ANNUAL EQUIPMENT DIRECTORY

Bound into the January issue each year is a comprehensive 200-page directory of construction equipment manufacturers and their distributors in the 13 Western states.

The Manufacturers' Section lists equipment makers alphabetically, showing products made, Western branch offices, key Western personnel, and distributors in the 13 Western states.

The Distributors' Section lists distributors alphabetically by state and city, giving names of key company men, and all lines handled.

The Products Section shows what companies make each type of equipment. Finally, is an alphabetical list of trade names, giving the corresponding manufacturers.

The annual directory is completely rewritten and brought up-to-date each year.

"If everyone is here, we'll proceed with the corporate earnings report."

"You needn't worry about being replaced by a machine, Fenton. They haven't yet invented one that does absolutely nothing."
