A two-building [complex](#) on the campus of the University of Texas at Austin is a new home for the school's computer science program. The 232,000-square-foot (21,600-square-meter) development has been named for Bill and Melinda Gates, while the northernmost of the two buildings is named for Michael Dell.

Clad in bond-patterned Texas brick and cast limestone, the Gates Computer Science complex, designed by New Haven, Connecticut-based [Pelli Clarke Pelli Architects](#), unifies the department's functions in a single place for the first time, with 60 faculty offices, and 40 more for visitors and technical staff. The building also accommodates up to 350 graduate students and boast about 20,000 square feet (1,860 square meters) of flexible lab space, as well as a 200-seat lecture hall, 10 seminar rooms, seven classrooms, eight conference rooms, and dozens of other seminar, discussion, and computer lab spaces.

The firm says that the chief organizing unit are the school's 10 research clusters, each with its own subset of the classroom, office, conference, and ancillary academic spaces surrounding two glass-walled computer labs.

In addition to glass, the interiors of the Gates Computer Science Complex are extensively finished with wood grillwork, screens, and paneling.

### **Building Details**

- **Name:** Bill and Melinda Gates Computer Science Center
- **Location:** Austin, Texas
- **Area:** 232,000 square feet (21,600 square meters)
- **Floors:** 6
- **Energy Use Intensity:** not available
