

# Texas Architect

First Christian Church, Breckenridge, Texas August, 1926

## For Permanent and Colorful Exteriors —Brick's the Thing

This splendid edifice is faced with our Acme Weatherproof Face Brick, selected by Architect and approved by the Building Committee for color, texture and adaptability. Refreshing old ivory tones maintain the atmosphere of the architect's design. ¶ We specially manufacture correct tints and textures—weatherproof quality—for Mission, Italian, Spanish and Correlated Architectural Types. Write for our eight-page folder entitled "Permanent and Colorful Exteriors." ¶ Use brick, the material everlasting.

THIRTY-FIVE YEARS IN THE ART OF BRICKMAKING

First Christian Church, Breckenridge, Texas May 15, 2016

## For Permanent and Colorful Exteriors — Brick's “Still” the Thing

Breckenridge's First Christian Church has been protected by an Acme Brick exterior for 90 years. In 1926 the church's building committee and architect Clyde Woodruff chose genuine Acme Brick to keep their new church “everlastingly beautiful” and maintenance free. Not only have these brick retained their rich color, but thanks to natural weathering, they are even lovelier today than the day the cornerstone was laid.

Like First Christian Church, many thousands of Texas commercial and civic structures, including most major universities, have been built using Acme Brick over the last 125 years. These structures continue to withstand the test of time, decade after decade – beautifully.

For your next project, consider the lasting beauty, design flexibility and hard-fired integrity of Acme Brick. For the Acme office or distributor nearest you please visit [brick.com](http://brick.com).
