baccalaureate programs in the Department of Home Economics, Eastern Kentucky University, and the College of Professional Studies, San Diego State Univ.

A three-year professional program was also accredited at the New England School of Art and Design, Boston.

# Design industry pricing data now being compiled

Brookline, Mass.—Information on design fees, contracts, and work requirements for more than 40 types of space planning projects will soon be available, thanks to a study being conducted by Professional Services Management Journal (PSMJ) and the A/E Marketing Journal (AEMJ). Called the 1st Annual Design Services Pricing Survey, it is headed by Bill Fanning, an Atlantabased management consultant.

Other information to be incorporated in the survey includes average billing rates and mark-ups on reimbursable items. Comments PSMJ editor Frank Stasiowski, "In today's economy, there is tremendous pressure on design firm profits that is largely attributable to clients demanding more services without fee increases. Currently, design firm management is ill-equipped to deal with this issue as no data base on fee levels is available for reference."

## Western design Oriental decor blend in Beijing hotel

Beijing, China-President Reagan's recent state dinner for top Chinese officials was among events which marked the opening of China's first luxury hotel designed for major conferences and business meetings. The 1,007-room hotel was a project of Welton Becket Assoc., New York, architects for the \$75 million American/Chinese joint venture.

Called the Great Wall Hotel, the 21story structure represented an historic step for the People's Republic of China and an unusual challenge for western architects, according to William Scott III, director, Welton Becket Assoc. "Our Chinese partners were intent on creating a western-style facade, while maintaining some traditional Chinese motifs in the interior design," he says. As a result, the firm selected a glass curtain wall exterior, "which is inherently modern, while reflecting the ancient city and landscape surrounding the building," Becket concludes.

Three reflective glass towers which are visible throughout the capital city serve as symbols of contemporary achievements in the People's Republic. Joined like the spokes of a wheel, the wings enclose a six-story glass atrium topped with a rooftop restaurant.

Inside the atrium are a tea garden and

pagoda pavilion overlooking a landscape of waterfalls and reflecting pools. Four glass elevators ascend through the towers from this space.

Chinese decor is also reflected in a four-meter mural of the Great Wall which graces lobby interiors. It is enhanced by rose-colored chromesheathed marble pillars, Oriental rugs, silk wall hangings and Chinese antiques.

Guest amenities include a main dining room, nine restaurants and bars, 15 banquet halls, and a ballroom large enough for 1,200 people. The latter was the site chosen by President Reagan on the occasion of his dinner.

According to Scott, construction of the hotel was particularly challenging due to shortages of necessary raw materials, Thus, many building components had to be imported and redesigned for use here. Other challenges were presented by the need for a reinforced concrete building frame which can withstand the city's frequent tremor activity.

Partners in the \$75 million project were the Beijing branch of China International Travel Service and E-S Pacific Development and Construction Co. The latter is owned by Becket Investment Corp. and Unison Pacific Corp.

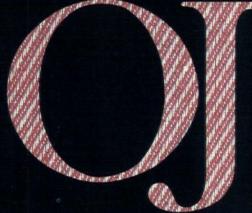

President Reagan is greeted by MacDonald Becket, FAIA, chairman, the Becket Group, at the Great Wall Hotel here, on the occasion of Mr. Reagan's state dinner for top Chinese officials. The new 1,007-room hotel was designed by Welton Becket Assoc., a Becket Group subsidiary.

# QUOTES

#### 'SMART DESIGN' DRIVES BUILDING DEVELOPMENTS

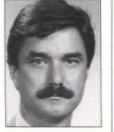

Thomas Cross Managing Director Cross Information Boulder, CO—

66 The emergence of the 'smart design' and 'intelligent building' will drive building developments in the '80s. Intelligent buildings are those structures which include teleconferencing, telecommunications technologies, local area networks, energy management systems, and other new information technologies. Increasingly, buildings are being designed by computer-aided design systems. Intelligent buildings, however, require intelligent designs that integrate new technologies into the design of the organization, not just into the design of the new building. Therefore, it is necessary to understand the new technologies as well as review the management styles and communications infrastructure of organizations that use intelligent buildings. Only through this means will we safeguard the future of today's structures. ??

#### MINNEAPOLIS MART SEEN AS EDUCATION CENTER

Gary Wheeler, ASID Partner Wheeler/Hildebrandt Minneapolis—

**66** The Twin Cities of Minneapolis and St. Paul are past ready for the development of a major regional design center such as International Market Square, which is scheduled to open in December. In addition to serving the many top-level designers located in the region, it will also act as a catalyst for local furniture sources. In the past, area space planners have been forced to take clients to New York or Chicago to show them furniture and furnishings. However, upon completion of International Market Square, we will be able to provide clients with a convenient, one-stop source. It is important to have a local place in which designers can educate their clients about various products by showing them furniture they can see and feel. ??

#### BUILDING AUTOMATION REFLECTS CONTROLS

Alvin O'Konski Director, CAD Leo A. Daly Washington, D.C.—

**66** Building automation is generally understood by architects to reflect environmental controls in buildings and, sometimes, security. In general, specification of a building's automation system is not understood by the architect, much less developed by him. Project mechanical engineers do that job. In this area, architecture/engineering (A/E) firms have a substantial advantage over straight architecture firms. Significantly, it is the A/E firm and not the A firm that leads our profession in both building automation experience and design automation experience. Very few straight architecture firms consistently use CADD. The opportunity recognized by some CADD-experienced A-E firms is one of merging computer-based design products with the clients' computerbased building and office automation systems. This is an uncharacteristic and non-visual, potential architectural innovation. It follows on work already being done by non-architects. ??

### U.S. USE OF ITALIAN TILE REPORTED ON RISE

Antonio Camellini Mng. Director Floor Gres President Assopiastrelle Bologna, Italy—

66 The U.S. market for title has been growing and this growth is shown by the increase in per capita consumption of ceramic tile over the past few years. However, U.S. per capita consumption is still much lower than that of many other industrialized countries. This market has to grow and expectations are that it will. The U.S. ceramic tile market should reach 1 billion sq. ft. in the next four to five years, an increase of about 40 percent more than the 730 million sq. ft. projected for the year 1984. We expect that, by 1990, the U.S. will be importing 250 million sq. ft. of tile from Italy alone, ??

#### BLEND ART & SCIENCE TO COMBAT COLD DESIGN

Bob Van Breda President VBDA Los Angeles—

**66** The image projected by an office space is a direct reflection of a business' philosophy, as well as a constant influence on employee attitudes and performance. Therefore, designed corporate spaces should be both comfortable and timeless. Employees who feel at ease and relate to their surroundings work productively for longer periods of time. It is important to round out the hard edge of technology by blending art and science to avoid sterility. **79**

# Elective Elements-1.<sup>™</sup> It gives you the future without the shock.

Office technology is coming out of the shadows and into the light. As it does, it brings new concerns to the workplace. How can a company automate without sacrificing human comfort?

Introducing Elective Elements-1<sup>™</sup> from Stow|Davis. EE-1 is an open-plan office furniture system that provides an unparalleled dual capability: it addresses both the electronic needs of tomorrow's office and the human needs of today's worker.

EE-I's design makes progressive automation possible. For example, the Power Distribution System allows for up to four twentyamp circuits, which can be designated for appliances or dedicated for computer equipment. The patented Energy Core™ brings power to the work surface level while managing wires and cables effectively.

EE-1 is also designed to make people feel comfortable. Its matched veneers and fabric-covered panel surfaces bring color

and texture to the work area. The complementing and contrasting details of end caps, top caps, and panel surfaces can be specified to create many different looks with one system.

If you're interested in an open-plan office furniture system that gives you the future without the shock, then visit any of our showrooms, or write us at Stow Davis, 25 Summer Avenue NW, Grand Rapids, MI 49504.

# CONTRACT **COLOR LINE**

# Color adds product diversity, gives mfr. competitive edge

Increased competition in the | many options in a standard | range." The available specsystems furniture market is prompting manufacturers of these products to seek new ways to sell their wares. As a result, the architecture and design community has recently witnessed numerous changes in the look of open plan systems in the form of more wood finishes, high-style panel fabrics, and innovative uses of colored surfaces.

One firm which has taken a stab at innovative color applications is Modern Mode, a company known for its transitional wood systems furniture. Due to its basically conservative image, Modern Mode lacked a marketing approach that would make its new 3000 Series of open plan furniture stand out in the crowd. The lightly scaled wood system was viewed as having strong sales potential, however, and management turned to color treatments to catch the designer's eve. Now called Tek 3, the system is offered with a choice of 15 finishes which can be applied to storage components, pedestals, or the entire worksurface top. This innovation, coupled with a brightly colored brochure, makes a strong contemporary statement about the firm.

#### Take second look

Explains vice president, sales, Bill Halsey, "Color has established the contemporary image that makes designers look twice. Plus, it adds the product diversity that permits designers to service an entire corporate office with one furniture line.

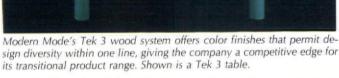

"I believe this type of service is demanded by designers today. The ability to offer

product line will give manufacturers a leading sales edge."

Initially, Modern Mode investigated color finishes with an ebonized stain which it offered with its cherry wood system in 1983. Success of this introduction led the firm to expand the treatment to other woods and to research a multi-hued program. According to Halsey, a monolithic treatment which presents a look of solidity and stands up to heavy office use was a key requirement; thus, modification of Tek 3 construction was needed. Finally, a substrate board dense enough to absorb color without excessive filler worksurface, it is usually black

trum-which incorporates neutrals such as black, two gravs, tan, and cream; shaded pastels with rose, peach, teal, and azure casts; and bright vellow, red, and blue-is inclusive without being confusing. Deep, rich green, blue, and burgundy round out color selections.

Says Halsey, "Today when we display the system in a showroom or brochure, specifiers immediately react to the color. However, we find that color is usually selected for a pedestal or overhead cabinet in one of the bright finishes. Where a color is chosen for a

was developed and the firm began fine-tuning its palette.

Colors were selected by Bill Halsey with assistance from graphic design consultant Michael Vanderbile and input from the design community. "Our objective," says Halsey, "was to include as standards highly popular colors, rather than offering a wide custom or dark gray in response to functional considerations."

The pared-down 11/4-in. scale of the Tek 3 Series had always been seen as an advantage by Modern Mode due to its adaptability to radius and mitered edges, among other treatments. Now, with the addition of color, the product is expected to take a giant step

**By Katherine Forman** 

forward in the market.

Notes Halsey, "Designers have a tendency to spend a lot of time thinking about the fabric they will specify because it affords them an opportunity to be creative with color and pattern. Now, the Tek 3 program lets them have fun with workstation design as well."

Indeed, with Tek 3, designers can play around with a wide variety of components and color treatments. Incorporated in the product line are worksurfaces in two heights and three shapes; connecting units in three sizes; backcorner CRT tables in two depths; a range of returns and credenzas; overhead and pedestal storage; and freestanding capsule-shaped conference tables.

Comments Halsey, "Today, the traditional roles of wood and metal systems manufacturers are crossing over. We see metal manufacturers offering wood as a product option, while wood manufacturers turn to color treatments. This trend represents the expansion of the industry and points out the need for diversification by all open plan furniture manufacturers. For, as systems are more widely used on all corporate levels, it is necessary to offer the variety that adds unique qualities to individual workstations. And, as work spaces become smaller, systems furniture will be called on to add interest."

# CONTRACT LIGHTING LINE

# 'See' lighting effects prior to placement with visualization tool

A computer-aided "Lighting Visualization" program from one of the nation's top manufacturers of office furnishings enables designers to see effects of their interior ambient lighting schemes prior to implementation, reducing the need for costly redesign based on inadequate planning.

The availability of this program, offered as a mail-in service by Steelcase Inc., Grand Rapids, Mich., not only underscores the industry's current focus on quality interior lightrelatively simple manner. De- | signers submit a scaled floorplan and analysis request form, detailing types of products specified, fixture placement and position, and in the case of projects not using Steelcase products, photometric reports. Specifiers must also indicate the horizontal height for which they want footcandle measures computed. Finish colors and reflectance values for ceiling, floor, and walls must also be provided as determined from a guide furnished by Steelcase.

This computer-generated view of an unfurnished office interior illustrates light distribution patterns on ceiling and wall surfaces as determined through Steelcase's "Lighting Visualization" program.

ing, but also indicates a move on the part of big-name furniture manufacturers to strengthen their foothold in the lighting industry. Steelcase, along with other top manufacturers such as Herman Miller, Knoll, and Stow/Davis, has been offering various lighting products for task and ambient use for some time. "Lighting Visualization," however, takes Steelcase one step further-from merely providing product to supplying lighting services.

The program operates in a

This data is then fed into a computer which develops a lighting-level analysis based on an unfurnished space. The computer makes all necessary calculations and translates the results into color-coded graphic and textual formats showing footcandle distribution at the specified height. Results are sent to clients approximately five days after receipt of submission

Included in the standard "Lighting Visualization" package are a contour plot on mylar overlay and a tubular report. On the contour plot, the color green may refer to illumination measures of 30 footcandles or more, yellow for 20- to 30-footcandles, and red for 10- to 20-footcandles. With this coding, clients can easily see if an area "measures up to their expectations."

#### Tabular report included

With the tabular report. specific footcandle measures at individual points contained in the drawing can be determined by simply tracing along vertical and horizontal column guides which resemble those used in road maps.

Clients can also order perspective views of lighting designs from a selection of eight angles. These views show light distribution on ceiling and walls with fixtures in place.

Although "Lighting Visualization" does offer time saving benefits as well as savings in energy and investment, it is important to remember that the program is not offered as an alternative to the services of a lighting designer. It cannot determine footcandles as reguired for a task, and because it assumes an unfurnished space, neither can it make adjustments for reflectance values of furnishings.

"The primary consideration of this program is the amount of illumination at task surfaces and the luminance variation from task to adjacent areas which could incur eve fatigue," says Don Dekker, environmental support services consultant, Steelcase. "The program doesn't address footcandles in that it doesn't say, 'these are the levels needed to perform a specific task."

By Dana Dubbs

"We're not trying to make judgements on the adequateness of a plan," he adds. "The program is simply a tool, and, as a tool it says, 'these are the footcandle levels a designer has chosen, and these are the patterns of light that will result in the plan."

In addressing the fact that the program does not take into account reflectance values of furnishings, a matter which lighting designers consider important to lighting design, Dekker does not feel that this detracts from the program.

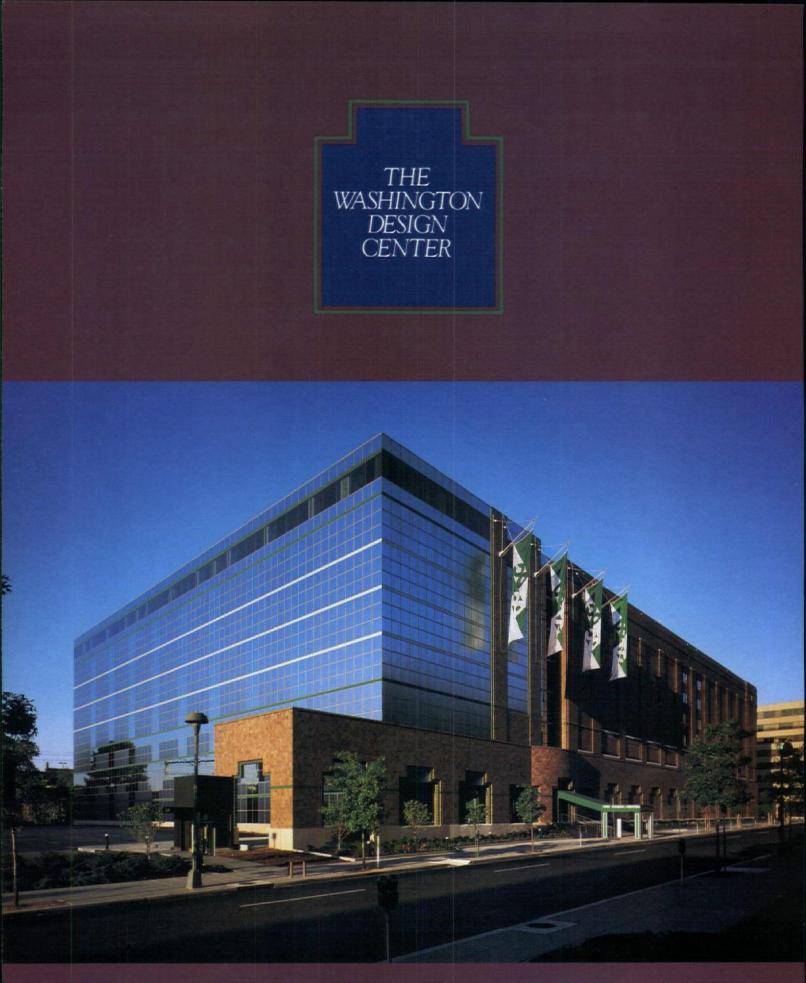

#### Colors affect quality

"Although furnishings colors do have an effect on the final lighting quality of a space, in most cases lighter colorswhich have been included in the reflectance guide-are used," says Dekker. "And, these colors do not have as great an effect on work areas as do darker colors."

Dekker also cautions against using "Lighting Visualization" in spaces that exceed 200 ft. in any direction. "When making calculations," he says, "a given number of points are assumed. If you go beyond that number, accuracy is diluted."

The cost of using Steelcase's tool varies with the type and number of graphics desired, but the base cost includes a processing charge of \$3 per luminaire for which analysis is requested (at a minimum of \$100) plus a computer programming charge of \$50 per non-Steelcase luminaire.

# TECHNOLOGY

# Copy-holder reduces fatigue for worker

HSP Computer Furniture's "Hide-a-way" copy-holder features a pull-out copy bridge ergonomically angled to hold reference data between computer keyboard and screen. Frontal placement of copy-holder minimizes head, neck, and eye movement, thereby reducing operator fatigue. Unit measures 17%-in. wide by 14½-in. deep. **Circle No. 379.** 

# Workstations arranged around central core

Humanetics group of clustered workcenters from Tab Products Co. features panels and worksurfaces arranged around a central, power distribution core. Groupings of two; three; four; or six stations are available; panels can be ordered in 48-, 62-, and 68-in. heights. Worksurfaces are offered with walnut, barreloak; or ivory finishes, and options include a built-in air system, storage components, and dropped keyboards. **Circle No. 380.** 

# Electronic memory phone stores 255 names, numbers

Alpha X electronic memory telephone allows users to dial people by their names. Users simply program names and numbers into the phone's memory. Alpha X can store 255 names and numbers, including long-distance codes. A 24-digit fluorescent display shows who is being called. Other features include monitor speaker, hold, mute and autoredial. A one-year NiCad battery enables the phone to be used anywhere. Alpha X is exclusively imported by Panel Research and Development Corp. **Circle No. 381.** 

# Dual lamp task lights system mounts on tracks in workstation

A dual lamp task light has been added to modular workstation systems offered by Pleion Corp. Mounted on a track for easy adjustment, the glare-free lighting system slides front-to-back and side-to-side. Circle No. 382.

# Mobile stand features locking cabinet

Bretford Mfg. has introduced an adjustable mobile equipment stand with a locking lower cabinet and a top shelf which can be positioned within a height range of 28- to 42-in. Model CA26-42 is constructed of steel and has arc-welded caster sockets; "E" model offers an electrical assembly with two outlets, 20-ft. cord, grounded plug, and built-in cord winder. **Circle No. 385.** 

# Oak finish debuts in furniture line

A wood-grain, English Oak finish has been added to Samsonite Furniture's 3100 series of information support systems furniture. The finish is available on desks, tables, and stands. Previously introduced finishes include wood-grain walnut, state oak, sylvan oak, and putty tone. **Circle No. 383.** 

# Put computer printers on desks with compact tabletop stand

Tabletop printer stand from Tiffany Stand and Furniture Co. enables small printers to be placed on worksurfaces. Construction is of heavy gauge metal with two, grommeted paper feed slots; one slot is centered and the other is located near the rear edge to accommodate both bottom- and rear-feed printers. Available in putty- or black-baked enamel, product includes paper guides, footpads, and vibration damper pads. **Circle No. 384.** 

# Look what the color of

**Nothing.** This carpet is made of fiber that keeps its color so well for so long, not even the harshest cleaning detergents can cause it to fade. It is Solution Dyed, which means the color is added to the fiber as the fiber is being made, locking in the color.

The fiber is called Zeftron 500<sup>®</sup> ZX nylon and it's made by Badische.

Zeftron 500 ZX nylon is unlike any other nylon fiber. Solution Dyeing gives you 38 pure, clean, contemporary colors. Heathers are softer, prettier. And Zeftron 500 ZX nylon also repels stains, defuses static electricity, and protects against harmful bacteria. It does all these things year after year, cleaning after cleaning, because they're

# bleach affatto Anscarpet.

all engineered right into the fiber. As for cleaning, Zeftron 500 ZX nylon is a cinch to clean, thanks to its five-sided shape which releases soil easily. And it hides soil exceptionally well. The reason? A six-hole cross section that deflects all light passing through the fiber, making soil virtually invisible.

The next time you're specifying carpet, specify Zeftron 500 ZX nylon. The commercial fiber that has more to offer than meets the eye.

Specify Zeftron 500°ZX Nylon. Not just the right color, the right carpet.

## Badische stands behind your carpet.

#### The technology to build you a better contract carpet.

Our major business is carpet fibers and yarns for contract carpeting. So we direct most of our research and development resources, as well as many of those of our \$16 billion international parent company, BASE into new technology to create better and more beautiful contract carpeting.

#### One number to put over 40 carpet mills within easy reach.

Dial (804) 887-6573, get the name of the Badische consultant nearest you and then see how easy carpet selection can be. You will receive the Badische Contract Carpet Guide which illustrates carpets, by traffic classification, from over 40 mills; help in finding the carpet engineered for your specific needs; help in making up carpet samples; help in writing up your carpet specification; and yarn pom chains for color selection. All for free.

#### An endurance test to ensure your carpet will endure.

Because no one wants complaints after the carpet is down, it must first be Badische Performance Certified. This means your carpet has undergone a series of rigorous tests that ensure it has been manufactured to the specifications for which the fiber and yarns were engineered. Once a carpet has been certified, that carpet will live up to what's expected of it in its traffic classification. If it didn't it wouldn't wear the Badische name.

#### COLORCORE. THE ONLY SURFACING MATERIAL THAT CAN KEEP UP WITH YOUR IMAGINATION.

"Broken Length" Designers: Massimo and Lella Vignelli, 1983.

One side of the Vignelli's table is rooted in modernism. The other side is steeped in classicism with its ornamental column that supports the tabletop's fragmented edge. In short, a somewhat surreal concept that sets up a tension between the past and present. Something that could only have been executed in COLORCORE® brand surfacing material. In this piece, COLORCORE is used to create a quality of stone. The Vignellis emphasized the monolithic characteristic of COLORCORE as well as its technical capability. The seamless edge finish of COLORCORE is an essential aspect of the design.

Because COLORCORE is solid color, it's vastly superior in durability and versatility to almost any other surfacing material. It performs exceptionally well in areas where high abrasion resistance and wear are important. And, because of COLORCORE, architects and designers are now able to take exciting approaches to reception areas, office furniture, store fixtures, architectural applications and other installations as can be seen in new works by people such as Massimo and Lella Vignelli, Stanley Tigerman and Milton Glaser.

For more information write Formica Corporation, Dept. D1, 114 Mayfield Ave., Edison, NJ 08837. For free individual COLORCORE samples, call toll-free: (1) (800) 543-8201. Ask for Operator #207. In Ohio, call: (1) (800) 582-1396.

#### **PRODUCT SHOWCASE**

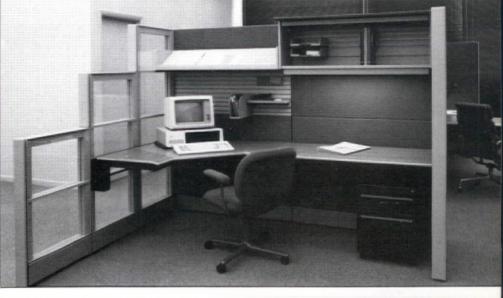

## Environmental systems reflect industry product trend

The time has come for office environment systems that integrate several interiors products into a cohesive whole, while also permitting personalized workspaces. Ethospace by Herman Miller creates such an environment with a line of structural, wired frames; interchangeable panels or "tiles;" and hanging components that afford workers access to natural light, varied surroundings, and opportunity for workspace change.

As designed by Bill Stumpf, in collaboration with Jack Kelley and Clino Castelli, Ethospace is a system of interior architectural products which can be configured in a variety of ways. The

new line represents an integration of function and esthetics, providing a pleasing environment which increases worker productivity, says Stumpf.

A structural frame containing all necessary wiring serves as the line's main component. It is available in 16in high increments and supports interchangeable tiles which permit adaptation to windows and open spaces as well as to full-height and tiered walls. Hanging components further complement the walls.

Tiles are individually finished and may be filled in with fabric, glass, wood, or vinyl. The array of available colors and finishes permits a variety of visual effects, from soft harmonies to muted contrasts.

Designers may also use the tiles to arrange patterns, insert windows, or alternate visual rhythms by manipulating light, color, and texture. Acoustical privacy can be added and localized by placement of a tile over the noise source. The same location may accept a tile with horizontal frets for mini shelves or other accessories.

Ethospace affords the worker opportunities for social contact. Windows offer a means to define public and private space; partially enclosed offices with windows afford privacy as well as visual access to co-workers. "In the past, people had to decide whether they wanted one kind of office or another," says Stumpf. "If they wanted custom design, they'd have to wait. If they couldn't wait, they couldn't get the one they wanted. If the corporation achieved a unified image, the individual often lost a sense of place.

"The drive to leave a personal mark on one's workspace has always been important," Stumpf adds. "This desire for personal comfort will only gain in importance as people spend more time at the workplace. Ethospace was designed on the principle that people cherish chosens, not givens." **Circle No. 296.**

Getting all the attention it deserves comes easy to Carousel-a cubicle cloth by KCR. After all, it was meant to be viewed by a "captive" audience. Hues that soothe and patterns that comfort are hardly a secret. But it took the innovative expertise of KCR Fabrics to break through the tried-andtrue and apply well-documented theories of color psychology to the creation of a practical 72" wide fabric for the health-care market. 100% Trevira polyester for FR fabrics never revealed such clarity and detail.

The theory is ready to be put into practice.

#### ARC-COM ANNOUNCES A MAJOR ADVANCEMENT IN ENVIRONMENTAL THERAPY.

## (HOSPITAL CUBICLE COLLECTION)

Arc-Com adds the human dimension to health-care fabrics with Medarc 2, a collection designed with the patient in mind. Available in over 100 combinations; bright and pastel colors provide round the clock therapy by creating a calm, soothing recuperative environment.

Combine the colors and patterns to compliment the existing interior design or to create a completely new patient friendly atmosphere. 72" wide, the 100% Trevira® polyester for FR fabrics can withstand all the stress and rigors of the health-care environment. They are washable up to 160°, inherently flame resistant, and surpass the most rigorous fire codes in the country. As cubicles, draperies, or bedspreads Arc-Com's Medarc 2 takes the health-care facility beyond its function to therapy in itself.

#### Protect your interiors beautifully with Acrovyn<sup>®</sup> handrails, corner guards, bumper guards.

How many times have your pristine interiors been damaged—by movers'dollies and carts, floor waxing machines and myriad other walking, skidding or rolling menaces?

Well, now there's a beautiful, practical solution. It's the Acrovyn Wall Protection System and it's better than ever, with even more designs and colors.

Handrails, bumper guards and corner guards, of tough vinyl/acrylic mounted to concealed aluminum retainers, will protect your interiors from day one and for years to come. That's because Acrovyn's unique free-floating action distributes and absorbs punishing impacts *before* they can cause unsightly damage to corners or wall surfaces.

The HRB III Handrail shown here is the newest member of the Acrovyn family. Insert options offer an infinite variety of color and surface effects, including 28 Acrovyn designer colors, plastic laminates, anodized aluminum, reflective film and a luminescent material.

The complete system also includes door cladding, door frame protectors and wall covering that's both beautiful and "tougher than blazes." Every design is available in 28 colors.

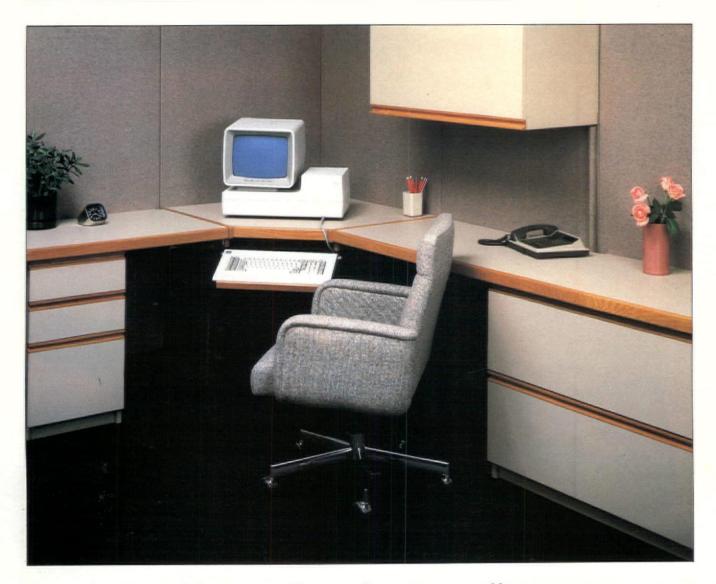

So, if you want to keep your walls looking new, protect them beautifully with Acrovyn!

#### Wood trim adds warmth to electronic offices

Rose Johnson Inc.'s Progressions open plan system is notable for its use of wood trim and fabric-covered acoustical panels, sources of warmth and softness that balance the harsh realities of today's electronic office.

The complete system, expanded to include file and drawer pedeștals which coordinate with overhead storage components and meet a variety of electronic as well as conventional storage needs, also features oak-trimmed, high-pressure laminate worksurfaces. A freestanding desk line is also offered as are storage shelves, typing returns, and CRT corner systems. A rounded-edge highlights a conference run-off surface.

Subtle oak detailing on drawer fronts and flipper door storage components further enhance the line.

"As the office environment becomes more and more hi-tech, people want more warmth in their surroundings," says Richard B. Oakley, Rose Johnson. "This furniture system provides the warmth and softness that is needed to balance the harsh, green screens of VDTs in electronic offices."

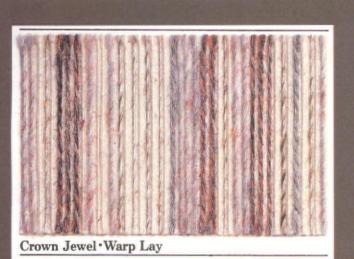

Also featured within the system are such "whistles and bells" as slotted printer surfaces, articulated keyboard holders, and wire management.

A variety of fabrics from silk and flannel to polyester and Irish woolens are available for use with the system's acoustical panels. Glazed panels are also offered as part of the system. **Circle No. 334.**

#### CONTINUAL

1983 IBD Gold Award Winner

P.O. Box 8100 Green Bay, WI 54308 (414) 468-8100 Krueger presents the Com Continual – the system with the workflow surface.

With its fluid sweep of contiguous task areas to facilitate operational interaction, the Com Continual is the ultimate expression of the new generation of worksurface-and-storage-system design.

Technical innovation ... by design

Unlike panel-supported systems, it can be rearranged easily as needed. And unlike ordinary desks, it employs a beam infrastructure that conceals all wiring - an anti-visual pollution device.

The Com Continual. The state of the art, artistically stated - for the living office.

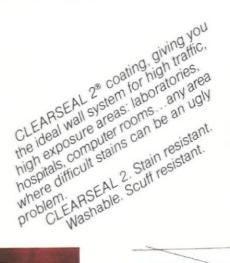

Designed by F. Frascaroli & C. Biondi for C.O.M., Bologna, Italy, and manufactured under license by Krueger, Inc.

#### **PRODUCT SHOWROOM**

## SoHo showroom sets stage for success as Italian furniture manufacturer enters U.S.

Establishing an identity in the American design community is the goal of Fantoni USA—marketing arm for the Italian contract furniture manufacturer. Thus, in setting up New York showroom operations, location and space plan were carefully selected to assure that the firm and its products are appropriately presented.

A 5,000-sq.-ft. former warehouse and printing facility in Manhattan's SoHo district was the site chosen by Fantoni due to SoHo's growing importance in the architectural and design community. New York architect Al Salsano was commissioned to create a stage set for Fantoni's furniture—some of which is part of the permanent collection at the Museum of Modern Art. Immediate space planning needs included concealing exposed pipes and radiator units and refurbishing columns covered with peeling paint. Salsano responded by painting pipes and radiators a neutral gray; columns were refinished in tambour, a feature of Fantoni's DS System.

When complemented by carpeting in the same gray tone, these elements appear to fade away under spotlights which accent the furniture. Says Salsano, "As a result, pockets of space, which permit clients to be absorbed by the furniture rather than by the space design, are created."

Upon entering, visitors are surrounded by stark white drywall framing a black marble floor which instantly communicates a stage-like quality. The contrast of black furniture against the neutral gray and white showroom draws clients through the space, while adding drama to the showroom.

Similar contrasts were used by Salsano to maximize the showroom's visibility and importance in the eyes of passers-by. The showroom is located below street level and has only one window through which furniture can be viewed from the sidewalk.

Framing the window is a bright neon sign which immediately draws attention. Meanwhile, greenery at the window base and on columns which step down into the showroom minimizes the sensation that the visitor is in a subterranean facility.

## Fiber artistry.

Creating beautiful interiors with carpet takes your particular abilities. Preserving that beauty and making it practical takes ours.

That's why carpets of Anso® IV HP nylon with HaloFresh<sup>™</sup> are unique. No other offers their heavy-denier performance and total built-in soil, stain, static, wear and anti-microbial protection. No other equals their lasting beauty and maintenance ease. Insist on a lasting medium, worthy of your time and talents. Anso IV HP nylon with HaloFresh: the state of fiber artistry today.

Allied Tech Center, Contract Technical Specialist, P.O. Box 31, Petersburg, VA 23804. (800) 992-9922.

#### You color interiors. We color tables.

Every interior you design is thought out in color.

To give you more food for thought, we at Howe are introducing our new Spectra Group. Spectra's metal understructure comes in many epoxy colors which either match or contrast with a wide choice of colored laminate tops and vinyl edges. How about, for example, tables of cranberry top, black edge and gray understructure for your cafeteria or training areas? Scheme too cool for cranberry?

Well, there are *many* other combinations. And when you find the ones you like, remember, you'll be specifying Howe quality along with these wonderfully colorful tables. Spectra is the name, color is the game.

# The Option One open office system from Amstore

### Buy it for its value. Then value it for its simplicity.

#### Better value's built in.

Compare Option One with any other open office system, and its value *really* shows.

First, Option One has a superior appearance — as well as the rigidity, and sound and fire ratings you expect from more expensive systems.

Second, it does something most other systems don't do, regardless of their cost: Option One works with your existing furniture. So you not only get the benefits of a reasonably-priced open office system, you get ongoing value from current equipment. Simplicity for better function.

Well-thought-out simplicity makes Option One easy to plan, install and rearrange.

Metal connector knuckles (right) align and space panels. And a basic connection device, a durable plastic hinge (left) joins panels, regardless of how they're angled or configured.

The simplicity continues: Option One consists of a limited number of carefully chosen components, so it's just as flexible as other systems that are much more complex. This means you can tailor an Option One work station to almost *any* office job function you can think of, so you save on planning, ordering, installation and inventory costs. **Exercise your option now.** 

Put Option One to work in your offices. Call or write for our brochure.

# You'll find colorful style here... with Ultron<sup>®</sup> 3D.

### Color

Color is one of the first qualities you specify, and the mills who use ULTRON® and ULTRON® 3D fibers by Monsanto offer a never-ending color palette. Just select any shade for any traffic location. The high quality of ULTRON fibers lets the carpet stay attractive and goodlooking for many years to come.

### Luster

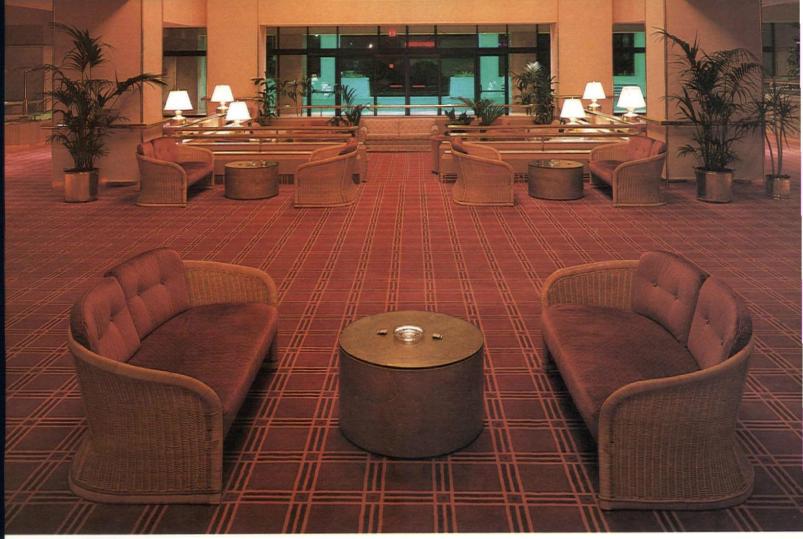

ULTRON fibers combine the expensive wool-like luster with the long-lasting function and practicality of nylon. The luster you'll see in ULTRON and ULTRON 3D fibers will give a unique glow and brilliance to a lobby, office area or restaurant application.

### Texture

ULTRON fibers are designed to resist crushing and matting regardless of the traffic flow. Low pile, cut pile, or berber look . . . all have the "bounce-back" features of ULTRON. ULTRON stays goodlooking over many years of use.

## and lasting performance here

### Performance

ULTRON and ULTRON 3D fibers feature a carefully engineered triangular cross section construction. This tri-lobal design resists abrasion. It provides excellent resilience. And it ensures excellent soil-hiding and low-soiling characteristics. Plus, Monsanto's built-in proprietary antistatic elements give permanent static control.

### **Durability**

ULTRON 3D is a heavy denier product with a firm hand. It offers even better protection against soil build-up and three dye level versatility. Both ULTRON fibers are made of type 6,6 nylon—the toughest of all manmade carpet fibers. And both have achieved an outstanding balance of appearance retention properties.

ULTRON\* and ULTRON\* 3D are registered trademarks of Monsanto Company

### The New Planters Just For Open Plan

**TOPsiders™** The entire grid is your garden. Plant the filetops, the binder bins—and the wall panels, if that's where the plants work best.

**TOPsiders™** Soften edges and happily put high touch humanistics anywhere. Free up plant placement options and de-limit design potential without stealing a single square foot from a space-critical floor plan.

TOPsiders<sup>™</sup> Patent pending. Clean-lined

radius rectangles in ABS. Non-marring support brackets install quickly with no tools at all, adjusting snugly to any size panel top from  $1\frac{1}{2}$ " to  $2\frac{3}{4}$ "; then, the watertight planters slip securely over the brackets to hide them completely. Designed to hold standard 6" nursery grow pots without replanting;  $30 \times 6\frac{1}{8}$ "  $\times 6$ " and more sizes to come soon; five standard matte colors — warm brown, dark brown, charcoal and the most frequently specified tan and gray values.

TOPsiders™ A whole new way to plant an open plan. Circle 87 on reader service card

2312 Central Avenue Middletown, OH 45044 (513) 423-2735 Executive Desks A Continuum in Design

Tuohy presents four distinctive designs in executive desks as a continuum in contemporarytransitional design.

Each desk grouping is an individual series of executive furnishings, including desks, returns, credenzas, U-stations, file paper management units, and computer designated furnishings. All units are produced from selected hardwoods and hardwood veneers. Detailing and appointments are presented with the highest regard for furniture excellence.

Above: Primera Series desk, presenting its epicycloidal corner detail. Cube or recessed formats.

Below: Dorian Collection desk in full crotch mahogany; also available in walnut, oak & mahogany veneers.

### EXCLUSIVE! ALL NEW COMPONENTS INTERFACE SYSTEMS FURNITURE PRODUCTS. BEAUTIFULLY!

Now, the ultimate partition has extended its superiority even further. New "Systems/Ultrawall" accommodates almost all manufacturers' system furniture readily...as shown here with American Seating Company products. ULTRAWALL partitions have been the industry's choice for years. For easy disassembly and reassembly. For sound ratings up to 50-STC, fire ratings up to 2 hours. And for the solid feel you'd expect only from a permanent partition. Flexibility. Aesthetics. Strength. Quality. You'll find ULTRAWALL partitions score on every count. All at a cost competitive with drywall and vinyl wall coverings. Tax benefits make it the only logical way to separate space. For specifics, call your U.S.G. Representative or one of our regional offices listed below. Or write to us at 101 S. Wacker Dr., Chicago, IL 60606, Dept. C-1184

## JEFFERSON COLLECTION IS 16TH ANNUAL PRODUCT DESIGN

Record number of gold medals among fewer total awards signifies quality of entries in the 1984 judging he Jefferson Chair/Table Collection designed by Niels Diffrient for SunarHauserman, was selected Best-of-Competition in the 16th annual Institute of Business Designers/CONTRACT Magazine Product Design Competition. Taking two gold awards, one for Best-of-Show and one for the Innovative Product Solution category, the Jefferson Chair/Table was among a record number of gold awards made by a distinguished group of four jurists.

Gathering for two full days of deliberations at the IBD headquarters, Merchandise Mart, Chicago, the judges awarded several gold, silver, and bronze awards plus five honorable mentions, although the latter category was earlier eliminated from judging this year.

Of the 42 awards, down five from last year, 16 were gold, 12 silver, and nine bronze. Category 13—Upholstery Fabrics—claimed three gold medals, while each of four other categories took two gold awards. Certain categories of the competition received multiple silver and bronze medallions.

Jurists were Eugene Daniels, FIBD, national president, IBD, and president, Counterpoint Inc., Knoxville, Tenn.; Dale Fahnstrom, IDSA, associate professor, product design, and chairman, Institute of Design, Illinois Institute of Technology,

## CHAIR/TABLE BEST-OF-SHOW IN IBD/CONTRACT COMPETITION

Chicago; James Guequierre, vice president, Hambrecht Terrell Intl., N.Y.; and Gordon Sylvester, partner, Henry Dreyfuss Associates, N.Y.

Absence of winners in 10 categories out of 22 is reflective of high standards set by the judges, according to Karen Guenther, competition coordinator for IBD. "We will launch an extensive campaign together with CONTRACT Magazine to welcome competition participants in early 1985 for next year's event," says Guenther.

"There were so many excellent entries in certain categories—especially in fabrics—that this year, judges established sub-categories for medalist recognition in these product lines. That is why multiple awards occurred so often.

"It is to the credit of this very responsible panel of jurists that pains were taken in selecting the winners over a grueling two-day period," Guenther concludes.

Winners were hosted at a special dinner held during Designer's Saturday at the International Design Center New York (IDCNY) in a program themed a "Design Olympics." Designer's Saturday participants and those in town to accept awards convened at the site of the new design center located in Long Island City, across Manhattan's 59th Street Bridge. Engaged in two days of deliberations for selection of IBD/CONTRACT product design awards are jurists and IBD executives (l. to r.; photo far-left) Dale Fahnstrom, ISDA, associate professor, product design, and chairman, Institute of Design, Illinois Institute of Technology; Gordon Sylvester, partner, Henry Drevfuss Associates; Charles Gelber, FIBD, chairman, IBD Product Design Competition and national president emeritus, IBD; James Guequierre, vice president, Hambrecht Terrell Intl.; Karen Guenther, IBD, product design competition coordinator; and Eugene Daniels, FIBD, national president, IBD, and president, Counterpoint, Inc.

#### Gold Award, Special Innovative Product Solution

SunarHauserman for The Jefferson Chair/Table Collection. Designed by Niels Diffrient. Circle No. 337.

The product takes seating in a new direction. W is the ultimate evecutive lowest taking the miniman body juts consideration. The product creates total individual privacy."

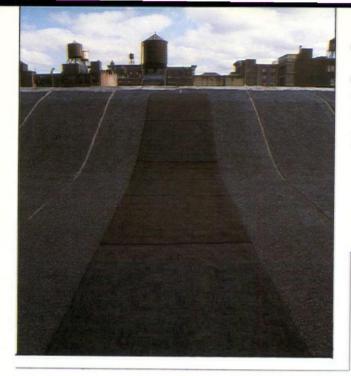

#### Gold Award

Interface Flooring Systems for Impressions. Designed by Peggy McGee. Circle No. 338.

This product represents innovative use of multi-color principles in a carper tile, It is prosaic in concept and color live. The file is responsive to all other colors and elements in the room.

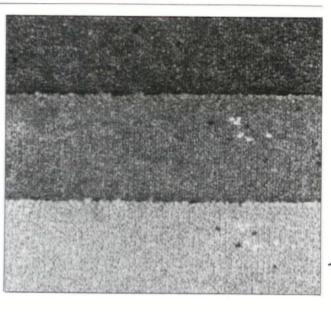

#### Silver Award

Milliken and Company for Nova Pointe. Designed by Leslie S. Ried and David D. Oakey. Circle No. 340. "Depth and shadows are added to standard carpet file to excidement." IN pesembles confetti print while making use of new technology in printing light pattern on a dark genind."

#### Carpeting & Rugs Continued

#### Gold Award

V'Soske for Task System. Designed by Henry Smith-Miller and Laurie Hawkinson. **Circle No. 339.**  The of the most sumptions campos... must be pun and onched to be appreciated. Wis rooted in Ociental philosophy The product it, thinks Cornig and Starts... with a clean Lat.

### BD CASEGOODS

#### Gold Award

Vereingte Werkstatten for Bisante Cabinets, available through Stendig Intl. Designed by Afra and Tobia Scarpa. Circle No. 341.

"A beautiful, elegant pice that is very specialized in application and winderfully executed."

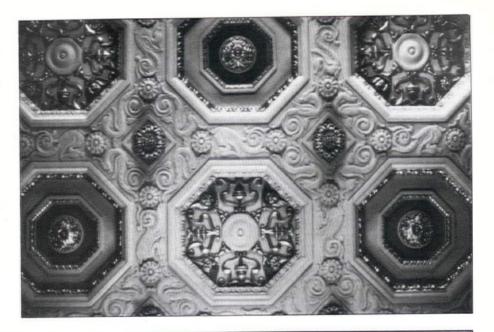

Silver Award

Entol Industries Inc. for Venezia "A Masterwork." Designed by Bernard Schumacher. Circle No. 342.

"Is a useful optim for restruction work. Very giventive, ingenious. This treats classic ceilings in a modern way."

## BD CHAIRS/SPECIALTY SEATING

#### Gold Award, Guest Seating

Stendig International Inc. for Andover Chair. Designed by Davis Allen. **Circle No. 344.**  Gold Award, Task Seating

Herman Miller for Equa Seating. Designed by Bill Stumpf and Don Chadwick. **Circle No. 343.**  "Chair offers efceptionally tresh, sculptural form." Upholosing detailing is quite begutiful." The line bludes quality of comfort. Without doing it in a mechanical way."

"This is a veal classic, offening trinicht-ful actailing and beautiful finisher! It looks light and harks back to carrier styles. W is created as an fmerican chair."

#### Silver Award, Guest Seating

The Gunlocke Company for The Courthouse Chair. Designed by Kenneth Walker. Circle No. 346.

The designer has ve-inginitered, the old courthouse chair successfully. Word version is cited to award since it is most successful in a, variety of finishes."

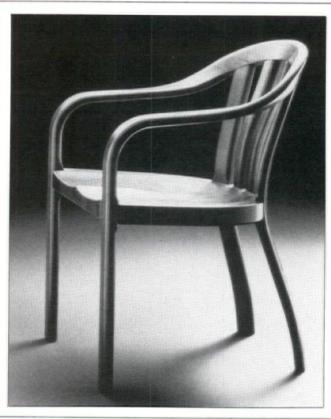

#### **Bronze** Award

Contract Seating International for the ART Chair Collection. Designed by Hector M. Coronado and Arturo Fis. **Circle No. 347.** 

Chair offers very hand some proportions and is very decorative. The verieal adds a shadow matity. This is an alegant stack chair. Chairs/Special Seating Continued

#### Silver Award, Task Seating

SunarHauserman for The Diffrient System Task/Desk Chair. Designed by Niels Diffrient. **Circle No. 345.**  The chair does not have the prindenous took of non expression contrast between grometry of the arm and softwar of the vest of the chair. I offers the perfect complement to the entire system."

### FURNITURE INTEGRATED/TASK AMBIENT LIGHTING

#### Silver Award

Knoll International for Hannah Task/Ambient Lighting. Designed by Bruce Hannah and Chuck Davis. **Circle No. 348.** 

"Different light levels are grailable though switching. This is a very clean solution and is well-executed. It is no-glare and very adjustable."

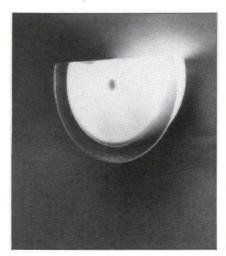

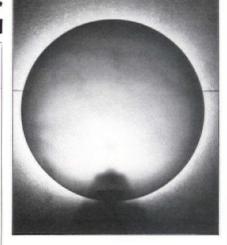

## LIGHTING

#### Silver Award

Arteluce, a division of Flos spa, for Tilt, available through Atelier International. Designed by Pier Giuseppe Ramella. **Circle No. 349.** 

"Product offers inventive use of vibbed gass and is most well-thought - set. It is beautiful in Heution."

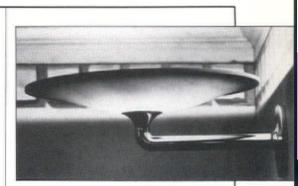

Honorable Mention

Les Prismatiques for Lotus Wall Sconce. Designed by Jerry Van Deelen. **Circle No. 351.** 

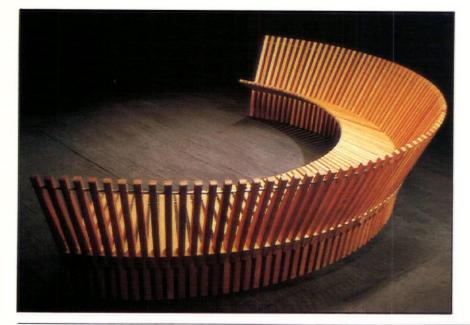

"Innovative use of materials and beautiful in concept."

Bronze Award Les Prismatiques for Ciro Wall Sconce. Designed by Jerry Van Deelen. Circle No. 350.

"This product features interesting use continuously matched and good use light. The product has a Victorian quality and humans Vight quite well."

## **LOUNGE FURNITURE**

#### Gold Award

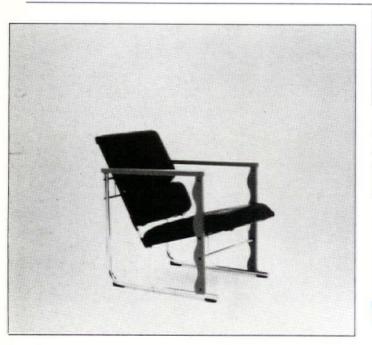

Thos. Moser Inc. for Astral Bench. Designed by Per Borre. Circle No. 352.

"Product has the most wouderful aisplay of natural finisties." I demonstrates total success av taking the material and beautifully integrating it into a successful design. "

#### Silver Award

Niedermaier Design for Series 4000 Chair, Loveseat, Sofa, Bench. Designed by Niedermaier Design Team. **Circle No. 353.**  "Product offus universal use and application possibilities. If is "innovative in that it valiscovers basic elements of the chair. Noteworthin for simplicity in design."

#### **Bronze** Award

Avarte, for Experiment Chair, available through Beylerian Ltd. Series. Designed by Yrjo Kukkapuro. **Circle No. 354.** 

"Smades of Bob Modern Muments and is vight for the moment. W is whimpical, and smally emotional."

#### Gold Award, Casement Fabrics

Groundworks for Modern Sheers Collection. Designed by Patricia Green. Circle No. 355.

> "Product hitro duces fabrics that everyone has been spain to think about I is pensual and grannabreaking."

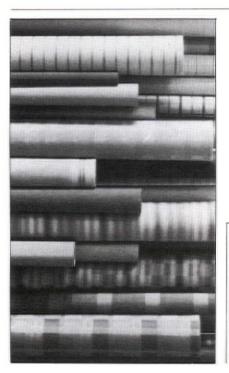

#### Gold Award, Fabric Collection

Herman Miller Inc. for Color, Fabric, Finish Program for Seating. Designed by Clino Trini Castelli. **Circle No. 356.** 

"Metallic look addo dimension, This is a very high-fech lookeing fabric in a well-coordinated grouping."

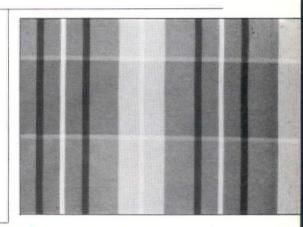

Silver Award, Health-Care Design Tex Fabrics for Envirotex 2. Designed by Hazel Siegel. Circle No. 358.

The collection offers G broad, well-coordinated line with versatility. SV polves difficult problems."

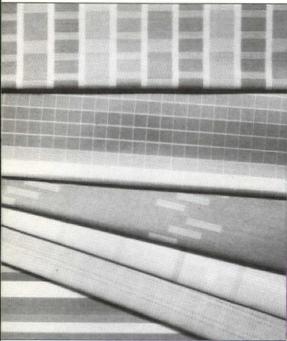

Circle No. 357.

Silver Award, Health-Care KCR Fabrics for 4500 Series Carousel Cubicle Cloth. Designed by Alice Conner.

"Product meets requirements of heathcare market... a major scoment of the marstry. A offers a hice balance between soft and cold styling "

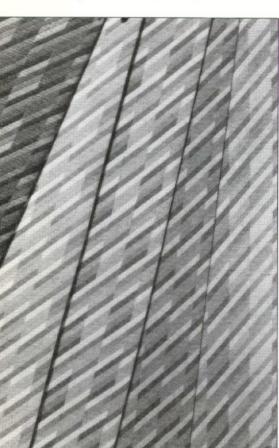

#### Other Fabrics Continued

#### Honorable Mention, Fabric Collection

Design Tex Fabrics for The Renaissance Collection. Designed by Hazel Siegel. **Circle No. 361.** 

"A delicious palette which is appropriate for hold chempele."

#### Bronze Award, Health-Care

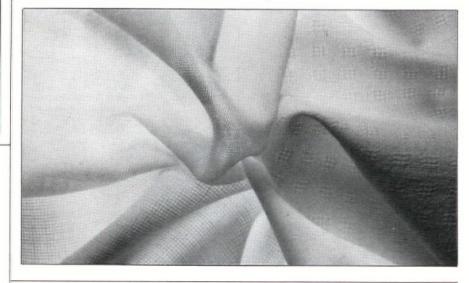

Arc-Com Fabrics Inc. for Medarc 2 Collection. Designed by Arc-Com Design Studio. **Circle No. 359.** 

"Offers broad vange that begins to introduce some sophi sticated patterns."

#### Bronze Award, Casement

Brickel Associates for W.B. Casement Collection. Designed by Ward Bennett. Circle No. 360.

"Live has a variety of textures and strips within a public color nin, or has a quality hand."

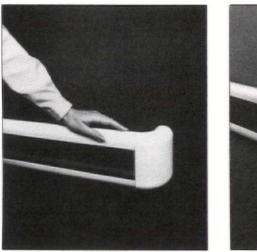

#### Honorable Mention, Hospitality

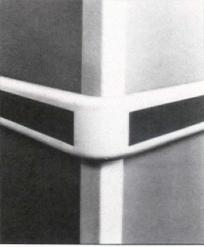

Ametex Contract Fabrics for Print Collection. Designed by Ametex Design Team. **Circle No. 362.**  "A tresh approach when compared with fabrics currently" on the market."

# PRODUCT SOLUTION

(In addition to the Best-of-Competition winner in this category, SunarHauserman-depicted on opening pages of this section-an Honorable Mention was awarded Construction Specialties.)

#### Honorable Mention

Construction Specialties for Acrovyn Model HRB-3 Handrail. Designed by C/S Muncy R & D Group. Circle No. 363.

"Introduction of color insert assists in fraffic direction. Product makes an interesting design

## SYSTEMS FURNITURE

#### Gold Award

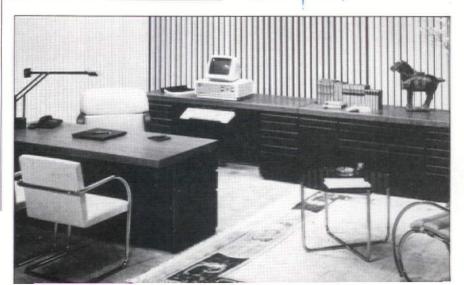

SunarHauserman for The Diffrient System. Designed by Niels Diffrient. **Circle No. 364.** 

"Represents a vemarkatle breakthrough in office humitule. The suptem addresses office line do where panels are not the only solution."

#### Silver Award

Knoll International for Hannah Desk System. Designed by Bruce Hannah. Circle No. 365.

"Judges reconnize-the maturity of the dest" into a protent. M offers have doome. elecution. There is flexible and sophisticated handling of mile management."

Athol Manufacturing Corp. for Generation. Designed by William M. Lipton. Circle No. 376.

"Looks like canvas until yn touch it This is very uiteresting fr a vinnt. The first aepenture from standard vinnt to be, seen in a long time."

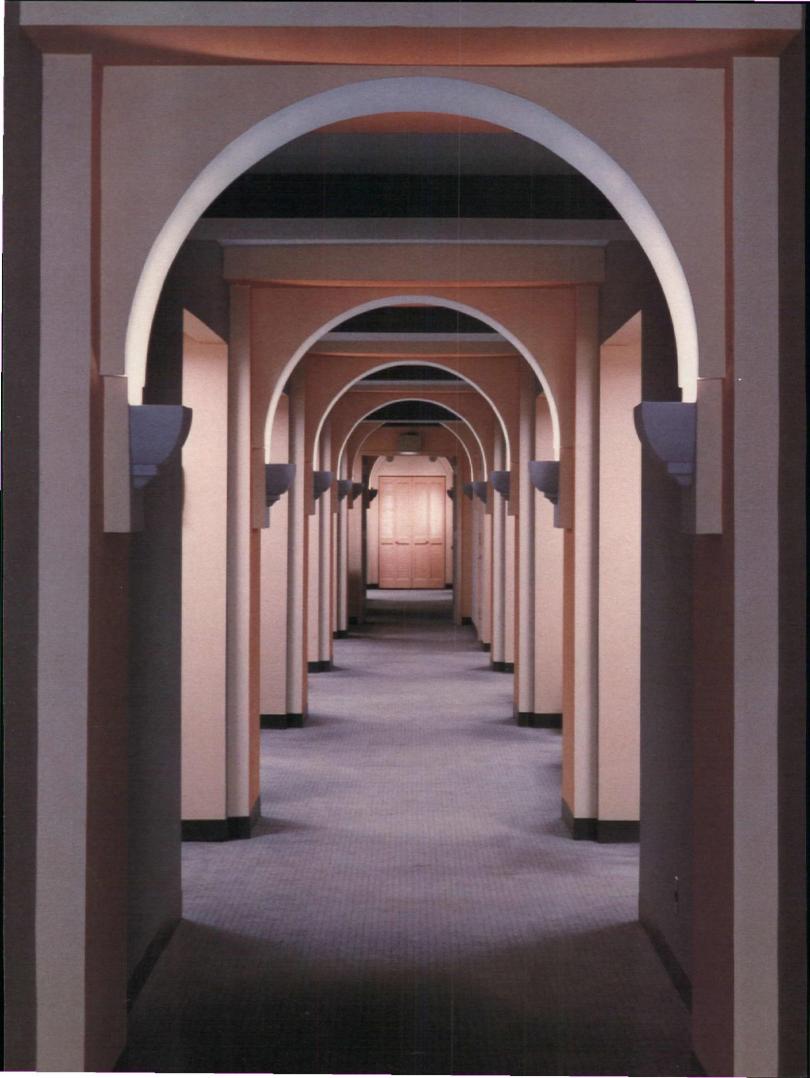

Contract November 1984

# OFFICE OUTLOOK: TIGHT BUDGETS, CREATIVE SOLUTIONS

An issue crammed with exciting new furnishings products by extension celebrates beautiful interior space planning. This month, CONTRACT does exactly that, providing some of the latest examples of space design that stimulate minds and emotions. Despite the restraints of budget limitations, designers manage to create interiors that achieve the best of two objectives—productive, efficient space design and esthetic quality. Office installations in this issue strike a happy balance between the two goals that will appeal to readers on many levels.

**—THE EDITORS** 

Unsightly plumbing shafts are transformed into gracious design elements used to support full- and half-arches, adding variety to interiors for Channel 13/WNET, N.Y. headquarters planned by Colbert deSign.

## ECONOMICS GUIDE DESIGN OF BROADCAST STATION HEADQUARTERS

Plumbing shafts form promenade on floor once occupied by hotel

espite a stringent budget which guided design of Channel 13/WNET's Manhattan headquarters, there was no shortage of creativity on the part of local design firm Colbert deSign. The space is a visual delight featuring arched promenades plus a soft apricot and blue/gray palette.

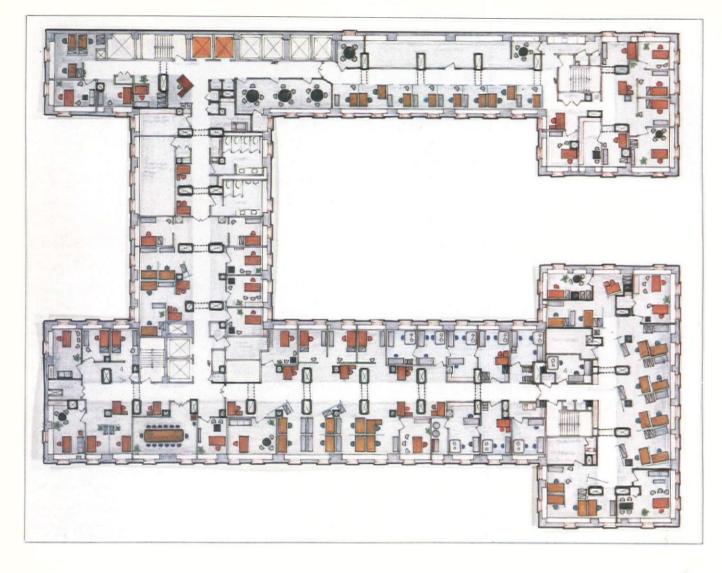

When designer Terry Colbert began work on the 20,000-sq.-ft. facility, a floor of the Henry Hudson Hotel, large plumbing shafts marked the "U"-shaped space. These shafts had once serviced guest rooms but now uselessly flanked corridors at 18-ft. intervals.

Structural and budgetary constraints made it impossible for the public-supported, non-profit institution to remove the shafts, but, according to Colbert, "They were large and hideous, and something had to be done with them. The station had previously attempted to hide shaft walls behind open plan furniture, but this resulted in a forced look and created an awkward traffic pattern."

#### Cutting costs is major consideration

Colbert's solution integrates the shafts into space design by using them as foundations for arches. Where shafts flank both sides of a corridor, full arches were constructed; half arches were employed in corridors featuring only one wall of shafts. This latter treatment also serves to add variety to the primarily symmetrical, full-arched corridors. As another benefit, the 60-in.-deep shaft wells are used as secretarial work areas, allowing form to combine with function.

Economics were a prime consideration of the design project, and Colbert responded to this in a variety of ways. By leaving hallways free of dropped-ceiling and heavy-duty

## Soft colors play on arches

light fixtures, he was able to cut costs while easing the tightness of low-ceilinged areas. And, despite the fact that Channel 13 mandated use of its existing furniture—a hodgepodge of styles and colors—Colbert's addition of similar task lamps with translucent apricot shades adds a homogenizing touch throughout the floor. "Illumination from overhead fluorescent lights has been kept at lower-than-normal levels in an attempt to encourage workers to use these lamps," says Colbert.

Perimeter fan coils handle heating and air conditioning needs while a hierarchy of open landscape and short-wall, fixed-partition offices are programmed at critical points to free air movement. In this way, Colbert was able to economize on the number of ceiling-mounted units that would have been needed to extend air to central areas.

Through a variety of lighting techniques, multiple effects are achieved. For example, tungsten uplights illuminate archways while creating subtle shadowing on arches, soffits, shafts, and ceiling beams. Artwork, used to help relieve the monotony of flat walls at corridor ends, is highlighted by track lighting as are some open spaces in corridors. Track lighting is also used to play up the texture of louvered closet doors.

Furthermore, open landscape areas take advantage of natural light pouring in through perimeter windows, while also serving to break up corridor length. Gray carpet tiles help define corridors from work areas which include offices for 87 employees, core facilities, editing rooms, libraries, pantry, conference/screening rooms, computer-oriented training room, and "new-technology" computer laboratory. A dot pattern runs throughout corridors; solid gray is featured in work areas.

#### SOURCES

Carpet—Milliken. Paint—Benjamin Moore. Lighting—Koch & Lowy, Boyd. Glass block—PPG.

Interior design—Colbert deSign, New York; Terry R. Colbert, designer. General contractor— Humphreys & Harding. Electrical engineer— Andrew McTique Pedrick. Mechanical engineer— Anthony DeSimone.

Functioning as foundations for arches and secretarial work areas in some spaces, plumbing shafts were integrated into design scheme for Channel 13/WNET, N.Y. Multiple effects are achieved as well by lighting treatments; uplights illuminate archways and add drama to soffits, shafts, and ceiling beams. Track lighting plays up texture of louvered closet doors.

Photography by Nick Wi

Modular approach to furnishings and storage systems helps achieve clean-line image desired by the client. A custom lacquer storage wall, above, was designed by space planners LCP Associates on a module that reflects the building perimeter module.

# OPERATIONS IMPROVED

Order with style achieved in planning

or New York law firm Kelley Drye & Warren, designers LCP Associates, also of New York, created an interiors package that is at once organized and visually striking. Organization is achieved through such means as bi-level circulation paths, vertical communication via stairways, centrally located service core, and modular approach to furnishings and filing.

But it was with an eye to the exterior that designers created visual effects to lend drama to this orderly space plan. Natural light is gathered and distributed throughout the interior through abundant use of glass panel and careful preservation of expanses of exterior glass wall. Panel heights of secretarial stations were designed to permit maximum access to light. Visual variety is achieved as well by alternation of enclosed spaces with open areas.

The firm of 170 lawyers occupies 120,000 sq. ft. on five floors at 101 Park Avenue. Says senior designer Julie Lindh, "The client sought an elegant, prestigious look. In addition, a prime requirement was space organization. Clean lines were mandated."

Designers began to articulate the plan by locating partner and associate offices along the perimeter. Standard locations were established for conference rooms at the northwest and southeast corners of the building. In these spaces can also be found two secretarial stations and stairwell.

Additional secretarial stations, paralegals, and various support functions (including

# FOR N.Y. LAW FIRM

## lawyers' 120,000-sq.-ft. HQ

library, central file, mailroom, copying machines etc.) are located in bands of space between the core and perimeter offices. Circulation is divided into two levels. The first level surrounds the core; the second exists between perimeter offices and the service band. The latter path is primarily for clients, being less traveled and quieter.

A modular approach to furnishings and storage systems helps achieve the clean-line image desired by the client. A custom lacquer storage wall, for example, was designed by LCP on a module that reflects the building perimeter module. Secretarial areas in East-West, long-run-of floor locations enjoy a 75-ft. length of storage wall which is 7-ft. high and broken up with private office doors. The wall offers 2-ft.-deep storage cabinetry.

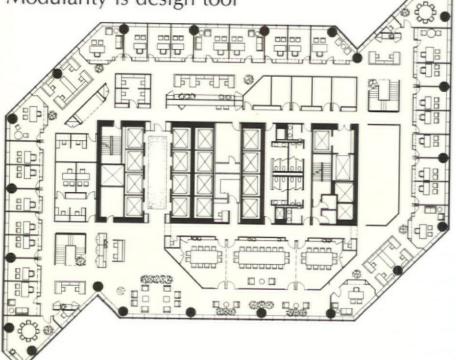

Private offices located on the opposite side of this wall have their own 4- by 9-ft. section storage walls. Modules can be joined by eliminating sheet rock walls to create a partner's office from two associates' offices.

"This flexibility was not necessarily a requirement, but we were told to build it in anyway," notes Diane Zabiela, vice president, LCP.

In an associate's office, a wall module consists of a door and a vertical file, or a counter with two shelves above. In a partner's office, a module contains door, coat closet, or files with two shelves above. On top of the storage wall a light tray illuminates both perimeter offices and adjacent corridor. (Continued)

Natural light is gathered and distributed throughout interiors of Kelley Drye & Warren by means of abundant glass panel, depicted above in reception area. Interest is added through use of angular wall treatments employed throughout the facility.

## KELLEY DRYE & WARREN Modularity is design tool

Reception areas, located on floors 29 (main reception) and 32, are open and airy spaces to which interest is added by angular wall treatments. This is especially apparent on the 29th floor where a 40-person conference room (which can be subdivided) has a wraparound reception area nearby.

Other conference areas are located in "corners" of each floor created by the building's wedged shape. These catty-corner conference areas seat eight and are a neat solution to an otherwise awkward space problem.

Color schemes chosen emphasize gray with brick, salmon, and wine-colored accents. General, public areas are of two neutral grays accented by brick-colored fabric. Secretarial chairs are done in the same color. Partners were given a choice of three palettes of burgundy, blue, or brick accents.

The core, partitions, and cabinetry are of medium gray; spaces on the perimeter are a lighter gray, including partitions, lacquer panel storage wall, secretarial stations, and carpeting. Thus, when looking out from a partner's or an associate's office to the secretarial area, a slightly different, darker value of gray used there tends to offset private office color subtly.

Chrome was the main metal employed, while mahogany was the dominant wood. Stairways are of granite with glass panel rails topped by chrome. □

Interior Design—LCP Associates; Gene Ruegamer, principal; Diane Zabiela, vice president; Julie Lindh, senior designer. Contractor—Nico. Furniture dealer—Empire Office Equipment.

Flexibility to accommodate change was a prime objective of the Kelley Drye & Warren project, designed by LCP Associates, N.Y. Shown here are Diane Zabiela, vice president, and Gene Ruegamer, principal, LCP Associates.

With an eye to the exterior, designers capture natural light, preserving expanses of glass wall that help illuminate interiors. Shown below is one of two circulation paths organized by interior designers to avoid congestion in the facility. Other tools employed to organize the space include connecting stairways, central service core, and modular furnishings.

Interior treatments for Chemical Bank, N.Y., include custom-designed frosted glass wall panels, used on private office walls and in conference room spaces (opp., top). Lighting employs sconces in elevator lobbies and corridors (opp., bottom and this page.) Corridors are foreshortened by use of portals.

## BUILDING BLOCKS HELP MAKE CHEMICAL BANK WORK

Universal approaches enable facility to cope with change

Janning to accommodate change anticipated over the duration of the client's lease prompted Gensler & Associates, N.Y., to take a building-block approach to interiors for Chemical Bank, located on Madison Ave.

Intensive work with the Real Estate and Construction Services departments of Chemical Bank's Real Estate Division yielded a forward plan that also drew on needs of the bank's Information Services division. A key consideration was markedly increasing use of computers by the facility's support services staff.

Five of six floors, totalling 200,000 sq. ft., have been completed for the bank. Legal, finance, and human resources departments, among other bank services, are located on floors nine through 13 of the building; floor 14 is scheduled for completion early next year.

"The banking industry is changing so rapidly," notes Ken Van der Kolk, AIA, of Gensler, "we had to build in flexibility for the extent of the lease." Working closely with the client proved to be a plus. Notes Van der Kolk, "We were fortunate to be able to work with staff who were extremely knowledgeable about the needs of the bank as well as the needs of the facility." Chemical Bank manages over three million sq. ft. in the New York City area.

Space planning organized along a modular concept permitted designers to apply similar approaches floor-to-floor. Support services are located in common areas in the building core (at the apex of the building's L-shape). Private offices ring the perimeter. In addition, conference rooms are designated centrally located positions on each floor. The latter were designed for versatility and accommodate various meeting formats.

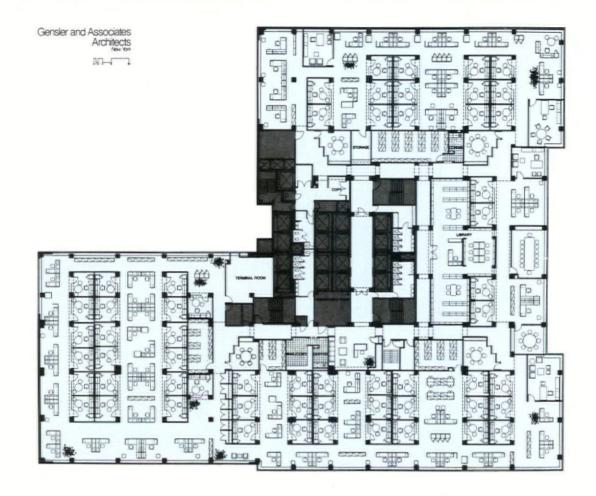

By taking a universal approach, designers worked to limit workstation modules to four different types and private offices to three kinds. Notes Gensler's Dina Frank, "We

"The banking industry is changing so rapidly, we had to build in flexibility for the extent of the lease," notes Ken Van der Kolk, who, along with Dina Frank, formed part of the Gensler design team for Chemical Bank, Madison Ave., New York.

### CHEMICAL BANK

## Computer upswing a design factor

started out with a workstation module and worked our way up to offices and floors, while applying the modular approach all the way."

In this manner, "neighborhoods" were formed, dictated by the number of private interior offices required in relation to open plan. Private spaces were most frequently allocated to the Legal and Employee Relations departments. Open plan use was determined more by function rather than by worker status.

Computer equipment centers were located on every third floor, in the center of a "sandwich" of other bank service floors. Wiring for these centers was an intensive area of work in the project.

Interior treatments worth noting are use of custom-designed frosted glass wall panels, used abundantly in private offices and conference rooms. The latter afford a degree of privacy for workers. The motif of etched glass was created by sandblasting under the designers' direction.

Lighting treatments include use of sconces in elevator lobbies and corridors. Since the building had low floor-to-ceiling height, thus eliminating the possibility of using recessed fixtures, sconces were employed as an easy solution.

Finishes used featured polyester lacquer applied throughout the facility on doors to conference rooms. And in elevator lobbies, high-gloss plastic laminate wallcovering was used for durability as well as esthetics.

Portals were added to corridors to break up the space in a foreshortening technique. Adding another design element to corridors was a solid-color carpet tile into which designers cut solid accent tiles to direct circulation.

Color schemes include two neutrals—either beige or gray—and accent colors of blue, green, and salmon.

Lighting—Louis Baldinger, Lightolier, Edison Price (custom).

Interior design—Gensler & Associates Architects. Eva Ching; Dina Frank; Ken Van der Kolk, AIA; Steve Hennebery, AIA; Jacqui Evanchik, design team. General contractor—Structure-Tone. Mechanical/electrical engineers—Jaros, Baum & Bolles. Acoustical consultant—Robert A. Hansen Associates. Architectural millwork—Svalgaard.

Space planning was organized along modular concept, permitting designers to apply similar approaches floor-to-floor. Using this building-block tool, offices and conference spaces were designed for versatility to meet changing needs.

Photos by Robert Wolsch Asso

Stepped-up ceilings and banded pilasters are used throughout The Depository Trust Co. headquarters, occupying 200,000-sq.-ft. of space in New York. Design centers on multi-floor communications scheme and provides sculptural stairs, inviting employee interaction.

## NEO-CLASSICAL DESIGN IS INFUSED WITH FUN

The Depository Trust Co. HQ by Soo Kim Associates, N.Y., was created on tight budget, but provides 'up' image

> eo-classical interior architectural detailing mixed with contemporary furnishings provides a strong design theme for The Depository Trust Co.'s new headquarters.

The design theme encompasses the full expanse of the site, and was achieved at a relatively low construction cost.

Occupying more than 200,000 sq. ft. of floor space, the headquarters building in New York City has six floors. Four are already occupied; one is under construction; and another is being reserved for future use.

Created by Soo Kim Associates, New York City, the design centers on an enhanced multi-floor communications scheme. Thus, sculptural stairs from floor-to-floor invite human interaction.

#### Shadows create contrast

Stepped-up ceilings and banded pilasters are used throughout the new building to provide depth and dimension. They act as major focal points in the fundamental design theme.

The volumetric design is supported by cove and down lights which define and accentuate various dimensions in each area.

Shadows are cast to lend contrast and create a particularly three-dimensional look, according to Bruce Schrimmer, associate architect in charge, Soo Kim Associates. Cove, wall washers, and fluorescent fixtures yield diffused ambient light.

"Use of the same design elements, carried through to the elevator lobby and floors above, unifies the site as a whole. But having different color schemes for each floor renders each level unique," Schrimmer says.

## Creates strong image for client

"We developed five different accent color schemes—one for each active floor," Schrimmer states. Accents used are: rose, aquamarine, blue, and smoke in combination with stucco beige.

Carpet tiles are employed in most floor areas, including elevator lobbies. The design team used them to define circulation from department to department and within departments, as well.

### Delivers right feeling at low cost

"The beauty of this installation," adds Schrimmer, "is that we were able to create a strong image for the client without being flashy."

Planters and artwork are strategically placed throughout each floor. "In addition, we were able to pool all used furniture and relocate it throughout, so that used furniture is never combined with new," Schrimmer reports.

"Filing cabinets, which define some of the corridors, stand from 3-ft., 6-in. to 5-ft., 5-in. high," he adds.

Schrimmer points out that details of the staircases—specifically, the bent rails mirror the design of sofas and a reception desk, which doubles as a security post. Custom-designed, the reception desk has a Neo-Classical look, a style which was also introduced at a messenger window and in elevator lobbies.

Immediately adjacent to the reception area are the boardroom and corridor leading to the offices of the chairman of the board and the president.

"The overall Neo-Classical theme enabled us to deliver exactly the feeling for the space desired by the client, while staying within budget and having a little fun with the design," Schrimmer concludes.  $\Box$ 

Shown left to right is design team for Soo Kim Associates, which completed Depository Trust, N.Y. project: Caliendo, Calamusa, Slade, Whitman, Nyssens, and Schrimmer.

#### SOURCES

Carpeting—Interface, Patrick Carpet Mills. Seating—Atelier International, Steelcase. Upholstery—Steelcase, Eancocas. Tables—Cartwright. Desks—Steelcase. Files—Steelcase. Accessories—Smokador. Custom reception desk—Millwright Woodworkers & Installers. Stairway & structural handrails—Ment Brothers.

Interior design—Soo Kim Associates, N.Y.; Gerald Caliendo, vice president; Bruce Schrimmer, associate; Lucie Nyssens, Diane Slae, Barbara Calamusa, Lynn Ross, Suzanne Whitman, design team. Construction manager—Lehrer McGovern. Mechanical & electrical engineers—Jaros, Baum & Bolles.

Volumetric design is supported by cove and down lights which define dimensions in each area. Shadows are cast to lend contrast and create a three-dimensional look. Accent color schemes were developed for each active floor; carpet tiles define circulation from department-to-department. Overall Neo-Classical theme helped planners deliver what the client desired, while staying within budget.

## INDIVIDUALITY DISTINGUISHES EXECUTIVE OFFICE PRODUCT INTROS

User's task & comfort needs addressed with adjustable furniture designs

All-Steel

Helikon—Delphi closed armchair has a molded seat and rounded wood members. Designed for a variety of uses, the chair is available in the firm's standard finishes. Circle No. 281.

All-Steel—Executive office setting features walnut tops on desk and credenza plus steel gray frames that enclose glazed panels. Table is suitable for work or conference use. Circle No. 270.

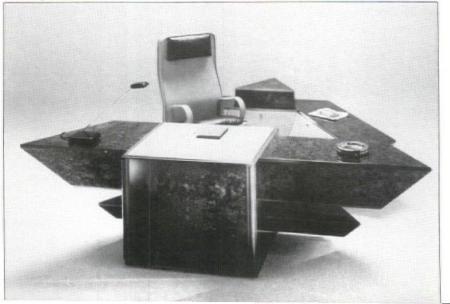

Madison Furniture Inds.—Available with posture and swivel/tilt controls, executive range seating is offered in high- and low-back models with a fivestar base in oak, walnut, or aluminum. Circle No. 241.

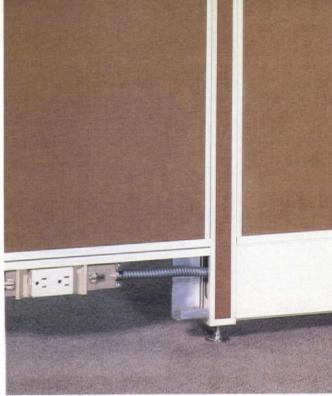

**Ghariany Executive**—Juppiter desk features a triangular bar compartment, bookcase, and walnut briar finish. Electronic equipment is optional. **Circle No. 228.** 

Madison

**Ghariany Executive** 

Flex-Y-Plan—Flex-Power, a pre-wired electrical, communications, and computer raceway, features three circuits and six wires. One dedicated circuit meets needs of sensitive electronic equipment. Circle No. 231.

**Gunlocke**—The Courthouse chair series offers both arm and swivel models in all-wood and partially upholstered versions. The walnut model symbolizes the line. **Circle No. 260.** 

Lehigh-Leopold—The Coda collection offers a complete office grouping of desks, credenzas, executive and conference tables, personal computer extensions, returns, and more. Collection is available in a variety of finishes. Circle No. 273.

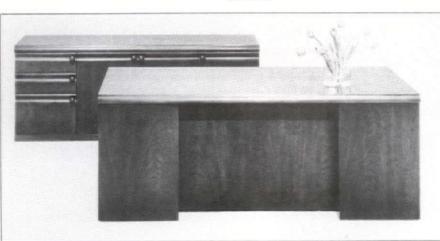

Flex-Y-Plan Tradex

La-Z-Boy—Adagio seating is distinguished by flowing lines of laminated hardwood that complements compound contours of backs and seats. Four styles are available. Circle No. 252.

Tradex—Firm's Phoenix Designs series creates this office configuration with two worksurfaces, each adjustable to a writing height or lower height for typewriter or computer terminal. Circle No. 268.

#### The Networkers<sup>™</sup> from Dennison National.

At Dennison National, we understand the importance of intelligent design. We appreciate the direct relationship between environment and efficiency. We also know there's nothing worse than spending hours of creative energy on total color-coordination in office design, only to have the space filled with old-fashioned, color-clashing binders. Unfortunately, these are things people use every day, the elements over which you've had no control. That is, until now.

Now, there are the Networkers from Dennison National—the information finding system designed to look as great as it works. The decorator-inspired network for media management that makes open shelf storage a part of your design consideration and binders the final element in your specifications.

The Networkers – fashioned in seven designer-selected colors to coordinate with traditional and contemporary interiors. With a unique sliding label system and file-by-color capability that make information access beautifully easy and efficient.

For the final element in your design decisions, specify The Networkers, for the intelligently designed environ-

ment, from Dennison National - The Source.

### Self-stick notes can fit into memo holders

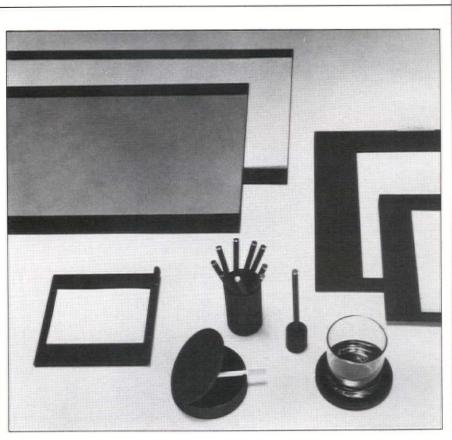

**Decatur Inds.**—Solid American walnut memo holders feature either pen base or hinged lid compartment. Both models hold Post-it self-stick note pads. Memo holder/pen base measures 3¾- by 6½by ¾-in. Desk caddy measures 6- by 5¾- by 1‰-in. **Circle No. 316.** 

### Shelf organizers keep files in users' easy reach

Accousti-Forms Inc.—Desktop workstation combines privacy with office noise control. Storage shelf keeps catalogs or directories within easy reach. Heavygauge steel frame comes in black or putty. Unit anchors to desktop with two-sided tape. Fabric covered soundstop panels mask sound from office activities. Fabric colors available are: bone, brown, burnt orange, rust, olive, melon and gold. Circle No. 318.

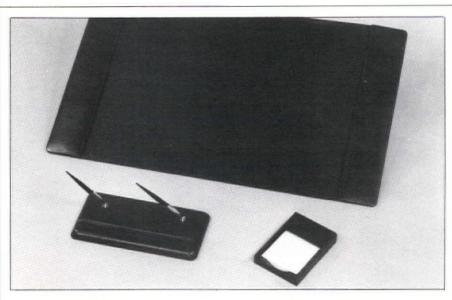

### Stapler has up-to-date styling

**Bates Mfg.**—Model 580 full-strip desk stapler features contemporary styling. The full rubber foot and contoured base allow for easy handtacking of staples. Unit holds 210 standard staples, and is available in various colors. **Circle No. 319.** 

## Desk objects have hand-applied finish

International Contract Furnishings— Desk accessories line was designed by Franco Bettonica and Mario Melocchi. Objects feature a hand-applied, chipproof "suede" anthracite-colored finish on ABS plastic. Desk blotter is made of steel. Included in the line are: conference table note pad; desk top note pad; jotter pad with pen; ashtray with coaster; pen cup; weighted pen holder with ball point pen; desk pad; set of six coasters. **Circle No. 336.** 

## Desk aids come in fine leather

Gift Craft Leather Co.—Office Accents Inc. division introduces The Soft Edge contemporary collection of desk accessories in fine leather. Products are available in the new Fuego leather standard colors. **Circle No. 317.** 

## TO CLOSE THE SALE **OPEN THE DRAWER**

When customers open these drawers this furniture literally sells itself. The drawers move with the smoothness and silence of a ride in an ultra-expensive luxury car. The reason is the Accuride® slides that suspend the drawers.

Furniture buyers physically experience a sudden and irresistible impression of overall quality. And it carries through to the entire piece of furniture. regardless of price.

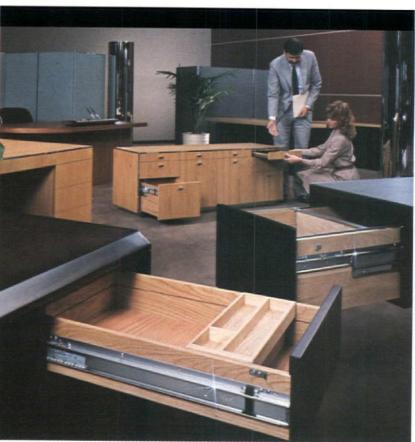

The effect is exclusive. No other slides (even those that use a "copycat" design) come even close to the Accuride fine movement. And there's no way any other slide ever will.

More than 10,000 Accuride custom designs are now in use in fine furniture all elements in the and file drawers, computer keyboards, disc drives, photocopiers, shipboard electronic enclosures and microfilm readers.

#### "Surprising" the steel into a precision movement

Ordinary slides are bent progressively by roll-forming, much the same way you crease a piece of paper with your thumbnail. And, like paper, the metal "wants" to return to its original shape, causing tiny dimensional variations in the slide raceway. That's why ordinary slides just don't move very smoothly.

The Accuride raceway is created simultaneously along its entire length in a fraction of a second. Immense forces in a precision die form the close tolerance ball raceways of extraordinary straightness and parallelism, and the fine Accuride movement that has never been duplicated.

### Accuride controls virtually manufacturing process

Accuride buys only steel and com-

monly available plating chemicals. Everything else (processes and components) that other slide manufacturers "job out" are done in-house at Accuride plants in California, England, West Germany and Japan. The result is unparalleled quality control.

#### Dozens of the world's largest and most demanding companies put Accuride to the test every year

Despite exhaustive vendor performance analyses, value engineering studies and Accuride will send you an actual slide. The action is so smooth and precise, some people call it an "executive

### THE MOST EFFECTIVE INTEROFFICE COMMUNICATION YOU CAN DESIGN.

Photography. It is hard to imagine another interior design medium that can say so much so well and for so little. Or one that has the visual impact, the flexibility, or the affordability of photographs. Possibly no other artform is so sophisticated, yet so easily understood. So distinctive, yet so readily reproducible.

Photography can communicate corporate concerns, interpret the corporate identity, or treat the company's products or its raw materials as subjects of art, which is what it does at National Gypsum Company's headquarters in Dallas.

There, 42 color prints, ranging in size up to 40 x 60 inches, have been installed in locations from the boardroom to hallways and executive offices.

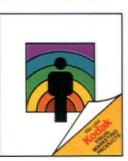

To employees and visitors, the photographs of gypsum, rock, glass, cement, and other materials present a composite portrait of National Gypsum as an integrated, diversified manufacturer and supplier of quality products for the building, construction, and shelter markets.

Prints like these, made on Kodak Ektacolor paper (or rear-lit transparencies on Kodak Duratrans display material) offer you an unparalleled opportunity to exercise your creativity. To meet client specifications and exceed client expectations.

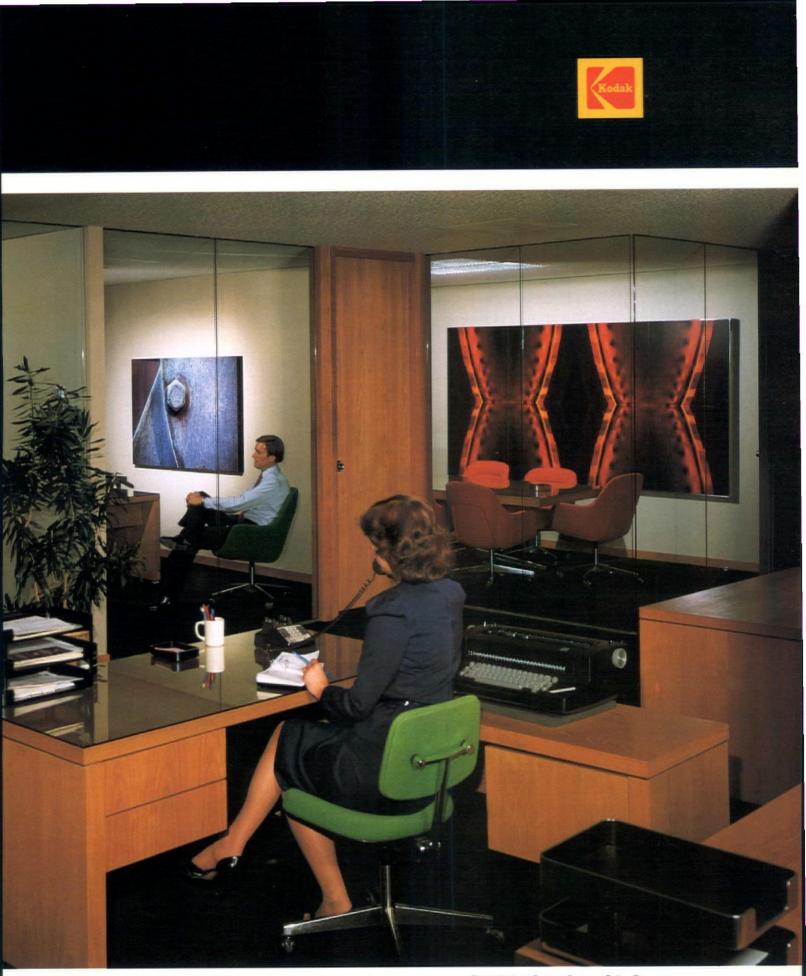

Begin by contacting a professional color lab-

oratory that displays this sign. Or write for a free directory of labs offering visual marketing products and services to Eastman Kodak Company, Department 412L-228, Rochester, NY 14650.

## ANDERSON POWERFLEX<sup>™</sup>III

## STYLE & POWER Create memorable mergers – Combine your stylish office furniture with the power of ANDERSON POWERFLEX<sup>™</sup> III wiring.

Style vs. Power: The distribution of power in today's fast-growing businesses can rapidly outstrip the capacity of movable partitions. And all too often, appearance is sacrificed as supplementary wiring is used to accomodate additional computer workstations.

With ANDERSON POWERFLEX<sup>™</sup> III built into your panels, you can at last achieve the merger of style and power. Anderson's bendable, foldable, flat-cable flexibility offers limitless partition design options. Versatile enough to fit today's partition styles, it has the power to meet tomorrow's demand for individual dedicated circuits, too, as befits a wiring system designed for the office of the future.

Featuring an innovative five-conductor distribution cable that eliminates extra wires, plus a unique CROSS X BLADE<sup>™</sup> design that simplifies connections, this remarkable new system adds real value to any open-plan office layout. Get the ANDERSON ADVANTAGE. Equip your partition with ANDERSON POWERFLEX<sup>™</sup> III – the new standard of excellence in modular office wiring.

Recognized under Component Program of Underwriter's Laboratory

Date of Completion of Interior

C

To qualify for judging, your entry must include this form completely filled in and mailed with slides and design rationale, postmarked by March 15, 1985.

DuPont Antron\* Design Award Room X-39534 Wilmington, DE 19898

Prizes First prize will be a trip for two to Italy and the Milan Furniture Fair and the prestigious Du Pont ANTRON\* Design Award itself. At the judges' discretion, additional prizes of \$1,000 each may be awarded for those entries considered worthy of honorable mention.

Eligibility: To qualify for judging, entries must show commercial environments incorporating carpet of 100 percent Du Pont ANTRON nylon used as a major design element in a creative manner. Entries may include environments completed since June 1983 and may involve installations in the following categories: (1) Offices (banks, et c.). (2) Hospitality (restaurants, hotels, motels, resorts), (3) Health Care (hospitals, clinics, nursing homes), (4) Public spaces (airports, theaters, convention centers), and a *new* category for 1985: (5) Residential (for commercial carpet used in a residential setting). All professional architects and interior designers are invited to submit entries. Students, employees of Du Pont and its agencies, and employees of the firms with which the judges are associated are ineligible.

Judging: Judging of all qualified entries will take place in April 1985. Judges will evaluate the entries in terms of the overall design, as well as use of carpeting as a design element in terms of originality, innovation and appropriateness. Winners will be notified by May 15. Public announcement of winners will be made at NEOCON 17. A formal presentation of the awards will take place the following week in New York.

Submissions: Entries must consist of 35mm slides of the interior, free of any identification of firm name. At least four slides must be submitted showing the interior from different perspective points. Slides must be accompanied by a design rationale, no more than one typed page, double-spaced on plain paper, not company letterhead. Mail all of these materials in a standard 81/2 x11 envelope to: DuPont ANTRON Design Award, Room X-39534, Wilmington, DE 19898. Entries must be postmarked by March 15, 1985. Each entry must be submitted in a separate envelope with a separate entry blank. Photocopies of the entry blank are acceptable.

All entries become the property of DuPont Company and may be used in advertising, brochures, and publicity releases.

Circle 98 on reader service card

Win this award for design excellence and you'll win a great trip to Italy to boot.

DUPONT

ANTRON°

The Du Pont ANTRON<sup>®</sup> Design Award is an award for commercial design excellence. It rewards the winner with an all-expense-paid trip for two to Italy and the Milan Furniture Fair.

Additional prizes of \$1,000 each may be awarded for those entries judged worthy of honorable mention.

This is the third year Du Pont is inviting designers to submit interiors that incorporate carpet of ANTRON nylon. In offices or banks. In restaurants, hotels, motels, or resorts. In airports, theaters, or convention centers. Even residences where commercial carpet is used.

Du Pont wants to encourage and recognize outstanding work in the design profession and demonstrate how carpet of ANTRON can be used as a major design element.

Choose your best interior design from an installation completed since June 1983 and enter it in the Third Annual Du Pont ANTRON Design Award Competition. It may turn out to be *the* best design in the eyes of the judges, too.

Bentley fabrics and coordinating carpets

of DuPont Antron® nylon provide exceptional

durability and soil resistance.

TRACERY

# One of the 700 choices of LouverDrape®colors & textures

Among those 700 choices, LouverDrape "pertorated vinyl louvers are perhaps the most unique. Unique, because a transparent quality is achieved by actually perforting the solid vinyl. Thousands of tiny holes are stamped into the louver creating these delicate patterns. From across the room. Vinyl Mist" patterns give the illusion of lace, while, retaining the practicality and energy efficiency of solid vinyl.

It's hard to believe the beauty of Vinyl Mist. until It's installed. Even though the louvers remain 87% to 93% solid, the view through the closed louvers is amazingly clear. And you can enjoy that view. while the room is protected from glare, sun and solar heat. In fact, Oyster Beige Vinyl Mist." louvers reflect as much as 65% of the solar radiation striking the window.

LouverDrape Vinyl Mist<sup>®</sup> — a strikingly beautitul, reasonably priced, low maintenance window treatment. Protect your furniture and carpet from the sun without giving up that beautiful view.

## There's more to wool carpets than meets the eye. Much more. Good looks that last...for one.

**Consider Appearance Retention...** especially important in high traffic areas where the first impression counts, such as restaurants, lobbies and corridors. And don't forget guest rooms where lasting beauty and durability are so important. It's the lush, beautiful, deep luster that is unique to wool that will remain year after year, no matter how close you look. Its luxurious appearance remains constant through years of use. When it comes to maintenance, wool reigns as your best choice time and time again...because it's soil and stain resistant...spills and burns are easily removed. Even after repeated cleaning, wool holds its deep warm color.

This is value at its best...plus, all the reasons you need to choose wool with confidence. So when it's up to you to make the choice, choose the one that makes the right impression. Every time. Every place. Pure wool carpet. Specify it with confidence.

Wool...the standard of carpet excellence.

TABLE BASES FEATURE SINGLE BOLT ASSEMBLY Series 1000 table bases from MTS Seating have a "labor-saver" assembly design. Manufactured of 11-gauge steel, bases are available with columns measuring 2- or 3-in. in diameter. Circle No. 393.

#### DESIGN APPEARS ON BOTH SIDES OF GLASS

CW-View Manufacturing process from CW Design permits graphics to appear on two sides of a glass design. Process is accomplished with reflective mirroring. Circle No. 394.

#### BLACK CEILING PANELS CONTROL LIGHT LEVELS

Black "Solitude" ceiling panels are appropriate in applications where light refraction must be minimized and where light levels must be tightly controlled. Panels are available from **Gold Bond Building Products. Circle No. 395.** 

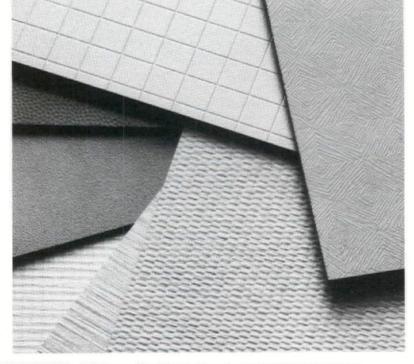

# Touch our texture

While other manufacturers of high pressure laminates chase a rainbow of colors, DUROpal® has realized the obvious — surfacing material should be more than seen, it should be touched. DUROpal® offers a palette of textures and colors for all kinds of surfacing applications. All are superior in heat and scratch resistance. All are stocked for immediate delivery. Request our sample chain.

Touch our texture!

#### INSULATING SHADES REDUCE WINDOW HEAT LOSS

"Window Comforter" insulating window shades, available from **Appropriate Tehnology Corp.**, have an R-7 insulating value and provide a two- to six-year payback depending on the number and size of windows and type of heating system used. **Circle No. 412.** 

**BOOKCASE SERVES MULTIPLE NEEDS** With the addition of sliding doors, "Steel Line" bookcase from **Borroughs** can be configured to serve a variety of user needs including credenza, counter, or room divider. Product features double-wall construction and is available in various sizes and colors. **Circle No. 413.** 

## THE NEW CEDARBURG CHAIR BASE

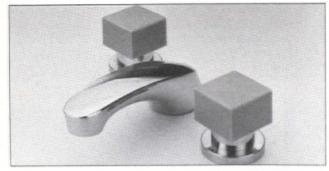

From EST is a bright new design by Earl Koepke. With its clean lines and sloping surfaces, this die cast aluminum base will enhance your chair and meet all BIFMA requirements. The CEDARBURG BASE is now in production in the 22" span and will be available in the 25" span by Autumn 1984.

span by Autumn, 1984. EST's entire line of lift mechanisms and hubs fit the CEDARBURG BASE, which can be supplied in all EST finishes, including the new ESTSHIELD finish in standard colors.

Circle 114 on reader service card

#### FITTING COLORS COORDINATE WITH FIXTURES

American-Standard is offering fittings in new "Whisper" colors to coordinate with three available fixture colors: shell, heather, and sterling silver. Handles of fittings are polyester cubes in intensifed shades of the new subtle colors. Circle No. 408.

#### SEATING DESIGN USES BENTWOOD FRAMES

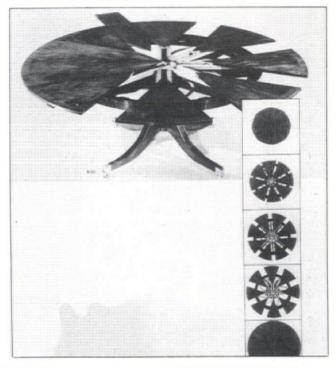

Magna Design Inc.'s 1200 series of executive seating includes standard- and high-back tilt chairs in a design which combines solid oak bentwood frames, hand-lacquered finishes, and fine fabrics. Models also feature a five-prong steel base with solid oak cap and optional gas-operated height adjustment. Circle No. 409.

#### TILE SYSTEM REDUCES MOVEMENT-RELATED FAILURES

A new system for installation of thin Vermont Marble tile uses an aluminum-clad substrate, silicone adhesive, and silicone joint sealant to accommodate differential movement due to thermal expansion and contraction. Circle No. 410.

#### SPIDER-LIKE MECHANISM INSPIRES TABLE DESIGN

A 19th-century spider-like mechanism inspired the design of Smith & Watson's mahogany extendable table. Offered in a variety of styles and woods including oak Country English and contemporary styles of burls, walnuts, and rosewood, the open table can accommodate 10 armchairs. Circle No. 411.

### Beautiful planters Vateri with Brains, Flexibility and a lot of Self-Control !

Highlight your design statement with healthy foliage in classic, color coordinated Natural Spring® Planters. You'll be using the patented Controlled Watering<sup>™</sup> Containers that have become State of the Art in the Interior Plantscaping Industry, and you'll be in good company. Many prestigious business facilities, noted atriums, First Class American hotels, fine restaurants and stores are currently enjoying the benefits of the Natural Spring®

When you specify Natural Spring® planters you maximize design flexibility in several important ways... A wider spectrum of usable plant material ... A cylindrical Standard American Architectural Desian in the four most popular sizes ... Gray, Gunmetal, Mauve, Taupe (Warm Brown), Burgundy, Deep Blue, Gloss Red and Gloss Black have recently been added to our basic selection of five earthtone colors...Our custom color matching service with turnaround in just three weeks .... Elegant trim rings, collars and sleeves in polished brass or chrome ... Custom size capability, such as planter boxes.

Fortunately, the Natural Spring® is more than just a pretty face. Usually, these self-contained units only need filling once every 3 to 4 weeks. The built-in Sensor automatically starts and stops watering based on the needs of the plant. Our planters won the Interior Plantscape Association's Highest Honor Award in 1981 and have been rigorously tested under laboratory conditions and in service around the country for almost five years. History proves that yearly plant replacement rates are greatly reduced, which means foliage will look just as good after months and years as it did on the day it was installed.

Up to 4 weeks between fillings!

PLANTER TECHNOLOGY, 999 Independence Ave., F-11, Mountain View, California 94043 (415) 962-8982

# If you'd like to do something significant for the entire industry, please come to dinner.

You are cordially invited to attend The first annual FIDER benefit dinner to honor Franklin S. Judson, President of Stroheim & Romann upon his retirement

Tuesday, November 27, 1984

The St. Regis-Sheraton Hotel

55th Street and Fifth Avenue New York City

> Cocktails at 6:30PM Dinner at 7:30PM

RSVP – The Frank Judson Dinner Committee 1430 Broadway, 22nd Floor New York, NY 10018 (212) 944-9220 Individual Tickets - \$150. \* Table for Ten - \$1500. \* Sponsors (Includes Table for Ten) - \$2500.\*

\*Contributions to FIDER (The Foundation for Interior Design Education Research) are welcome from those unable to attend. All contributions and dinner fees are tax-deductible to the fullest extent allowed by law.

My name's McGruff, and it's my business to help prevent crime. I think it should be your business, too—to teach your employees how to protect themselves. Just send for my business kit—it'll help you develop a program that teaches your employees how to make their homes burglar-proof, make their neighborhoods safer, even how not to get mugged.

And, while you're at it, get in touch with the cops—they can help you out. So now you're probably wondering (like a top cat businessman should), what's in it for you. That's easy. When your company works harder for your people, your people work harder for your company.

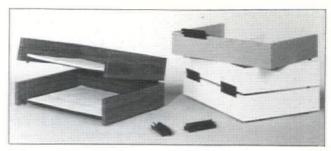

So take the time, and ...

Write to National Crime Prevention Council, 805 15th St., N.W., Washington, D.C. 20005 for lots of information on Crime Prevention.

#### **PRODUCTS & SERVICES**

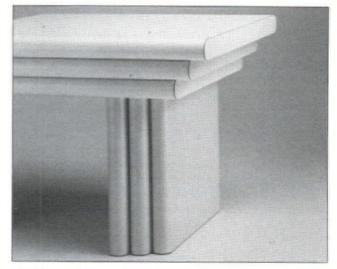

#### STACK TRAYS USE HINGED CLIPS

"Data Stacker," a desk/computer stacking tray system available from **Artistic**, uses clips to allow easy access to material stored in lower trays. Product is made from wood furniture core and is laminated with scratch-resistant vinyl. Available finishes include oak, walnut, and putty. **Circle No. 414.** 

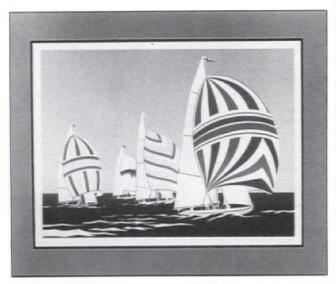

#### BUFFALO PLAID OFFERS OUTDOOR APPEAL

New, wool buffalo plaid fabric from **Gretchen Bellinger** offers outdoor appeal to indoor application. Woven of long-staple, high-twist 100 percent wool, the fabric is closely sheared and features fiber-dyed yarn. Color combinations include blue/ black, red/black, and white/black. **Circle No. 415**.

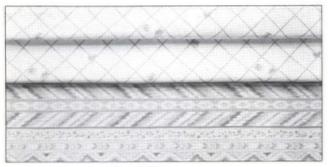

LAMINATE LINE EXPANDS COLOR CHOICES Wilsonart's "Color Quest" line of solid-color decorative laminates has been expanded with 28 new colors including soft pastels and muted neutrals. All colors are available in three optional finishes and in several surfacing grades for horizontal, vertical, or post-formed applications. Circle No. 416.

## PRODUCTS & SERVICES

### SERIGRAPH DEPICTS YACHT RACING

Artist Warren Woodward has created a new serigraph for **W W Graphics** based on his favorite subject, yacht racing. "Downwind II" measures 18- by 24-in. and can be ordered frame and matte. **Circle No. 417.** 

### TWO PATTERNS MIX MOTIFS

Mixed motifs are featured in two new patterns from the "Fantasia" collection of cotten sateen fabrics from John Wolf Decorative Fabrics. "Mirage" stripe pattern alternates columns of small florals and Ikat flashes; "Images" features Ikat flashes against an open grid. Circle No. 418.

### LAMPHOLDER AIDS IN GLARE REDUCTION

A lampholder designed to reduce glare and a lamp designed to conserve energy have been combined into **Halo Lighting Division's** "Power-Trac" track lighting system. The lampholder uses an integral transformer to operate a 50-watt MR 16 lamp, while a black Coilex baffle is deeply regressed to reduce glare. **Circle No. 419.**

# 

# It's clean, It's simple!

Now great comfort, style and perfect back support are available for any task. And without sitting in something that looks like a mechanical monster replete with push-buttons, bells and whistles. HIEBERT's 420 Series incorporates a brand new tilt mechanism that keeps feet firmly and comfortably on the floor no matter how far one leans backward. That means no fatiguing pressure on thighs or restrictive bites behind the knees. The convex lumbar support sends you home refreshed—not exhausted.

A complete collection of handsome, comfortable chairs for every purpose.
