New Books

Available April 1: Kengo Kuma Complete Works, by Kenneth Frampton. This is a major monograph documenting Kengo Kuma's interpretations of traditional Japanese architecture. The quintessential Japanese architect of today, Kengo Kuma has forged a modern design language that artfully combines the country's traditional building crafts with sophisticated technologies and materials. Kenneth Frampton frames Kuma's work in the context of post-war Japan's flourishing architecture scene. From his iconic *Water/Glass* (1995) to the Nezu Museum in Tokyo (2009), each building is presented through descriptive text, newly commissioned photographs, and detailed drawings that reveal the refined architectonic vocabulary that characterizes Kuma's buildings.

Available April 9: Le Corbusier and the Power of Photography. Published to coincide with Le Corbusier's 125th birthday, this new book chronicles the architect's work through his own lens as well as those of contemporary photographers. With over 400 illustrations, 164 of which are presented in vivid color, this

volume does justice to the aesthetic of its subject through bold design and images. It is a celebration of the vastly influential architect's relationship with the photographic medium. See all of Corbusier's houses in the [TMH Masters Archive](#).
