

Consider a great roof system right up front.

Sheraton Hotel, Hot Springs, AR
Risley Childers Associates, Inc., Architects, Planners, Consultants.

ECI's Architectural Roof System is fast becoming known as a great value in premium roofing.

One of the reasons is that architects and contractors find it so versatile. In the hotel above, the architect used it as both a roof and a facade. In fact, ECI's Metal Architectural Panels met both of those needs, and the budget.

Some of the same features that make ECI's Metal Roof System such an attractive roofing buy, also make it ideal for architec-

tural treatments.

Features like the longevity of the maintenance-free coating, or standing seams that rise above runoff. Plus, the concealed fasteners that create the attractive look.

Add the fact that it's designed for simple, straightforward installation, and you'll see why ECI's Roof System is such an attractive architectural solution.

For information on the variety of styles, colors and metals available, write ECI.

Center Street Parking Structure, Anaheim Development Project, Alpha Plan, Architect: Group Forum Associates, Masonry Contractor: Masonry Builders

Challenge: Design a parking structure reflecting the design excellence of its architectural environment.

Solution: Higgins 5" and 8" Hollow Brick

Parkview Medical Center, Riverside, California, Architect: Shamma Enterprises, Inc., Masonry Contractor: Winegardner Masonry

Challenge: Design a medical office facility of distinctive high quality on a controlled budget.

Solution: Higgins 5" Hollow Brick

Whatever the building type, Higgins Hollow Brick often is the best solution to meeting a design challenge. The high strength of this brick together with the ease and speed of building single wythe reinforced walls makes it ideal for use on the pre-fabricated panel-designed Center Street Parking Structure in Anaheim, California. The three different shades in "Earhtone" complement the use of brick in other buildings in the Anaheim Redevelopment Area and, together with the dimensional design center by Nelson

Behrend, gives a common parking structure an uncommonly striking architectural appeal.

The Higgins 5" Hollow Brick also complements the creativity of Shamma Enterprises, Inc., whose design projects a quality image for the Parkview Medical Center in Riverside, California. Use of this through-the-wall structural unit resulted in significant savings for this project.

Call Higgins when you want a natural solution for your architectural challenges.
