

SCAIA REVIEW OF ARCHITECTURE 84/85

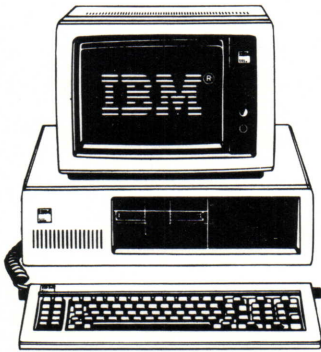

SOUTH CAROLINA CHAPTER/THE AMERICAN INSTITUTE OF ARCHITECTS

AUTOCAD™

Number One

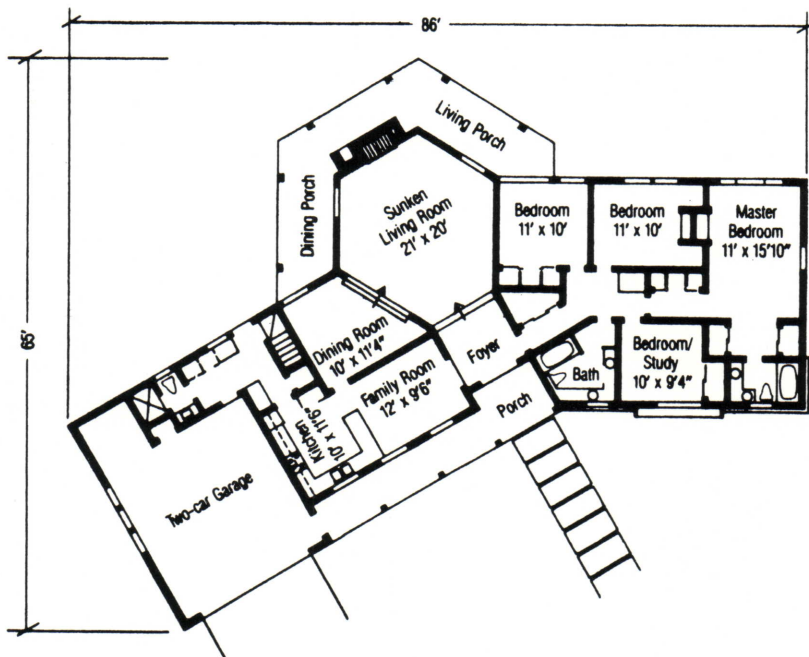

IBM PC™ with color monitor

TI PC with color monitor

IS DRAFTING DRAWING UP TO 40% OF YOUR FEE?

That's the current estimate of how much of an architect's fee gets eaten up by drafting cost. If you do anything that eventually comes down to a drafting table then our CAD system can save you money.

QUICK! . . . HOW MUCH DOES CAD COST?

. . . Wrong! Not 50k, 30k, or 25k. In fact, a complete system can be purchased for between 13k to 19k. AutoCAD is to drawings what word processing is to words.

Architects are hired to solve problems; to design buildings. But their big cost is not the cost of design. It is the production of working drawings. Money is spent not on solving the problem, but in documenting the solution.
