

## Today's News - December 1, 2004

Architecture for Humanity does its part for World AIDS Day today. – The gloves are coming off in battle to save Cambridge department of architecture. – Does Rio really need a Guggenheim (worse: not even designed by a Brazilian)? – Sustainability standards rise in cohousing and low-cost adobe abodes. – Foster's music center in Gateshead uncharacteristically bulges and billows and "cries out for attention." – Neighbors lose out in battle against big dorm plans in Chicago. – A corner in San Francisco becomes more comfortable. – The Office of Subversive Architecture takes on the Thames Gateway (sort of). – Experts chime in with their favorite American building (includes poll to log in your favorite, too). – Expansion plans built in original Colorado Convention Center. – U.S. embassy architecture explored in a book and documentary. – Two items we couldn't resist: a report from Spain taken from pay-per-view South China Morning Post says Gehry wants to move back to Toronto, and a fantasy house-for-sale ad for his Santa Monica digs (our thanks to subscribers for sending us the links!).
