ISSUE 10:1973

A REVIEW OF ARCHITECTURE IN THE TROPICS

Foyer: Dept. of Psychiatry  
University Hospital of the  
West Indies, Jamaica

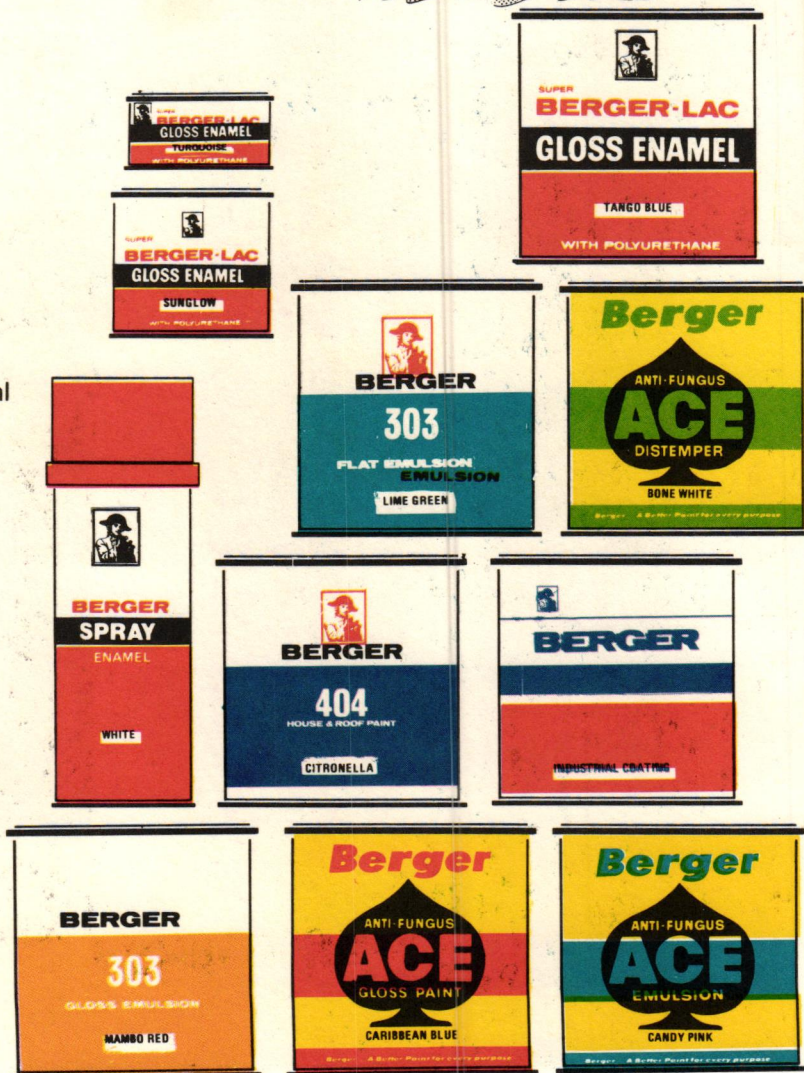

# it's what's inside and out that counts

No matter what and how you paint it must be as beautiful on the outside as on the inside yet fully protected by a tough, lasting paint coating. BERGER is what you need. Painter-approved, Home Owner recommended, backed by 210 years of technical knowledge of paints and painting — that's Berger. BERGER offers a complete range of finishes, each one specially formulated to do its job. Ring 36226 or 39116 and ask for Trevor Neale of the Technical Department or Margaret Lubsey of the Colour Advisory Services. They'll give you all the advice you need absolutely free. Put Berger on the job . . . you'll be glad you did!

## BERGER

a better paint for  
every purpose.

## Ni2 Automatic Engineer's and Precision Level

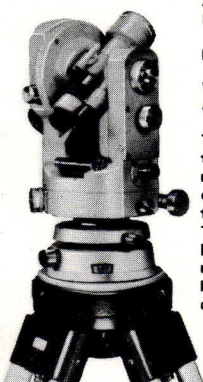

## Ni22 Automatic Engineer's Level

## Th4 Optical-Scale Theodolite

Telescope magnification 25x  
Aperture 35mm dia (1.38 in.)  
Focusing range 1.2m (4ft to 00)

Accuracy +3" or +10 cc  
Maximum zenith distance 150 (-60)  
Distance measurement 100.0  
Weight without case & tripod 4.5kg. (9.9lb.)

The Th4 is a modern engineer's theodolite for surveys requiring medium accuracy. The number of outstanding technical features are certain to secure the Th4 a wide field of application, including setting out, alignment, measurement of vertical and horizontal angles and optical distance measurement.

Telescope magnification 32x  
Aperture 40mm (1.58 in.)  
Focusing range 3.3m (11ft) to 00  
Maximum sight range 120ft.  
Mean square error per mile +0.003ftVS mile  
Weight without circle 2.1kg. (4.6lb.)

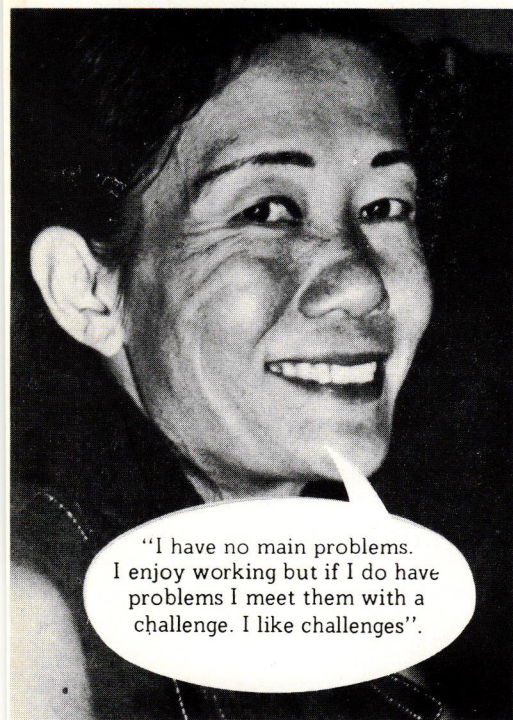

The highly economical level for practically any levelling problem. With a compensator that is highly insensitive to disturbing vibrations, the Ni2 works with constant accuracy in wind, traffic or under the most difficult climatic conditions.

Telescope magnification 32x  
Aperture 40mm (1.58 in.)  
Focusing range 3.3m (11ft) to 00  
Maximum sight range 120ft.  
Mean square error per mile +0.005ftVS mile  
Weight without circle 1.9kg (4.2lb.)

Modestly priced instrument offering most of the technical advantages of the Ni2. Zeiss V-type compensator with high-setting accuracy, largely insensitive to ground vibrations with good damping characteristics. Suitable for practically any levelling problem on construction projects, highway and railroad construction, line and contour levelling, mineral prospecting and scientific investigation in the field.

OCHO RIOS: Pineapple Place Shopping Centre.

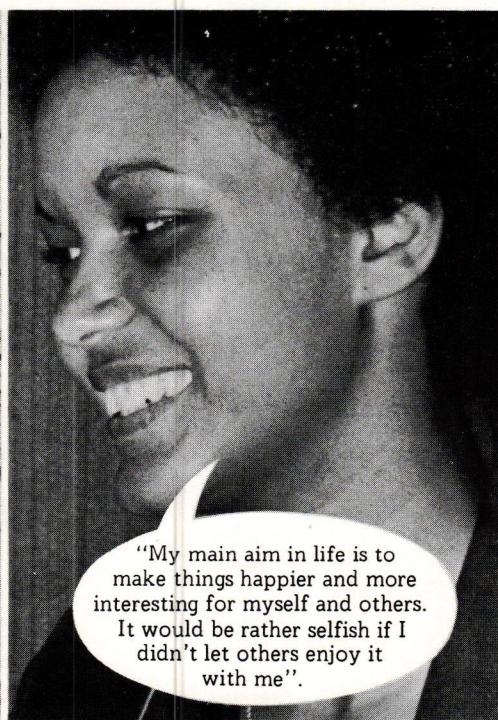

"I have no main problems. I enjoy working but if I do have problems I meet them with a challenge. I like challenges".

Mrs. Beryl Chin - Manager's Assistant - Harbour Street Branch.

"What gives me a lot of pleasure is seeing people develop. Going through the ropes, taking to the work and developing, sometimes from absolutely no talent at all into management material".

Don Farquharson - Manager - Matilda's Corner Branch.

"My main aim in life is to make things happier and more interesting for myself and others. It would be rather selfish if I didn't let others enjoy it with me".

Miss Vinette Billings - Current Account Clerk - Montego Bay, Main Branch.

# Barclays people, somehow they're better

A VERY GOOD REASON TO BANK AT BARCLAYS.

---

# Some of our best friends are Termites

... Because they have nothing over us. Termites wrought havoc with several of our old Jamaican timber framed houses. The fire hazard increased as wood became eaten and decayed and lost its strength and architects and builders turned to concrete to overcome these problems.

How is it that wood is again being used in larger and larger quantities in house construction today?

The answer to this, of course, is the ready availability of Wolmanized Pressure Treated Lumber ...

Wolmanized Lumber is pressure treated to guard against termites and is guaranteed for 20 years. So whatever you build from Wolmanized Lumber - stays looking good.

**Thinking Electrical?  
Think C.A.C.  
Installations Division**

You can't afford to fool around with electricity. Electrical work has to be good. Good enough to last the lifetime of your project. That's why if you're planning a project, large or small, you should be thinking C.A.C. We've got the sort of solid quality that's real value for money. And that makes all the difference. We know this market. After all, we've been around for a long time. And we've got the right kind of people backed by the best equipment to give you quality service. Solid value for money service. So if you're thinking electrical, think C.A.C. for your project. Large or small, our solid quality will make all the difference.

**Think C.A.C.**

# OMNIA PRECAST CONCRETE FLOORS

QUICK VERSATILE ECONOMICAL

The light Omnia blocks are quickly and easily placed in position between the joists. Alternatively, for hung ceilings, metal pans can be used instead of blocks.

The complete erection, including the provision of cross ribs where desired, is entirely "dry" and carried through in a fraction of the time needed in erecting conventional formwork required with other types of concrete floor.

## PRECAST JAMAICA LTD.

# If you only use glass to look through, you're being short-sighted.

Glass has come a long way since man looked through his first window. And Pilkington glass has come furthest of all.

It's been floated, toughened, patterned, wired, tinted, coated, laminated and sealed into double glazed units.

**Pilkington Solar Control glasses** live up to their name beautifully.

They control sunlight and temperature. (Thus saving quite a lot on air-conditioning.) When double glazed they give even greater savings.

They also look magnificent.

And our high performance 'SunCool' double glazed units have a remarkable way of mirroring their surroundings.

**Pilkington Patterned glasses**, clear and tinted, open up all kinds of possibilities, indoors and out. You have 48 varieties to choose from. They protect privacy, and they're lovely to look at. Use them for concealed lighting, partitions . . . not forgetting, of course, the bathroom window.

**Pilkington Wired glass**, rough cast or polished, has an official one hour fire rating and discourages break-ins.

**Pilkington invented Float glass**, thus eliminating the wavy window. And the wavy patio door. (To see what we mean, look through a window of ordinary sheet glass.)

Our technical expertise is always at your disposal.

## PILKINGTON GLASS

Just call your local Pilkington agent:

Pilkington Glass (Jamaica) Ltd., 66 Harbour Street, Kingston. Phone: 922294.

# Pilkington have 48 great ways to spoil the view.

One beauty of Pilkington patterned glass is privacy.

Another is its beauty.

There's a wide range of original designs in white, amber, blue and green, many in both 3mm and 5mm thicknesses.

Our latest pattern, Driftwood, pictured above in amber, goes particularly well with wood panelling and stonework.

Our patterned glasses are non-flammable, scratch-resistant (compared with plastic) and they won't fade.

They need no decorating or maintenance, except for the occasional clean.

Pilkington patterned glasses open up all kinds of possibilities for designers and architects, far beyond the bathroom window.

Ask for our new colour brochure from your local Pilkington agent:

Pilkington Glass (Jamaica) Limited,  
66 Harbour Street, Kingston.

Phone: 922294.

# The Governor General's Award Presentation

Left: His Excellency, Sir Clifford Campbell, then Governor General of Jamaica and Patron of the Jamaican Society of Architects (left) presents the Governor General's Award for Architecture 1972, to Mr. Alan Foster (rt.), of the firm of architects, Chalmers/Gibbs/Martin/Foster. Mr. Foster, who holds a Diploma in Architecture from Kingston-on-Thames, was the partner in charge of planning the Department of Psychiatry building, University Hospital, which won the award. (Mr. Ian Gibbs is in the background).

Below: (l to rt.) Mr. Ian Gibbs of Chalmers/Gibbs/Martin/Foster, received the Award of Merit for Architecture for the Wray & Nephew building. Mr. Vayden McMorris, of McMorris Sibley Robinson, received the Award of Merit for Architecture for the Hilton Hotel Extension. Mr. Michael Carter, of the Michael Carter Partnership, received the Award of Merit in Architecture for the Dunbar Residence. Mr. H. D. Repole of H. D. Repole & Associates received the Award of Merit for Architecture for the Ten Ambassadors Apartments.

Right: Front row (L. to R.), Mr. Peter Soares, then President of the Jamaican Society of Architects; His Excellency, Sir Clifford Campbell; Professor Eugene Raskin of the Columbia University School of Architecture, New York City who came to Jamaica on the invitation of the J.S.A. to judge the competition; Mr. Alan Foster; Mr. Mostyn Campbell, then Chief Architect, Ministry of Works and Past Pres. J.S.A.

Back row: Mrs. Alan Foster; Mr. Michael Carter; Mrs. Ian Gibbs; Mr. Ian Gibbs; Mr. Vayden McMorris; a guest and Mr. H. D. Repole, who is now President of the J.S.A.

# Let concrete set the pace for the job.

We are geared to keep your job moving forward with maximum speed and maximum productivity. In one hour with Pre-Mix concrete you can pour what might take you a day to site-mix. This way concrete can set the pace for your form work, steel and electrical installations.

Take a look, too, at the economies of transit-mixed concrete - lower labour costs, reduced equipment inventory, no loss from mishandled cement and aggregate, consistent product quality and the

elimination of site clean-up and waste-disposal problems.

We take care of the concrete supply problem and let you get on with the job - on time.

### *Category:*

**High Rise Resort Hotel:** "The extension of Jamaica Hilton Hotel, with special recognition for the dramatic "show" effects that this type of design apparently needs to make its clients happy. Done with great skill and taste."\*

\* citation by adjudicator — Prof. G. Raskin

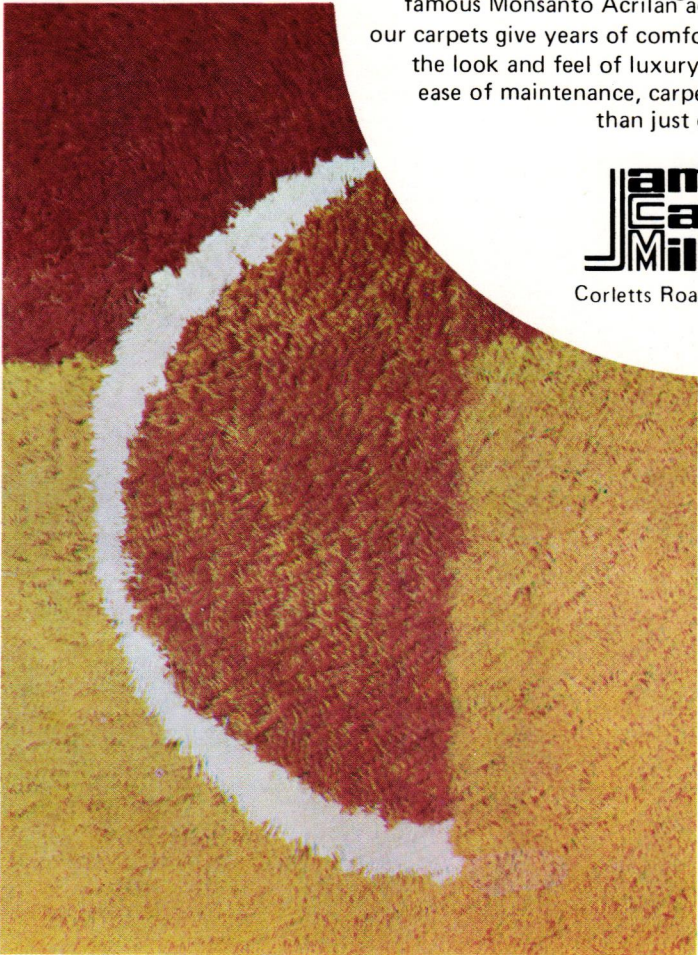

## Carpet does a whole lot more than just cover a floor

Carpet does a whole lot more than just cover a floor, it helps to control noise, minimises the need for regular and strenuous cleaning jobs and is safer than most types of floor surfaces. Architects and contractors appreciate the ease with which it can be laid, as well as its light weight for load bearing structures. And, being made from the world famous Monsanto Acrilan<sup>®</sup> acrylic and Cadon<sup>®</sup> nylon fibres, our carpets give years of comfort and value while still maintaining the look and feel of luxury. With its beauty, comfort and ease of maintenance, carpet really does a whole lot more than just cover a floor.

# the architect

Perhaps more than any other member of the professions, the architect is entrusted with the interpretation — in wood, stone, cement and steel — of the aspirations of his society.

The homes, office buildings, hotels and other structures rising in the New Jamaica are a physical manifestation of the aspirations of today.

Reginald Aitken Ltd. pays tribute to the architects of Jamaica who have accepted the challenges of an impatient and eager young country, whose work has done so much to change the face of our nation and whose inspiration has helped to lead us into a new and proud era.

## The world's largest selling louvres

### introduces the 4" clip For Redwood Blades

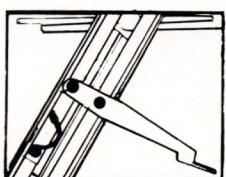

The world's largest selling louvre is now being manufactured in Jamaica with a special clip to take 4" Redwood blades. The well known centre-ribbed frame is now slimmer, along modern lines, but the same large aluminum alloy bearings are used and the heavy gauge paired operating bars work within the channels away from dust and curtains.

#### Other outstanding features...

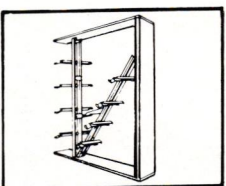

#### 1. NEAT FLUSH FITTING HANDLE:

Ensures trouble free finger tip opening and closing. Simple design means fewer moving parts. Nothing to get loose and unsecure even after years of continuous use.

#### 2. SPECIAL HIGH PERFORMANCE SPRING LOCKING DEVICE:

NACO'S exclusive, strong, secure, stainless steel spring locking device which is internally fixed and balanced in the handle, guarantees long lasting trouble free operation.

#### 3. SELF MULLIONING:

NACO louvres can be self mullioned. Standard left and right hand channels can be easily bolted together to form a self supporting mullion without additional components.

SPRING CLIP →

Look for the name NACO on the handle to be sure of getting
