THE THIRTY-NINTH STREET BUILDING

231-241 WEST THIRTY-NINTH STREET

NEW YORK

Ferroinclave

Plant of Aluminum Co. of America Niagara Falls, N. Y.

Q An unusually interesting form of construction. Note the four towers, each fifty feet square and one hundred feet high. It was necessary to have a material that was acid proof and that would not be affected by the enormous wind pressure.

Ferroinclave

was selected because of its all-round desirability. Our brochure tells all about Ferroinclave. Have you sent for it?

Brown Hoisting Machinery Co. Cleveland, Ohio

Ferroinclave

Indirect Heating.

Where a limited amount of space does not permit installing direct radiation, air-ducts passing fresh outside air over an AMERICAN Indirect Radiator and into the apartment, in the manner shown in the accompanying illustration frequently solve the problem.

AMERICAN Indirect Radiators are made in a broad range of patterns to meet widely varying conditions and architectural requirements.

RENAISSANCE DOORWAYS

AN ESPECIALLY
VALUABLE COLLECTION

Sent Carriage Prepaid on Receipt of the
Price, \$6.50

THIS portfolio constitutes one of the most practically valuable collections of illustrations ever suggested and recommended by the American Architect.

Renaissance Doorways is a portfolio made up of ten groups, totalling 109 illustrations, photographed from the original Italian subjects.

These portfolios are arranged as follows:

GROUP	CLASSIFICATION	EXPRESSION
ONE	Square Headed	Decorated Architecture
TWO	Square Headed	Lintel over Lintel
THREE	Square Headed	Triangle over Lintel
FOUR	Square Headed	Arc over Lintel
FIVE	Round Headed	Lintel over Arc
SIX	Round Headed	Triangle over Arc
SEVEN	Square Headed	Arc between Lintel
EIGHT		Canopied or Hooded
NINE	Round Headed	Arc over Arc
TEN		Dual Motive

This collection will be sent, carriage prepaid, upon receipt of the price, \$6.50. Bound in red cloth, gift top, \$7.50.

HY-RIB Sheathing

PARTITIONS

No studs or centering are necessary in solid partitions reinforced with *Hy-Rib Sheathing*. The *Hy-Rib* combines in a single sheet the ordinary lath and separate stud construction. Simply set up the sheet of *Hy-Rib*—plaster both sides—the wall is complete.

FURRING

For furring walls to make them damp-proof and moisture-proof, fasten the *Hy-Rib* against the wall, and plaster the lath surface. A perfect air space is secured back of the plaster without the use of any studs.

SUSPENDED CEILINGS

Hy-Rib does away with the small T's and channels ordinarily used to stiffen the lathing. Simply attach the *Hy-Rib* and plaster underneath.

Hy-Rib does away with all expense of wiring sheets of lath to separate studs. No centering is required when used in walls or floors. The ribs give the necessary strength and rigidity.

Hy-Rib Sheathing is low in first cost. Saves money in installation. Makes stronger and better walls. The ideal construction for roofs and sidings of Industrial Buildings and floors.

You should know *Hy-Rib* if you are planning any building work at all. Write to-day for Catalogues and Prices.

Also separate Catalogues describing other Kahn System Products, *Kahn Trussed Bar—Rib Metal—Rib Lath* and *Cup Bars*. Catalogues of Tests of Structures of every kind, and "Kahn System Standards," the best Handbook on Reinforced Concrete.

Full sized cross section of Slab or Wall reinforced with *Hy-Rib*. Note great rigidity and perfect surface for plastering.

TRUSSED CONCRETE STEEL COMPANY

DETROIT, MICHIGAN

OFFICES IN ALL PRINCIPAL CITIES

KAHN SYSTEM

This
Trade
Mark
Proves it

THIS trade mark on a pneumatic tank, proves that it is a Kewanee Pneumatic Tank. Any pneumatic tank which does **not** have this trade mark on it, is positively **not** a **Kewanee Tank**. We want every architect to know this, because some people are under the impression that any pneumatic tank is a Kewanee Tank.

There are imitations of Kewanee Pneumatic Tanks and of our complete water supply plants. To protect ourselves from imitators, we put this trade mark on every Kewanee Pneumatic Tank and our name appears on all pumping machinery which we furnish.

In ten or twenty years after the purchase of a Kewanee Pneumatic Tank, it will easily be recognized as a Kewanee Pneumatic Tank; and then, the Kewanee Water Supply Company will stand back of it and may be called upon to correct any deficiency.

The Kewanee System of Water Supply

is **not an imitation**—is **not a substitute**. It is the **original** water supply system which involves the use of **air pressure** instead of gravity pressure. Cheap imitation tanks and outfits almost invariably cause trouble and are very expensive in the long run. Kewanee Pneumatic Tanks and complete Kewanee Systems are guaranteed to give good service. Over 8,000 in successful operation.

Write for our illustrated catalog. Let us explain our plan for assisting Architects. Let us tell you about our guarantee; and when you have a water supply problem, let us solve it for you. Please mention "AMERICAN ARCHITECT."

Kewanee Water Supply Company

Kewanee, - - Illinois.

820 Marquette Bldg., Chicago, Ill.

1566 Hudson-Terminal Bldg.,

50 Church St., New York City.

710 Diamond Bank Bldg., Pittsburg.

This is our No. 11 Kewanee System which includes a Kewanee Pneumatic Tank with automatic attachments and hand pump. We also furnish Kewanee Systems with gasoline engines, electric motors, hot air engines and windmills.

COMPLETE "FENESTRA" WINDOW "Patented"

DETROIT "FENESTRA"

WROUGHT STEEL WINDOW SASH

A Fireproof Window

A Strong Window

An Inexpensive Window

FOR

FACTORIES
POWER HOUSES
WAREHOUSES
PUBLIC BUILDINGS
INSTITUTIONS
JAILS, etc., etc., etc.

DETROIT FENESTRA SASH is manufactured from special rolled steel section, and is preferable to any other metal sash on the market for the certain class of substantial construction heretofore mentioned. Its cost is much below that of other metal sash, while its strength and durability is readily appreciated.

It can be made to fit any opening, large or small, and to withstand wind pressure up to 16' x 20' without reinforcement. Expensive frames are done away with, and more light area is obtained from the given opening.

The sash with all its strength has a light and slightly appearance; it can be divided into various sizes of panes, from the smallest to the large paned, say 20 x 30 inches, if desirable.

In basement windows of city houses the sash becomes a steel grating, giving protection from thieves and burglars, and nothing to interfere with washing.

For use in institutions and insane asylums, its combined value as a grating, without the apparent visible effect, can be at once understood.

In paper mills, soda ash works and other similar plants where chemical action or dampness destroys sheet metal and wood, the *Detroit Fenestra Sash* are being used to replace.

We invite correspondence, and if encouraged will gladly send an expert to consult. *Write to us to-day.*

Fig. 1.

Fig. 2.

Fig. 3.

Fig. 4.

THE "FENESTRA" JOINT

In the "Fenestra" joint, as can be seen above, a small cross slot is made in one of the bars (Fig. 2), only sufficiently large to allow the flange of the other bar (Fig. 1) to pass through it. The moulded portion of the bar (Fig. 2) is then hydraulically pressed out far enough to allow of the moulded portion of the other bar (Fig. 1) to pass between it and its flange.

The inserted bar (Fig. 1) is only cut in one place, a small nick being made to allow of its being locked in position.

NOTHING IS LEFT TO THE IMAGINATION

Every feature of the "Never-Split" Closet Seat is shown with distinctness so that you will receive fully as favorable an impression from our advertising and catalogue as though the seats themselves were sent to you for inspection.

This is the underside of the "NEVER-SPLIT" Seat as it appears with bolts tightened. The next step is the filling of the eight mortise holes with a composition matching the color of the wood and which sets as hard as rock.

split or come apart at the joints a hair's breadth. Specify "Never-Split" Seats and run absolutely no risk.

Specification requirements may be obtained from page 8 of our Catalogue "C." Please make requisition by Post Card.

The result is an absolutely perfect understanding of the various styles and qualities of finish and the distinction between the lasting qualities of the "Never-Split" Seat as compared with the ordinary kind.

Those who have had experience with the "Never-Split" Seat will not enter any other closet seat into the construction of any building.

"Never-Split" Closet Seats are *built*, bolts inserted, and finished by skilled hands and are positively guaranteed to Architect, Building Contractor, Plumber and Owner for five years, not to

NEVER-SPLIT SEAT COMPANY

EVANSVILLE, INDIANA

Tanks

WE make a specialty of the design and construction of steel tanks for fire protection and general service. Our elevated tanks give a positive direct supply of water under pressure which is independent of the operation of any machinery to maintain the pressure until the tank is entirely empty.

The structure illustrated is built entirely of steel, including the ornamental features. Erected at Roslyn, L. I., on the estate of Mr. Benjamin Stern. Capacity 50,000 gallons, height 84 feet. Schickel & Ditmars, Architects.

Economy in Fireproofing

Terra Cotta Hollow Tile is being so universally considered and used as a fireproof covering for protecting the structural members of a building, that its own strength and adaptability for structural uses has been largely overlooked.

For instance, we are constantly demonstrating that Hollow Tile combined with other structural materials in such a manner as to secure the full strength of the tile, not only produces a better fireproof construction but does so **at a less cost**, than can be attained by the use of any other materials.

Send us your plans where fireproof construction is specified, and let us show you how these results are secured.

You will probably be surprised to see how favorably our figures compare with the cost of using other material which **does not** give as efficient fire protection.

"RICHARDSON" BOILERS

For Steam and Water

"Perfect" Furnaces

"Perfect" Ranges

Specified by Leading Architects

RICHARDSON & BOYNTON

234 Water St., New York
CHICAGO BOSTON

THE REASON WHY

so many leading architects are specifying **KEWANEER** Boilers is, that they recognize the good points about them that make them best when cold weather comes.

KEWANEER Boilers don't give out at a time when they are most needed.

They take care of the radiation attached with ease; they are designed so that the surfaces are most efficient—all fire surface. They burn a minimum amount of fuel of almost any kind.

They are constructed of the best material and with a mechanical skill and exactness that can only be acquired by long experience.

They have to be fed, otherwise they take care of themselves.

In other words:—

KEWANEER Boilers are Durable, Economical, Safe and easily taken care of.

KEWANEER Boilers are rated conservatively. Deduct from 15 to 20 per cent. for mains and risers, then load them to the limit. They will do the work. Don't specify "a size larger" **KEWANEER**, it's unnecessary.

KEWANEER Boilers make pleased and grateful clients. That's **THE REASON WHY**.

Always have a **KEWANEER** catalogue on your desk. Get it from **THE BUSY SHOP**.

What Typewriter Paper Do You Use?

Have you ever considered the use of a finely made, distinctive paper apart from the pleasure there is in handling it and writing upon it?

Any letter that carries a hope ought to be on paper that wins a welcome, and will make friends with the reader's eyes and his sense of quality.

Specifications and documents of any nature need, further, a paper that will stand plenty of usage and hold its strength and color indefinitely.

The great majority of professional men will thoroughly appreciate Old Hampshire Bond Typewriter Paper. It is sold by the best stationers. A specimen book will be mailed upon request.

Hampshire Paper Company, South Hadley Falls, Mass
