Achievement Amid the Hyper-Evolution of the Design Professions

Most architecture and design firms are changing dramatically. As they change, so do we. The globalization, technological, and demographic changes have forever altered the way we get and deliver data. We understand that when it comes to making marketplace decisions, change can be a good thing, but it can also be disruptive. Change rewards talent, achievement, and entrepreneurship. Change brings a thirst for new information and it drives growth. And thus, this *Almanac of Architecture & Design* is growing steadily too. The number of people reading the printed edition is now in the neighborhood of 15,000—these are mostly professional practices, news groups seeking media guidance, and library users. The real exciting story goes much further into the multi-dimensional marketplace globally. Now, our data is being mined on the internet at www.di.net/almanac and has been accessed by hundreds of thousands, (over 500,000 unique visits) ranging from real estate developers to university facility vice presidents—those with a voracious appetite for data and facts about architecture and design. They have come to trust this *Almanac* as a no-nonsense, reliable, continuously-updated resource packed with only the most relevant data.

Market research tells us that decision-makers and researchers come to the *Almanac* to find new information about professional services, and moreover, to supply a sophisticated level of information that aligns with their business and information needs. These decision-makers understand that the quality and performance of their buildings, facilities, and spaces are critical to their success. They know that finding just the right talent fit is key to their business growth and prosperity. Here at Greenway Group and DesignIntelligence we knit these and other strategic elements together so that data can be digested. Our goal is to improve the condition of those who come to us for knowledge.

We research the *Almanac* around the clock; we make lists and we rank firms. In Chapter 1, we rank the top 1,000 firms in North America. How do we dare do this? First, we're very careful and extremely thorough. We take similar strategic analysis methodologies that we have established through use with design competitions and awards programs for over 20 years. This first chapter contains an alphabetical listing of the top firms in North America. We provide data about the type of services firms offer, their size, and geography, as well as the market segments they work in. The DI Index is an organizing system that was formulated by the Greenway Group to provide categorical recognition that measures peer repute, business recognition, and public acclaim. Sure, it's an imperfect science, which is why we are so thorough. We search the media, read press releases, constantly

scan the internet, track awards programs, and observe firsthand many of the projects that are making the news. This system has five tiers and herein we publish the top three. In our work advising competitions and selections systems we use similar methodology, with a combination of intellectual thrust and down-home logic.

Then we publish our popular 333 rankings and more data and facts about resources and awards in design and architecture. You will see a richness of information beyond that delivered at any time in the past.

We invite you to challenge your most fundamental beliefs about rankings, competitions, value, time, action, and leadership!

Let us know what you would like to see in the future. We're committed to bringing new data to you in print and electronic forms and to do more of it. We have a vision to make this Almanac a toolbox for you that include lists, rankings, and understandings to lay claim to your future in the world of architecture, design, and real estate growth.

NORTH AMERICA'S TOP 1,000 ARCHITECTURE AND DESIGN FIRMS |

This chapter features an alphabetical listing of leading North American architecture and design firms with data about the type of services they offer; their size, headquarters, and geography; the market segments they work in; and metrics from the *DI Index*.

America's Leading Architecture & Design Firms 2014

This section of the *Almanac* features an alphabetical listing of leading North American design and engineering firms selected by the editors. Each year, *DesignIntelligence* polls architects and designers in North America regarding their firms' officers, firm size, primary services offered, market segments and geographical locations served, and the nature of their practices. The firms are invited to participate in additional research underwritten by the Design Futures Council, which includes surveys about trends and market shifts, compensation and fees, technology, mergers and acquisitions, and management strategies.

The key to interpreting the tables is featured below. Firm size, headquarters (HQ), firm type, and markets are determined by *DesignIntelligence* surveys or from record files. Although the concept of headquarters might be less normative than in the past, this convention is still often used for diagnostic purposes in many market-data studies. If your firm has no headquarters and we have listed one, please make sure to complete a survey next year at di.net. The list of services includes market segments and specific professional specializations. The DI Index was determined by survey responses, with further research conducted by *DesignIntelligence* and Greenway Group analysts. The criteria include geographic service coverage and reputation (awards as listed in the *Almanac of Architecture & Design* and recognition in professional and business publications). Of the five tiers, only firms in the top three (as represented by 3–5 stars) are included due to space considerations. Abbreviations were used in some firm names due to space constraints: architecture = Arch.; architects = Archts.; associates = Assoc.; construction = Const.; engineers = Engrs.

Principals of firms who want to be included in our next *Almanac* can obtain and/or fill in a survey at di.net; email the editor, Jane Wolford, at jwolford@di.net for a copy; or call *DesignIntelligence* at (678) 879-0929. Firms appearing in this *Almanac* can expect to receive a copy of next year's survey in the mail soon or can request a survey by contacting DI or the editor.

AVAILABLE SOON FROM GREENWAY COMMUNICATIONS

How Firms Succeed 3.0

The Next Generation of Professional Practice

Architecture and design are undergoing a radical transformation.

Global practice, sustainability, innovative delivery processes, and sophisticated technology are challenging everyone involved in the A/E/C industry to be both more creative and more efficient.

In *How Firms Succeed 3.0*, Jim Cramer and Scott Simpson show how design professionals can deliver extraordinary new value for their clients. Their model of the "Design Enterprise Cycle" offers a compelling vision of what lies ahead, with step-by-step advice on how to achieve extraordinary success in a time of rapid change.

This is an important read for everyone who has a stake in building a better, healthier, and more sustainable future.

DesignIntelligence 333 |

This chapter features a ranking of America's top 333 architecture firms, along with useful contact information and pertinent data.

DesignIntelligence 333

The *DesignIntelligence* 333 ranks the top 333 architecture and design firms in North America by revenue. To compile the most accurate and up-to-date information, firms throughout the United States and Canada were surveyed during the spring and summer of 2013. Under the direction of the editors, extensive research was conducted by the *Almanac* staff and the research staff of *DesignIntelligence* to compile a comprehensive geographically and demographically diverse group of firms that would qualify for inclusion. Professional associations, media lists, client organizations, and conference registrations of the Design Futures Council were also studied to determine the most active leading firms. The Greenway Group also researched additional media sources, such as leading professional and business publications read by clients in each of the areas of specialty.

The firms were mailed a letter inviting them to participate in the survey, along with a copy of the survey. The survey asked for information regarding their areas of specialty, employment counts, number of offices, fields of professional practice, 2012 gross professional fee revenues, leading officers of the firms, and other relevant information. The data collected was also used for the *Almanac's* Directory of North America's Top 1,000 Architecture & Design Firms.

Telephone calls and emails followed mailed surveys if additional information was needed. Each firm included in this *Almanac* was contacted a minimum of three times by mail, email, or telephone. When firms did not respond, estimates were made based on previous surveys completed by the firms for *DesignIntelligence*, listings in business media, Greenway's private research databases, reliable information on the Internet regarding employee counts, and other credible sources. At least three independent sources were used to estimate gross revenues when the firms did not supply these figures. Blank fields in the ranking section or missing profile information were due to the firm not returning its survey. The number of reported firm locations and actual locations may differ. Totals may not equal 100 percent due to rounding.

To fill out a survey for next year's *Almanac*, visit www.di.net/almanac, call *DesignIntelligence* at (678) 879-0929, or contact the editor at jwolford@di.net.

33 Understanding Change & the Change in Understanding

By Richard Saul Wurman

You might describe Richard Saul Wurman as a provocateur, a pioneer, a creative genius. Inspirational, innovative, larger-than-life ... legendary, even. Others have. But the most apt description of this singular individual — this architect, designer, creator of the celebrated TED Conference, and prolific author — is storyteller.

Springing to life from the mind of the world's original information architect is 33: Understanding Change & the Change in Understanding. A book that breaks out of any traditional (dare we say even rational) story-telling framework, 33 invites readers to journey through its pages as they will.

A fable re-imagined three decades after its original telling as a conference keynote address, 33 chronicles the adventures and musings of an eccentric (yet oddly familiar) character: the Commissioner of Curiosity and Imagination. This bemused, amused, and roundish imp waddles through the city of What-If in the land of Could-Be, trying to make sense of the myriad changes that have transpired in the past 33 years.

The story is presented in an ingenious, multi-layered format — “information upon information,” as the Commissioner himself might say — with the original fable at its core. Surrounding this is an updated tale as presented through 33 episodes and accompanying graphics.

THE OWNER'S DILEMMA

Driving Success and Innovation in the Design and Construction Industry

By BARBARA WHITE BRYSON and CANAN YETMAN

\$29.95 ISBN: 978-0-9840846-7-8

The design and construction industry is one of the most inefficient on the planet, wasting billions of dollars a year of public and private owners' money. Architects, engineers, builders, and developers have struggled in this environment for years.

But it is owners who can impact the industry most deliberately and aggressively. It is owners who can drive innovation on their projects and create profound change in the industry. In fact, it is owners who are uniquely positioned to innovate. By planning the design and delivery process, becoming team leaders, collaborating deeply throughout the industry, and applying key elements documented in *The Owner's Dilemma*, owners can summon meaningful and lasting change.

The Owner's Dilemma explores how best to use the power of the owner and how that power can recreate the building industry.

"The Owner's Dilemma asks us to understand that two things are crucial. First, that each of its five elements is considered individually and given equal weight and second, that the five elements are considered collectively and this collective thinking must be maintained throughout the entire project. If the individual keys are managed well, the collective group will clearly be successful."

BUILDING TYPES |

Listings of architecturally significant airports, aquariums, art museums, convention centers, and sports stadiums, with their requisite architectural statistics, are available in this chapter.

Airports: 1990–2013

Airports have evolved over the past century from small, utilitarian structures to sprawling multi-purpose complexes. Engineering challenges, the popularity of regional airlines, the need to accommodate larger jets, and expansion in Asia have resulted in the construction of countless new airport terminals since 1990. Many of those noteworthy for their architecture or engineering are listed in the following chart.

| Airport | Location | Architect | Opened |
|---|--|--|--------|
| Astana International Airport (KZT), Passenger Terminal | Astana, Kazakhstan | Kisho Kurokawa Architect & Associates (Japan) | 2005 |

Aquariums

The opening of Boston's New England Aquarium in 1969 ushered in a new age for aquariums, combining the traditional ideas found in the classic aquariums of the early 20th century with new technology and revised educational and research commitments. Aquariums have since proliferated. The following pages highlight the major free-standing aquariums in the United States.

| Aquarium | Location | Opened | Cost |

AWARDS, STATISTICS & RESOURCES

Top awards to firms and individuals are included in this chapter. Numerous vital statistics for professional reference are also contained herein.

(Note: Bolded text indicates additions to the existing list.)

AIA Gold Medal

The Gold Medal is the **American Institute of Architects' highest award**. Eligibility is open to architects and non-architects, living or dead, whose contribution to the field of architecture has made a lasting impact. The AIA's board of directors grants at least one gold medal each year, occasionally granting none.

SCUP/AIA-CAE Excellence in Planning, Landscape Architecture, and Architecture Awards

The Society for College and University Planning and the American Institute of Architects' Committee on Architecture for Education jointly present the annual Excellence in Planning, Landscape Architecture, and Architecture Awards to **outstanding projects developed for higher education institutions**. The jury considerations include the quality of the physical environment as well as the comprehensiveness of the planning process. The award is presented to all members of the project team.

Star Award

The International Interior Design Association's Star Award celebrates **individuals and organizations that have made extraordinary contributions to the interior design profession**. As the Star Award is merit-based, it is not necessarily granted each year. Although non-members are eligible, the IIDA board of directors (the selection body) only accepts nominations from IIDA fellows, chapter presidents, and directors.

Top Green Projects

The American Institute of Architects' Committee on the Environment annually selects the Top Green Projects to highlight **viable architectural design solutions that protect and enhance the environment**. Winning projects address significant environmental challenges, such as energy and water conservation, use of recycled materials, and improved indoor air quality. Responsible use of building materials, daylighting, efficient heating and cooling, and sensitivity to local environmental issues are some of the jury's considerations.

Twenty-five Year Award

The American Institute of Architects' Twenty-five Year Award celebrates **buildings that excel under the test of time**. Eligible projects must have been completed within the past 25 to 35 years by a licensed US architect, though the buildings may be located worldwide. Winning designs are still operating under the tenets of the original program, demonstrating continued viability in function and form, and contributing meaningfully to American life and architecture.

AIGA, the professional association for design

One of the oldest and largest membership associations for professionals engaged in visual communication and graphic design, AIGA, the professional association for design was founded in 1914 as the American Institute of Graphic Arts. Its more than 22,000 members include professional designers, educators, and students in traditional communication design fields, such as type and book design, as well as such newer disciplines as interaction design, experience design, and motion graphics. In addition, AIGA supports the interests of those involved in design in other disciplines, professions, and businesses who are committed to advancing the understanding of the value of design. AIGA serves as a hub of information and activity within the design community through conferences, competitions, exhibitions, publications, educational activities, and its website.

American Architectural Foundation

The American Architectural Foundation is a national nonprofit 501(c)(3) organization that educates individuals and communities about the power of architecture to transform lives and improve the places where we live, learn, work, and play. The AAF's programs include the Mayors' Institute on City Design and Great Schools by Design—highly regarded initiatives that help improve the built environment through the collaboration of thought leaders, designers, and local communities. Through its outreach programs, grants, exhibitions, and educational resources, the AAF helps people become thoughtful and engaged stewards of the world around them. The AAF is headquartered in The Octagon, an 1801 Federal-style home designed by William Thornton.

About the Editors

James P. Cramer is founder and chairman of the Greenway Group, a management consulting firm specializing in strategy, leadership, and organizational health. He is the author of three best-selling books on professional practice leadership and the founding editor and publisher of the journal *DesignIntelligence*. Along with Jonas Salk, M.D., he founded the Design Futures Council in 1994 in La Jolla, CA, and in Washington, DC, at the Smithsonian Institute. Each year Cramer and his colleagues at Greenway Group conduct research on the future of the design professions. They currently have ongoing research in the fields of design education, executive compensation, business trends & shifts, and professional services value migration. His work has been featured in *Business Week*, the *Wall Street Journal*, *Architectural Record*, National Public Radio and elsewhere. Cramer is the former Executive Vice President and CEO of the American Institute of Architects and the former President of the American Architectural Foundation. He served as group publisher of *Architecture* magazine for eight years. He is an honorary member of the AIA, an honorary member of the International Interior Design Association (IIDA), and a Leadership Fellow of the Western Behavioral Sciences Institute (WBSI) in La Jolla. He is a Senior Fellow of the Design Futures Council, a Richard Upjohn Fellow of the American Institute of Architects, and past board director of the Society of Architectural Historians.

Jane Paradise Wolford, Ph.D., is an architectural historian and the editor of the *Almanac of Architecture & Design*. She is also a senior consultant with Greenway Communications and an editor for the Ostberg Library of Design Management. Wolford has a doctorate in architectural history, theory, and criticism from the Georgia Institute of Technology as well as a Master of Science degree in architectural history from there. Her doctoral thesis established the theoretical and practical framework for architectural contextualism in its definitions and aspects of construction that enable buildings to relate better to each other and encourage a more sustainable, cohesively built environment. She is a LEED accredited professional. She also studied at Westmont College in Santa Barbara, CA, where she earned her bachelor's degree in English, and the University of California Berkeley, where she received her teaching credential. She and her husband, Arol Wolford, founded Construction Market Data in 1981, a leading international construction information service. She served on the board of the American Architectural Foundation and the Octagon Museum for more than a decade. In our constantly changing environment she is passionate about the potential of architecture to transform our world—into a better place that nurtures our physical and spiritual health and supports our endeavors.

östberg

Library of Design Management

Every relationship of value requires constant care and commitment. At Östberg, we are relentless in our desire to create and bring forward only the best ideas in design, architecture, interiors, and design management. Using diverse mediums of communications, including books and the Internet, we are constantly searching for thoughtful ideas that are erudite, witty, and of lasting importance to the quality of life. Inspired by the architecture of Ragnar Östberg and the best of Scandinavian design and civility, the Östberg Library of Design Management seeks to restore the passion for creativity that makes better products, spaces, and communities. The essence of Östberg can be summed up in our quality charter to you: "Communicating concepts of leadership and design excellence."
